THE BOY'S BRIGADE. (Incorporated.)

The senior boys' organisation; founded in 1883 by the late Sir William A. Smith. The object of the Brigade is attained by a combination of discipline and religious training. Every Company is connected with a Church or other Christian body. The total strength is 70,000 officers and boys. *Sec.*, R. S. Peacock, 34 Paternoster Row, E.C. 4.

CHURCH LADS' BRIGADE.

An organisation especially valuable for helping a parish to keep the elder lads to their religious duties; was founded in 1891, and combines a military method with moral and religious instruction. It is estimated that 1,000,000 lads have had the advantage of the Brigade's training, and to-day there are 1,278 Companies throughout the Empire, with upwards of 60,000 lads.—*Headquarters*, Aldwych House, Catherine Street, W.C.2. *Chaplain-General and Secretary*, Rev. Edgar Rogers, O.B.E., M.A.

BOY SCOUTS. (Incorporated.)

A Movement initiated and organised by Sir Robert Baden-Powell, G.C.V.O., K.C.B., Chief Scout, to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance; inculcating loyalty and thoughtfulness for others; teaching them services useful to the public and handicrafts useful to themselves, and promoting their physical development and hygiene.

The Movement (whose membership approximates 2,000,000) has taken root in all parts of the British Empire, and nearly every other country has adopted it.—*Imperial Headquarters*, 25 Buckingham Palace Road, S.W. 1.

THE GIRL GUIDE ASSOCIATION.

A movement founded by Sir Robert Baden-Powell, Chief Scout, in the year 1910, on the lines of the Boy Scouts and incorporated by Charter in 1915, while in the year 1923 H.M. the King granted the Movement a Royal Charter. Its aim is to develop good citizenship amongst girls by forming their character, training them in habits of observation, obedience, and self-reliance; inculcating loyalty and thoughtfulness for others, and teaching them services useful to the public and handicrafts useful to themselves. It also seeks to promote their physical development, making them capable of keeping good homes and of bringing up good children. Its desire is to co-operate with educational and other bodies working to this end. The membership of the Movement now numbers over 615,000 all over the world, that of the British Isles alone being over 370,000. *Imperial Headquarters*, 25 Buckingham Palace Road, London, S.W. 1.

LUNACY.

ON Jan. 1, 1923, the number of notified insane persons under care in England and Wales was 136,279, an increase of 2,565 since Jan. 1, 1922. The relative percentage distribution of the sexes (males 43·8; females 56·2) shows a slight reversion towards the proportions which obtained immediately prior to the Great War (males 46·2; females 53·8). The average weekly cost of maintenance was :—

ASSOCIATION OF HEAD MISTRESSES.—Head mistresses of Public Secondary Schools with at least 50 pupils are eligible for membership. Members are marked § in the preceding lists. A Conference is held annually in June. *President* (1925-27), Miss Sparks, M.A., Ladies College, Cheltenham. *Secretary*, Miss R. Young, 29 Gordon Square, W.C. 1.

SCHOLASTIC ASSOCIATIONS.

THE HEAD MASTERS' CONFERENCE (*Secy.*, W. A. Bulkeley-Evans, C.B.E., M.A., 5 Paper Buildings, Temple, E.C. 4.).—The object of the Conference is the discussion of educational questions which affect such schools as are in close connection with the Universities of Oxford and Cambridge. In considering what Schools shall be included in the List, or removed from it, the Committee will have regard to the Scheme or other Instrument under which the School is administered, the numbers in the School and, in the case of Schools in Great Britain and Ireland, the number of resident Undergraduates of Oxford and Cambridge educated at the School. The Committee may also take into account the proportion of boys in the School, who, having passed the School Certificate or other equivalent Examination, are continuing their studies beyond that stage. The annual meetings are, as a rule, held in December, alternately (*a*) at some school represented on the Conference, (*b*) at London or some University town.

THE INCORPORATED ASSOCIATION OF HEAD MASTERS, 29 Gordon Square, W.C. 1. (*President* (1926), W. Ewart McClure, M.Sc. *Joint Hon. Secs.*, W. Jenkyn Thomas, M.A.; F. R. KING EDWARD VII'S HOSPITAL FOR OFFICERS, 17 Grosvenor Crescent, S.W. 1.

KING EDWARD'S HOSPITAL FUND FOR LONDON, 7 Walbrook, E.C. 4.—Was inaugurated in 1897 to secure more efficient support for the hospitals of London and so to commemorate the 60th anniversary of the accession of Queen Victoria. The Fund not only collects money for the voluntary hospitals, but helps to promote efficiency by means of its annual grants, every individual claim being carefully considered on its merits. Efforts are also made by various forms of propaganda to arouse and maintain a wider interest in the work of the hospitals generally. Total receipts, 1925, £413,873; expenses, £10,421; grants to hospitals and convalescent homes, £302,000 (including £57,000 for extensions, &c., from Wells legacies); funds in hand (including gifts to capital), £3,523,156.—*Pres.*, H.R.H. CONSUMPTION AND CHEST DISEASES.

The number of deaths from tuberculosis in the United Kingdom and the rate per 100,000 of the population for each year since 1915 were as follows:—

Year.	Deaths.	Rate per 100,000.
1915	54,295	151·5
1916	53,858	152·9
1917	55,934	162·4
1918	58,073	169·4
1919	46,312	125·8
1920	42,545	112·8

The fall in the rate of 56·6 per 100,000 between 1918 and 1920 is attributable partly to the cessation of the War and consequent better living conditions, and partly to the valuable work done by Local Government Authorities. The increase of facilities for the treatment since 1912 is as follows:—

Year.	No. of beds in public institutions.	Dispensaries.
1912	1,500	8
1918	6,749	375
1921	9,879	470

At the same time the beds in voluntary institutions increased from 2,800 in 1912 to 7,568 in 1921, a total increase of beds from 4,300 in 1912 to 17,447 in 1921.

Sutton, C.B., C.M.G.

COLLEGE OF ARMS OR HERALDS' COLLEGE (*see also* p. 181), Queen Victoria Street, E.C. 4.—The Royal "Officers of Arms" ("Kings, Heralds and Pursuivants of Arms") were incorporated by Richard III., and acquired "Derby House" on the site of the present College building from Queen Mary I. The building now in use was rebuilt after the Fire of London. The Powers vested by the Crown in the Earl Marshal (The Duke of Norfolk) with regard to all State ceremonial, and the granting and use of Armorial Bearings, are exercised by this College. Enquiry may be made to the Officer on duty in the Public Office every day between 10 a.m. and 4 p.m.

COUNTY HALL, Westminster Bridge S.E. 1.—The Headquarters of the London County Council (*see* pp. 545–548) built on the Pedlar's Acre, Lambeth, from the designs of Ralph Knott, with a river façade of 700 ft. Cost £3,239,293. The building contains a council chamber, reception hall, &c.

CUSTOM HOUSE, Lower Thames Street, E.C. 3.—Built early in 19th century, with a wide quay on Thames. The *Long Room* is 190 ft. long.

DEAN WACE HOUSE, 7 Wine Office Court, E.C. 4.

DEVONSHIRE HOUSE, Bishopsgate, E.C. 2.—Built in late 16th century, and since 1667 the headquarters of the Society of Friends, where many documents relating to William Penn, &c., may be seen.

DOWNING STREET, Whitehall, S.W. 1.—Named after a politician of Charles II.'s reign. No. 10 is the official town residence of the Prime Minister, No. 11 of the Chancellor of the Exchequer, and No. 12 is the office of the Government Whips.

ELY PLACE, Holborn Circus, E.C. 1.—The site of the London house of former Bishops of Ely. The 14th century chapel, now St. Etheldreda's (R.C.) Church, is open daily until dusk; a charge of 3*d.* is made for admission to the crypt.

EMPIRE MEMORIAL HOSTEL (British and Foreign Sailors Society), 747 Commercial Road Poplar, E. 14.—A memorial erected by the women of the Empire to men of both sea services who lost their lives in the service of their country. The hostel contains 220 beds, a restaurant and recreation-rooms. Open daily, incl. Sunday, free; night porter in attendance.

FOUNDLING HOSPITAL, Guilford Street, Russell Square, W.C. 1.—Founded in 1739 by Capt. Coram, of the Merchant Marine, for exposed and deserted young illegitimate children. Coram also bequeathed funds for the benefit of King's Chapel, Boston, Mass. The chapel services are largely attended by the public. The hall contains many fine pictures by Hogarth, Gainsborough, &c.

FULHAM PALACE, Bishop's Avenue, Fulham, S.W. 6.—The courtyard is 15th century, remainder 18th century. Residence of the Bishop of London. Grounds of 37 acres, surrounded by ancient moat. Previous application to visit should be made to the Bishop's Secretary.

GUILDHALL, King Street, City, E.C. 2 (dating from early 15th century).—Grand Civic Hall, where Sovereigns and Princes are entertained, Freedoms conferred, and the great City functions take place; Offices and Council Chamber of the Corporation of the City of London (*see* p. 540). Admission free to Library (containing Plan of London in 1570; Deed of Sale with Shakespeare's signature; first, second and fourth folios of Shakespeare's plays; William I.'s Charter to the City, &c.), and Newspaper Room, 10 a.m. to 6 p.m. *Librarian*, J. L. Douthwaite.

GUY'S HOSPITAL, St. Thomas's Street, S.E. 1.—Founded by Thomas Guy (a bookseller), in 1721: the main entrance and quadrangle (with statue of founder) are early 18th century. 650 beds.

HOLBORN VIADUCT, E.C. 1, was constructed in 1867–1869 by order of the Corporation of the City of London from the designs of William Haywood, to carry the roadway over the valley of the Fleet river (the "Hole-bourne"). The Holborn Valley Viaduct is 1,400 ft. long, and is mainly of iron construction. The cost (£1,571,000) was borne by the City of London, the loan raised for the purposes of the improvement being secured on the Coal and Corn dues; these dues were abolished in 1889 and 1902, and the loan is otherwise discharged.

HONOURABLE ARTILLERY COMPANY'S HEADQUARTERS, City Road, E.C. 1.—The H.A.C. (*Sec.*, Maj. G. G. Walker, D.S.O, M.C.) received its charter of incorporation from Henry VIII. in 1537, and has occupied its present ground since 1642. Four of its members—Duncan, Keayne, Sedgwick, and Spencer—who emigrated in the seventeenth century, founded in 1638 the Ancient and Honorable Artillery Company of Boston, U.S.A. American soldiers and sailors may view the armoury, on request.

HORSE GUARDS, Whitehall, S.W. 1.—Archway and offices built about 1750. The headquarters of the Commander-in-Chief until 1904. The mounting of the guard (1st or 2nd Life Guards, or Royal Horse Guards) at 11 a.m. (10 a.m. on Sundays) and the dismounting at 4 p.m. are picturesque ceremonies. Only those on the Lord Chamberlain's list may drive through the gates and archway into Horse Guards' Parade. *Horse Guards' Parade*, where the Colour is "trooped" on the King's Birthday, has been enlarged to 300,000 sq. ft. (Trafalgar Square is 168,850 sq. ft.; Parliament Square, 136,900 sq. ft.; Leicester Square, 100,000 sq. ft.).

HOUSES OF PARLIAMENT, Westminster, S.W. 1.—The "Palace of Westminster" was rebuilt in 1840–1850 from the designs of Sir Charles Barry and Augustus Pugin, at a cost of £2,198,000.—Open to visitors on Saturdays, and on Easter and Whit Mondays and Tuesdays, if neither House be sitting. Admission at the Norman Porch, House of Lords, on the above-mentioned days, from 10 a.m. to 3.30 p.m. Admission to the Strangers' Gallery of the House of Commons, during session, by member's order, or order obtained on personal application at the Admission Order Office in St. Stephen's Hall. The Victoria Tower (House of Lords) is 336 ft. high, and when Parliament is sitting the Union Jack flies by day from its flagstaff. The Clock Tower of the House of Commons is 320 ft. high and contains "Big Ben" (15½ tons), named after Sir Benjamin Hall, First Commissioner of Works when it was hung in 1856. A light is displayed from this tower when Parliament is sitting.

INNS OF COURT.—The *Inner* and *Middle Temple*, S. of Fleet Street, E.C. 4, and N. of Victoria Embankment, to which the gardens extend, occupy (since early 14th century) the site of the buildings of the Order of Knights Templars, the *Temple Church* (*q.v.*) surviving. Middle Temple Hall is Elizabethan, and in Middle Temple Gardens Shakespeare (Henry VI., Pt. I.) places the incident which led to the "Wars of the Roses" (1455–1485). *Lincoln's Inn*, from Chancery Lane to Lincoln's Inn Fields, W.C. 2, occupies the site of the palace of a former Bishop of Chichester and of a Black Friars monastery. It was founded early in the 14th century. The new Hall is modern, the Library is 15th century, and the old Hall early 16th century, the Chapel (Inigo Jones) early 17th century. *Lincoln's Inn Fields* (7 acres); the Square contains many fine old houses with handsome interiors. *Gray's Inn*, Gray's Inn Road, W.C. 1, was founded in late 14th century. The Hall is 16th century (the "Comedy of Errors" was performed there in 1594); the Gardens were laid out (according to tradition) by Lord Chancellor Bacon (died 1626). No other "Inns" are active, but *Staple Inn* is worth visiting as a relic of Elizabethan London; it has a picturesque gabled front on Holborn (opposite Gray's Inn Road), and the Hall, with hammer beam roof, is intact; in rear of the hall is a picturesque Dutch garden, restored by the present owners of Staple Inn (the Prudential Assurance Company). *Clement's Inn* (near St. Clement Dane's Church); *Clifford's Inn*, Fleet Street and *Thavies Inn*, Holborn Circus. *Serjeants' Inn*, Fleet Street, and another (now demolished) of the same name in Chancery Lane, were composed of Serjeants-at-Law, the last of whom died in 1899.

KENSINGTON PALACE, W. 8.—Enlarged by Christopher Wren for King William III. (1691), and continued as a royal residence until 1760. The birthplace of Queen Victoria in 1819. Open on Sundays, 2 to 6; winter 2 to 4. *Kensington Gardens* (*q.v.*) adjoin.

LAMBETH PALACE, S.E. 1.—The official residence of the Archbishop of Canterbury, on south bank of Thames; the oldest part is 13th century, the house itself is early 19th century. For leave to visit the historical portions, applications should be made by letter to the Archbishop's Secretary.

LAW COURTS, Strand, W.C. 2.—The Royal Courts of Justice were erected from the designs of G. E. Street (completed by Sir A. Blomfield and A. E. Street) in 1874–1882 at a cost of £1,000,000 (the site cost £1,500,000 in addition). Until they were occupied by the Supreme Court of Judicature (established in 1873 by the fusion of High Court, Chancery, Queen's Bench, Common Pleas, Exchequer, Probate, Divorce, and Admiralty) the Courts met in Westminster Hall (*q.v.*). The Central Hall is 238 ft. long.

LITTLE BRITAIN, Smithfield, E.C. 1.—Benjamin Franklin lived in Little Britain on his first coming to London. It was then a centre of the bookselling and printing trade, and Franklin is reputed to have set type in the works which extended into the Lady Chapel of St. Bartholomew's Church (*q.v.*).

LIVERY COMPANIES' HALLS.—The "Twelve Great Companies" (*see* p. 543) have magnificent halls, but admission to view them has generally to be arranged beforehand.

LONDON HOSPITAL, Whitechapel High Street and Road, E. 1.—Founded 1759. Hospital contains 930 beds.

LONDON MONUMENT (commonly called "The Monument"), Pudding Lane, Eastcheap, E.C. 3.—Built from designs of Wren, 1671–1677, to commemorate the *Great Fire of London*, which broke out in Pudding Lane, Sept. 2, 1666. The fluted Doric column is 202 feet high (the flames of fire 42 feet in addition), and is based on a square plinth, with fine carvings on W. face. Splendid views of London from gallery at top of column. Admission 3d., 9 to 6 (Oct.–April to 4).

LORD'S CRICKET GROUND, St. John's Wood Road, N.W. 8.—The headquarters (since 1814) of the Marylebone Cricket Club, the premier cricket club in England and the governing body of cricket. Oxford and Cambridge, and Eton and Harrow matches in July. Lord's is also the Middlesex County Cricket Club headquarters, and the scene of some of the principal matches of the season. Admission to ordinary matches 2s., to special matches 3s. or 5s. (including tax). Tennis Court in building behind members' pavilion, where interesting games are played. The public can obtain reserved seats on payment.

MANSION HOUSE, City, E.C. 4.—The official residence of the Lord Mayor; the Egyptian Hall and Ballroom are the chief attractions. Admission by order from the Lord Mayor's Secretary.

MARKETS.—The London markets (administered by the Corporation of the City of London) provide foodstuffs for 8,500,000 to 9,000,000 people. The dead meat market at Smithfield is the largest in the world, the supplies marketed amounting to nearly 500,000 tons annually. *Central Meat, Fish, Fruit, Vegetable, and Poultry Markets*, Smithfield; *Leadenhall Market* (Meat and Poultry); *Billingsgate* (Fish), Thames Street; *Spitalfields*, E. 1 (Vegetables, Fruit, &c.); *Cattle Market* (Mon. and Th.; and Fri. for Horses) *and Abat-*

toirs, Caledonian Road, N. 1; *Foreign Cattle Market*, Deptford (temporarily closed). Other markets are—*Covent Garden*, W.C. 2. (established under a charter of Charles II. in 1661) and *Borough Market*, S.E. 1, for Vegetables, Fruit, Flowers, &c.

MARLBOROUGH HOUSE, Pall Mall, S.W. 1. (Not open to the public).—Built by Wren for the great Duke of Marlborough about 1710, and purchased as a London residence for the Prince of Wales in 1863. To become the London house of the present Prince of Wales in 1927.

MAYFAIR.—A fashionable district of London, north of Buckingham Palace and east of Hyde Park, extends from Oxford Street (N.) to Piccadilly (S.), and from Bond Street (E.) to Park Lane (W.), includes Curzon Street and Grosvenor and Berkeley Squares. The most fashionable shopping centres of London are included in Mayfair in Old and New *Bond Street* and *Oxford Street*. *Regent Street* almost adjoins Mayfair.

PORT OF LONDON.—The administration of the Port of London is under the "Port of London Authority" (*see* p. 210) whose offices adjoin Trinity House, Tower Hill, and extend to Crutched Friars. The offices were designed "on a really grand scale" by Sir Edwin Cooper; the square building of Portland stone has a façade facing the estuary and is surmounted by a "temple of Neptune." The *River Thames* has a total length of 210 miles from its source in Gloucestershire to its mouth at the Nore. The *tidal portion* below Teddington Lock (70 miles) forms the *Port of London*, where one-third of the commerce of the United Kingdom is carried on. The value of the trade of the port was stated at £564,333,772 for 1922, and at £579,095,502 for 1923. The Port is served by the following Docks:—*St. Katherine's Dock*, E. 1 (23 acres), handling marine shells, spices, tea, marble, &c.; *London Docks* with Eastern Dock and Shadwell Basin, Wapping, E. 1 (100 acres), ivory, spices, rubber, wine, wool, tinned goods, &c.; *Surrey Commercial Docks*, Rotherhithe, S.E. 16 (380 acres), timber, grain and Canadian produce; *West India Docks*, E. 14 (241 acres), rum, sugar, grain, timber and frozen meat; *Millwall Docks*, Poplar, E. 14 (231 acres), the principal centre of the grain trade of London; *East India Docks*, Poplar, E. 14 (68 acres), Cape and American traffic; *Royal Victoria and Albert Docks*, E. 16 (1,100 acres), frozen meat, grain and tobacco; *King George V.*, North Woolwich, E. 16, opened in 1921 (68 acres), provides accommodation for the largest steamers afloat. *Tilbury Docks* (596 acres), about 26 miles below London Bridge, for Australasian and Eastern routes.

POST OFFICE.—The "General Post Office" is in King Edward Street, E.C. 1, a handsomely-fronted, ferro-concrete building (Tanner), with marble inlaid hall, opened in 1910. The public Hall is open for usual postal business from 6.45 a.m. to 9 p.m. (Sat. 8 p.m.). In the neighbourhood are G.P.O. North and G.P.O. West (the Central Telegraph Office).

PRINCE HENRY'S ROOM, 17, Fleet Street, E.C. 4 (bought by the L.C.C. in 1900, and open free 10 to 4 or 5) is in a timbered 17th century house, and contains a Jacobean plaster ceiling and Jacobean and Georgian panelling. (Available for lettings—Apply Architect, County Hall, S.E. 1.)

ROMAN LONDON.—Traces of the Roman occupation of London from the 1st century B.C. to the 5th century A.D. may still be seen *in situ*. There are remains of Roman baths at No. 5 Strand Lane, Strand, W.C. 2, and at the Coal Exchange, Lower Thames Street, E.C. 3. Portions of the Roman Wall which encircled London are still visible, including a bastion below the pavement of the yard of the General Post Office (fronting Giltspur Street). Other pieces of the wall may be seen in the disused churchyard of St. Alphage, Aldermanbury, E.C. 2; in the churchyard of All Hallows on the Wall, London Wall, E.C. 2; in Roman Wall House, Jewry Street and Crutched Friars, Aldgate, E.C. 3; below Leadenhall Market; and near the S.E. corner of the White Tower of the Tower of London; a small portion of Roman brickwork was uncovered in March, 1922, on a

site adjoining St. Peter's, Cornhill, E.C. 3. Many relics of Roman London may be seen in the Guildhall, British and London Museums (*q.v.*).

ROYAL EXCHANGE, Cornhill, E.C. 3, founded by Sir Thomas Gresham, 1566, opened by Queen Elizabeth 1571, rebuilt 1667–9 and 1842–1844).—Admission free. Statues of Queen Elizabeth, Charles II., Queen Victoria, Sir Thomas Gresham, Wellington (Chantrey), riding without stirrups, Peabody, and others; frescoes in the ambulatory by Leighton, Abbey, Brangwyn, Wyllie, and others. Change, the busy time from 3 to 4 p.m. The chimes of the Royal Exchange (re-cast 1921) play English, Scottish and Irish melodies at 9 a.m., 12 noon, and 3 and 6 p.m.

ROYAL GEOGRAPHICAL SOCIETY, Kensington Gore, S.W. 7.—Map Room open to public, *free*.

ROYAL MINT, Tower Hill, E.C. 1 (building erected 1810), where gold, silver, and bronze are coined. Admission by order only, application for which should be made to the Deputy Master of the Mint, about 4 weeks in advance of intended visit. Hours of admission, 10 to 3 Mon. to Fri., 10 to 11 Sat.

ST. BARTHOLOMEW'S HOSPITAL, Smithfield, E.C. 1.—Founded A.D. 1123 by Rahere (*see* St. Bartholomew's Priory, p. 295). Present buildings mainly 18th and 19th centuries; main entrance 1702. The Great Hall contains a series of portraits including Henry VIII., Harvey, Abernethy, Pott, Radcliffe, &c. Hospital for 760 beds. The Church of St. Bartholomew the Less (rebuilt 1823) is within the hospital precincts; Inigo Jones was baptised in former church.

ST. GEORGE'S HOSPITAL, Hyde Park Corner, W. 1.—Founded in 1733. Hospital for 340 beds. Present buildings date from 1829.

ST. JAMES'S PALACE, in Pall Mall, S.W. 1.—(Not open to the public). Built by Henry VIII. (according to tradition, from designs by Holbein); the Gatehouse and Presence Chamber remain, and part of the Chapel Royal. A royal residence from 1698 to 1837. *Royal Levées* held here during the season. Representatives of Foreign Powers are still accredited "to the Court of St. James's," and (by the King's permission) the Conference of the Allies was held there in February, 1921.

ST. JOHN'S GATE, Clerkenwell, E.C. 1.—Now the Chancery of the Order of St. John of Jerusalem, and formerly the gate of the Prioryof that Order, of which the gate house (early 16th century) and choir of Church (crypt 12th century) alone survive. The gatehouse may be inspected by written permission of the Secretary of the Chancery.

ST. THOMAS'S HOSPITAL, Albert Embankment, S.E. 1.—Founded 1213. Present buildings (7 red brick houses) by Currey, 1868–71. 1,000 beds.

SMITHFIELD, E.C. 1.—Sir William Wallace was executed there (1305) in the reign of Edward I., and Wat Tyler was "despatched" by Lord Mayor* Walworth (1381) in the reign of Richard II. Anne Askew, a Protestant martyr (1546), was burned there in the reign of Henry VIII.; and under Mary I. (1553–1558) many suffered there for the Protestant faith. (A memorial is affixed to the W. wall of St. Bartholomew's Hospital.) The last to suffer for religion at Smithfield was Bartholomew Leggatt, Unitarian (1612), in the reign of James I. At the corner of Cock Lane (W. side of West Smithfield) is a small gilt figure commemorating the spot where the Fire of London was finally checked by the demolition of houses, Sept. 6, 1666. Smithfield Market occupies the W. side of West Smithfield.

SOMERSET HOUSE, Strand, W.C. 2, and Victoria Embankment, W.C. 2.—The beautiful river façade (600 feet long) was built at the close of the 18th century from the designs of Sir W. Chambers; the remainder of the building is early 19th century. Somerset House was the property of Lord Protector Somerset, at whose attainder in 1552 the palace passed to the Crown, and it was a royal residence until about the close of the 17th century. The building is now occupied by the *Board of Inland Revenue* and by the *Principal Probate Registry* and the office of the Registrar-General of *Births, Marriages and Deaths*. In the Probate Registry (Central Hall) are the wills (*inter alia*) of Shakespeare, Milton, Newton, Van Dyck, Pitt, Dr. Johnson, Nelson, Wellington and Burke.

STOCK EXCHANGE, E.C. 2. (Strangers not admitted).—Known in the City as the "House," was founded in 1773 and now consists of about 3,900 members. A "jobber" does business only with other members; a "broker" is the intermediary with the public. Speculators for a rise in prices are "bulls"; those for a fall are "bears." *Chairman of the Committee for General Purposes*, Archibald H. Campbell; *Secretary, General Purposes Committee*, Edward Satterthwaite, C.B.; *Secretary, Trustees and Managers*, R. M. Brydone; *Office*, 23, Throgmorton St., E.C. 2.

THAMES EMBANKMENTS.—The Victoria Embankment, on the N. side (from Westminster to Blackfriars), was constructed by Bazalgette for the Metropolitan Board of Works, 1860–1870 (the seats, of which the supports of some are a kneeling camel, laden with spicery, and of others a winged sphinx, were presented by the Grocers' Company, and by Rt. Hon. W. H. Smith, M.P., in 1874); the Westminster to Vauxhall section, on the S. (Surrey) side, 1860–1869; the Chelsea Embankment, 1871–1874. The total cost exceeded £2,000,000. Sir Joseph William Bazalgette (1819–1891) also constructed the London main drainage system, 1858–1865, at a cost of £4,600,000. A medallion has been placed on a pier of the Victoria Embankment to commemorate the engineer of the Thames waterside improvements ("Flumini vincula posuit"). The County Hall of the L.C.C. includes an embankment on the Surrey side.

THAMES TUNNELS.—The *Rotherhithe Tunnel* (foot passengers and vehicles), constructed by the L.C.C. and opened in 1908, connects Commercial Road East, with Lower Road, Rotherhithe; the total length is 1 mile 440 yards, of which 510 yards are under the river. The cost of the tunnel and its approaches was £1,560,041. The *Blackwall Tunnel* (foot passengers and vehicles) was constructed by the L.C.C. and opened in 1897, connects East India Dock Road, Poplar, with Blackwall Lane, East Greenwich. The total length of the tunnel is nearly 1¼ miles, of which 407 yds. are under the river. The cost of the tunnel with its approaches was about £1,406,000. *Greenwich Tunnel* (foot passengers only) constructed by the L.C.C. and opened in 1902, connects the Isle of Dogs, Poplar, with Greenwich. The length of the subway is 406 yards, and the cost was about £180,000. The *Woolwich Tunnel* (foot passengers only), constructed by the L.C.C. and opened in 1912, connects North and South Woolwich below the passenger and vehicular ferry

* The "Sword of St. Paul" appears in the 1st quarter of the City Arms, not "Walworth's dagger" as once commonly believed.

from North Woolwich Station, E. 16, to High Street, Woolwich, S.E. 18. The length of the subway is about 500 yards, and its cost was £85,862. The *Thames Tunnel* (1300 feet) was opened in 1843 to connect Wapping (N.) with Rotherhithe (S.). In 1866 it was closed to the public, and purchased by the East London Railway Company. The *Tower Subway* for foot passengers was opened in 1870, and has long been closed.

TOWER HILL, E.C. 1 and E.C. 3, was formerly the place of execution for condemned prisoners from the Tower, the site of the scaffold being marked in the gardens of Trinity Square.

TOWER OF LONDON, E.C. 3 (built by William the Conqueror, A.D. 1066–1087).—Admission to Jewel House, on all week days, 6*d.*; White Tower and Armouries, including Vaults, 6*d.*; to Bloody Tower, on all week days, 6*d.* Free on Saturdays (except Jewel House and Bloody Tower) by tickets issued at the office at gateway. Open from 1 May to 30 Sept., 10 a.m. to 6 p.m.; 1 Oct. to 30 April, 10 a.m. to 5 p.m. Not open on Good Friday, Christmas Day, or Sunday. *Constable*, Field-Marshal Lord Methuen, G.C.B., G.C.M.G., G.C.V.O.; *Lieutenant*, Lt.-Gen. Sir Cameron D. Shute, K.C.B., K.C.M.G.; *Major and Resident Governor*, Lt.-Col. Dan Burges, T.D., D.S.O.; *Keeper of the Jewel House*, Major-Gen. Sir George J. Younghusband, K.C.M.G., K.C.I.E., C.B.; *Curator of the Armouries*, Charles Houlkes, F.S.A. The Yeoman Warders retain their picturesque Tudor uniforms. During the Great War the use of the Tower as a prison was revived. Sir William Wallace, King David II. and King James I. of Scotland, the "Little Princes" (Edward V. and his brother), Anne Boleyn, Katherine Howard, Lady Jane Grey, Queen Elizabeth, Sir Walter Raleigh, William Penn, Cranmer, Ridley and Latimer and many others were imprisoned in the Tower.

TRAFALGAR SQUARE, S.W. 1.—This space was laid out in the second quarter of the 19th century. In the Square are the *Nelson Monument* 142 feet high, with Landseer's lions round the base, and statues of *Havelock*, *Napier*, and *Gordon*. The plinth of the Nelson Monument was badly damaged by fire during the (unofficial) celebrations on Armistice Day (Nov. 11, 1918). In the façade of the N. Wall of Trafalgar Square are metal standard measures.

WESTMINSTER HALL, S.W. 1 (built by William Rufus, A.D. 1087–1100 and altered by Richard II., 1377–1399), adjacent to and incorporated in the Houses of Parliament.—Westminster Hall is part of the Palace of Westminster and survived the fire, which destroyed the remainder of the Palace (Oct. 16, 1834). The Hall is 220 feet long, 68 feet wide, and 90 feet high. The hammer beam roof of carved oak, dating from 1399, is one of the principal attractions. King Charles I. was tried in the Hall. For admission, see regulations as to Houses of Parliament.

WHITEHALL, opposite Horse Guards, S.W. 1.—Erected by Inigo Jones as a banqueting-house for the projected Whitehall Palace. King Charles I. was beheaded here.

NATIONAL SAVINGS CERTIFICATES.

Three different Issues of National Savings Certificates or War Savings Certificates have been made. They are:—

First Issue Certificates (cost price 15*s.* 6*d.* and ten-year maturity value 20*s.*) issued from Feb. 1916 to March 31, 1922.

Second Issue Certificates (cost price 16*s.* and ten-year maturity value 20*s.*), on sale from April 1, 1922, to Sept. 31, 1923.

Third Issue Certificates (cost price 16*s.* and ten-year maturity value 24*s.*) on sale from Oct. 1, 1923. Certificates of the First Issue have now begun to reach ten-year maturity. Holders of Certificates of that Issue may, instead of encashing the Certificates at the end of ten years, adopt any of the following courses:—

1. Retain Certificates until March 31, 1932, with interest after the tenth year at one penny per month per Certificate originally costing 15*s.* 6*d.*

2. Exchange them for Certificates of the current Third Issue.

3. Transfer into 4 per cent. National Savings Bonds.

4. Transfer into 4½ per cent. Conversion Loan (1940–44).

In all cases the operation is possible without the necessity for encashment and reinvestment. Full details may be obtained at a Post Office.

The total number of Savings Certificates sold from their first issue in Feb. 1916 to Sept. 30, 1926, was 783,907,921, their cash value being £612,736,087. The amount withdrawn on that date was approximately 39 per cent. of that total. On April 1, 1922, the price of the Savings Certificate was raised from 15*s.* 6*d.* to 16*s.*, the maturity value remaining 20*s.* On Oct. 1, 1923, the maturity value was reduced to 24*s.*

ENVIRONS OF LONDON.

BARNET AND HADLEY GREEN.—Scene of Battle, A.D. 1471. Memorial Pillar to Earl of Warwick. Hadley Woods.

BROOKLANDS, Weybridge.—Motor and motor-cycle races.

BURNHAM BEECHES and FLEET WOOD, Bucks.—Magnificent sylvan scenery (374 acres), purchased by the Corporation of London for the benefit of the public in 1879; Fleet Wood (65 acres) presented in 1922. During summer omnibus runs daily, Sundays included, from Slough Station, G.W.R., passing within 250 yards of "Gray's Elegy" Church, *see* "Stoke Poges."

BUSHY PARK (1,100 acres).—Adjoining Hampton Court, contains many fine trees and avenue of horse-chestnuts enclosed in a fourfold avenue of limes, planted by King William III. "Chestnut Sunday" (when the trees are in full bloom with their "candles") is usually about 1st to 15th May. A herd of tame deer is maintained in the Park.

CHEQUERS, a country residence for Prime Ministers (from Jan. 1, 1921), was accepted by Mr. Lloyd George in 1917 (with an endowment to maintain the estate, &c.) from Lord and Lady Lee of Fareham. In 1921 the Chequers Estate of 700 acres was added to the gift by Lord Lee. Chequers is a Tudor mansion in the Chilterns, about 3 miles from Princes Risborough, Bucks, and contains a collection of Cromwellian portraits and relics.

CHILTERN HUNDREDS (Stoke, Burnham and Desborough, in Buckinghamshire). — No duly elected member of the Commons can resign his seat; he must apply for some office of profit under the Crown, and so vacate his seat under the Act of Settlement, 1707 (6 Anne, c. 7), and the usual practice is to apply for the Stewardship of the *Chiltern Hundreds*, or of the Manor of Poynings, or Northstead, or the Escheatorship of Munster, whereupon the seat is declared vacant (under the Place Act of 1742, which expressly permitted acceptance of such offices to serve as an excuse for resignation) and a new writ is issued by the Speaker.

CROYDON, Surrey.—London Terminal (Customs) Aerodrome.

CUFFLEY, Herts.—Memorial to Capt. W. L. Robinson, V.C., on spot above which the first German Zeppelin (L 21) was destroyed on British soil, Sept. 3, 1916.

DULWICH, S.E. 21 (5 miles from London) contains *Dulwich College* (founded by Edward Alleyn in 1619), *Dulwich Picture Gallery*, built by Sir John Sloane (open free daily, 10 to 4, 5, or 6, and on Sunday afternoons during the Summer), the *Horniman Museum* (*see* p. 205), and *Dulwich Park* (72 acres). In *Dulwich Village* the rural characteristics of the pre-suburban period are preserved.

ELTHAM, Kent (10 miles from London by S.E. & C.R.). Remains of 13th–15th century Eltham Palace, the birthplace of John of Eltham (1316), son of Edward II. The hall, built by Edward IV., contains fine hammer-beam roof of chestnut. In the churchyard of St. John the Baptist is the tomb of Thomas Doggett, the comedian and founder of the Thames Watermen's championship.

ENFIELD, Middlesex (10 miles from London by G.E. or G.N.R.). Opposite Market Place is part

of Princess Elizabeth's Palace, with fine carvings; the Parish Church contains well-preserved brasses and monuments.

ENFIELD LOCK, Middlesex (11 miles from London by G.E.R.). Royal Small Arms Factory may be visited by appointment (intending visitors must be British subjects and should apply beforehand by letter).

EPPING FOREST (5,560 acres, purchased by the Corporation of London for £250,000 and thrown open to the public in 1882; the present forest is 11 miles long by 1 to 2 miles wide, about one-tenth of its original area; in 1920 the deer in the forest numbered 87), LOUGHTON, BUCKHURST HILL, CHINGFORD, HIGH BEECH, on Great Eastern Railway. Beautiful forest scenery.

ETON COLLEGE.—22 miles from London. The most famous of English schools, founded by Henry VI. in 1440, the scholars numbering 1,131 in May 1923. Buildings date from 1523.

GRAVESEND, a borough and river port, 22 miles from London (S.E. & C.R.). A favourite resort for Londoners. St. George's Church (1727) contains a pulpit of Virginian wood, erected in 1904, and a stained glass window (the gift of ladies of Virginia) in memory of Princess Pocahontas, who was buried in the former church in 1617. Gravesend was formerly considered to be the entrance to London (Tilbury fort and docks are on the opposite bank), and King Edward VII. received Queen Alexandra there, March 7, 1863 (three days before their wedding).

GREENWICH, S.E. 10.—A south-eastern metropolitan borough (*see p. 539*) with a frontage of 4½ miles on the Thames. *Greenwich Hospital* (since 1873, the Royal Naval College) was built by Charles II., from designs by Inigo Jones, and by Queen Anne and William III., from designs by Wren, on the site of an ancient royal palace, and of the more recent *Placentia*, an enlarged edition of the palace, constructed by Humphrey, Duke of Gloucester (1391-1447), son of Henry IV. Henry VIII., Queen Mary I. and Queen Elizabeth were born in the Royal Palace (which reverted to the Crown in 1447) and King Edward VI. died there. The Painted Hall of Greenwich Hospital (Thornhill), Nelson Relics, &c., free on weekdays (except Friday) from 10 (and on Sundays from 2) till 4 or 6, according to time of year. In the principal quadrangle is a marble statue of George II., by Rysbraeck. *Naval Museum*, interesting Collection of Models, &c., open daily, except Friday and Sunday, from 10 till 4 or 6. *Chapel* open daily except Sundays and Fridays, and after 4 p.m. on Saturdays. *Greenwich Park* (188 acres) was enclosed by Humphrey, Duke of Gloucester, and laid out by Charles II., from the designs of Le Notre. On a hill in Greenwich Park is *Greenwich Observatory* (founded 1675) the zero meridian of longitude and of "Greenwich Time." Admission to the Observatory only by permission of the Astronomer Royal. The parish church of Greenwich (*St. Alfege*) was rebuilt by Hawksmoor (Wren's pupil) in 1718, and contains a pulpit and other carvings attributed to Grinling Gibbons. General Wolfe (Heights of Abraham) and Tallis ("the father of Church Music") are buried in the church. Henry VIII. was christened in the former church. The Ministerial *Whitebait Dinner*, held for many years at the "Ship" Hotel, was last held in 1894.

HAMPTON COURT.—Sixteenth century Palace built by Cardinal Wolsey, and added to by Sir Christopher Wren for William and Mary, 15 miles from London. Fine view of river. Beautiful gardens with maze and prolific grape vine (planted in 1768). Old Royal Apartments and collection of pictures. Tennis Court, built by King Henry VIII. in 1530. Open every week-day (except Friday) and on Sundays. Hours: Jan., Feb., Nov., Dec., 10 to 4, Sun. 2 to 4; Mar., Apr., Oct., 10 to 5, Sun. 2 to 5; May, June, July, Aug. and Sept., 10 to 6, Sun. 2 to 6. Admission, Mon., Tues., Wed., Thur., 1*s.* (children half price), Sat., 6*d.*; Sun. and Bank Holidays, free. *Bushy Park* adjoins the Lion Gates of Hampton Court Palace.

HARROW-ON-THE-HILL.—10 miles by Metropolitan and other railways. Large public school (620 scholars in Sept. 1922), founded by John Lyon in 1571. The "Fourth Form Room" dates from 1608.

JORDANS AND CHALFONT ST. GILES, near Beaconsfield, Bucks, contain the Old *Quaker Meeting House* (1688) at Jordans, in the burial ground of which lies William Penn (Pennsylvania); a barn in the farm ground is believed to have been built out of the timbers of the *Mayflower* by the 17th century owner of Jordans (Gardener). At Chalfont St. Giles is the cottage where Milton lived during the Great Plague (1665-1666).

KINGSTON-UPON-THAMES, Surrey (about 12 miles from London), is the ancient place of coronation of the Kings of Saxon England. The Coronation Stone (hence the name "King's Stone") is preserved within railings in the market place.

RICHMOND, Surrey, contains the red brick gateway of *Richmond Palace* (Henry VII., 1485-1509) and buildings of the Jacobean, Queen Anne, and early Georgian periods, including *White Lodge* in Richmond Park, the residence of the Duke and Duchess of York, and the home of Queen Mary's mother (the Prince of Wales was born there June 23, 1894). The *Star and Garter* Home for Disabled Soldiers, Sailors, and Airmen (the Women's Memorial of the Great War) was opened by Queen Mary in 1924. *Richmond Park* (2,250 acres) contains herds of fallow and red deer. From the *Terrace Gardens*, Richmond Hill, can be obtained a wonderful view of the Valley of the Thames.

RUNNIMEDE.—A meadow of about 100 acres, on S. bank of Thames (part of the Crown Lands), between Windsor and Staines. From June 15-23, 1215, the hostile Barons encamped on this meadow during negotiations with King John, who rode over each day from Windsor. The 48 "Articles of the Barons" were accepted by the King on June 15, and were subsequently embodied in a charter, since known as *Magna Carta*, of which several copies were sealed on June 19. About half a mile N.E. of the meadow is the privately owned *Magna Carta Island*, which is claimed as the actual site of the sealing.

RYE HOUSE, at Hoddesdon, on the River Lee. Scene of the celebrated plot. Old castle and dungeons, pictures, oak fireplaces, chests and panels; Queen Elizabeth's bed; the Great Bed of Ware (mentioned in "Twelfth Night").

ST. ALBANS.—A city in Hertfordshire, on the river Ver, 22 miles N.W. of London. The abbey church, built partly of materials from the old Roman city of Verulamium by Paul of Caen, was consecrated in 1115. Parts still remain of the Norman structure. The city was the scene of the overthrow of Henry VI. in 1455, and of the Earl of Warwick in 1461. On a printing press set up in the abbey the first English translation of the Bible was printed. Ruins of ancient City

of Verulam; St. Michael's Church, with tomb of Lord Bacon.

STOKE POGES (2 miles from Slough station on G.W. Ry.) contains the 14th century Church with the Churchyard of Gray's "Elegy" and "Ode on a Distant Prospect of Eton College." The poet was buried in the church in 1771. There is an eccentric "Bicycle" Window (1643) in an external cloister.

WALTHAM ABBEY (or WALTHAM HOLY CROSS), 13 miles from London (G.E.Ry.).—The Abbey ruins, Harold's Bridge (11th century), the Nave of the former cruciform Abbey Church (the oldest Norman building in England, and the traditional burial place of King Harold II., 1066) and a Lady Chapel of Edward II., with crypt below. At Waltham Cross, 1 mile from the Abbey, is one of the crosses (partly restored) erected by Edward I. to mark a resting place of the corpse of Queen Eleanor on its way to Westminster Abbey. (Ten crosses were erected, but only those at Geddington, Northampton and Waltham remain; "Charing" Cross originally stood on the spot now occupied by the statue of Charles I. at Whitehall.)

WINDSOR CASTLE (begun by William the Conqueror, A.D. 1066–1087).—22 miles from London, by Great Western and South Western Railways. When the Court is not in residence, the State Apartments of Windsor Castle are generally open to the public, during His Majesty's pleasure, on every week-day except Friday. The charges for admission are: Adults, 2s.; children, 6d. On Bank Holidays half the usual fees are charged; by the King's command, the proceeds to go to local charities. An authorised guide book can be obtained at the office, price 6d. The hours of admission to the State Apartments are from 1 April to 30 June, and 1 to 31 Oct. between 11 and 4; 1 July to 30 Sept., 11 to 5; and from 1 Nov. to 31 March, between 11 and 3. The Albert Memorial Chapel is open on the same days and at the same hours as the State Apartments; the Round Tower or Keep is open from 1 April–30 Sept. from 11 to 4. The royal stables and riding school may be viewed daily between the hours of 1 and 3. St. George's Chapel may be viewed on week-days (Fridays excepted), between 12.30 and 4.

WOOLWICH.—9 miles from London; Southern Railway, Dockyard and Arsenal Station for Barracks, Rotunda, &c. *Old Dockyard; Extensive Barracks for Royal Artillery, Royal Army Service Corps, &c.* Common for military evolutions. *Rotunda Museum* daily, free, from 1 April to 30 Sept., 10 a.m. to 12.45 p.m., and from 2 p.m. to 5; 1 Oct. to 31 March, from 10 to 12.45 and from 2 to 4; Sundays, April to Sept., 2 to 5; Oct. to March, 2 to 4 p.m.

METROPOLITAN SPORT.

AQUATICS (*Hon. Sec., Amateur Rowing Association*). — The *Oxford and Cambridge Boat Race*, rowed almost continuously since 1856 (first race 1829) takes place about last Saturday in March. The course is 4¼ miles from Putney to Mortlake. *Henley Regatta* occupies four days towards the close of the London season, and some of its principal races are now of an International character. *Doggett's Coat and Badge* (*see* Eltham, p. 374) are competed for annually by Thames watermen on Aug. 1, from London Bridge to Chelsea. The *Wingfield Sculls*, marking the amateur championship of the Thames, are competed for, between Putney and Mortlake, in July.

ATHLETICS.—The Amateur Championships are generally held on the first Saturday in July at Stamford Bridge Grounds, Fulham Road, the headquarters of the London Athletic Club, under the auspices of the *Amateur Athletic Association* (*A.A.A.*), 10, John Street, Adelphi, W.C. 2. The *Women's Amateur Athletic Association* (*Sec.*, Major Marchant, Polytechnic, Regent Street, W. 1) is affiliated to the *A.A.A.* The *Oxford and Cambridge Sports* are held at Queen's Club, Hammersmith, usually on the Friday before the Boat Race. *Bowling* is managed by the English Bowling Association, C. E. Woodruffe, *General Sec.*, 9–10, Pancras Lane, Queen Street, E.C. 4. Amateur *Boxing* is managed by the Amateur Boxing Association, 4, Aldgate High Street, E. 1, and Professional Boxing by the National Sporting Club, 43, King Street, Covent Garden, W.C. 2. *Cricket* is governed by the M.C.C. at Lord's (*see* p. 380). The grounds of Surrey County Cricket Club at Kennington Oval and of Essex County at Leyton are also easily accessible. The *Croquet* Association offices (*Sec.*, Charles Crawley) are at 4, Southampton Row, W.C. 1. Rugby *Football* in the Metropolitan area is played by amateurs only, the International home matches between England and Wales, Scotland, Ireland and France taking place at Twickenham. The Oxford and Cambridge match is also played at Twickenham. The principal Metropolitan Clubs are Blackheath (Rectory Field), the Harlequins (Twickenham), Richmond (Athletic Ground), London Scottish and Rosslyn Park (Old Deer Park, Richmond). *Sec. of the Rugby Union*, Commdr. S. F. Cooper, R.N. *Offices*, Twickenham. Association Football is principally professional, the leading Metropolitan clubs being Arsenal (Highbury, N.), Chelsea (Stamford Bridge), Clapton Orient (Millfields Road, Homerton, E. 9), Fulham (Craven Cottage, S.W. 6), Millwall (New Cross, S.E. 14), Queen's Park Rangers (Shepherd's Bush, W.), Tottenham Hotspur (Tottenham, N.), and West Ham United (Upton Park, E.). *Secretary of the Football Association*, F. J. Wall; *Office*, 42, Russell Square, W.C. The governing body for Amateur *Gymnastics* is the Amateur Gymnastic Association of Great Britain and Ireland (*Hon. Sec.*, C. J. West, Grassmead, Lingfield, Surrey). *Lawn Tennis* Headquarters are at the All England Lawn Tennis Club at Wimbledon, S.W., where the Championship of the world is decided early in July (or late in June). The controlling body is the *Lawn Tennis Association*, 49, Queen Victoria Street, E.C. 4. *Polo* is played at Hurlingham Club (Fulham, S.W. 6), and at Ranelagh Club (Barnes, S.W. 13). *Tennis* is played at Queen's Club, Prince's Club, and Lord's, and there is a Tennis Court at Hampton Court Palace (built by King Henry VIII. in 1530).

RACE MEETINGS.—The *Derby* is run at Epsom (14 miles from London) last Wednesday in May or first Wednesday in June. *Ascot Week* at Ascot Heath, near Windsor, about a fortnight after the Derby. The principal meetings are on *Newmarket Heath*; meetings near London are Sandown Park (Esher), Kempton Park (Sunbury), Hurst Park (W. Molesey), Gatwick (Reigate), Lingfield (E. Grinstead); *Goodwood Races*, which mark the close of the London Season, are held in the Duke of Richmond's Park, near Chichester, Sussex in July. The *Grand Military Steeplechase* is at Sandown Park. The *Grand National Steeplechase* (the principal race of the steeplechasing season) is held at Aintree, near Liverpool, about the last Friday in March.

GENERAL REGULATIONS.

GENERAL REGULATIONS.—The fares by Taximeter Motor Cabs are based upon a combination of time and distance. When the cab is kept waiting, delayed by traffic, or caused to travel at the rate of less than six miles an hour, then the charge is by time. When travelling at a speed of six or more miles an hour, then the charge is by distance. Fares for horse-drawn cabs are according to distance or time, at the option of the hirer, *expressed at the commencement of the hiring*; if not otherwise expressed, the fare to be paid according to distance ; but driver can refuse to be hired by time between 8 p.m. and 6 a.m.

DRIVER, if hired by distance, is not compelled to drive more than six miles, nor more than one hour if hired by time ; further, if hired by time, the driver may be required to drive at any rate not exceeding four miles an hour ; if required to drive more than four miles within the hour he may demand, in addition to the fare regulated by time, for every mile or any part exceeding four miles, the fare regulated by distance.

AGREEMENT to pay more than legal fare is not binding.

If the driver agree beforehand to take any sum less than the proper fare, the penalty for demanding more than the sum agreed upon is 40*s.*

The driver of every cab shall have with him, and when required produce, the Authorized Book of Distances, and every driver of any cab shall, if so required, deliver to the hirer a printed ticket, showing cab number, name and address of Proprietor, &c.

Driver may demand a reasonable sum as a deposit from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thither. Penalty 40*s.*, if driver, having received such deposit, refuse to wait, or go away before the expiration of the time for which the deposit shall be a sufficient compensation ; or if the driver shall refuse to account for such deposit.

The London Cab Act, 1896, enacts that if any person hires a cab, knowing, or having reason to believe, he cannot pay the fare ; or, fraudulently endeavours to avoid payment of a fare ; or, having failed, or refused, to pay a fare, refuses, or gives a false address, is liable, in addition to the fare, to a penalty of 40*s.*

The fares legally demandable by a stage carriage are those painted in a conspicuous manner on the inside of every such carriage, and they are recoverable in a summary way before a Justice of the Peace, in the same way as fares for a hackney carriage.

All property left in any cab shall be deposited by the driver (and in the case of a stage carriage, by the conductor, or driver if no conductor) at the nearest Police Station within twenty-four hours, if not sooner claimed by the owner ; such property to be returned to the person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him, on payment of all expenses incurred, and of such sum to the driver as the Secretary of State has by order prescribed. Property found in a stage carriage by a passenger must be given up to the conductor under a penalty of £10.

All inquiries, &c., relating to public carriages should be addressed to the Public Carriage Office, New Scotland Yard ; but inquiries as to property

left in a cab or stage carriage should be made at the Lost Property Office, New Scotland Yard. Office hours, 10 to 4.

LAMPS TO BE LIGHTED.

Motor Cars.—A white light placed on the extreme off-side, and visible within a reasonable distance toward which the car is proceeding or intended to proceed. This lamp should show a red light to the rear unless a red light is fixed on the rear of the vehicle. To be lighted one hour after sunset and kept till one hour before sunrise.

A lamp for the illumination of the rear number plate to be lighted *half an hour* after sunset to *half an hour* before sunrise.

Motor Cycles.—A white light to the front, but if it has a side-car attached, a red light to the rear must also be shown during the period between *one hour* after sunset and *one hour* before sunrise.

The lamps need not be placed on the extreme off-side unless the side-car is attached or projects beyond the off-side of the motor bicycle.

The front or rear plate must be illuminated *half an hour* after sunset to *half an hour* before sunrise.

Horse Drawn.—If only one lamp is carried it must be on the extreme off-side to show a white light to the front visible for a reasonable distance during the period between *one hour* after sunset and *one hour* before sunrise. If a light is shown to the rear it must be red.

N.B.—In certain localities a red light or red reflex light is requisite.

If a load projects more than 6 ft. to the rear a red light must be shown to the rear.

Traction Engines must show two efficient lights to the front and a red light at the rear between the hours of one hour after sunset and one hour before sunrise from April 1 to Sept. 30, and between sunset and sunrise the remaining six months.

The lamps must be provided with shutters to enable them to be temporarily screened.

HARVESTING.—County Councils have power to make orders exempting vehicles used for the purpose of harvesting from carrying lights.

STAGE CARRIAGES licensed in the Metropolitan Police District must carry a lamp inside, properly lighted, between sunset and sunrise when plying for hire.

HACKNEY CARRIAGE STATISTICS.

During 1923 there were licensed public carriages:—Hansoms, 15; clarences—animal 332, mechanical 7,674; omnibuses—animal 8, mechanical 5,117; char-a-bancs, 316; tramway cars—mechanical 3,214; total, 16,676. Drivers and conductors:—Cab drivers—animal 460, mechanical 9,471; stage drivers—animal 2, mechanical 14,168; composite licences (stage driver and conductor)—animal 9; mechanical 2,354; conductors, 15,784; total, 42,248.

HACKNEY AND STAGE CARRIAGE DRIVERS before obtaining a licence are required to pass an examination as to their ability to drive, and hackney carriage drivers, in addition, have to pass an examination as to their knowledge of town. It extends to a knowledge of the principal squares, clubs, hospitals, hotels, theatres, streets, and public buildings in London. During 1923, of 618 men examined, 301 were successful. The proportion of drivers to mechanical hackney carriages is approximately 12·3 drivers to 10 carriages.

LOST PROPERTY.

Of lost property, 163,314 articles were deposited, of which 64,279 were claimed by the owners. The number of awards paid to drivers, &c., was 57,467.

This is one of our great National Institutions, where Sailors, Soldiers and Airmen can go when on leave or passing through London; a place where they may obtain at moderate charges good meals and comfortable bedrooms and where they find the usual amenities of a club, including Library and Writing Room, Billiard Room, Baths, Barber's Shop, and also a Club Shop in which articles of everyday use and almost everything that Service men require may be purchased. The Club is open throughout the day and night.

The Union Jack Club was erected by public subscription as a National Memorial to those who had fallen in the South African War, and other campaigns, and was opened on July 1st, 1907, by His late Majesty King Edward VII. Membership is limited to those serving on the Active List of the Regular Forces, below the rank of Officer, but Honorary membership is open to those belonging to the Royal Malta Artillery, the West India Regiments and the Colonial Permanent Forces, as well as the Navies and Armies of foreign Powers visiting England. The Club is managed by a Council and General Committee, which includes representatives elected by the members.

A considerable extension of the Club with funds raised in all parts of the Empire to commemorate the services of our gallant fighting forces in the Great War of 1914-18 and to provide increased accommodation was completed in 1923.

In 1926 the Council were enabled, through the anonymous gift of one of its members, still further to enlarge the premises, thus bringing the total sleeping accommodation up to 727 beds.

THE UNION JACK HOSTEL.

Exton Street, Waterloo Road, S.E. 1.
Tel.: Hop. 2724. Opened June, 1913.

Patron-in-Chief: His Majesty the King.
Patroness-in-Chief: Her Majesty the Queen.
Patron: H.R.H. the Duke of Connaught, K.G.

President: Brig.-General E. F. O. Gascoigne, C.M.G., D.S.O.
Hon. Treasurer: Sir G. J. Marjoribanks, K.C.V.O.
Secretary: J. R. Hayward, M.B.E.
Warden: Mrs. G. Myatt.

The Hostel provides lodging and accommodation for the wives and children (with or without their husbands and fathers) of members and ex-members of the Naval and Military Forces of the Crown, below the rank of Officer. It is managed by a Council, and though run closely in connexion with the Union Jack Club, the organisation and finances of the two institutions are quite separate from one another.

LIFE ASSURANCE.

THE list on the following two pages contains the names of all the more important British Life offices, and of eight Colonial companies (marked C), all of which transact business in this country.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allotted to participating policy-holders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are marked O in this column. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches. Those having an Industrial branch are indicated by letters I.

FIGURES.—These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended 31 December, 1925.

LIFE FUNDS.—The amounts of these funds, though interesting, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actuarially compared with assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassuring parts of the risks.

EXPENSES.—The expenses of a Life office include, in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of British offices is about 12½%, of which about 5% is expended on commission and 7½% on other expenses. This ratio taken by itself is frequently misleading, because, if the proportion of new business is large, the percentage of the total premiums absorbed in expenses may legitimately be higher than where the new business is small. Moreover, where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a gain to the policyholder through reduced premium being equivalent to an immediate cash bonus.

INTEREST.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. The rate of interest given is without deduction of Income Tax except where marked (N)—net.

VALUATIONS.—The last two columns of the table are derived from the valuation returns made by the companies to the Board of Trade. A valuation indicates liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate. Various mortality tables are employed, those most usual being known as the H^m and O^m, and the corresponding Tables $H^{m(5)}$ and $O^{m(5)}$ which exclude mortality in the first five years of assurance. If a company assumes that it will earn a high rate of interest in the future, the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The O^m and $O^{m(5)}$ tables in conjunction are more stringent than the O^m table alone, the H^m is more stringent than the American, and with every table the lower the rate of interest assumed the more stringent is the valuation.

FIRE INSURANCE RATES.

MOST large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merits. Tariff rates of premium per £100 insured against fire for the more common classes of risk are as follows:—

Private Dwelling Houses, built of brick or stone and tiled or slated and in no hazardous proximity, 1s. 6d.

Household goods therein, usually 2s.

A number of companies issue "comprehensive" policies embracing in one contract all risks incidental to private houses and contents.

Shops and Warehouses, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on, from 2s.

Stock and Utensils in trade, fixtures, and household furniture in such shops and warehouses, from 2s.

Private Dwelling Houses, brick and timber built and tiled or slated, in no hazardous proximity, from 2s. 6d.

Most fire insurance companies transact accident and miscellaneous business, and if a strong company be selected with a reputation for liberal dealing it will probably be found to the advantage of a householder that he should effect with it all such policies as he may require, in place of dividing them amongst several companies. The "comprehensive" policies previously referred to, combine in one contract protection against damage by fire to the contents of a house, or from burglary, housebreaking, larceny, theft, &c., and insurance against domestic servants' employers' liability, damage from storm or tempest, third party risks, and other hazards. This can usually be arranged for an annual premium of 5s. per £100 of the full value of the contents of the house. Fire insurance of the house itself is not included, however, in this estimate, but can be included under the same policy, if desired. The advantage of a policy of this description is that it obviates the inconvenience of payments of small amounts in insurance premiums at different dates; and that in one comprehensive form it supplies protection at a moderate cost for all a householder's ordinary insurance requirements.

INCOME TAX ALLOWANCES ON PREMIUMS PAID.

Where an allowance is due in respect of premiums paid for Life Assurance or for contracts for Deferred Annuities, the allowance is deducted from the amount of tax on the "Taxable Income" (*i.e.*, that part of the income on which the tax is actually charged—the first £225 of the taxable income being charged at half the standard rate of tax; the remainder at the standard rate of tax). The allowance is made on the premiums paid, and is calculated at the following rates:—one-half the standard rate in the £ on the amount of the premium paid on policies taken out since June 22, 1916, limited to premiums not exceeding one-sixth of total income, and to a rate of premium not greater than 7 per cent. of the sum assured); and on policies taken out before June 22, 1916, a deduction of tax at one-half the standard rate in the £ is allowed on the premiums paid by a claimant whose income does not exceed £1,000, of three-fourths of the standard rate in the £ where his income exceeds £1,000 and does not exceed £2,000, and at the standard rate in the £ where his income exceeds £2,000. The *Repayments* of Income Tax on account of Life Insurance Premiums are shown for a series of years on page 419.

BONUSES.

The following table shows the average annual rate of Bonus declared on Whole Life and Endowment Assurances for £100. In each case the rate given is in respect of a policy effected at age 30 next birthday, and the Endowment Bonus is based on a Policy maturing at age 60. It will be noticed, in the case of some of the Offices whose Valuations are made quinquennially, that the last Valuation included part of the War period, when conditions were abnormal. Owing to the depreciation in securities, and the strain of War claims, &c., some Offices were only able to grant a low rate of Bonus, but at the next Valuation these Offices should resume their pre-War rate at least; intending Assurers, however, would be well advised to ascertain the possibilities of this before effecting a Policy.

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE.

Life assurance may be effected either with or without participation in profits. If without participation, both sum assured and premium remain unchanged. If with participation, a higher premium is charged, and bonuses can either be payable with the sum assured, applied to reduce the premium, or surrendered for cash. An alternative plan is available in some offices whereby future bonuses are anticipated and used to reduce premiums from the outset. This is called the "Discounted Bonus" or "Cost Price" system. If the bonuses actually declared exceed those anticipated, the difference is credited to the policyholder; if, however, the anticipated bonuses exceed those declared, the balance has to be liquidated by the policyholder or remains as a debt. Policies should only be effected on this system in companies which can point to good and consistent bonus records, and whose valuation reserves are particularly strong.

The ages applicable to the life and endowment assurance (but not the annuity) rates as hereafter given are "next birthday" unless otherwise stated.

The next table shows the annual premiums payable throughout life for a policy of £100 payable at death, with profits. It is not sufficient to judge a life office by premium rates only. An office charging a high premium may give higher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Some offices only allow bonuses to be taken in reduction of premium, and on this plan the rates are usually high to commence with, but are greatly reduced after a few years. Some reserve bonuses for the older classes of policyholders, and in these cases lower premiums than the average are usually charged. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such interim bonuses compare with valuation bonuses, especially in cases of endowment assurance.

Endowment Assurances.

Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realisation of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no medium promising more satisfactory results than an Endowment assurance participating in profits in a good bonus-paying life office. The selection of such an office is all-important, as so much depends upon profit-earning capacity—*see* first page of Life Assurance section.

ANNUAL PREMIUMS FOR ENDOWMENT ASSURANCE OF £100. WITH PROFITS.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death.

The following table shows the annual premiums, for various ages at entry, charged by the offices named, to secure £100 with profits at the age of 55 or 60, or at death, if previous.

This Table shows amount of Annuity granted for every £100 paid. The age is calculated from the last birthday, but many offices quote intermediate rates for every half or quarter year. By some a proportionate amount is payable to *day of death*. Some Companies pay whole or part of stamp duty. See note as to rates on introductory page.

The Annuity is calculated as payable half-yearly. In some cases the quarterly rate is the same; in others it is a little less. Some offices grant special terms in case of impaired lives.

ADVICE REGARDING LIFE ASSURANCE.

Apart from the immediate protection thereby given, a life or endowment assurance policy, if effected in a first-class bonus-paying company, provides exceptional opportunity for the remunerative investment of savings. Policyholders can claim relief from Income Tax in respect of life assurance premiums not exceeding in amount one-sixth of their income, where the death risk is involved.

The selection of the office best suited to requirements and likely to produce the best results should be carefully made, but the study of any tables or suggestions is not sufficient to enable persons without technical knowledge to gauge the respective merits of the various companies. There are many good offices, and in the most select class some are better adapted than others for particular purposes, and large sums may be saved or earned by intending proposers through obtaining reliable advice before a proposal is made.

Medical examinations are sometimes dispensed with in the case of new proposals, but policies in these instances are sometimes subject to certain restrictive conditions of a temporary character.

INQUIRIES.—On receipt of an inquiry containing particulars of requirements (accompanied by 5*s.*) addressed to "The Insurance Editor, 12, Warwick-lane, E.C. 4," advice will be given as to the system and policies best adapted to the special requirements. Inquiries should state the age at and date of next birthday. The following are suggested as the policies most likely to be required:—

(*a*) *Whole Life*—With and without profits.
(*b*) " " —With limited number of payments.
(*c*) " " —Reduced premium for first 5 years.
(*d*) *Endowment*—With and without profits.
(*e*) " —Reduced premium for first 5 years.
(*f*) *Children's Insurances*—Educational, &c.
(*g*) "*Non-Medical*" Insurances.

Standard Gold contains twenty-two twenty-fourths (carats) of fine gold and two twenty-fourths of alloy; fineness, 916·66, or 22 carats; 240 troy ounces of standard gold are coined into 934 sovereigns and one half-sovereign; one troy ounce is, therefore, worth £3 17s. 10½d., and one ounce of pure gold, on the same basis, £4 4s. 11½d. During 1925, the average market price of gold has been above these figures.

Standard Silver formerly consisted of thirty-seven-fortieths of fine silver and three-fortieths of alloy; fineness, 925. Silver for coinage, by an Amending Act (10 Geo. V. ch. 3), consists of one-half silver, one-half alloy; or in millesimal fineness, 500; 11 troy ounces of 500 fineness are coined into 66 shillings.† [Another Standard, called the "New Sterling" or Britannia, of the fineness 11 oz. 10 dwt. (958·33), is practically obsolete. It is occasionally used, however, for high-class plate.]

The melting of British gold and silver coin is prohibited. The Average Yearly Price of Silver per standard Troy Ounce in the London Market during the last ten years was as follows:—1925, 23½d.; 1926, 31⅛d.; 1927, 40⅜d.; 1928, 47⅛d.; 1929, 57⅛d.; 1930, 61⅛d.; 1931, 36⅜d.; 1932, 34⅛d.; 1933, 31½d.; 1934, 34d. On Oct. 19, 1926, the price of silver was 24⅛d. per oz.

In the United States the price of silver is quoted in cents per troy ounce *fine*. In order to convert an English quotation into cents per ounce fine, first express the pence as a whole number and decimal fraction and then multiply by 2·192; to express a United States price on the English system, multiply the cents by 0·4562.

‡Bronze is an alloy of copper 95 parts, tin 4 parts, and zinc 1 part, or of copper 95½ parts, tin 3 parts and zinc 1½ parts.

The "Remedy" is the amount of variation from standard permitted in fineness and in weight of coins when first issued from the Mint.

Tokens.—No person is allowed to coin any token to pass for, or as representing, bronze or other money, under a penalty of £20.

Light Gold.—Any person to whom it is tendered may break, cut, or deface any gold coin below the least current weight; but under the provisions of the Coinage Act, 1891, and an Order in Council of 16 March, 1892, light gold coin which has not been illegally dealt with is received by the Bank of England on behalf of the Mint at its full nominal value.

Bank of England Notes are issued for sums of £5, £10, £20, £50; also for £100, £200, £500, and £1,000.

Treasury Notes of the value of £1 and 10s. are issued.

Bank Post Bills can be obtained at the Bank of England for amounts of £10 and over at seven days' sight. They are issued for the full sum named thereon, without allowance for discount. No charge is made for bills so drawn: they may be obtained at the Chief Office of the Bank of England in London, or at any of the branches.

Legal Tender of Money.—The tender of Bank of England Notes is legal in England and Wales for every purpose, and by anyone (except by the Bank of England). No one can be compelled to give change. Gold, if above the least current weight, and Treasury notes are legal tender to any amount. Silver is not a legal tender for sums over two pounds, nor bronze, including farthings, for sums over one shilling.

British Coinage Statistics.—During 1925 the number of coins struck at the Royal Mint was 186,775,657, of which 53,066,813 were Imperial, 84,503,313 Colonial, and 49,205,531 Foreign.

BRITISH DOMINIONS ABROAD.

Imperial Sterling Coins are the *sole legal metallic currency* in:—

NEW ZEALAND. FALKLAND ISLANDS.
FIJI. GIBRALTAR. ST. HELENA.
WEST INDIES. *See also* JAMAICA, *below*.

Special Coins are current in addition to the Imperial series in:—

AUSTRALIAN COMMONWEALTH. — Special florins, shillings, sixpences, and threepences in silver, and pence and halfpence in bronze, of the same weights and composition as Imperial coins of these denominations, but of special designs, while the silver coins are of 925 fineness.

UNION OF SOUTH AFRICA.—Silver and bronze coins, bearing special designs, and corresponding to Imperial coins in denominations, weights and composition, except that the fineness of the silver is 800.

BRITISH GUIANA.—A special groat or fourpence.

BRITISH WEST AFRICA.—Silver and also "alloy metal," 2s., 1s., 6d., and 3d., One penny, one halfpenny, and one-tenth penny (nickel-bronze).

GUERNSEY.—Eight doubles (= 1 penny), 4, 2, and 1 double.

JAMAICA.—Nickel-bronze pence, halfpence, and farthings.

JERSEY. — Special pence, halfpence, and farthings.

MALTA.—One-third of a farthing (bronze).

* Issued on special occasions.

† By law a shilling weighs one sixty-sixth of 1 2oz. Troy; 1 2oz. of *pure* silver would be used in coining 72 shillings of 925 fineness and 132 of 500 fineness.

‡ The legal weight of a penny is one-third, of the halfpenny one-fifth, and of the farthing one-tenth of an ounce avoirdupois; the halfpenny is one *inch* in diameter.

† New Austrian schilling currency quoted from the commencement of March 1925. One new Austrian schilling equalled 10,000 old paper kroner.

‡ New Hungarian pengö currency quoted for 1926. One new Hungarian pengo equals 12,500 old Hungarian kroner. Maximum for 1925 was 348,000 kr. and minimum 342,000 kr.

§ New Belgian "Belga" currency was established on October 26, 1926. The par value of the *Belga* is 35 to the £. The conversion rate was one gold *Belga* = 5 old paper francs.

HALL MARKS ON PLATE.*

Assay Office Marks.—The official marks stamped on gold and silver plate at Assay Offices are distinguished as under :—

Assay Office ...	*Distinguishing Mark.*
London (Goldsmiths' Hall)	Leopard's Head (crowned, until 1823).
Birmingham...	Anchor (square frame for gold; pointed shield for silver).
Chester	City Arms (3 Garbs and a Sword).
Sheffield	Crown.
Edinburgh.....	Castle.
Glasgow	Tree, Fish & Bell.
Dublin	Harp crowned.

In addition to the above, there have been Assay Offices at Bristol, Exeter, Newcastle-upon-Tyne, Norwich and York, all of which have long been closed.

Makers' Mark (instituted in 1363).—This is impressed by the maker, and consists of initial letter (or letters) indicating the Surname (or Christian and Surname) of the maker.

Date Mark.—The year in which the article is marked at the Assay Office is indicated by a letter on a shield, the *type of letter* and the *shape of the shield* being changed in cycles of 20, 25 or 25 years. In 20-year cycles (London, invariably, Chester, alternately with 25, and Sheffield, alternately with 25), the letters J, V, W, X, Y, Z are omitted ; in 25-year cycles (Birmingham, Edinburgh and Dublin, and alternately at Chester and Sheffield) the letter "j" is omitted from the alphabet ; at Glasgow all the letters are employed in a 26-year cycle.

The Sovereign's Mark. — The "lion passant" introduced in the reign of Edward I. (1300) for *silver* articles only.

The Sovereign's Head.—The portrait of the reigning Sovereign was impressed on all plate chargeable to duty assayed from 1784—1889-90. The duty on plate was removed in 1890, and the Sovereign's head does not appear on plate assayed before 1784 or after 1890.

The Crown.—On *gold* articles only, in lieu of the "lion passant" on silver.

Britannia.—A full-length figure of Britannia was impressed on silver plate of a special standard of fineness (11 oz. 10 dwt. of fine metal to each 10 dwt. of alloy) during a short period only, 1697-1720 ; since that date the Britannia quality has been manufactured in small quantities, bearing the figure of Britannia, with the lion's head erased and the date mark.

Sterling Silver.—Articles of silver plate marked at an assay office are guaranteed to be of the requisite standard of purity and to contain 11 oz. 2 dwt. of fine metal to each 18 dwt. of alloy.

Sterling Gold.—Articles of gold plate marked at an assay office are guaranteed to contain such amount of pure gold as is marked thereon by the assaying office in carats and decimals thereof. The *relative* values of the various standards is shown below :—

	£	*s.*	*d.*
Pure gold, 24 carats.....	4	4	11½
Standard, 22 carats.....	3	17	10½
2nd ditto, 18 carats.....	3	3	8½
3rd ditto, 15 carats.....	2	13	1
4th ditto, 12 carats.....	2	2	5¼
5th ditto, 9 carats.....	1	11	10½

The Collector will find but little difficulty in distinguishing a letter of one cycle from that of another, presuming his knowledge to be insufficient to judge by the style and period of the article itself, *e.g.*:

An article marked with the letter F 1721–2 can be distinguished from letter F 1801–2 by the difference in the shape of the respective shields; as also those containing the crowned leopard's head and the lion passant; the absence of the sovereign's head in the former as against its presence in the latter case; the different form of the leopard's head (which was "crowned" until 1823); and lastly, the irregularity of the stamp in the first case as compared with the uniformity of the latter stamp. These again can be distinguished from F 1881–2 as before, by the different shield of the date letter only (the shields of the remaining marks being the same as those of 1801–2); the absence of crown on leopard's head, and the presence of the Queen's *vice* the King's head.

Imported Plate.

Any gold or silver plate or article manufactured out of the United Kingdom and brought to be assayed, stamped or marked at a British or an Irish Assay Office must be marked in the manner prescribed by the Order in Council of May 11, 1906, under which the mark for each Assay Office is ordained to be:—*London*, the sign of the Constellation Leo; *Birmingham*, Equilateral Triangle; *Chester*, Acorn and two leaves; *Sheffield*, the sign of the Constellation Libra; *Edinburgh*, St. Andrew's Cross; *Glasgow*, double block letter F inverted; *Dublin*, Bonjet. The annual date letter is to be added by the Assay Office, as for plate, etc., of home manufacture.

Modern Architecture (The Age of Revivals)	19th cent. to present time		William IV. (A.D. 1830–1837). Victoria (A.D. 1837–1901). Edward VII. (A.D. 1901–1910). George V. (A.D. 1910–).

This Comparative Table shows the approximate period of each style. It must, however, be remembered that the transition from one style to the next was slow and gradual, and can often hardly be traced, so minute are the differences. It is only for convenience in alluding to the different stages of evolution that the division is made, for it must not be forgotten that the Architecture of England is one continuous development.

Note.—The first portion (I–VIII) of this table is based upon that given on p. 319, Parts IX, and X on p. 701; and "Modern" on p. 764, of "A History of Architecture on the Comparative Method" (6th ed.), by Sir Banister Fletcher, F.R.I.B.A. (Batsford.)

Weights and Measures.

The Weights and Measures Act of 1878, superseding all previous laws, enacts the legal measures for Great Britain, basing them upon the Standard Yard and the Standard Pound, in the custody of the Standards Department of the Board of Trade.

The YARD and the POUND are the only two independent standards for weights and measures. The GALLON, the capacity standard, wet or dry, is based upon the Pound. The Act of 1878 defines the Gallon as the volume of ten standard pounds of distilled water weighed in air against brass weights, both water and air at the temperature of 62° Fahrenheit, with the barometer at 30 inches.

Apothecaries' Weight.

Measures of Weight.

20 grains = 1 scruple (℈1) (= 1·296 *Grammes*).
3 scruples = 1 drachm (℥1) (= 3·888 *Grammes*).
8 drachms = 1 ounce (= ℥1·1035 *Grammes*).

Measures of Capacity.

60 minims (*min.*) = 1 fluid drachm (= 3·552 *Millilitres*).
8 fluid drachms = 1 fluid ounce (= 2·84123 *Centilitres*).
20 fluid ounces = 1 pint (= 0·568 *Litre*).
8 pints = 1 GALLON (= 4·5459631 *Litres*).

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' *drachm* is not the same as the Avoirdupois *dram*, and is spelt differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437·5 grains). A fluid *drachm* (54·6875 grains) is equal in weight to TWO Avoirdupois *drams*.

Approximate Equivalents :—
1 "table-spoon" = ½ fluid oz.; 1 "dessert-spoon" = ¼ fluid oz.; 1 "tea-spoon" = ⅓ fluid oz.

Avoirdupois Weight.

7000 grains (*gr.*) = 1 pound (*lb.*).
16 drams (*dr.*) = 1 ounce (*oz.*) (= 28·350 *Grammes*).
16 ounces = 1 POUND (= 0·45359243 *Kilogram*).
14 pounds = 1 stone* (= 6·350 *Kilograms*).
28 pounds = 1 quarter (of a *cwt.*) (= 12·70 *Kilograms*).
100 pounds = 1 cental (= 45·359243 *Kilograms*).
4 quarters (112 lb.) = 1 hundredweight (*cwt.*) (= 50·8022 *Kilograms*).
20 hundredweight (2,240 lb.) = 1 ton (= 1·0160 *Tonnes* or 1016·0 *Kilograms*).

Troy Weight.

24 grains = 1 pennyweight (*dwt.*) (= 1·5552 *Grammes*).
20 dwt. = 1 ounce (= 31·1035 *Grammes*).

For gold and silver the ounce, divided decimally, and *not* into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce, = 480 Avoirdupois grains (31·1035 *Grammes*) in weight. There is *no* Troy POUND.

Jewellers' Weight.

The metric carat of 200 *millegrammes* is the legal standard of weight for precious stones and pearls.

* The *Smithfield stone* (for dead meat) is 8 lb. only.

Measures of Capacity.

4 gills = 1 pint (= 0·568 *Litre*).
2 pints = 1 quart (= 1·136 *Litres*).
4 quarts = 1 GALLON (= 4·5459631 *Litres*).
2 gallons = 1 peck (= 9·0919 *Litres*).
8 gallons = 1 bushel (= 3·637 *Dekalitres*).
8 bushels = 1 quarter (= 2·909 *Hectolitres*).
A chaldron is 36 bushels = 4½ quarters.

Measures of Length.

12 inches (*in.*) = 1 foot (*ft.*) (= 0·30480 *Metre*).
3 feet = 1 yard (*yd.*) (= 0·914399 *Metre*).
6 feet = 1 fathom (= 1·8288 *Metres*).
5½ yards = 1 pole (= 5·0292 *Metres*).
22 yards = 1 chain = 100 links (= 20·1168 *Metres*).
10 chains = 1 furlong (= 201·168 *Metres*).
8 furlongs = 1 mile (= 1·6093 *Kilometres*).
3 miles = 1 league (obsolete).
A *Pole* of 5½ yards is a quarter of a chain.
A *Cricket Pitch* is 22 yards (one chain) between the stumps.
A *Lawn Tennis Court* is 78 × 36 feet (double) and 78 × 27 feet (single).
A *Croquet Lawn* is 105 × 84 feet (full size) or a smaller multiple of 5 × 4 feet.
A *Badminton Court* is 44×20 ft., with net 30 ins. deep and 5 ft. high at centre.

Birmingham Gauge.

The Weights and Measures Act of 1878 made standards on and after Nov. 1, 1914, certain new divisions of an inch. The equivalent of an inch is 15/0 B.G. The numbers proceed by units down to 1/0 B.G., which = 0·3964 inch, and from 1 B.G. (·3532 inch) by units to 52 B.G. (·00095 inch).

Square or Surface Measure.

144 sq. inches = 1 sq. foot (= 9·2903 *Sq. Decimetres*).
9 sq. feet = 1 sq. yard (= 0·836126 *Sq. Metre*).
30¼ sq. yards = 1 perch, or rod, or pole (= 25·293 *Sq. Metres*).
40 perches = 1 rood (= 10·117 *Ares*).
4 roods (4840 sq. yards) = 1 acre (= 0·40468 *Hectare*).
10 square chains = 1 acre.
640 acres = 1 square mile (= 2·58995 *Sq. Kilometres*).

Note.—The Anglo-Saxon acre's-length is the furlong, and the acre's-breadth the chain.

Cubic Measure.

1,728 cubic inches = 1 cubic foot (= 0·028317 *Cubic metre*).
27 cubic feet = 1 cubic yard (= 0·764553 *Cubic metre*).

Angular or Circular Measure.

60 seconds (″) = 1 minute (′).
60 minutes = 1 degree (°).
30 degrees = 1 sign.
90 degrees = 1 right angle or quadrant.
12 signs (4 quadrants) = 1 circumference.
Diameter of circle × 3·1416 = circumference.
Diameter squared × ·7854 = area of circle.
Diameter squared × 3·1416 = surface of sphere.
Diameter cubed × ·5236 = solidity of sphere.
One degree of circumference × 57·3 = radius.
Diameter of cylinder × 3·1416; product by length or height, gives the surface.
Diameter squared × ·7854; product by length or height, gives solid content.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain.

Miscellaneous Weights and Measures.

Apples (Bushel) = 37 to 43 lb. (average 40 lb.).
Ballast (Pig) = 56 lb.
Beef (Barrel) = 200 lb.
Biscuits (Bag) = 102 lb.
Blacklead (Cask) = 1½ cwt.
Butter (Barrel) =4 firkins = 224 lb.
Camphor (Box) = 1 cwt.
Cloves (Matt) = 80 lb.
,, (Chest) = 200 lb.
Coal (Sack) = 224 lb.
,, (Bushel) = 80 lb.
,, (Chaldron) = 85 bushels.
,, (Ton) = 10 sacks.
Cocoa (Bag) = 112 lb.
,, (Cask) = 1 cwt. 28 lb.
Coffee (Bag) = 140 to 168 lb.
,, (Bale of Mocha) = 224 to 280 lb.
,, (Barrel) = 112 to 168 lb.
,, (Tierce) = 5 to 7 cwt.
Cotton (U.S. Bale) = 400 to 500 lb.
,, (Egyptian Bale) = 700 to 740 lb.
,, (Indian Bale) = 500 to 600 lb.
Currants (Caroteel) = 5 to 9 cwt.
Flour (Peck) = 14 lb.
,, (Bag) = 140 lb.
Glass (Seam) = 24 stone of 5 lb. = 120 lb.
Gunpowder (Barrel) = 100 lb.
Hides (Last) = 12 dozen.
Honey (Gallon) = 12 lb.
Hops (Bag) = 280 lb.
,, (Pocket) = 1½ to 2 cwt.
Lead (Fodder):—
London and Hull = 19½ cwt.
Derby and Newcastle = 22½ cwt.
Meat (Stone) = 8 lb.
Nuts (Barcelona, Bag) = 126 lb.
Oats (Barrel) = 14 stone.
Pepper (Bag of black) = 316 lb.
,, (Bag of white) = 168 lb.
Pork (Barrel) = 224 lb.
Potatoes (Sack) = 112 lb. (since 1923).
Raisins (Barrel) = 112 lb.
Rice (Bag) = 168 lb.
Sago (Bag) = 112 lb.
Saltpetre (Bag) = 168 lb.
Soft Soap (Barrel or Pack) = 256 lb.
,, (Firkin) = 64 lb.
Steel (Faggot) = 120 lb.
Sugar (Bag) = 112–196 lb.
,, (Hogshead) = 13 to 16 cwt.
,, (Tierce) = 7 to 9 cwt.
Tar (Barrel) = 26¼ gallons.
Tea (Chest) = 84 lb.
Tobacco (Hogshead) = 12 to 18 cwt
Turpentine (Barrel) = 224 to 280 lb
Wood (Cord) = 128 cubic feet.
Wool (Sack) = 364 lb.

Wheat, Corn, and Flour.

Under the *Corn Sales Act* of 1921 the Corn Returns Act of 1882 is amended, and provision is made for the sale of cereals by weight in terms of the hundredweight of 112 imperial standard pounds.

100 lb. wheat produces 70 lb. flour.
100 lb. flour produces 130 lb. bread.
A quartern loaf = 4 lb.
A last of grain = 80 bushels.

NOTE.—A *Quarter* is a heaped measure of 8 *bushels*. A quarter of English wheat is reckoned as 504 lb. weight. On the Winnipeg Grain Market the standard *bushel* of oats is reckoned at 34 lb.; in U.S.A. at 32 lb.

Hay and Straw.

Truss of Straw, 36 lb. Truss of Old Hay, 56 lb.
Truss of New Hay (to September 1st), 60 lb.
Load of hay or straw = 36 trusses.
Ton of hay = 36 trusses.
An acre of grass should yield 1 to 2 tons of hay.

Sizes of Barrels and Bottles.

	Gals.
Firkin or Quarter Barrel.....	9 = 9 × 1
Kilderkin, Rundlet, or ½ Barrel	18 = 9 × 2
Barrel	36 = 9 × 4
Hogshead (1½ barrels)	54 = 9 × 6
Puncheon (2 barrels).....	72 = 9 × 8
Butt of Ale (3 barrels).....	108 = 9 × 12

An *Anker* = 10 gallons; a *Tierce* = 42 gallons; a *Pipe* of Port or Masdew = 115 gals.; Teneriffe = 100 gals.; Marsala = 93 gals.; Madeira and Cape = 92 gals.; Sherry and Tent = 108 gals.; *Butt* of Lisbon and Bucellas = 117 gals.; *Aum* of Hock and Rhenish = 30 gals.; *Hogshead* of Brandy, 60 gals.; Claret, 46; Port, 57; Sherry, 54; Madeira, 46 gallons; *Puncheon* of Brandy or Rum = 120 gals.

Bottles.—The customary glass bottle of wine or spirits should contain one-sixth of a gallon = 26⅔ fluid ounces.

In the drug trade two large bottles are used:—

Corbyn.....	=40	fluid oz. (quart).
Winchester quart	=80	,, (½ gallon).

Water.

The British Ton is the weight of a cubic British Metre of pure water at the temperature of melting ice, very nearly. At present, the following relations hold good:—

Cubic inch	=	252·458 grains.
Gallon (277·274 cub. in.)	=	10 lb. (distilled).
Cubic foot	=	62·321 lb.
35·943 cubic ft. (224 gals.)	=	1 ton.

Water for Ships: Tun, 210 gals., Butt 110, Puncheon 72, Barrel 36, Kilderkin 18 gals.

Cisterns: A cistern 4 feet by 2½ and 3 deep will hold brimful 186·963 gallons, weighing 16 cwt. 2 qrs. 21·6 lb. in addition to its own weight.

Railway Gauges.

In Great Britain = 4 ft. 8½ in.
,, Ireland = 5 ft. 3 in.
,, U.S.A. = 4 ft. 8½ in.
The 4 ft. 8½ in. gauge is also used in Canada, France, Germany, Netherlands, Belgium, Denmark, Austria, Hungary, Italy, Switzerland, Sweden and European Turkey.
,, Australia:—
N.S.W. = 3 ft. 6 in. and 4 ft. 8½ in.
Victoria and South Australia = 5 ft. 3 in.
Queensland and Western Australia = 3 ft. 6 in.
,, New Zealand = 3 ft. 6 in.
,, India = 2 ft. 6 in.; 3 ft. 3⅜ in. and 5 ft. 6 in.
,, South Africa = 3 ft. 6 in.
,, Egypt = 4 ft. 8½ and 3 ft. 6 in.
,, Ceylon = 5 ft. 6 in.
,, Japan = 3 ft. 6 in.
,, Russia = 5 ft. 0 in.
,, Spain and Portugal = 5 ft. 6 in.
,, Asia Minor = 4 ft. 8½ in. and 3 ft. 5½ in.

A single track of 4 ft. 8½ in. gauge requires 12 ft. of roadway; a double track requires 23 ft. of roadway.

Electrical Measures.

It is customary to express electrical measurements in terms of the centimetre, the gramme, and the second (C.G.S. units), and the value of the units has been fixed by international agreement. The principal units are as follow :—

As a unit of resistance, the international *Ohm*, which is based upon the ohm equal to 10^9 units of resistance of the C.G.S. system of electromagnetic units, and is represented by the resistance offered to an unvarying electric current by a column of mercury at the temperature of melting ice, 14·4521 grammes in mass, of a constant cross-sectional area, and of a length of 106·3 centimetres.

As a unit of current, the international *Ampère*, which is one-tenth of the unit of current of the C.G.S. system of electro-magnetic units and which is represented sufficiently well for practical use by the unvarying current which, when passed through a solution of nitrate of silver in water, in accordance with a certain specification, deposits silver at the rate of 0·001118 of a gramme per second.

As a unit of electro-motive force, the international *Volt*, which is the E.M.F. that, steadily applied to a conductor whose resistance is one international ohm, will produce a current of one international ampère, and which is represented sufficiently well for practical use by $\frac{1}{1000}$ of the E.M.F. between the poles or electrodes of the voltaic cell known as Clark's cell at a temperature of 15° C., and prepared in the manner described in a certain specification.

As a unit of quantity, the international *Coulomb*, which is the quantity of electricity transferred by a current of one international ampère in one second.

As a unit of capacity, the international *Farad*, which is the capacity of a conductor charged to a potential of one international volt by one international coulomb of electricity. The unit generally used in practice is one-millionth part of this, or the microfarad.

As the unit of work, the *Joule*, which is 10^7 units of work in the C.G.S. system, and which is represented sufficiently well for practical use by the energy expended in one second by an international ampère in an international ohm. In practice the watt-hour is usually employed. It represents the work done by such a current in an hour, and equals 3,600 joules.

As the unit of power, the *Watt*, which is 10^7 units of power in the C.G.S. system, and which is represented sufficiently well for practical use by the work done at the rate of one joule per second. 746 watts = 1 horse-power, and the value of a Board of Trade unit (B.O.T.U.) is 1,000 watt-hours, or 3,600,000 joules, or 1½ horse-power hours.

As the unit of induction, the *Henry*, which is the induction in the circuit when the E.M.F. induced in this circuit is one international volt, while the inducing current varies at the rate of one international ampère per second.

Builders' Measurements.

Stock or kiln bricks.....	8¾ inches	×	4¼	× 2¾
Welch fire-bricks	9 ,,	×	4½	× 2¾
Paving bricks.....	9 ,,	×	4½	× 1¾
Square tiles.....	9¾ ,,	×	9¾	× 1
,, ...	6 ,,	×	6	× 1
Dutch clinker bricks ...	9¼ ,,	×	3	× 1½

A Rod of Brickwork 16½ feet × 16½ feet × 1½ brick thick = 306 cubic feet, or 11⅓ cubic yards, and contains about 4,500 bricks with about 75 cubic feet of mortar. The rod being 5 British metres, a rod of brickwork is 25 square metres 1½ bricks thick = very nearly 10 cubic metres.

Ordinary bricks weigh about 7 lb. each ; a load of 500 weighs about 1 ton 11 cwt. 1 qr.

A *Piece* of *machine* printed *Wall Paper* is 11½ yd. long and 21 in. wide ; of *hand* printed 12 yd. long × 21 in. wide. French wall papers are usually 9 yd. × 18 in.

Timber and Wood.

100 superficial feet = 1 square of flooring.
50 cubic feet of planks = 1 load.
42 do. timber = 1 shipping ton.
108 do. do. = 1 stack.
128 do. do. = 1 cord.

A standard hundred of deals contains 120 pieces. The Petrograd standard consists of 165 cubic feet, or 120 pieces 1½ in. × 11 in. × 12 ft., or 120 pieces 3 in. × 11 in. × 6 ft.

A Batten is not more than 7 inches wide ; a Deal not more than 9 inches ; Planks are 2 to 4 inches thick, and 10 inches and up in width.

To find the weight of a cubic foot, multiply 62·321 lb. by the specific gravity. To find the number of cubic feet in one ton, divide 35·943 by the specific gravity.

Weight of Cubic Foot and Cubic Yard.

A cubic foot of fresh water = 62½ lb. ; salt water 63½ lb. Timber—ash 49 lb. ; beech 43 lb. ; birch 49 lb. ; cork 15 lb. ; elm 36 lb. ; pine 41 lb. ; oak 59 lb. A cubic foot of clay weighs 125 lb. ; of loose earth 95 lb.

A cubic yard of anthracite coal, solid, weighs 2,160 lb. ; *bituminous* 2,025 lb. ; *cannel* 1,400 lb. A cubic yard of compressed hay = 225 lb. ; of hay in stack, 126 lb. ; of compressed straw, 145 lb. ; of straw in stack, 90 lb. ; of grain, 20 bushels.

Fish.

In Scotland, and at certain places in England and Wales at which the Cran Measures Act, 1908, has been put into operation, fresh herrings must be sold by the *Cran*, containing 37½ imperial gallons. In the Isle of Man and in Ireland herrings are sold by the *Maze*, which contains 5 long hundreds of 126 each. On the East Coast of England, at places where the above-mentioned Act is not in force, they are sold by the *Last*, which contains 13,200 fish. They are counted by the *Warp*, which is 4 fish. 33 Warps = 1 Long Hundred, 132 ; 10 Hundred = 1 Thousand, 1,320; 10 Thousand = 1 Last, 13,200. Cured herrings are sold in barrels, the capacity of which, in Scotland, must always be 26½ imperial gallons, or in half-barrels of 13½ gallons. Herring barrels or half-barrels must be of corresponding capacity in England and Wales if they are presented for the Government Brand at any place at which the Herring Fishery (Branding) Act, 1913, is in force.

A *Quintal* of fish (Newfoundland, &c.) is 100 lb. ; a barrel of anchovies = 30 lb. ; a "box of fish" is about 90 lb.

Geographical Measures.

The *North and South Poles* are two points at the opposite extremities of that diameter of the earth round which it revolves. The *Equator* is a great circle, equally distant from the North and South Poles. For geographical purposes, the surface of the earth is divided by circles, called the circles of Latitude and Longitude. The circles of *Latitude* are small circles parallel to the Equator. The circles of *Longitude* are great circles perpendicular to the Equator, and passing through the North and South Poles. These circles are divided into Degrees, Minutes, and Seconds. Degrees of Latitude are numbered from the Equator to the North and South Poles. Degrees of Longitude are numbered from the primary circle of Longitude, or Meridian, which passes through the astronomical observatory of Greenwich (England).

A *Geographical Mile* is the length of one minute of Latitude. If the earth was a sphere, every minute of Latitude would be of the same length ; but, as it is a spheroid, the length of a minute increases from 6,046 feet at the Equator to 6,108 feet at the Poles. The mean length of the geographical mile is 6,076·8 feet. The *Nautical Mile* is (strictly speaking) the length of a minute of the meridian, and is thus identical with the geographical mile. In practice, however, it is taken as the *Admiralty Knot* of 6,080 feet, divided into 10 cables, which are assumed to be 100 fathoms, or 600 feet.

The Polar diameter of the Earth is 7,899 English miles. The mean equatorial diameter is 7,926 miles. The circumference at the Equator is 24,902 miles.

NOTE.—The *normal* temperature of the *human body* is 98·4° F., or 37° (36·9°) C., or 29·5° R. *Freezing* point = 32° F. = 0° C. = 0° R. ; *Boiling* point = 212° F. = 100° C. = 80° R. "*Absolute Temperature* is Temperature reckoned from "*Absolute Zero*," which is at 273° C. below 0° C., 459·4° below 0° F., and 218·4° below 0° R.

Nautical Measures.

6 feet = 1 fathom.
100 fathoms = 1 cable length.
10 cables = 1 nautical mile.
60 nautical miles = 1 degree.

The assumed length of the cable is 600 feet (=182·87 *metres*), but it is strictly 606·97 feet (= 185 *metres*). The conventional Nautical Mile (the *Knot* in speed measurements) is 10 cables, assumed at 6,080 feet (strictly 6,069·7 feet), but the Nautical Mile is strictly the length of a minute of the meridian and differs according to latitude.

Ship Measurement.

The Ton-measurement of cargo was originally the space occupied by 4 hogsheads (= a Tun) of wine = 50 cubic feet. It is now 40 cubic feet, which is approximately the bulk of 4 quarters, or a short ton, of wheat.

The *Ton-register*, the unit of capacity of a ship, was originally the space occupied by a Last of 10 Quarters of wheat = 100 cubic feet. This cubic space is the Ton-register used by all maritime nations, 100 English cubic feet.

Gross tonnage is the sum in cubic feet of all the various enclosed spaces of a vessel, divided by 100.

Net tonnage is the gross tonnage *less* certain deductions on account of crew spaces, engine room, water ballast, and other spaces not used for passengers or cargo.

Dead-weight tonnage, or carrying capacity, is the number of tons (of 2,240 lb.) of cargo that a vessel is capable of carrying when charged to the load water line (*q.v.*).

Displacement tonnage is the number of tons of sea water displaced by a vessel when charged to the load water line (*q.v.*), *i.e.*, it is the *weight* of vessel and contents in tons.

Load-water-line is the line that would be made round the shell of a vessel when loaded as deep as the minimum freeboard regulations permit.

Draught is the distance in feet from the lowest part of the bottom of a vessel to the actual water line at which the vessel is floating. Thus the load-water-line marks the greatest, or loaded, draught of a vessel. A vessel without any cargo in her hold or passengers or their luggage aboard is said to be "light ship," or "light," or "in ballast."

Free Board is the distance from the main or upper deck to the load-water-line of a vessel. As a general rule the minimum free board provides an amount of reserve buoyancy that will keep a vessel afloat with two compartments holed.

Bells and Watches on Board Ship.

Bells.—Time is kept by means of a bell, which is struck every half hour. Anyone who, in an effort to terminate his watch prematurely, strikes the bell early, is accused of "warming the bell," an expression which has grown to include the doing of anything before the appointed time.

Watches.—For purposes of discipline, and to divide the work fairly, the crew is mustered in two divisions: the *Starboard* (right side, looking forward) and the *Port* (left). The day commences at noon, and is thus divided:—

Watch.	*Bells* (in ½ hours).
Afternoon	noon to 4 p.m., 1 to 8.
First Dog	4 p.m. to 6 p.m., 1, 2, 3, 4.
*Last or †Second Dog	6 p.m. to 8 p.m., 1, 2, 3, 8.
First	8 p.m. to midnight, 1 to 8.
Middle	midnight to 4 a.m., 1 to 8.
Morning	4 a.m. to 8 a.m., 1 to 8.
Forenoon	8 a.m. to noon, 1 to 8.

*Last = Royal Navy; †Second in Mercantile Marine.

This makes seven Watches, enabling the crew to keep them alternately, as the Watch which is on duty in the forenoon one day has the afternoon next day, and the men who have only four hours' rest one night have eight hours the next. This is the reason for having *Dog Watches*, which are made by dividing the hours between 4 p.m. and 8 p.m. into *two* Watches.

For TIME AT SEA *see* p. 78.

Speed of Ships.

The *Knot* is a measure of speed of ships. The following table shows the equivalents of 1 to 42 knots in land (statute) miles per hour:—

Knots.	Miles.	Knots.	Miles.	Knots.	Miles.
1	1·1515	15	17·2727	29	33·3939

Measures of Energy, &c.

In Physics the unit of force is the *dyne*, the amount that, acting for one second on one gramme mass, gives it a velocity of one centimetre per second. The British unit is the *poundal*, which in one second gives one pound a velocity of one foot per second. One *poundal* = 13,825·5 *dynes*. In Meteorology the unit of atmospheric pressure is the *Bar*, equal to the pressure of 1,000,000 dynes (1 megadyne) per sq. centimetre. The Meteorological *Bar* is thus 1,000,000 Chemical *Bars*.

Horse power is energy exerted at the rate of 550 foot-pounds per second; an alternative unit is the *kilowatt* (102 kilogram-meters per second)= 737·59 foot pounds per second.

Thermal Unit.—The British Thermal Unit (B.Th.U.) is the amount of heat required to raise one pound of water one degree Fahrenheit. The *Gas Therm* = 100,000 B.Th.U. If V = cu. ft. consumed, H=declared heat value of the Company's gas (in B.Th.U. per cu. ft.), P = cost of therm in pence, B=total bill in pence—then $B = V \times H \times P \div 100{,}000$, whence equivalent cost (in pence) per 1,000 cu. ft. $= B \times 1{,}000 \div V = H \times P \div 100$.

Yarn Measures.

Cotton and Spun Silk Count.—
Thread = 1½ yards.
Lea or Skein, *skn.* = 120 yards.
Hank, *hk.* = 7 Skeins, or Leas = 840 yards.
Spindle, *spdl.* = 18 Hanks.
Counts = the number of Hanks in 1 lb.
Bundle Hanks, either of 5 lb. or 10 lb.
Reels of cotton vary from 30 to 1,760 yards; they must be marked correctly.
Bundles of Cotton are chiefly made up for export.

Worsted Count.—Wrap, 80 yards: Hank = 560 yards = 7 Wraps; Counts or Numbers are the number of hanks in a lb.

Linen Count.—The Hank or Lea is 300 yards, and the number of these in 1 lb. is the count of the yarn. A Spindle is 48 hanks; a Bundle is 200 hanks.

West of England Count.—The Hank is 320 yards, and the number of hanks in 1 lb. is the count of the yarn.

Paper and Book Measure.

Writing Paper.

24 sheets = 1 quire.
20 quires = 1 ream.

Printing Paper.

516 sheets = 1 ream.
2 reams = 1 bundle.
5 bundles = 1 bale.

NOTE.—Books are usually bound up in sheets of 16 or 32 pages. Octavo books are generally printed 64 pages at a time (32 pages on each side of a sheet of quad); a crown octavo book of 320 pages will therefore require 5 sheets of quad crown, and a ream will provide 100 books, the odd 16 sheets being reckoned as waste. Newspapers (and books circulating in large numbers) are printed on rotary presses, for which the paper is supplied on reels (and not in cut reams). "Whitaker" is printed on a rotary press, 192 pages at a time, the paper being served to the press from a reel, and 6 sheets of 32 pages are delivered, printed and folded, at the opposite end of the press.

Sizes of Type.

All Founders cast their type to one uniform height ("type high"), which is 0.918 inch, though the letters may vary considerably in their breadth.

The type chiefly used in "Whitaker" is named *Nonpareil* (6 point). The column contains 75 lines, and is 12 Pica ems wide; on an average every column contains about 3,000 letters, or 600 words.

The Point System.—The basic unit in American (and many British) type foundries is the "point" of 0·013837 inch (72 points to the inch), and the names of the various types in the point system are added in parentheses.

Brilliant (3½ point). A column in the size of this in "Whitaker," if set in Brilliant would contain 124 lines, and about 7,500 letters.

METRIC WEIGHTS AND MEASURES.

See also "Double Conversion Tables for Weights and Measures."

In addition to the Imperial standard weights and measures, the use of the French or Metric system of weights and measures was made permissive in Great Britain in 1897.

In the Metric system, the standard of length is the METRE, the standard of weight is the KILOGRAM, and the standard of capacity is the LITRE. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade.

1.—MEASURES OF LENGTH.

10 millimetres	= 1 centimetre	= 0·3937013 inch.
	(*mm.*) (*cm.*)	
10 centimetres	= 1 decimetre	= 3·9370113 inches.
	(*dm.*)	
10 decimetres	= 1 METRE (*m*)	= 1·0936143 yards.
10 metres ...	= 1 dekametre	= 10·936143 yards.

10 dekametres	= 1 hectometre	= 109·36143 yards.
	(*hm.*)	
10 hectometres	= 1 kilometre	= 0·62137 mile.
	(*km.*)	

A kilometre is approximately *five eighths* of a mile, so that 8 kilometres may be regarded by pedestrians as 5 miles.

2.—MEASURES OF WEIGHT.

10 milligrams	= 1 centigram	= 0·15432 grains.
(*mg.*)	(*cg.*),

	(*hl.*)	

1 cubic cm. (water) = 1 gram; 1,000 cubic cm. (water) or 1 litre = 1 kilogram; 1 cubic metre (1,000 litres, 1,000 kilograms) = 1 metric ton.

4.—MEASURES OF LAND.

100 sq. metres	= 1 are (*a.*).....	= 0·0988 rood.
100 ares	= 1 hectare (*ha.*)=	2·4711 acres.
100 hectares	= 1 sq. kilometre =	0·38611 sq. mile.

NOTES.

1 hectolitre.....	= 2·75 bushels.	
1 hectolitre per hectare	= 1·11 bushels per acre.	
1 quintal	= 3·67 bushels.	
1 quintal per hectare ...	= 1·49 bushels per acre.	
1 franc a hectolitre	= 3·6*d.* a bushel (par).	
1 ,, a quintal	=	4·3*d.* a cental (par).

THE UNITED STATES.

The weights and measures of the U.S.A. are the same as those of Great Britain, with the following exceptions:—

Weight.—In the short ton of 2,000 lb., the Cental of 100 lb. takes the place of the Cwt. in the long ton. There are TWO tons, therefore, the long ton of 2,240 lb., the short ton of 2,000 lb.

Capacity.—For grain, the old bushel of 2,150·42 cubic inches; its gallon = 268·8 cubic inches. This is commonly called the Winchester bushel, though really of the slightly different London standard.

For liquids, the old wine-gallon of 231 cubic inches, five-sixths of the British gallon and = 58,317·8 grains of water. It is divided into 8 pints = 7,289·7 grains of water = 16·6 Imperial ounces. In medicine the pint is divided into 16 fluid ounces = 455·6 grains of water, and the ounce into 8 fluid drachms of 60 minims.

BRITISH DOMINIONS.

Australia and New Zealand.—*Same as* British.

Canada and Newfoundland.—*Same as* British but with *short* ton of 2,000 lb., as in U.S.A.

Channel Islands.

The weights and measures in use in the Channel Islands are those of Great Britain, the *cental* of 100 lb. being used as well as the *cwt.* of 112 lb. The *Old Island Measures* are as follows:—

	Vergée (Normandy rood)	Jersey.	Guernsey.
	= 0·44 acre	0·4 acre.	
Bushel.....	= 8·9 gallons	5·8 gallons.	
Pound	= 7,561 grains	7,623 grains.	
Cwt. .....(104 lb.) = 112·3 lb.		(100 lb.)= 108·9 lb.	

British India.

Ungul	= 0·75 inch.
Guz, usually 33 inches; also the yard.	
Koss	= 2,000 yards.
Bigha (Bengal)	usually = 0·625 acre.
Cawny (Madras)	,, = 1·33 ,,
Tola (rupee-weight).....	= 180 grains.
Chittak	= 2·0571 oz.
Seer, 16 chittak, or 80 tolas	= 2·0571 lb.
Maund, 40 seers	= 82·284 lb.

Seer (Liquid)	= 1·760 pints.
Candy ,, ...	= 500 lb.
Visham = 3 lb.; Dangali	= 3 pints.
Parah	= 15 gallons.
Catty (Singapore).....	= 1⅓ lb.
Pikul ,, ...	100 catties = 133 lb.

Irish Free State.—*Same as* British.

Malta.

Piede	= 11·166 inches.
Canna	= 2·2283 yards.
Libbra	= 12 oncia = 4886 Troy gr.
Rotolo	= 1·745 lb.

South Africa.

Money, Weights, and Measures.—The *Metric System* is compulsory in the case of chemists, and is permissible (along with British standard of weights and measures) in other cases. In addition, the following old Dutch measures are still used:—*Liquid Measure:* Leaguer=about 128 imperial gallons; half aum = 15½ imperial gallons; anker = 7½ imperial gallons. *Capacity:* Muid = 3 bushels. The general surface measure is *Morgen*, equal to 2·1165402 acres; 1,000 Cape lineal feet are equal to 1,033 British feet. The short ton of 2,000 lb. is used.

FOREIGN WEIGHTS AND MEASURES.

The *Metric System* has been adopted by the whole of Europe (except *Great Britain* and *Russia*) and is *permissive* in all countries.

China.

Tael weight	=	1·33 oz.
Catty ,,	=	1·33 lb.
Picul ,,	=	133·33 lb.
Ts'un	=	1·41 inches.
Ch'ih	=	1·175 feet.
Chang	=	11·75 feet.
Li	=	2,115 feet.

Egypt.

The *Metric System* of *Weights and Measures* and the foot and pound and their multiples, are legal in Egypt. The foot and pound are rarely used and the Metric System is little known except in the large towns.

The Weights and Measures in common use, with their British equivalents, are as follows :—

Length—

Dira Baladi (used for piece goods) = 29·83 inches
Dira Mamari, or Pic (used by architects) = 29·53 inches
Qasaba (used for agricultural land) = 11·65 feet

Area—

1 Qirat = 209·3 sq. yards
1 Feddân (= 24 qirats) = 1·038 acres

Capacity—

1 Kêla = 0·454 bushel
1 Ardeb (= 12 kêlas) = 5·444 bushels

Weight—

1 Rotl = 0·99 lb.
1 Oke = 2·75 lb.
1 Qantar (= 100 rotls) = 99·05 lb.

A *Qantar* of unginned cotton = 315 lb., of ginned cotton = 100 lb. ; an *Ardeb* of wheat = 150 *kilogrammes*, of barley = 120 *kilogrammes*, of beans = 155 *kilogrammes*, of maize = 140 *kilogrammes*, of whole lentils = 157 *kilogrammes*, of split lentils = 132 *kilogrammes*.

Greece.

1 ocque = 2·84 lb. 1 livre = 1·1 lb
1 quintal = 132·2 lb. 1 drachma = 0·11 oz.

Japan and Formosa.

The Metric System from July 1, 1924.

Old Japanese Measures.

Shaku (10 Sun)	=	11·931 inches.
Ken (6 Shaku)	=	1·9884 yards.
Ri	=	2·4403 miles.
Square ri	=	5·9553 sq. miles.
Cho	=	5·423 chains.
Square cho	=	2·4507 acres.
Tsubo	=	3·9538 sq. yards.
Liquid koku	=	39·7033 gallons.
Dry koku	=	4·9629 bushels.
Koku of capacity	=	0·1 ton.
Liquid sho	=	1·5881 quarts.
Dry sho	=	0·1985 pecks.
Kin (160 Monme)	=	1·3228 lb.
Kwan (1000 Monme)	=	8·2673 lb.

Russia.

The standard of length is the Sajen, which is equal to seven British feet; the standard of weight is the Funt = 0·90282 lb.

Length.

16 vershok	=	1 arshin
3 arshin	=	1 sajen.
500 sajen	=	1 verst.
1 verst	=	1166·66 yards (0·66288 mile).

Surface.

1 sq. vershok	=	3·0625 sq. inches.
1 sq. arshin	=	5·4444 sq. feet
1 sq. sajen	=	5·4444 sq. yards.
1 sq. verst	=	0·4394 sq. miles.

Weight.

1 zolotnik	=	65·8306 grains.
3 zolotnik	=	1 loth.
32 loth	=	1 funt.
40 funt	=	1 pood (36·1128 lb.)
10 poods	=	1 berkovatz

Capacity.

1 tcharka = 0·2164 pint.
1 shtoff (10 tcharkas) = 1·0822 quarts.
1 vedro (10 shtoffs) = 2·705 British gallons.
1 chetvert (8 chetveriks) = 5·771 British bushels.

Siam.

Niu	=	0·83 inch
Ru'p	=	10 inches.
Sen	=	44·4 yards.
Roeneng	=	2·525 miles.
Tael	=	936·25 Tr. gr.
Chang	=	2·675 lb.

Turkey.

Oke	=	400 drams = 2·8264 lb.
Batman	=	6 okes = 16·958 lb.
Cantar	=	44 okes = 124·3616 lb.
Cheki	=	280 okes = 508·752 lb.
Kileh	=	0·9120 bushel.
Muscal (Ess. of Rose)	=	1·5 drams = 74·171 grains.
Arshin (cloth)	=	26·96 inches.
Endaze	=	25·555 inches.
Arshin (land)	=	29·830 inches.
Deunum	=	1098·765 sq. yards.
Djerib (hectare)	=	2·47 acres.

OLD MEASURES.

Old British and Irish Measures.

Cubit	=	18 inches.
English Ell	=	45 inches.
Scottish Ell	=	37·2 inches.
Hand (horses)	=	4 inches.
Scottish mile	=	1,984 yards.
Irish mile	=	2,240 yards.
Scottish acre	=	6,150·4 sq. yards.
Cunningham acre	=	6,250 sq. yards.
Irish acre	=	7,840 sq. yards.
Cheshire acre	=	10,240 sq. yards.
Hide	=	120 acres (average).
Yard of land	=	¼ of a hide

Old French Measures.

Toise of 6 feet ; Foot = 12·789 in.
Aune (ell) of 4 Roman feet = 46·77 in.
League, 3,000 toises = 3·6 miles.
Perch, 22 feet or 6 aunes = 23·44 feet.
Arpent, 100 sq. perches = 1·26 acres.
Pound = 7,554 grains. Setier = 34·317 gallons ; Boisseau ($\frac{1}{12}$) = 2·86 gallons. Pinte = 1·76 pints.

Old Hebrew Measures.

Talmud Cubit = 21·914 in. ; Egyptian Cubit = 18·24 in.
Cubit of Ezekiel = 25·26 in. ; Reed = 151·6 in.
Kikkar (Alexandrian talent) = 50 minas of 60 shekels.
Shekel = ½ oz., of 8 gerah, or (Shekel of the Sanctuary) of 2 beka, 4 reba, 20 gerah.
Bath (fluid), Epha (corn) of 6 hin, 18 cab, 72 log = 6·477 British gallons.
Cor or Homer (10 ephas) = 8·351 bushels.

DOUBLE CONVERSION TABLES FOR WEIGHTS AND MEASURES.

NOTE.—The central figures in **heavy type** represent either of the two columns beside them, as the case may be. *Examples*:—1 centimetre = 0·394 inch and 1 inch = 2·540 centimetres. 1 metre = 1·094 yards and 1 yard = 0·914 metre. 1 kilometre = 0·621 mile and 1 mile = 1·609 kilometres.

EXAMPLE 1.—What is the present value of a Lease having 37 years to run of the net annual value of £100, interest being reckoned at 4 per cent.? ANSWER:—19·14 years' purchase, or £1,914.

EXAMPLE 2.—A man, aged 54, in the receipt of a pension or annuity of £100 a year net, wishes to commute that for a present payment, interest being reckoned at 5 per cent. How much will he receive? ANSWER:—Looking at the Table of Expectation of Life (q.v.), it will be seen that the expectation for age 54 is about 27 years; and from the above table an annuity certain for 17 years' interest at 5 per cent., is worth 11·27 years' purchase. The present payment required would therefore be £1,127 *approximately*.

Note to Example 2.—This method is only approximate. The values of annuities which depend on lives of a given present age, when properly calculated according to a given mortality table and a given rate of interest, are always somewhat less than those given by the method used in this example.

REPAYMENT OF PUBLIC LOANS.

Sums needed annually for the liquidation of a debt (principal and interest) of £100, at the stated percentage, in 5 to 80 years. If the loan be for £1,000, each annual instalment must be multiplied by 10, and so on. Thus, a Municipal Loan of £1,000,000 at 5 per cent., repayable in 80 years, would cost the ratepayers £51,031 5s. annually for that period, and would then be extinguished.

REDEMPTION OF CAPITAL BY ANNUAL PAYMENTS.

THE following are the rates charged by certain first-class Insurance Companies for "Redemption Policies," to secure the payment of £100 in return for so many annual premiums, *e.g.*, an Insurance Company will undertake to pay £100 on Midsummer Day, 1951, in return for the payment of £2 5s. 2d. on Midsummer Day, 1923, and each year afterwards until 1950, or 28 payments in all; for £1,000 the annual premium would be £22 11s. 8d., and so on. This table is of particular interest to purchasers of *Leasehold* property, as it enables such purchasers to see, at a glance, the amount to be paid out of the income from the property for a redemption policy to provide the sum originally expended (with a margin for dilapidations, if necessary), by the time the leasehold interest has expired.

THE RULE OF THE ROAD.

The Rule of the Road is a paradox quite,
For in driving your carriage along,
If you bear to the left you are sure to go right,
If you bear to the right you go wrong.

But in walking the streets 'tis a different case,
To the right it is right you should steer,
On the left should be left enough of clear space
For the people who wish to walk there.

THE RULE OF THE ROAD AT SEA.

1. *Two steamships meeting.*

When both side-lights you see ahead,
Port your helm, and show your RED.

2. *Two steamships passing.*

GREEN to GREEN, or RED to RED,
Perfect safety—Go a-head!

3. *Two steamships crossing.*

If to your starboard RED appear,
It is your duty to keep clear;
To act as judgment says is proper;—
To Port—or Starboard—Back, or Stop her.

But when upon your port is seen
A Steamer's starboard light of GREEN,
There's not so much for you to do,
For GREEN to Port keeps clear of you.

Both in safety and in doubt,
Always keep a good look-out;
In danger, with no room to turn,
Ease her—stop her—go astern.

When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year, less £1, must be taken. Thus, for £1 at 2½ per cent. for 25 years, take 26 years, £36·012, and deduct £1—£35·012.

METROPOLITAN PASSENGER TRAFFIC.

From the following figures it will be seen that nearly three thousand million journeys were made on the various vehicles and trains in the metropolitan area.

LONDON FLAG DAYS.

Since the time when accounts were first insisted upon upwards of £1,539,000 has been collected for various charitable objects at an administrative expense of, approximately, 12½ per cent. Of the total amount available for charities a large proportion has gone to hospitals, which in 1922 benefitted to the extent of £109,787, as against £53,550 in 1921. Of a total of £196,613 raised in 1922, £179,933 was collected, and donations amounted to £16,680. Expenses absorbed £25,502, leaving a balance for distribution of £171,111, or approximately 87 per cent.

GEOGRAPHICAL DISTRIBUTION.—The British Empire occupies over one-quarter of the known surface of the globe, and its population exceeds one-quarter of the estimated number of the human race. The total area is distributed almost equally over the Northern and Southern Hemispheres, but more than two-thirds lie in the Eastern and less than one-third in the Western Hemisphere. The distribution of the surface over the Northern and Southern Hemispheres causes a complete alternation of the seasons, one half of the Dominions enjoying summer while the other half is under winter conditions. In spite, however, of the uneven distribution east and west, daylight and darkness are almost equally divided, on account of the position of Australasia near the limit of east and west.

ETHNOLOGY.—By far the greater portion of the Empire lies within the temperate zones and is suitable for white settlement, the tropical areas being Southern India, West, East and Central Africa, parts of the West Indies, British Guiana and Honduras, Northern Australia, Borneo, and the various settlements in the Malay Peninsula. The estimated white population of the Dominions in 1911 was 60,000,000, mainly British and Irish, but partly French, Dutch, and Spanish. The remaining 370,000,000 include 315,000,000 of the native races of India and Ceylon, 40,000,000 black races, 6,000,000 Arabs, 6,000,000 Malays, 1,000,000 Chinese, and 1,000,000 Polynesians, with various other elements, including 100,000 "Red Indians" in Canada.

RELIGIONS.—Of the total population over 210,000,000 are Hindus, 100,000,000 Muhammadans, 80,000,000 Christians (67,000,000 Protestants, 13,000,000 Catholics), 12,000,000 Buddhists, 12,000,000 Animists, 4,000,000 Sikhs, Jains and Parsees, 750,000 Jews, and the remainder Polytheists and Idol worshippers.

CONSTITUTION AND GOVERNMENT.—There is no fundamental law upon which the Constitution of the British Empire rests, but there are three main principles underlying its administration, viz., self-government, self-support, and self-defence. The first of these principles has been applied for many years, and is fully developed in the case of Canada, Newfoundland, Australia, New Zealand, the Union of South Africa, and the Irish Free State. The second principle is equally developed, almost every unit being financially self-supporting, and few requiring aid from the central Government. The third principle is of modern growth, and may be said to be the outcome of the *Imperial Conference*.

SELF-GOVERNMENT. — (1) *Great Britain.*— The Constitution recognises certain great principles, including the fair administration of justice, the prohibition of taxation without the consent of the people, and a limited monarchy, the power of the monarch being, in effect, wielded by a Ministry supported by a majority of the House of Commons, the members of which House are elected on a wide franchise, exercised by electors of both sexes. The component parts of the British Government are the King; the Legislature (House of Lords and House of Commons); the Executive, appointed by the Sovereign and responsible to Parliament and the Judicature.

(2) *The Indian Empire.*—India is governed by the King as Emperor, acting on the advice of the Secretary of State for India, who is assisted by a Council whose members are appointed by the Secretary of State. The latter is responsible to, and represents the authority of, Parliament. Subject to the Secretary of State's direction, the supreme executive authority in India is the Governor-General and his Executive Council, with a legislature of two houses, the Council of State of 60 members (of whom not more than 20 are government officials), and the Legislative Assembly of 144 members (26 official and the remainder elected).

(3) *Imperial Dominions.*—All British Dominions are subject (except as regards taxation) to the legislation of the British Parliament, but no Act of Parliament affects a Dominion unless that Dominion is specially mentioned. If the legislature of a Dominion enacts a law which is repugnant to an Imperial law affecting the Dominion, it is to the extent to which it is repugnant absolutely void. Dominion legislatures may be controlled by the refusal of the Governor's assent to any measure passed; by reservation of a measure for the consideration of the Crown, and refusal of the Crown's assent; by a suspensory clause and the refusal of the Royal assent. Subject to such control the parliament of a self-governing Dominion exercises within its borders all the ordinary powers of a sovereign assembly. The Imperial Dominions may be divided into four classes, according to the way in which they are governed:—

(a) *Those having responsible government, i.e.* "Dominion Status." The executive is entrusted to political chiefs who are responsible, not

merely or mainly to the Crown, but to the elected legislature. The Dominions thus governed are the Irish Free State, Northern Ireland, Canada, Newfoundland, Australia, New Zealand, and the Union of South Africa. Malta, Southern Rhodesia and Northern Rhodesia have "responsible government," but certain powers are reserved.

(b) *Where there is government by legislative assembly wholly or partly elected, and an executive council nominated by the Crown or the Governor representing the Crown.* In this class may be placed the Bahamas, Barbados, Bermuda, British Guiana, Jamaica, Leeward Islands, and Mauritius.

(c) *Where there is government by a Governor acting with an executive and a legislative council, the councils being nominated by the Crown or a Governor representing the Crown.* Dominions so governed include Ceylon, Falkland Islands, Fiji, Gambia, Gibraltar, Nigeria, St. Vincent, Sierra Leone, Straits Settlements, Tanganyika, Trinidad.

(d) *Wherein both legislative and executive powers are vested in the Governor alone.* In this class are Labuan and St. Helena, where power is also reserved to the Crown to legislate by Order in Council. In South Africa, Bechuanaland, Basutoland, and Zululand are governed in substantially the same way, but no power is reserved to the Crown.

(e) *Protectorates.* The protectorates are countries which, as regards their foreign relations, are under the exclusive control of the Crown: The protectorates of the British Empire include Kenya, Nyasaland, Somaliland, Swaziland, Uganda.

(f) *Spheres of Influence.* A sphere of influence may be described as an area wherein other Powers undertake not to attempt to acquire influence or territory by treaty or annexation; such British spheres exist in the Persian Gulf and in Arabia. In addition to the Spheres of Influence are

(g) *Mandatory Spheres*, where the responsibility for securing good government and a reasonable development of natural resources is confided to an already established government by mandate from the League of Nations. Such British spheres are parts of the former German Colonies in West Africa, and the former Turkish governments of Palestine and Mesopotamia.

SELF-SUPPORT.—With but few exceptions the British Dominions are self-supporting, revenue being raised locally to meet the expenditure. Occasional grants are made by the Central Government to meet exceptional expenditure, or in aid of administration in the earlier stages of development. Certain capital expenses are also undertaken from time to time by the Central Authority, *e.g.*, the Nigerian purchase, the Uganda Railway, &c. No taxes are imposed on the subjects of a Dominion or Colony by the Central Government, as such subjects are not directly represented in the British House of Commons; this principle, "No taxation without representation," was the mainspring of the revolt in the North American Colonies at the close of the eighteenth century. Since that disastrous attempt to impose taxes without the consent of the taxpayers, the principle, which had for many years been accepted in Great Britain, has become an accepted maxim of British Overseas administration.

SELF-DEFENCE.—The Dominions, generally, provide for the defence of their immediate area, but the general strategical defence of the Empire is undertaken by the Central Government. Questions affecting general strategical defence are considered and determined by the *Imperial Defence Committee*, which co-ordinates the work of the sea, land and air forces. In the Great War of 1914–1918 the Dominions provided Armies or Contingents, which fought in every area and bore a full share of the sacrifices by which victory was achieved. The land and air forces of the Dominions are maintained at the expense of the Dominions concerned.

The contribution of the Dominions to *Naval Defence* takes the form of maintenance of their own naval forces and establishments by the governments of Canada, Australia, New Zealand and Union of South Africa, and of contributions to Imperial Defence by the governments of Hong Kong, Straits Settlements, Ceylon and Mauritius. Hong Kong also provided the sum of £130,000 towards the cost of the Singapore base, the site of which was provided by the Straits Settlements. The Naval Estimates 1925-26 of Canada provided the sum of $1,400,000; of Australia £3,921,145; of New Zealand £538,335; and of the Union of South Africa £139,893. The naval expenditure of the United Kingdom in 1925-26 was £60,500,000.

THE IMPERIAL CONFERENCE.—The origin of the Imperial Conference may be traced to the presence in London (in 1887) of the Premiers of the various self-governing Dominions, representing their nations at the celebrations of the Jubilee of Queen Victoria. Similar gatherings took place in London in 1897, 1902, 1907 and 1911, and in 1907 the title of "Colonial" Conference was changed to Imperial Conference. At the earlier meetings the Colonial Secretary presided, but with the change of title additional importance was given to the assembly by the assumption of the Presidency by the Prime Minister of Great Britain. In 1917 and 1918 the Conference, which was held concurrently with the sessions of the Imperial War Cabinet, was called the Imperial War Conference, and was held under the Chairmanship of the Secretary of State for the Colonies. In 1921, the *Premiers' Conference*, under the Presidency of the Prime Minister of Great Britain, discussed all matters of general interest to the Empire as a whole. The constitution of the Conference, which again met in 1923 and 1926, is as follows:—*President*, The Prime Minister of Great Britain; *Chairman* (*in the absence of the President*), The Secretary of State for Dominion Affairs; *Members*, The Prime Ministers and other Ministers of Canada, Australia, New Zealand, Union of South Africa, the Irish Free State, and Newfoundland, the Secretary of State for India and other representatives of India. The Secretariat of the Conference is provided by the Governments represented.

THE LEGISLATURE.—The Parliament of Great Britain is the supreme legislative authority of the Empire. This Parliament has, with the consent of the King-Emperor, delegated its legislative authority to other parliaments constituted by itself, while retaining a general supervision of Imperial affairs. The Secretary of State for the Colonies is a Cabinet Minister, his active participation in the government of the nations of the Empire varying with the measure of self-government accorded to them. Parliament also exercises a control over Indian affairs through a Secretary of State.

THE JUDICATURE.—The Supreme Judicial Authority of the Empire is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and from the Courts of India and every British Dominion. The Committee (*see* p. 228) consists of such members of the Privy Council as have held or are holding high judicial office, provision being made for the inclusion of representatives of India and the self-governing Dominions. India and the Dominions have each a judicial system, with judges appointed by the Crown. The Supreme Judicial Authority for Great Britain and Northern Ireland is the House of Lords.

EDUCATION.—Educational systems, on a more or less uniform plan, are developed throughout the Empire under the control of the respective governments. Universities and University Colleges have been established and degrees are conferred. Under the will of Cecil Rhodes scholarships were founded at Oxford, his old University, for students from the British Dominions and Colonies, the United States of America, and the German Empire. The German scholarships were abolished by Act of Parliament in 1916, and re-allocated to various parts of the British Dominions, while the trustees have from time to time created other scholarships as the funds in their hands permitted. *Rhodes Scholarships* are awarded in each of the United States, in each State or Province of Canada, Australia and South Africa (where there are also scholarships for Rhodesia and for certain towns and schools in Cape Colony), in New Zealand, Newfoundland, Jamaica, Bermuda and Malta. They are of the annual value of £400, and are tenable at any College in Oxford. The normal number of Rhodes scholars in residence together is about 193, of whom 97 come from the British Empire and 96 from America. *Secretary to the Rhodes Trustees*, F. H. Kerr, C.B., 27, Waterloo Place, London, S.W. 1. *Oxford Secretary*, F. J. Wylie, M.A., 9, South Parks Road, Oxford.

Statistics issued by the Universities Bureau of the British Empire show that the *total* number of students from overseas attending Universities and Colleges in the United Kingdom is 4,131, of whom 2,191 are from Africa, 764 from America, 1,401 from Asia, 542 from Europe, and 253 from Australasia. The principal figures are: India, Burma, and Ceylon, 1,094; South Africa and Rhodesia, 803; United States, 402; Egypt, 298; Australia, 160; Canada and Newfoundland, 157; West Indies and Bermuda, 130; China, 119; Russia, 92; New Zealand, 90; France, 52; Japan, 51; Switzerland, 43; Rumania, 38; Greece, 37; Netherlands, 35; Denmark, 33; Norway, 32; Spain, 32; Poland, 21.

In 1923 the *Davison Scholarships* to enable 3 Undergraduates from Oxford and 3 from Cambridge to attend the Universities of Harvard, Yale and Princeton, U.S.A., were founded by Mrs. Henry P. Davison of New York, U.S.A. *Secretaries of the Selection Committee*, A. C. Jacobs, Oriel College, Oxford; A. L. Goodhart, Corpus Christi College, Cambridge.

Under *The Commonwealth Fund* (1, East 57th Street, New York, U.S.A.), established in 1918 by Mrs. Stephen Harkness, 20 Fellowships, of the annual value of $3,000 each, are tenable for two years at certain American Universities by British graduate students of either sex, unmarried, and not over 30 years of age.

FINANCE.—Complete financial autonomy is enjoyed, in fact, by all British Dominions, and customs tariffs are in most cases the principal source of revenue. Until the close of the War of 1914-1918 the tariff of the United Kingdom was imposed without distinction on foreign and Imperial merchandise, but recent legislation foreshadows a general change of fiscal policy. The tariffs of the self-governing Dominions are generally lower for merchandise of British origin than for importations from foreign countries. There is no Imperial Debt, but certain obligations of Crown Colonies and Protectorates are met in the early stages of their development by the central Government, and occasional grants in aid of revenue are also made at need.

PRODUCTION.—Canada, India, Australia, and Great Britain are the principal wheat-producing units, and Mesopotamia (with irrigation) has great potentialities. Barley, oats, rice and maize, and tea, coffee and rubber are largely cultivated, while more than half the world's output of cocoa was produced in British Dominions. Cane sugar is produced in India (for local consumption), West Indies, Australia, New Zealand, Natal, and Mauritius, and beet sugar in Canada and elsewhere. Australia and New Zealand are the greatest wool-producing countries of the world, and the output of coal in Great Britain exceeds that of every country except the U.S.A.; coal is also abundant in Australia, Canada, India and South Africa. Cotton is extensively grown in India, West Africa, East Africa, Sudan, West Indies, and in the tropical parts of Australia, but of the 11,725,521 centals imported in 1921 only 500,000 centals came from British Dominions. In 1921 the imports of chemical and mechanical wood pulp for paper-making amounted to over 590,000 tons, but Canada produced half as much again, her product being largely sent to the United States, while Newfoundland sent 26,838 tons to Great Britain. Iron ore is found in many of the Dominions, and pig iron is largely produced; tin is produced mainly within the Commonwealth (particularly in the Malay peninsula), while 70 per cent. of the world's supply of gold is drawn from South and South-West Africa, Australia, New Zealand and Canada; it is produced also in Borneo, British East Africa, British Guiana, Ceylon, India, Malay States, Sarawak, Sudan, and West Africa.

Precious stones are found in various parts of the Commonwealth, South Africa producing the principal supply of diamonds, and India of rubies and emeralds. Petroleum is produced in India, Trinidad and Canada, and there are vast resources available at Mosul (Mesopotamia) and in the neighbourhood of the Persian Gulf.

SHIPPING.—On June 30, 1926, there were 10,846 vessels (over 100 tons) flying the British flag, of which total 8,369 (19,399,797 gross tons) were registered in Great Britain and Ireland, and 2,477 (2,870,327 gross tons) in other parts of the British Empire. These figures include 9,923 steam and motor vessels of 21,952,460 tons, and 923 sailing vessels of 317,664 tons. In the Great War of 1914-1918 there were lost through enemy action 2,774 merchant vessels of 9,538,918 gross tonnage; of this total 2,197 (7,638,020 tons) were *British*, 238 (696,845 tons) *French*, 230 (742,365 tons) *Italian*, 29 (120,176 tons) *Japanese*, and 80 (341,512 tons) *U.S.A.*

Nationality of Emigrants.—In 1913 the number of *British and Irish* Emigrants was 389,394, of whom 271,756 were *English*, 5,040 *Welsh*, 68,202 *Scottish*, and 44,396 *Irish*; in 1923 the total number of *British and North Irish* Emigrants was 256,284, of whom 140,891 were *English*, 4,529 *Welsh*, 88,584 *Scottish*, and 22,280 *North Irish*.

CENSUS POPULATION OF GREAT BRITAIN AND IRELAND.

Previous to 1801 there existed no official return of the population of either England or Scotland; nor was it till 1813 that statesmen had anything more than surmise to guide them respecting Ireland, and the census then taken of that country was far from correct. The estimate formed of the English population at various periods, calculated from the numbers of baptisms, burials, and marriages, was in the years—

1570	4,160,221	1670	5,773,646
1600	4,811,718	1700	6,045,008
1630	5,600,517	1750	6,517,035

The first general *Census* of Great Britain and Ireland was taken in 1801, and since the time named there has been a fresh numbering every ten years, with the following results:

1801	16,345,646	1871	31,845,379
1811	18,509,116	1881	35,241,482

*** The population of Great Britain and Ireland a month before the outbreak of the Great War was officially estimated at 46,089,249. The number of persons to the square mile was in 1921: England and Wales, 649; Scotland, 164; Ireland (1911), 135·6.

CENTRAL GOVERNMENT.

THE BRITISH CONSTITUTION.—The British Constitution is mainly unwritten and customary, but its development is marked by certain outstanding and fundamental laws, of which the principal are *Magna Carta* (1215), which secured annual parliaments and the equal administration of justice; the *Habeas Corpus Act* (1679), securing the liberty of the person; the *Act of Settlement* (1701), providing for the Protestant succession to the throne; the *Act of Union with Scotland* (1707), the *Act of Union with Ireland* (1800), the *Parliament Act* (1911), which enabled the Commons to pass certain Acts without the concurrence of the other chamber; the *Government of Ireland Act* (1920), and the *Irish Free State (Agreement) Act*, 1922.

The constituent parts of the British Constitution may be thus briefly described:

1. *The Sovereign.*—The throne is hereditary in the British house of Windsor with mixed succession, the sons of the Sovereign and their descendants having precedence of daughters, but daughters and their descendants preference over lateral lines. The Monarchy is constitutional and limited. The King has a right to veto Bills passed by both Houses of Parliament, but in practice his veto is almost obsolete. "The King can do no wrong" is a maxim of the Constitution, and consequently no action for civil wrong will lie against the Crown. A petition of right will, however, enable an injured subject to obtain redress, while, if in the administration of an Act of Parliament a Government department exceeds its rights, a declaration of right may be obtained in an action against the Attorney-General.

2. *The Legislature.*—Parliament consists of two Houses, the Lords and the Commons.

(*a*) *The House of Lords* consists of peers. A peer may hold his seat by (1) hereditary right, (2) creation by the King, (3) official position or election. English bishops (24), Irish peers (28) elected for life, and Scottish peers (16) elected for duration of Parliament, also sit in the House of Lords.

The powers of the House of Lords were much restricted by the Parliament Act, 1911. Thus, if a Money Bill is not passed unamended by the House of Lords within a month of its being sent up, it becomes law upon the Royal assent being signified. A Public Bill other than a Money Bill will become law without the consent of the Lords if it is passed by the Commons, and sent up to the Lords, in three successive sessions, provided two years elapse between the date of the second reading in the Commons in the first session and the date when it is passed by that body in the third session. Passing a Bill with amendments by the House of Lords is equivalent to rejection, unless the Commons approve the amendments. Any Bill by which the maximum duration of Parliament is increased is excepted from this Act. Members of the House of Lords are unpaid.

(*b*) *The House of Commons.*—This body consists of 615 members, elected by the registered male and female electors in county, borough, and university constituencies. Roughly speaking, about one-third of the population are electors. The maximum duration of Parliament is five years. Members of the House of Commons receive annual salaries of £400 and travelling facilities over the railways to and from their constituencies.

3. *The Executive.*—The Crown (the King in Council) "makes peace and war, issues charters, increases the peerage, is the fountain of honour, of office, and of justice." The *Cabinet*, under the presidency of the Prime Minister, consists of Ministers, drawn from the ranks of the party in power and appointed by the Sovereign on the advice of the Prime Minister; Ministers receive salaries of varying amounts (*see* page 156). The Cabinet has no corporate existence. Ministers are severally responsible to Parliament for their actions, and the Cabinet as a whole is responsible to Parliament for its joint and several administration. Ministers hold their office during the Sovereign's pleasure; they may be dismissed at any moment.

4. *The Judicature.*—(*a*) *England and Wales.*—The laws in England and Wales are administered by judges appointed by the Crown, who hold office for life, and cannot be removed save on petition presented by both Houses of Parliament. Two Courts of Appeal hear appeals from the High Court, the ultimate Court of Appeal from all the courts in Great Britain being the House of Lords. Civil cases arising in London and Middlesex are tried at the High Court in London, but civil cases arising in the country are tried on circuit by judges of the King's Bench (Assizes). The Chancery division has exclusive jurisdiction to try certain classes of actions. To the County Courts is relegated the duty of trying actions where the sum in dispute does not exceed a certain amount. The County Courts, too, have jurisdiction to try cases arising under certain special Acts of Parliament, *e.g.*, the Workmen's Compensation Act. Bankruptcy cases arising in London are heard in the London Bankruptcy Court; those arising out of London are dealt with in the County Courts.

With regard to criminal law it is a general principle that, except for certain minor offences, every person charged is entitled to be tried by a jury. Courts of criminal jurisdiction in England are: (1) The judges of the High Court sitting at Assizes for the trial of cases out of London; and at the Central Criminal Court ("The Old Bailey," *see* p. 369) for the trial of cases arising in and around London. (2) Courts of Quarter Sessions, holden for every county, and formed of justices of the peace, presided over by a chairman who is unpaid. The recorders of certain cities and boroughs have a jurisdiction similar to that of courts of Quarter Sessions. (3) Courts of Petty Sessions, consisting of at least two justices of the peace or a stipendiary magistrate. (4) *The Court of Criminal Appeal* has power to hear appeals against convictions and sentences.

(*b*) *Scotland.*—Scots civil law is administered by the Court of Session, which is a court of law and equity. The High Court of Justiciary is the supreme criminal court in Scotland. It consists of all the judges, and as a rule it is confined to the trial of serious cases. The Sheriff of the county (*see* p. 235) exercises functions which correspond to those of the English County Court Judges and the Chairmen of Quarter Sessions. Burgh magistrates and justices of the peace have jurisdiction in petty cases.

(*c*) *Northern Ireland.*—The higher courts in Northern Ireland are very similar to the English courts, but the County Court Judges are also the Chairmen of Quarter Sessions.

LOCAL GOVERNMENT.

Local Government is carried out under the central control of the Ministry of Health (which superseded the various Local Government Boards in 1919). The subjects which local bodies administer are, *inter alia*, the poor law; the laws relating to public health; the maintenance of the police; the control of the sale of intoxicating liquors; the provision of lunatic asylums. Local authorities also have to administer and carry into effect the laws as to elementary and other schools. The ruling principle has been to entrust special interests to those specially interested. In England and Wales there are elective Councils for each County (under Chairmen), for each City and County Borough (under Lord Mayors or Mayors), and for Urban and Rural Districts (under Chairmen), every parish being thus included. Scotland has elective County Councils under a Convener, Burgh Councils under a Lord, Provost or Provost, or Parish Councils with Chairmen.

POLICE.

The strength of the Police force was 56,945 in England and Wales (1924), and 6,528 in Scotland (1924). The Police of England and Wales are administered by the Home Office, those of Scotland by the Scottish Office. The LONDON POLICE consists of the City Police and of the Metropolitan Police. The *City Police* district comprises an area of 675 statute acres, and contains two courts of justice, those of the Guildhall and Mansion House, where the Lord Mayor and the Aldermen are the magistrates (*see* p. 231). Although the area is comparatively small, the rateable value is enormous, and there are 19,657 night residents. The Force comprises 1 Assistant Commissioner, 3 Superintendents, 6 Chief Inspectors, 25 Inspectors, 17 Sub-Inspectors, 125 Sergeants, and 984 Constables; also 19 Constables on private service duty.

The *Metropolitan Police* district embraces an area of 447,626 statute acres, with a population of about seven and a half millions. There are within this area fourteen Police Courts (*see* p. 232). The Force on Oct. 1, 1925, consisted of 35 Superintendents, 664 Inspectors, 2,999 Sergeants, and 16,738 Constables, making a total of 20,436, with 279 horses. The strength of the Metropolitan Special Constabulary Reserve and its Auxiliary Force on Sept. 26, 1925, was 9,342. The gross expenditure of the Metropolitan Police and Metropolitan Police Courts for the year 1924–25 was £7,427,075. On March 31, 1925, there were 12,074 Police pensioners, and 597 pensioned widows and 272 children.

LOSSES FROM FIRE.

The annual cost of fire defence in Great Britain may be estimated at about £25,000,000. The average annual direct loss from fire in Great Britain is about £12,000,000. In the United States it is estimated to have exceeded £100,000,000 in 1922. The number of fires attended by public fire brigades in Great Britain is about 22,500 per annum, varying from 77 per 100,000 population in London to half that figure in other large cities and urban districts. The average for England and Wales is 56 per 100,000 population, and 83 per 100,000 population in Scotland. The cost of public fire brigades in Great Britain amounts in the aggregate to about £2,000,000 per annum, and varies from the produce of a 3*d.* rate in London to the produce of a halfpenny rate in an urban district.

* Budget Estimate.

THE BUDGET, 1926-1927.

The Budget of Great Britain for 1926-1927 was introduced on April 26, 1926, by the Chancellor of the Exchequer (Mr. Churchill). The financial year 1925-1926 ended with a realized deficit of £14,038,120, and the estimated revenue for 1926-1927 showed an estimated surplus of £4,109,000, after allowing for certain changes in taxation.

Summary of Changes.

New Taxes.

Tax on Betting.—A duty of 2 per cent. on the course and 3½ per cent. in offices from Nov. 1, 1926, on legal bets made with a Bookmaker; a duty of £10 on certificates to be taken out by Bookmakers, and a duty of £10 on the registration of each set of premises used by a Bookmaker for receiving bets on credit. Relief for bets laid off and bets for any reason void.

Motor Charabanes, &c.—Duties on hackney motor vehicles made uniform in all districts chiefly at the higher Metropolitan scale up to those seating 40 persons; a considerable increase on the heavier vehicles. Commercial goods vehicles of one to two tons and upwards, and tractors and road locomotives of two to four tons and up, to pay higher duties. Vehicles in the last category used for agricultural haulage not affected. Owing to the difficulties of substituting a motor spirit tax for the present licence duties, proposals cannot be made in the present Budget, but Mr. Churchill hopes to make the change in the lifetime of the present Parliament. Extension of Customs duty to commercial motor vehicles.

Variations in Customs and Excise Duties.

Beer.—Credit periods to brewers for payment of excise duty reduced from three to two months.

Wrapping Paper.—A duty on imports from May 1 at 16⅔ per cent. *ad valorem*; preferential rebate of one-third for Empire goods

Chicory.—Excise duty on home-grown chicory repealed.

Key Industries.—Duty at the present rate of 33⅓ per cent. *ad valorem* to continue for further ten years, except that the rate on optical glass and elements and instruments is to be 50 per cent. *ad valorem* and the rate on arc lamp carbons 1s. per lb. Certain extensions of duty from May 1. Works of art, more than 100 years old, to be free of duty.

Dumping.—Dumping (*i.e.* hurried clearances of imports to avoid coming taxation) to be stopped by making new duties applicable from date of introduction.

Imperial Preference.—The principle of a ten years' guarantee to be extended to all the articles now enjoying Imperial Preference.

Income-Tax and Excess Profits Duty.

Income-Tax.—The three years' average for Schedule D of the income-tax to be abolished and that schedule to be founded exclusively on the preceding year. This will come into operation in 1927.

Excess Profits Duty.—To be repealed.

GAME AND GUN LICENCES.

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springes ; proprietors, or tenants, on enclosed land, killing rabbits ; persons hunting deer, or hares, with hounds ; owners or occupiers, or their servants, killing deer on their own enclosed land ; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorise others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence. Sailors, soldiers, territorial soldiers, or constables, on duty, or at practice, need not take out a gun licence, nor need occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he cannot authorise any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits. The rates of duty are as follows :—

GAME LICENCES, if taken out after 31st July and before 1st Nov., to expire on 31st July following.....	£3 0 0
After 31st July, to expire following 31st October	2 0 0
After 31st Oct., to expire 31st July ...	2 0 0

Game-Dealer's Licence, to expire 1st July, annually	2 0 0
DEPUTATION or Appointment of a Gamekeeper	0 10 0
GUN LICENCES (gun or pistol).....	0 10 0

Payment is now rigidly enforced, even to the carrying of a revolver or air gun. Persons holding game licences, soldiers and volunteers carrying a gun in the performance of duty or when engaged on target practice are exempt ; but the licence cannot be transferred to a son or to a servant. Expire 31st July.

Estate Duty in respect of agricultural property is to be charged in part on agricultural value at the rates set out in the Finance Act, 1919, in lieu of the above rates.

Gifts made by deceased during his life for public or charitable purposes, are charged, unless made more than twelve months before death; other gifts are charged, unless made more than three years before death; gifts made in consideration of marriage, or as part of deceased's reasonable normal expenditure, excepted. Gifts not exceeding £100 in value or amount also excepted.

Payment of Estate or Succession Duties may, by agreement with the Commissioners, be made, wholly or in part, in the form of real or leasehold property comprised in the estate.

Small estates up to £300 and £500 gross are charged, at the option of the accounting parties, either by the preceding scale or with fixed duties of 30*s.* and 50*s.*, and are exempt from all other death duties.

Interest at 4 per cent. per annum is also payable on the Estate Duty on personalty from the date of the death up to that of delivery of the affidavit or account.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, and that on certain annuities may at option be paid in four yearly instalments, and 4 per cent. interest is charged on all unpaid portions of duty in these cases from twelve months after death.

INCOME TAX.	In the £		
The tax is chargeable under five Schedules, A, B, C, D, and E, and the standard rate for the year 1926–27 is	0	4	0

Schedule A: Lands, Tenements, &c.

Owner must allow deduction from next payment of rent when tax paid by tenant.

Relief is given in certain cases in respect of Income Tax under Sch. A to the extent of ⅓ part of the assessment in the case of lands, and in the case of houses, where the amount of the assessment—

Does not exceed £40 ..... ¼
Exceeds £40, but not £100 ... ⅓
Exceeds £100 ..... £20 plus ⅙ of amount in excess of £100

Allowance to Owners of Land and Houses, for average cost of maintenance, repairs, insurance and management, may be claimed in addition. Five years' average taken.

A Clergyman or Minister using part of his house mainly for his duties may obtain an allowance not exceeding the tax on one-eighth of the rent, or annual value.

Schedule B: In respect of the Occupation of lands used for the purposes of husbandry only, or mainly for those purposes, on an amount equal to the Annual Value; *or*, by special request, if made before 5th June (5th August in Scotland) in the current income-tax year, on *profits* of husbandry, as in case of Trades, under Schedule D. In the case of all other lands on an amount equal to one-third of the annual value.

Schedule C: Dividends or Annuities from public revenue (Government Stocks, &c.)

Schedule D: Trades, Professions, Remittances from Abroad, Interest, &c.

Schedule E: Salaries, pensions, and other emoluments of Officers of Army, Navy, Civil Service, Ecclesiastical Bodies, Corporations, Public Companies, &c.

LIFE INSURANCE.—Allowance of duty may be claimed on the amount of premiums paid for insurance of self or wife in approved Companies legally carrying on business in the United Kingdom, if not exceeding one-sixth of the net personal income; but the amount allowable in respect of any premium for securing a capital sum on death not to exceed 7 per cent. of the actual sum assured, nor in respect of any premium for securing any other benefits, more than £100 in all.

RESIDENTS ABROAD.—No exemption or other relief is given to persons not residing in the United Kingdom. *Exceptions:* British subjects, present or former servants of the Crown, widows whose late husbands were in the service of the Crown, missionaries, servants of native

States under British protection, residents in the Channel Islands or the Isle of Man, and persons, previously resident in the United Kingdom, residing abroad for the sake of their health or the health of a member of their family.

DOMINION INCOME TAX.—Relief is granted under certain conditions in the case of a taxpayer who has paid, or is liable to pay, United Kingdom Income Tax on any part of his income, and who proves that he has paid Dominion Income Tax for the same year in respect of the same part of his income.

SCHOLARSHIPS.—Income from a scholarship held by a person receiving full-time instruction at a university, college, school, or other educational establishment is exempted from Income Tax (including Super-Tax).

STANDARD RATES OF INCOME TAX.—The Income Tax year is from April 6 to the following April 5. The following were the standard rates for the years mentioned :—

For every £ of the next £10,000 of the excess	0 5 6
For every £ of the remainder of the excess	0 6 0

Notes on Income Tax.

Under the Finance Act of 1920 a radical alteration was made in the method of granting relief in the Income Tax in favour of earned income as compared with investment income, and in the method of graduating the burden of the tax according to the size of a taxpayer's income and his family responsibilities. The previously existing exemptions, abatements, and reliefs were replaced by the various reliefs set out below. In introducing the new system, the Act employs two terms not previously used in connection with the Income Tax, *viz.*, "assessable income" and "taxable income."

"Assessable Income" means, in the case of "earned" income, the amount of such income as computed for Income Tax purposes, after deducting the amount of the "earned" income allowance mentioned below, and in the case of other income, the actual amount of such income as computed for Income Tax purposes.

"Taxable Income" means that part of the "assessable income" upon which Income Tax is actually charged, that is, the "assessable income" less the various deductions referred to below.

Deduction in arriving at Assessable Income. Earned Income Allowance.—The differentiation in favour of "earned" income is made, not as heretofore by reducing the rate of tax chargeable upon such income as compared with investment income, but by deducting one-sixth of the "earned" income in order to arrive at the assessable income. The deduction is given irrespective of the amount of the total income, but must not exceed £250 for any one individual. The "assessable income" of a taxpayer is, therefore, his total income, as computed for Income Tax purposes, after making the appropriate deduction in respect of any "earned" income.

The Finance Act 1925 provided for a special allowance of one-sixth of the total income (from whatever source) of persons of the age of 65 years and upwards whose total income does not exceed £500. This allowance is granted, in the case of a married couple, where *either* the husband *or* his wife, living with him, has attained the age of 65 years at the commencement of the year of assessment, but the *joint total income* must in such a case fall within the prescribed limits. Provision is also made for marginal relief, in order to avoid the hardship which would be involved when the total income falls just over the prescribed limit of £500.

Total Exemption.—Exemption from tax may be claimed where the total assessable income does not exceed £135, or, in the case of an individual whose wife is living with him, £225. Where the income is wholly earned, these limits are equivalent to £162 and £270 respectively. *See* above.

Deductions from Assessable Income in order to arrive at Taxable Income.—Where the taxpayer is not totally exempt, the following deductions may be claimed from the total assessable income in order to arrive at the "taxable income." *The deductions may be claimed irrespective of the amount of the taxpayer's total income.*

Personal allowance may be claimed of £135, or, in the case of an individual whose wife is living with him, £225.

Wife's Earned Income.—When a taxpayer's total income includes any earned income of his wife, the personal allowance of £225 is increased by a sum equal to nine-tenths of the amount of such earned income, subject to a maximum additional allowance of £45.

Deduction for a Widower's (or Widow's) Housekeeper taking Charge of Children.—A deduction of £60 may be claimed, under certain conditions, by a widower who has living with him a female relative for the purpose of having the charge and care of any child or adopted child of his in respect of whom the deduction for children (*see* below) is given or in the capacity of a housekeeper or by a widow who has a female relative resident with her for the like purpose. If the widower or widow proves that he or she

has no such female relative who is able or willing to take such charge, the same deduction may be claimed in respect of some other female person employed for that purpose.

Deduction in respect of Widowed Mother, &c., taking Charge of Children.—A deduction of £60 may be claimed, under certain conditions, by an *Unmarried Person* who has living with him and maintains at his own expense either his mother (being a widow or living apart from her husband) or some other female relative, for the purpose of having the charge and care of any brother or sister of his in respect of whom the deduction for children or adopted children (*see* below) is given.

Deduction for Children.—A deduction may be claimed in respect of each child, step-child, or adopted child under the age of 16 years, or who, if over that age, is receiving full-time instruction at any university, college, school, or other educational establishment. The deduction allowable is £36 in respect of one child, and £27 in respect of each additional child for whom the relief is due. No deduction is, however, allowed in respect of any child or adopted child who is entitled in his or her own right to an income which, after excluding any income to which the child is entitled as the holder of a scholarship, bursary, or other similar educational endowment, exceeds £40 a year.

Deduction in respect of Dependent Relatives.—A deduction of £25 may be claimed in respect of (*a*) any person whom the taxpayer maintains at his own expense, and who is a relative of his or of his wife, and incapacitated by old age or infirmity from maintaining himself or herself, or (*b*) his or his wife's widowed mother, whether incapacitated or not, or (*c*) a daughter who is resident with the taxpayer, and upon whose services he is compelled to depend, by reason of old age or infirmity. The deduction under (*a*) or (*b*) is conditional, however, upon the income of the dependent relative not exceeding £50 a year. The deduction applies in the case of a female taxpayer, with the substitution of "husband" for "wife" above.

Rates of Tax chargeable on the "Taxable Income."—The following provisions as to the rates of tax chargeable on the taxable income (*i.e.*, that part of the income on which tax is actually charged) apply, *whatever the total amount of the income.* The first £225 of the taxable income is chargeable at half the standard rate of tax, *i.e.*, for the year ending April 5, 1927, at 2*s.* 0*d.* in the £. The remainder of the taxable income is chargeable at the standard rate of tax, *i.e.*, at 4*s.* 0*d.* in the £.

Relief in respect of Life Assurance Premiums.—Where allowance is due in respect of premiums paid for Life Assurance or for contracts for Deferred Annuities, the allowance is deducted from the amount of tax arrived at under the preceding paragraph, and calculated at following rates:—one-half the standard rate in the £ on the amount of the premium paid on policies taken out since June 22, 1916, irrespective of the claimant's total income; and on policies taken out before June 22, 1916, a deduction of tax at one-half the standard rate in the £ is allowed on the premiums paid by a claimant whose income does not exceed £1,000, of three-fourths of the standard rate in the £ where his income exceeds £1,000 and does not exceed £2,000, and at the standard rate in the £ where his income exceeds £2,000.

STATE EXPENDITURE, 1926-27.

THE expenditure of the various departments of the State is met from two main sources, (1) supply grants, (2) receipts appropriated in aid. Together these form the *gross* expenditure for the year, the *net* expenditure being the amount raised by taxation for the particular purpose. In order to measure the actual total expenditure of public departments, the more significant figures are the *gross* estimates, that is, the supply grants and appropriations in aid combined, as these figures represent the total cash sums placed by Parliament at the disposal of departments. The Estimated Expenditure given below accounts only for the *net* expenditure, after taking credit for receipts appropriated in aid of expenditure.

THE CIVIL SERVICES.

The Estimates for the Civil Services and Revenue Departments show a reduction of £12,313,589 for the year 1926-27, made up as follows :—

Service.	1925-6.	1926-7.
Civil Services	£247,699,237	£234,256,631
Customs and Excise	4,780,000	4,920,000
Inland Revenue	6,670,635	6,864,652
Post Office	53,805,000	54,600,000
	£312,954,872	£300,641,283

The Civil Services show a saving of £13,442,606, but the Revenue Departments, with an increase of £1,129,017, reduce the total saving to £12,313,589.

The figures for 1925-26 included a total outgoing of £1,144,510 in respect to the British Empire Exhibition, the guarantee alone accounting for £1,100,000. Expenditure under this heading is omitted from the 1926-27 estimates. The Ministry of Labour's estimate of £11,720,135 represents a retrenchment of £2,139,084 and saving has been effected in the cost of the Diplomatic and Consular services, and in the case of the Colonial services there is a reduction of £664,318, and in that of the Dominion services one of £25,037. The cost of the Middle East services has declined by £481,000 to £4,444,000. Overseas Settlement, on the other hand, involves an advance from £497,935 to £935,000. The Board of Education estimate has increased from £40,832,754 to £44,300,000, and expenditure in respect to Old-Age Pensions is £2,786,000 more than in 1925-26, and in respect of the new Widows', Orphans', and Old-Age Contributory Pensions there appears for the first time an allocation of £4,000,000. The Ministry of Pensions' £63,504,900 shows a reduction of £4,013,100. An additional £1,500,000 to the beet sugar subsidy brings this provision now to £2,750,000. The League of Nations costs £5,500 more to Great Britain. The Development Fund advances from £140,000 to £200,000. The Government Hospitality Fund, which received £80,000 in 1925-26, drops to £5,000 in 1926-27, and the cost of the Mint, including coinage, for which £500,000 was allocated in 1925-26, is estimated at £150,000 for 1926-27.

Large reductions are shown under the head of *Unclassified Services*, which include the few remaining wartime commitments. One of them has relation to prize claims, and the amount falls from £45,000 to £23,000. For the Coal Subsidy, as to which £19,000,000 was provided in 1925-26, the amount allocated in the new estimates is £4,100,000. Several items which appeared in the 1925-26 estimates have been eliminated, such as £550,400 paid in settlement of Irish compensation claims, a sum of £80,000 paid as grants for compensation for "damage by enemy action," and a sum of £1,200,000 as a grant-in-aid to Northern Ireland. The estimates for the remaining services, together with those for 1925-26, are set out below :—

	1925-6.	1926-7.
Unemployment grants ...	£550,000	£225,000
Relief of unemployment	1,926,000	1,146,100
Grants in respect to unemployment schemes...	1,450,000	1,200,000
Totals.....	£3,916,000	£2,571,100

The Cost of Education.

The Board of Education's estimates for 1926-27, show that in 1924-25—the latest year for which complete figures are available—the total net expenditure on all forms of education in England and Wales was £74,809,397, of which £43,875,180 was provided by the Exchequer, and £30,934,217 was derived from local rates. The Exchequer's share represents the net charge, after deduction of £2,394,678 received from teachers in respect of pension contributions and £216,957 in miscellaneous receipts.

The aggregate expenditure was distributed between State grants and local rates in the proportion set out below :—

	Exchequer.	Rates.	Total.
	£	£	£
Elementary	32,666,359	24,931,170	57,597,529

Health, Labour and Insurance.

The net total of Estimates Class VII is £32,737,419—a decrease of £2,107,839 by comparison with 1925-6. The present total is made up as under :—

Ministry of Health	£18,117,048	+	£41,061
Scottish Board of Health	2,728,345	—	10,921
Ministry of Labour	11,720,135	—	2,139,084
National Insurance Audit Department	165,900	+	1,260
Friendly societies' deficiency	5,991	—	155

The Ministry of Health's estimate shows increases of £56,968 for salaries, wages, and allowances, £616,000 in respect of grants towards housing expenses, and £125,000 in grants for the treatment of tuberculosis. The principal decreases are of £250,000 in medical benefit (grant-in-aid), and of £370,000 for sickness, disablement, maternity, &c., benefits. The outstanding increase in the Scottish Board of Health estimate is £199,806 for grants towards housing expenses.

The saving of £2,139,084 in the total for the Ministry of Labour is largely accounted for by a reduction of £1,395,000 in the contribution to the Unemployment Fund, which now amounts to £12,160,000. Salaries, wages, and allowances show a saving of £223,376. The cost of the industrial training of disabled men is estimated at £334,849—a reduction of £534,848.

THE NAVY ESTIMATES.

The Navy Estimates for 1926–7 show a decrease of £2,400,100 from the figure proposed for the year 1925–6. Administrative economies effect a saving of £3,000,000, and the sum of £9,083,693 is allocated for the provision of new ships to replace obsolete vessels (as against £7,235,737 in 1925–6). Two "A" class cruisers, 1 "B" class cruiser, 6 "O" class submarines, 1 submarine depôt ship, 1 repair ship, and 4 motor launches will be begun during the year. The number of officers and men is 102,675 for 1926–7 and 450 R.M. Police as in 1925–6.

THE ARMY ESTIMATES.

The Army Estimates show a net reduction for the year 1926–7 of £2,000,000, made up as follows :—

THE AIR ESTIMATES.

The Air Estimates show an increase for 1926–7 of £486,990, the Net Estimates being £16,000,000 against £15,513,010 in 1925–6, but when account is taken of the provision made for the Fleet Air Arm and the Middle East, &c., there is a decrease of £454,820 in the gross total for 1926–7 (£20,864,500, against £21,319,320 for 1925–6).

In the general abstract of the estimates are given the following net figures under the various heads of expenditure :—

Pay, &c., of the Air Force	£3,405,000
Quartering, Stores (except Technical), Supplies and Transport	1,507,000
Technical and Warlike Stores (including Experimental and Research Services)	6,091,000
Works, Buildings and Lands	2,347,000
Medical Services	209,000
Educational Services	£432,000
Auxiliary and Reserve Forces	406,000
Civil Aviation	462,000
Meteorological and Miscellaneous Effective Services	135,000
Air Ministry	761,000
Half-pay Pensions, and other Non-effective Services	245,000
Total	£16,000,000

The principal increase in the above totals is that of £441,000 in respect of technical and warlike stores, including experimental and research services. The gross expenditure under this head, however, is £350,000 less than that shown in the estimates for 1925–6, appropriations-in-aid being down by £791,000—a decrease due to the reduction in expenditure on account of the Middle East and the Fleet Air Arm. There is an increase of £104,990 for Civil Aviation, and of £48,000 for quartering, stores (except technical), supplies, and transport. The largest decrease is that of £225,000 in respect of works, buildings, and lands; and other decreases are £54,000 for educational services and £7,000 for pay, &c. In the case of technical and warlike stores the provision made under the various heads compares as follows with the current year's votes :—

	1925–6.	1926 7.
Aeroplanes, Seaplanes, and Engines	£5,864,000	
Aircraft Establishment, Farnborough	37,000	
Aeronautical Inspection Dept., &c.	151,000	
Aircraft, Technical and Warlike Stores	198,000	
Armament and Ammunition	415,000	
Electrical Stores	396,000	
Miscellaneous Research	253,500	
Miscellaneous Materials	300,000	
Balloons and Hangars	42,500	
Mech. & other Transport	303,000	
Petrol and Oil	458,000	
War Liabilities (rewards to inventors & miscell. claims)	57,500	
Purchase of Airships	60,000	
Airship Development	440,000	

PAYMENTS TO LOCAL TAXATION ACCOUNTS.

In addition to the amounts raised by Local Authorities from the Rates, the sum of £14,453,559 was paid by the Exchequer to Local Taxation Accounts in the financial year 1925–26. The amount estimated to be payable in this way during the financial year 1926–27 is stated at £14,100,000 in the Budget (*see* p. 461), and in the six months ended Sept. 30, 1926, the sum of £4,445,627 had been so paid by the Exchequer.

In the financial year 1925–26 *England and*

Wales received £1,107,260 in respect of Additional Beer and Spirit Duties; £1,804,802 in respect of Liquor and £832,060 in respect of Other Licences; £3,914,718 in relief of Rates; £413,091 in relief of Rates on Tithe Rent Charges; £3,160,827 under the Agricultural Rates Act, and £60,000 for the cost of collection of Licence Duties; a total of £12,614,458.

Scotland received a total of £1,839,101, of which £594,854 was in relief of Rates, and £413,189 additional grants under the Agricultural Rates Act (1923).

THE NATIONAL DEBT.

The National Debt was raised almost entirely for foreign wars. There was a trifling sum of £664,463 until the "Glorious Revolution" of 1688, which added nearly £16,000,000 to the Debt. Under Queen Anne the campaigns of the Duke of Marlborough added nearly £38,000,000, part of which was paid off in the time of George I. In the reign of George II. about £87,000,000 were added, but the first twelve years of George III. saw £10,000,000 of this paid off. The American War added £121,000,000, making the total nearly £250,000,000, which was reduced considerably until 1793, when the repayments ceased owing to the outbreak of the French Revolutionary War. In twenty-three years, £601,500,343 were added to the debt for the purposes of the war, the following amounts being raised:—

Year.	£	Year.	£	Year.	£
1793...	4,877,956	1801...	27,305,271	1809...	12,298,375

1800...	23,030,520	1808...	12,095,044	1816...	514,059

The amount of the Debt in January, 1816, was £900,436,000 (Funded, £816,312,000; Unfunded, £44,727,000; Annuities, £39,397,000), the annual charge being nearly £33,000,000, but the following amounts were paid off from 1817–1837:—

Year.	£	Year.	£	Year.	£
1817...	1,826,814	1824...	7,456,559	1831...	2,673,858

1823...	5,261,725	1830...	1,935,465	1837...	1,985,885

At the accession of Queen Victoria the amount stood as nearly £788,000,000, with an annual charge of £29,000,000. Small sums were paid off annually from 1837–1854, when the Russian War added £33,000,000 to the Debt. Repayments were made from 1858 onwards, with slight increases in 1868, 1875, 1878, 1879 and 1886, the following being the actual amounts paid off:—

On March 31, 1899, the "Dead Weight" total was £635,070,635, being a decrease since 1837 of £153,000,000. For the South African and China wars £142,752,190 was raised, but from April 1, 1903, to March 31, 1914, the sum of £115,518,571 was paid off, and the total Debt on March 31, 1914, was £661,473,765.

In the financial year 1914-15, and in the five subsequent years, the Great War caused enormous increases, the aggregate of the National Debt standing at its highest point (£7,878,607,166) on March 31, 1920; while the cost of Interest and Management increased from £24,500,000 in 1914-15 to £349,598,616 in 1920-21.

The Debt to U.S.A.

The Debt Funding Commission fixed the total repayable at $4,604,128,085, of which $4,128,085 was to be repaid at once in cash and the balance funded at 3 per cent. for 10 years and 3½ per cent. thereafter, until redeemed by the operation of an accumulative sinking fund of ½ per cent. in 62 years. Interest is payable on June 15 and Dec. 15 in each year at the rate of 3½ per cent. for the first 10 years, and 4 per cent. thereafter, to include the sinking fund.

Other Capital Liabilities.

These sums are not included in the capital on which interest is arranged for in the permanent charge. They consist of various loans contracted for Telegraph and Telephone extension, for the purchase of land for Government offices, &c. On March 31, 1926, these liabilities stood at £75,078,203, an increase of £7,046,111 upon the total for the previous year, an amount of £9,754,979 having been created and £2,708,868 having been redeemed during the year.

There are also sundry Contingent or Nominal Liabilities which the State is not likely to be called upon to any material extent to discharge. These liabilities consist of Unclaimed Dividends and unclaimed amounts due to suitors or to creditors of bankrupt estates.

Loans Guaranteed by British Government.—The Nominal Net Liability of the State in respect of loans guaranteed by the British Government was stated on March 31, 1926, to be as follows :—Turkish Loan, £3,815,200 ; Egyptian Loan, £4,876,700 ; Greek Loan, £3,360,400 ; Mauritius Loan, £165,304 ; Transvaal Loan, £23,756,979 ; Sudan Loan, £11,643,400 ; Welsh Church Loan, £2,317,982 ; Local Loans, £251,679,432 ; Irish Land Purchase Stock, £133,877,656 ; Ulster Savings Certificates, £1,853,549 ; and 24½ per cent. of the Austrian Guaranteed Loan, secured on the gross receipts of Austrian Customs and Tobacco monopoly.

Unrepaid Advances.—Against these Guaranteed Loans may be set the amounts remaining unpaid on March 31, 1926, on account of Advances made by Great Britain to various Governments. The amounts so outstanding on March 31, 1926, were :—Crete, £40,000 ; Kenya and Uganda, £9,798,203 ; Nyasaland, £614,913 ; Persia, £248,500 ; Albania, £1,603 ; Nauru and Ocean Islands, £1,600,636 ; Tanganyika, £3,085,184 ; Somaliland, £113,000 ; and Northern Rhodesia, £238,000.

The Sinking Funds.

Reductions in the Debt are made by means of the *New Sinking Fund*, a term formerly applied to the fund set up by Sir Stafford Northcote in 1875, and consisting of the balance of the Annual Charge after providing for interest and cost of management, but now applied to the fund set up by Mr. Stanley Baldwin in 1923, and amounting to £60,000,000 (Budget of 1926-27), the National Debt being decreased by that amount annually ; the *Old Sinking Fund*, which is the application of the surplus revenue of any year for the redemption of debt when so determined by Parliament ; *Terminable Annuities*, the capital value of which is deducted from the Debt upon the expiration of the term for which the annuities are payable (£413,868 in 1925-26) ; *Victory Bonds Sinking Fund*, by means of which Victory Bonds drawn for repayment on Sept. 1 of each year are discharged (£2,186,700 in 1926) ; *Funding Loan Sinking Fund*, £2,598,518 applied in cancellation of Debt in 1925-26 ; *Conversion Loan Sinking Fund*, £14,386,113 applied in purchase and cancellation of £18,915,514 in 1925-26 ; *Issues from the Consolidated Fund*, £10,233,330 applied in Debt reduction in 1925-26 ; *Depreciation Fund*, under the Finance Act of 1917, by which sums are issued by the Exchequer and applied for the purchase of various Government Stocks, &c. (£8,100,738 in 1925-26). (£156,751,000 of 5% Stock and £11,430,738 of 4% Stock had been so purchased up to March 31, 1926) ; *Payments for Death Duties*, under Section 3 of the War Loan Act, 1919, amounting at March 31, 1926, to £9,542,823 cash and £57,625,905 securities.

Decrease of Liabilities.

By the operation of the various Sinking Funds the following decreases were caused in the Gross Liabilities of the State during the financial year 1925-26. Terminable Annuities from £13,053,408 to £12,639,540, a decrease of £413,868 ; the Unfunded Debt from £6,610,628,804 to £6,529,755,641, a decrease of £80,873,253, while Bonds tendered for Death Duties were £8,747,715 in excess of 1924-25. The Funded Debt was increased by £50,831,082, and Other Capital Liabilities by £7,046,111, making a total reduction of the Gross Liabilities of the State of £32,157,643 in the financial year 1925-26.

Estimated Assets.

Reparations Payments.

Lieut.-Colonel Guinness (Financial Secretary to the Treasury), in a written reply to a question addressed to him in the House of Commons, gave the following return of the payments made by the Agent-General for Reparations to or for the account of the Allies during the period from September 1, 1924, to June 30, 1925 :—

	Gold Marks.
France	325,506 390
British Empire	165,930,858
Belgium	78,313,022
Italy	51,739,283

Rumania	6,218,355
Portugal	4,054,248
Japan	3,711,459
Greece	2,225,731
Poland	40,179

In accordance with the Dawes plan these payments cover not only Reparation proper but all obligations of the German Government under the Peace Treaty.

German Reparation (Recovery) Act, 1921.

This Act, which came into force on April 1, 1921, provides for the payment to the Commissioners of H.M. Customs of a proportion of the purchase price of German goods, the official

receipt for the amount so paid operating *pro tanto* as a good discharge to the importer against the person to whom the purchase price of the goods is due. At the outset the proportion of the purchase price to be thus paid to the Customs was 50 per cent., and the Act applied not only to goods exported directly from Germany to this country but to all goods of substantially German origin. After the acceptance by the German Government of the Schedule of Payments prescribed by the Reparations Commission, the rate of the levy was reduced, on May 13, 1921, to 26 per cent. On May 27, 1921, the application of the Act was restricted by Board of Trade Order made under Section 1 (5) to goods first consigned from Germany to the United Kingdom. On February 26, 1924, the rate of the levy was further reduced to 5 per cent. of the purchase price of the goods. Exemption from the provisions of the Act has been granted by the Board of Trade, under certain conditions, to catalogues and advertising material, goods for experimental use by the Government, and memorial tablets for deceased German Prisoners of War. During the year ended March 31, 1924, £8,138,000 was collected and paid into a special account, under Section 1 (3) of the Act, to be applied in such manner as the Treasury might direct toward the discharge of the obligations undertaken by Germany under the Treaty of Versailles. In addition, the sum of £26,800, which had been collected by the Irish Free State authorities in respect of German goods imported during 1922-23, was paid by them to the Treasury in 1923-24.

Payment of the French Debt.

According to the settlement reached by Mr. Churchill with M. Caillaux on July 12, 1926, (which has not been ratified by the French Government), the total war indebtedness of France to Great Britain is £653,127,900, and France is to pay the equivalent of sixty-two annuities of £12,500,000. This is provided for by a ladder of ascending payments, the first being one of £4,000,000 due in the financial year 1926-27, and the last being instalments of £14,000,000 due in the financial years 1957-58 to 1987-88. On September 15, 1926, the French Government paid to the British Government the sum of £2,000,000, being the first instalment of the payment due in the financial year 1926-27.

Debt of France to U.S.A.

Negotiations between the two Governments have resulted in an offer by France to pay an average sum of about £18,000,000 per annum (£8,000,000 for 5 years, £12,000,000 for 7 years, £20,000,000 for 50 years).

Payment of the Italian Debt.

The Italian Government paid to the British Government, September 15, 1926, the sum of £2,000,000, being the second instalment payable under the Italian War Debt Funding Agreement of June 27, 1926.

Defaulting Debtors.

The Council of Foreign Bondholders reported in 1923 that a total of £1,782,544,291 of principal is owing by States which do not pay their debts, in addition to over £486,000,000 for interest due. The principal defaulter is Russia (£1,746,274,182), and included in the list are certain Southern States of the U.S.A. and certain cities of South America.

LOCAL GOVERNMENT DEBTS.

In addition to the *National* Debt there are considerable amounts outstanding as Loans of *Local Authorities* in England and Wales, Scotland and Ireland. These amounts were raised for the provision of baths, cemeteries, electricity supply, gasworks, harbours, piers, docks, canals and quays, light railways, markets, tramways, waterways and other purposes. On March 31, 1923, there were outstanding loans in England and Wales to the amount of £803,880,725, including £52,620,845 Metropolitan Water Board Stock and £30,590,459 of the Port of London Authority; against the total the sum of £62,415,462 stood at the credit of various Sinking Funds. The total amount of outstanding loans and capitalized annuities in Scotland (on March 31, 1920) was £62,260,201, and in Ireland (on March 31, 1919) £25,453,114.

GREAT WAR PENSIONS.

THE rates of disability retired pay and pensions in respect of disablement due to service in the Great War are contained in the Royal Warrant of July 2, 1920, (*Officers and Nurses*), the Royal Warrant of December 6, 1919, (*N.C.O's and Men*), and the corresponding Orders in Council and Orders applicable to the *Royal Navy* and *Royal Marines* and the *Royal Air Force*.

DISABLEMENT.

The disablement pension is at the outset generally a temporary award based on a Medical Board's assessment of disablement arising out of injury and disease attributable to or aggravated by war service. Such temporary reward usually runs for a period of 12 months, and is from time to time reviewed until the case is ripe for consideration for a final award under the War Pensions Act, 1921 and the Regulations made thereunder. Under that authority a system of final awards has been brought into operation, the effect of which is to stabilise pensions, gradually to eliminate recurring medical examinations, and to bring about finality as to the amount of pension to be awarded. A man, on receiving notification that a final award has been made to him, has a right of appeal, subject to certain conditions, to an independent Assessment Appeal Tribunal, whose decision is final and binding on both the Ministry of Pensions and the appellant.

Disablement, for the purpose of pension, is assessed on a percentage scale. Total disablement is reckoned at 100 per cent., and the lowest degree entitling to pension is 20 per cent. Where the disablement is assessed at less than 100 per cent. the disablement pension and any allowances attached thereto are proportionately reduced. For instance, a man 50 per cent. disabled would receive 50 per cent. of the full rate of pension and 50 per cent. of the full rate of allowances for wife and children (if eligible).

Disablement assessed at less than 20 per cent. is compensated by a gratuity or a final weekly allowance paid over a definite number of weeks, subject in either case to a maximum payment of £200.

RATES OF PENSION.

The following are the principal rates of weekly pension for a private soldier 100 per cent. disabled, and of pensions or allowances for dependants of a private soldier: (except in the case of wife and children's allowances, the rates for other ranks are higher):—

Private—40*s.*; wife's allowance 10*s.*: children's allowances—7*s.* 6*d.* for first child and 6*s.* for each other child; (if there is no wife, 10*s.* for the first, 7*s.* 6*d.* for the second, and 6*s.* for each other child).

Widow—over 40 or with children 26*s.* 8*d.*; under forty and without children 20*s.*; allowances for children 10*s.*, 7*s.* 6*d.*, 6*s.*

Parents—need-pensions not exceeding 20*s.* Provision is also made for other dependants.

A totally disabled man who is certified to require constant attendance may receive an additional allowance not exceeding 20*s.* a week.

Alternative Pensions.

Alternative pensions are based upon the man's ascertained pre-War earnings. Application for alternative pension must be made within a year after the notification of the first award of disablement pension.

Treatment.

The Ministry of Pensions provide courses of treatment for disabilities accepted as attributable to or still aggravated by service, and if in consequence of and during a course of treatment a man is unable to provide for his own support and that of his family, treatment allowances may be granted in lieu of pension and allowances.

THE WAR BONUS.

In order to counteract the increase in the *Cost of Living* the Government introduced a *Bonus Scheme*, under which salaried Civil Servants and wage-earning Government employees receive temporary additions to their salary or wages. The scheme was applied, irrespective of age or sex, as from March 1, 1920, the limit of the addition in any case being £750 per annum. The Government Bonus Scheme has been adopted generally by Public Authorities, certain modifications being made in particular instances. The scheme formulated a basic rate of increase, producing a basic addition to salaries or wages, and this basic rate rises or falls 1 *twenty-sixth* in response to every *five points* rise or fall in the Index figure average of prices over a six months' period. The standard cost of living in March, 1920, was 130 per cent. in excess of that of July, 1914, and the scheme of increase agreed by the *Whitley Council* is as follows:—

Where the ordinary rate of remuneration does not exceed 30s. per week—130 per cent. increase.

Where the ordinary rate of remuneration exceeds 35s. a week, but does not exceed £200 per annum—130 per cent. on the first 35s. a week (£91 5s. per annum) and 60 per cent. on the excess over £91 5s.

Where the ordinary rate of remuneration exceeds £200 per annum—130 per cent on the first £91 5s., 60 per cent. on the next £108 25s., and 45 per cent. on the amount in excess of £200 up to £500.

In addition to the reduction caused by the automatic decline of the cost of living figure the following decreases have been introduced:—

10 per cent. on salaries from £500 to £700; 15 per cent. on salaries from £700 to £800; 20 per cent. on salaries from £800 to £900; and so on until 60 per cent. is reached in the case of salaries of £1,600 a year.

Details of the Bonus addition to Salaries and Wages, under the scale in force at various dates, are shown below:—

The Sutton Judgment.—On Nov. 5, 1924, the House of Lords decided that a Post Office employé, who had enlisted in Sept. 1915, and was demobilised in May, 1919 after foreign service, was entitled to receive the War Bonus that would have been payable to him if he had remained at home in the service of the Post Office. This decision was based on the words of a circular which referred to "full civil pay in addition to military pay and allowances." In consequence of this judgment, Government employés who enlisted under that, or similar, circulars received varying amounts to a total of about £3,000,000, and many municipalities and other public bodies paid similar claims in full or upon a compromise scale.

NOTE.—When the yield of wheat per acre differed from the average for the 30 years 1892–1921 by less than one-tenth of a bushel, the year has been noted as "Average." When the difference was between 0·1 and 0·5 bushel, the year has been noted as "Slightly above (or below) Average"; when between 0·5 and 1·5 bushels, as "Decidedly above Average" or "Deficient"; when between 1·5 and 2·5 bushels, as "Good" or "Bad"; when between 2·5 and 3·5 bushels, as "Very good" or "Very bad"; and when above 3·5 bushels, as "Extremely good" or "Extremely bad." * From April 1, 1923, the figures of Imports *include* imports (if any) into Gt. Britain and Northern Ireland from the Irish Free State, but *exclude* the direct foreign trade of the Irish Free State.

Fisheries.

The quantities and values of the sea fish of British taking landed in Great Britain and Ireland in 1925 (exclusive of river salmon) are shown in the following table. The total catch was 66,000 tons less than in 1924, 92,000 tons less than in 1920 (by far the largest since the outbreak of the War) and 218,000 tons less than the record catch of 1913. Representing the 1913 catch by 100, the catches during 1920–5 were respectively 90, 70, 75, 71, 87, and 82. The total value in 1925 was £1,082,000 less than in the previous year.

In 1921 there was a stoppage of production for 88 days, ending in a settlement on June 28, 1921. In 1926 there was a stoppage of production from May 1, and work had not been resumed (except by a "drift back" of employees) at the time of going to press.

Home Consumption.

In a normal year about 200,000,000 tons of coal are available for home consumption, of which about half is absorbed in domestic use and in factories. Railway locomotives require about 14,000,000 tons; gas works 16,000,000 tons; coke production 17,000,000 tons, of which about half (with 1,500,000 tons of coal) is consumed by blast furnaces; colliery engines require about 17,000,000 tons, and coal miners receive about 6,000,000 tons; electrical generating stations require about 7,000,000 tons, and coasting ships require over 1,000,000 tons.

Coal Exports.

Admiralty shipments of coal (34,500,000 tons in 1918) are not included in these figures. Before the Great War of 1914-1918 the value of the coal consumed by the ships of the Royal Navy was about £2,500,000 annually. Oil has taken the place of coal in most of the recently built ships.

Iron Ore.

The production and importation of iron ore are as shown below. Values are not shown, as that of iron ore produced in Great Britain is taken at the place of production, while the value of imported ore is enhanced by transport and handling to the port of entry. The value of the iron ore produced in Great Britain in 1924 is stated at £3,415,000; that of the imported ore at £6,570,000.

Pig Iron and Steel.

The quantity of pig iron and steel ingots and castings made is shown below. In 1905 the quantity of coal used in the manufacture of pig iron was 19,255,555 tons; in 1924 the quantity was 1,490,000 tons of coal and 8,745,000 tons of coke. In 1905 there were 345 blast furnaces at work, and in 1925 they numbered 141.

Joint Stock Companies.

On Dec. 31, 1924, there were registered in Great Britain and Northern Ireland 92,208 Joint Stock Companies, with a total paid up capital of £4,404,802,782; the total for 1923 was 89,200 Companies, paid up capital £4,309,705,250.

Friendly Societies.

During 1924 there were 672 new registrations, and 992 societies were removed from the register for various reasons, the total number registered at Dec. 31 standing at 33,048. In 1924 the number of societies and kindred associations making returns was 32,140, with an aggregate membership of 34,087,447, and funds amounting to £430,441,957. Comp red with the previous year the membership shows an increase of 572,465, and the total funds a rise of £44,454,226. Below are the main details:—

	Members.	Total funds.

Building Societies.

In 1924 there were 1,117 Building Societies in Great Britain, with 1,000,988 members. The amount advanced on mortgage during 1924 was £40,584,606, the share capital £108,983,304, the balance due on mortgage £119,744,926, and other assets £25,144,779.

Co-Operators' Profits.

The half-yearly balance-sheet of the Co-operative Wholesale Society submitted to the business meetings in October, 1922, shows sales of £32,000,000. During the half-year the supplies from the various productive works were just over £10,000,000. After providing for all the expenses of production and distribution and £994,634 for interest on capital and depreciation of property, there is a net profit of £23,521.

Bankruptcy Statistics.

England and Wales (1924).

The number of debtors adjudicated bankrupts was 4,706, with liabilities £12,223,858, and assets £2,284,204; of compositions 52, with liabilities £219,928 and assets £46,593; of administration orders for deceased debtors' estates 36, with liabilities £173,398 and assets £23,027. In addition, there were 1,901 assignments, compositions, &c., under deeds of arrangement, with liabilities £4,328,301, and assets £1,966,305.

Scotland (1924).

The number of bankruptcies in Scotland was 247, with liabilities £1,993,492, and assets £199,465.

Northern Ireland (1924).

The Bankruptcies numbered 51, with liabilities £78,880, and assets £19,669; deeds of arrangement 27, with liabilities £66,763, and assets £38,451; arrangements 66, with liabilities £124,836, and assets £40,631.

Unemployment Statistics.

The live registers of the employment exchanges in Great Britain contained the highest figures for unemployment on June 3, 1921, subsequent figures being appended for comparison:—

	June 3, 1921.	Sept 22, 1924.	Sept. 28, 1925.	Sept. 29, 1926

Cost of Unemployment.

Schemes to the value of approximately £536,250,000 undertaken in connexion with the relief of unemployment have been, or are being, assisted by the Exchequer This total includes

the cost of the post-war resettlement of members of his Majesty's Forces, and is distributed as follows:—

	Million £.
Training, &c.	104¼
Unemployment insurance	240
Unemployment Grants Committee	92½
Ministry of Transport	74
Land settlement	22
Women's training, &c.	1
Miscellaneous	3½

Contributions towards this sum by the Exchequer will, it is estimated, reach £214,500,000 by the end of the financial year 1925-26, while the additional future Exchequer liability under schemes already approved amounts to £107,250,000 (including £60,500,000 guarantees under Trade Facilities Guaranteed Schemes). A further Exchequer liability of £3,000,000 is involved by schemes which the Government has offered to assist if undertaken.

Unemployment Insurance.

The actual expenditure upon unemployment insurance since the Armistice, including appropriations for administration and refunds, came to £247,233,000 (up to Oct. 3, 1925), and the income was derived from the following sources, in the proportions indicated:—

Contributions:—	
Employers	£85,301,000
Employed	77,354,000
Exchequer	56,434,000
Exchequer (ex-Servicemen)	3,278,000

1923	2,657	477,378	591,164	6,542,932

In the seven groups of industries the aggregate number of workers employed in 1922 was 7,205,609, compared with 7,315,866 in 1921, 8,348,150 in 1920, and 7,509,353 in the pre-war year. In 1922 the average payment in case of death was £220, against £217 in 1920, and £161 in 1914. In case of disablement the average amount (including cases settled by payment of a lump sum) was £15 5*s.* against £6 7*s.* in 1914. In 1922 the average amount paid in lump sums was £65 3*s.*, as against £73 in 1921, while the average amount in the weekly payment cases was £18 9*s.*, as compared with £13 18*s.* in 1921, and £4 17*s.* in 1914. The figures given above represent only the actual amount paid to workmen or their dependents, and not the total charge on the industries in respect of compensation. Adding the legal, medical, administrative, and other expenses, the aggregate outlay in respect of the 392,912 cases in 1922 can hardly have been less than £8,500,000. For a total of 442,116 cases in 1914 the estimate was £5,000,000. Taking the seven groups of industries together, the annual charge for compensation averaged 18*s.* per person employed, compared with 9*s.* 9*d.* in 1914. Below are the figures for the various groups

EXTERNAL TRADE (GREAT BRITAIN AND NORTHERN IRELAND).

In statistics of Trade, the term GENERAL TRADE refers to the whole volume of Imports (including such as are temporarily detained and afterwards exported), and to the whole volume of Exports. The term SPECIAL TRADE includes only *Imports for consumption* in the country receiving them, and *Exports of home produce or manufacture*. Imports are taken at their C.I.F. value (which includes the *Cost* of the merchandise and the charges for *Insurance* and *Freight*), whereas Exports are taken at their F.O.B. (free on board) value, which includes only the *Cost* of the merchandise delivered to the exporting ship. Exports have an added value by the time they reach their destination, having become loaded *en route* with Insurance and Freight. They leave the country of origin with an F.O.B. value and arrive with an acquired C.I.F. value.

COMMUNICATIONS.

Roads.

The total mileage of public roads in Great Britain is approximately 178,000 miles, of which 153,000 are in England and Wales and 25,000 in Scotland. The cost of maintenance in 1914–15 was £19,051,000, and in 1923–24 about £46,100,000. The roads of Great Britain have been classified by the Ministry of Transport, and out of the total mileage of 178,000, 24,552 have been included in Class I. and 15,625 miles in Class II.

The maintenance and repair of bridges and main roads is within the jurisdiction of the County authorities, other roads being maintained by Borough, Urban and Rural Councils. The motor licence duties (referred to below) are paid into a special *Road Fund* which is administered by the Minister of Transport. Grants are made from the Road Fund to highway authorities towards the cost of maintenance and improvement of roads and bridges. During the year 1925-26 the grants from the Road Fund amounted to £17,400,000. The bulk of this money was directed to assisting highway authorities in the maintenance and improvement of Class I. and Class II. roads, and in the construction of new and important arterial roads expedited for the relief of unemployment.

Road Taxes.

The total gross receipts from the taxation of road vehicles between Dec. 1, 1924, and Nov. 30, 1925, amounted to £17,233,238. The approximate number of motor licences issued during this period was 1,547,000, while licences in respect of private and hackney horse-drawn carriages numbered 153,487. The average receipt in respect of a whole year licence was £15 8*s.* 0*d.* for cars taxed on horse-power, £2 13*s.* 6*d.* for motor bicycles, £21 1*s.* 6*d.* for commercial goods vehicles, and £31 9*s.* 0*d.* for motor hackneys.

Motor Vehicles in the World.

When population was taken into account, there were 7 persons per car in the U.S., 13 in Canada, 74 in the U.K., 93 in France, 44 in Australia, 453 in Germany, 99 in Argentina, 490 in Italy, 27 in New Zealand, and 6,490 in India.

In 1923 the exports of "automotives" were valued at $189,737,018 for 151,866 motor vehicles, and from Canada $43,688,448 for 69,920 vehicles.

The National Automobile Chamber of Commerce (New York) estimates the number of Motor Vehicles (Passenger Cars) (1924):—

United States ...	13,464,608
Canada ...	554,874
United Kingdom ...	469,490

Street Accidents, Great Britain, 1924.

In addition to the accidents on the various railways of Great Britain, there were no fewer than 98,215 accidents caused by vehicles on streets and roads in 1924. Of this number 3,631 were fatal and 94,584 non-fatal, compared with 2,979 fatal and 80,122 non-fatal accidents in 1923.

In 1923 there were 109,425 street accidents in *Paris*, of which 150 were fatal.

Canals.

There are 4,673 miles of canals and canalised rivers in Great Britain and Ireland (England and Wales, 3,641 miles; Ireland, 848 miles; Scotland, 184 miles), no additions to the mileage having been made for several years. In 1905 the inland waterways carried 43,161,927 tons of merchandise, the revenue being £2,680,710 and expenditure £1,891,213. In 1921 the tonnage returns from 2,879 miles of canals were 11,803,000 tons. Of the total mileage 1,363 miles were (1905) owned or controlled by railway companies (the longest systems being the Shropshire Union, 202 miles; Grand Junction, 189 miles; Birmingham, 159 miles; and Leeds and Liverpool, 145 miles). The total paid-up capital of all the canals was (1905) £47,550,768. The existing system is at its greatest development in the midland counties of England, and in Lancashire and Yorkshire. A Royal Commission, appointed in 1906, reported, in 1909, in favour of a development scheme under an *Inland Waterways Board*, to improve the existing system. Their principal proposal was the formation of four main routes (from a centre in South Staffordshire) to the Thames (London), the Mersey

(Liverpool), the Humber (Hull), and the Severn (Gloucester), the proposed routes to accommodate barges up to 100 tons. The *Manchester Ship Canal*, opened in 1894, has a total length of 36 miles, and connects Manchester with the Mersey port of Liverpool; in 1913 the tonnage carried through the canal was 5,780,161 tons, and in 1923 the tonnage of toll-paying traffic was 5,363,940 tons, and the tolls, dues, &c., £1,384,743.

Tramways.

The total mileage of tramways and light rails ways open in Great Britain on Dec. 31, 1924, was 2,624. The total receipts in 1924 were £29,434,000, the working expenses £22,822,000, and the net receipts £6,522,000, the total paid-up capital being £91,294,000. 4,443,327,000 passengers were carried. In addition there were 21 miles of "trackless trolley" routes.

Posts, Telegraphs and Telephones.

The carriage and custody of the mails has been maintained by the State "from time immemorial." The telegraphs were transferred to the State on Jan. 28, 1870; the telephone service became exclusively owned and operated by the Government (with one or two minor exceptions) on the transfer of the National Telephone Company's undertaking to the Post Office on Jan. 1, 1912. Some of the submarine telegraph cables connecting the British Isles with the various Dominions and Foreign Countries are maintained and operated by the State and some by private companies. The submarine telephone cables from the British Isles to the Continent are either owned entirely by the State or jointly with the Foreign Administration in whose territory the other end of the cable terminates.

Savings Banks.

Post Office Savings Banks.—On Dec. 31, 1924, there were 12,200,013 active deposit accounts in the *Post Office Savings Banks*, with the sum of £280,373,433 due to depositors. On Dec. 31, 1924, Government Stock to the amount of £197,514,063 stood to the credit of holders in the books of the Post Office Savings Banks.

Trustee Savings Banks.—In 1925 there were 2,340,644 Depositors in the *Trustee Savings Banks*, with £83,396,492 to their credit in the Banks' Government Departments, and £27,006,458 in their Special Investment Departments. In addition to these sums, representing money, Stocks and Bonds to the nominal amount of £31,744,553 were held for Depositors in the former Department, and of £31,865 in the latter. The year ends on the 20th November, and, in 1925, the banks had 424 offices, either principal or subordinate.

LOCAL GOVERNMENT FINANCES.

In addition to the State Revenue and Expenditure large amounts are received and expended by Local Authorities in Great Britain, the total receipts (including the State contribution) being nearly £500,000,000 annually. The total amounts received from direct and indirect taxation, and from other sources of receipt by Local Authorities in England and Wales for 1922–23; and in Scotland for 1919–20, are stated below. The gross rental of Rateable Hereditaments in England and Wales in 1920–21 was £301,727,787, the rateable value being £236,024,438.

GENERAL REGULATIONS.

UNPAID PACKETS (*letters, newspapers, postcards*) are charged *double postage* on delivery; UNDERPAID PACKETS, *double the deficiency*.

RE-DIRECTION.—(1) By agent of addressee: *Letters, post-cards, printed papers, and newspapers* may be re-posted free not later than the day after delivery (Sundays and public holidays not being counted), and must not have been opened or tampered with. *Parcels* may be re-directed free of charge, within the same time limits, if the original and the corrected addresses are both within the same Town Delivery Area (the whole London Postal District being regarded for this purpose as one Town Delivery Area); otherwise they are charged on delivery at the ordinary prepaid rate. *Registered packets*, which must be taken to a Post Office, are re-*registered* free only up to day after delivery. (2) By the Post Office (not undertaken during temporary absence, unless house be left empty, or from clubs, hotels, &c.). Notice for re-direction of *letters*, &c., must be given on printed forms, to be obtained from the local postmaster or from postmen, and signed by the person to whom the letters are to be addressed. The notice holds good for twelve months, and may be extended by payment of 1*s.* for second, 1*s.* third, and 5*s.* each subsequent year. Separate forms must be filled in for *parcels*, and for the (postal) forwarding of *telegrams*.

REGISTRATION.—All kinds of postal packets intended for registration must be marked "Registered" in bottom left-hand corner, and *must be handed to an officer of the Post Office, and a receipt taken.* Parcels (or the string with which they are tied) and letters, must be fastened with wax or other adhesive. The registration fee is 3*d.* exclusive of postage. With a further 3*d.* the sender may obtain advice of delivery. The latest time for registering is usually half an hour before the latest time for posting ordinary packets; at Head Offices this may be done later for an additional 6*d.* late fee. Unregistered packets containing coin or jewellery, or found open and containing stamps, uncrossed bearer cheques, &c., over 10*s.* in value, or any marked "registered" and found in a letter-box, undergo compulsory registration (3*d.*), carrying no compensation.

COMPENSATION for loss or damage is granted, though not as a legal right even if fee is paid and packing adequate.—The fees for *compensation inclusive of registration* are:—Fee 3*d.*, compensation up to £5; 4*d.*, £20; and 1*d.* for each additional £20 up to the maximum 1*s.* 11*d.* for £400. *Compensation* up to £2 is given on (*a*) *unregistered parcels* (for loss, only if certificate of posting is obtained at the time of posting), (*b*) *unregistered packets* conveyed by Express Delivery Service No. (1). Compensation in respect of *money* of any kind (*coin, notes, orders, cheques, stamps*, &c.) is only given if particulars (for identification) are kept and the money is sent by Registered *Letter* Post in one of the special envelopes sold officially (*see* next page); the maximum compensation for *coin* is £5. Compensation for *jewellery, watches*, &c., is only given on *registered* packets; for *glass, crockery, greases, colour-powders, fish, meat, fruit, and vegetables* only when sent as *parcels*. Compensation is not given for *damage* to (1) eggs, soft fruit, liquids and semi-liquids or exceptionally fragile articles, in any case; (2) registered packets other than parcels, unless conspicuously marked "*Fragile, with care.*"

CERTIFICATE OF POSTING unregistered parcels, free; other unregistered postal packets, ½*d.*

EXPRESS DELIVERY SERVICE BY SPECIAL MESSENGER.—There are five services of which (4) and (5) alone are available on Sundays:—(1) All the way, from most offices which deliver telegrams. Inclusive charge, *which must be prepaid*, in cash or by stamps, 6*d.* per mile, or part of a mile, with 1*d.* on each *separate* packet after the first, up to ten, the maximum; also a special charge of 3*d.* on each packet over 1 lb. in weight. Packets must be handed over the counter with "Express" clearly marked in left-hand top corner. Live animals, liquids, and money may be delivered by this service, and persons may be conducted. The messenger may take back an inland telegram *gratis*. (2) After transmission by post, at sender's request: (*a*) from the ordinary delivery office, if a telegraph office, and *open* (maximum charge in London 6*d.*); or *if so marked*, (*b*) "Express Delivery from Head Office" in large provincial towns, and (c) in London "from Head District Office" or "from G.P.O." Packets must be marked "Express," with a broad vertical line back and front. Charges as before (without weight fee) in addition to postage. (3) Before ordinary deliveries, at addressee's request (6*d.* per mile for one packet, and 1*d.* for every ten or less additional packets). (4) *see* p. 504. (5) Of a message telephoned to an express delivery office (30 words for each express fee, besides telephone charges).—Waiting fees: 10 minutes free; each additional 15 minutes or part thereof, 2*d.*—For Sundays and Holidays, *see* p. 504, and next paragraph.

RAILWAY LETTERS.—On payment of 4*d.* extra at a Parcel or Booking Office of most railways, during such hours as the station is open, *whether on week days or Sundays*, an unregistered letter not exceeding 2 oz. will be forwarded by the next available train or steamship, and passed on from one company to another. The letter may be called for at the station of address, or posted there in the nearest letter-box, or (*except on Sundays*)

delivered as an Express Letter under Service *a* (or from the first Express Delivery office it reaches), or (by telegraphing for a messenger to meet it) under Service *x*.

DISPOSAL OF UNDELIVERED POSTAL PACKETS.—*Inland packets chargeable with a postage of 1½d. or more*, undelivered, are returned unopened if bearing sender's name and address outside; others are opened by the Returned Letter Officer and returned to senders without charge. Packets containing neither sender's address nor any enclosure of importance are destroyed, except parcels which, if not applied for, are generally disposed of after 4 months. If perishable are dealt with as requisite. *Packets chargeable with postage not exceeding 1d.* are redelivered to sender on payment of a second postage, if his name and address, with a request for return in case of non-delivery, appear on the outside; those without such request are disposed of. *Foreign letters, &c., undelivered in Britain*, are returned unopened, after a short detention, to the countries whence received; *parcels* are disposed of after a reasonable time for inquiry. If containing sender's address, he is advised, and parcel will be returned on payment of fresh postage. *British packets undelivered abroad* are returned to sender here on payment of charges due; but for *parcels see* p. 499.

POSTE RESTANTE (solely for the accommodation of strangers and travellers and for three months only).—Correspondence of any kind may be addressed as a rule to any Post Office (except Town Sub-Offices. It should have the words "Poste Restante" or "to be called for" in the address. If addressed to initials, or fictitious names, or Christian name only, it is not taken in, but is at once treated as undelivered. All persons applying for "Poste Restante" letters must furnish sufficient particulars to ensure delivery to the proper owner. Poste Restante letters, parcels, &c., from abroad, or letters at a seaport for an expected ship, are kept two months; others, only one fortnight. After these intervals they are treated as undelivered (*see* above), unless bearing request for return at end of the interval, or some specified *shorter* period.

Letter Post.

The Normal Post of the Country. Most things may be sent by it (except explosive, offensive or obscene matter, eggs, fish, game, rabbits, meat, fruit, and vegetables) (*see* p. 496).

Post Cards.

Postage (*see* p. 496). The left-hand half of the address side may be used for correspondence (the same holds for abroad). Plain cards (minimum size 4 × 2¾ in.), like but not thinner than official cards, may also be used both inland and abroad (maximum size (5⅞ × 4⅝).

Printed Papers Post (*see* p. 496).

For printed or written matter not in the nature of a letter, and not exceeding 2 lb.

By this post may be sent books and other works of a literary character, with or without written dedications, and any other *written or printed matter not being in the nature of a letter*, drawings, paintings, photographic prints, engravings, maps, &c., together with their binding (provided that the materials are those ordinarily used for the purpose and are not brittle or very fragile), together with anything necessary for the safe transmission of the packet. Commercial printed forms, legal documents, printers' copy and proofs, examination papers, answers, corrections, the writing on which refers solely to the subject matter of the document; Christmas and picture cards with date, names and addresses of sender and addressee, and with conventional formulas not exceeding 5 words or initials, are also admitted. (*See* the Post Office Guide.) Printed papers being subject to examination in the post, the cover, if any, must be capable of easy removal and replacement for purposes of examination, *i.e.*, without breaking, tearing, ungumming, or cutting.

Newspaper Post (*see* p. 496).

For newspapers registered at the G.P.O.

The cover, if any, must be open at both ends and easily removable, and copies should be folded so that title is readily inspected. Writing or additional printing is permitted, other than the words "with compliments," name and address of sender, request for return if undelivered, and a reference to a page. Newspapers not registered at G.P.O., Christmas or special issues of registered newspapers, or supplements apart from their ordinary publications, will be charged at printed paper, letter, or (with 1*d.* fine) parcel rate.

Parcel Post.

For bulky and heavy matter (*see* p. 496). The parcel should be marked "Parcel Post," and handed across the counter or given to a rural postman; and the postage must be prepaid by stamps, affixed by the sender. The hours for Parcel Post business are the same as for general postal business. Parcels are neither accepted nor delivered on Sundays. The name and address of sender should be inside or (not too prominent) on the outside of every parcel. More than 11 lb. must not be accepted from one person by a rural postman on foot or bicycle, without notice on the previous day, and he may refuse parcels if already loaded; a postman with a cart must accept what he can conveniently carry.

Parcels to Irish Free State, Channel Is. or I. of Man are liable to customs duty; the sender must, except in last case, declare contents when posting. 9*d.* customs clearance fee is charged on parcels from I.F.S. or Channel Is. delivered in Britain or N. Ireland.

By the *Cash on Delivery Service* (not available with I.F.S.) a sum (Trade Charge) up to £40 can under certain conditions be collected from addressee and remitted to sender of a parcel posted as a Money Order Office. Fees (additional to postage): For Trade Charge up to 10*s.*, 4*d.*; up to £1, 6*d.*, £2, 8*d.*; £5, 10*d.*; and for each further £5 or less, 2*d.*

(ii) Elsewhere: Size, (*a*) and (*c*) 1½ × 1½ × 1½ ft., (*d*) 18 × 8 × 4 in.; weight, (*a*) and (*c*) 4 lb., (*d*) 1lb. If in the form of a roll, the limits of size for (*d*) are 12 × 6 in. in case (ii), for (*a*) and (*c*) 30×4 in. everywhere. Postage must be prepaid; wholly unpaid packets are *stopped*. Regulations as to packing, writing, &c., are much similar to those for inland packets.

Parcels from abroad.

These are subject to British Customs examination, and duties (with 6*d.* fee, if any are levied) must be paid before delivery to addressee.

Parcels sent abroad.

Enquiries should always be made at a P.O., or the P.O. Guide consulted, before packing. Parcels can be (and if containing coin, jewellery, &c., *must* be) *insured* for many countries, but not registered. They are subject to *Customs*, and contents and value must be declared on special forms; undervaluation or other inaccuracy may lead to confiscation and heavy fines (especially U.S.A.). (Rebate of Customs Duty is allowed on British goods by the chief Colonies.) The Customs charges of Dominions and certain countries (not U.S.A.) can be prepaid by sender, on depositing generally one-fifth to one-half of declared value, otherwise they are collected from addressee. *Packing must be substantial*, and sometimes special kinds of packing are insisted upon. Certain articles are *prohibited*; among them letters nearly everywhere.

Delivery in many countries is only to certain towns, post offices, stations, or customs houses, whence addressee, who is notified of the arrival, must arrange conveyance. In Belgium, France, and Spain parcels are delivered by the railway companies. From most countries abroad, an *undeliverable parcel is returned without notice at sender's expense, unless, when posting*, he instructed *either* its abandonment *or* its delivery to some other address or person in the country. Warehousing fees and (rarely) the foreign customs duty are sometimes payable, the return postage always.

Limits:—Parcels over 11 lbs. are only accepted at important post offices, for the countries (*e. f.*, in table below), and generally may not contain coin, jewellery, &c. Maximum length generally 3½ ft., length and girth) combined 6 ft.; but to *Paraguay, Portuguese Timor*: length 2 ft., length and girth 4 ft.; *China*, other than about 1300 chief P.O.'s, the same, except that if not more than 8 in. across a parcel may be 3 ft. 3 in. long, and that for Sinkiang Province no parcel may exceed 1 × 1 × 1 ft. For *Italy*, length 2 ft., but if girth be not more than 2 ft., length may be 3 ft. 3 in.

Imperial and Foreign Parcel Rates.

General Regulations: Postage Abroad.

DUTIABLE ARTICLES, except to some countries, must be sent by Parcel or Insured Box Post.

REGISTRATION (except parcels and magazine post) is in force to almost all countries. Valuable articles may not be sent in unregistered letters. Fee, 3*d.* Compensation on registered packets up to £2 is paid in the case of entire avoidable loss while in the custody of a country in the Postal Union (*see* † p. 498), if claimed within a year.

INSURANCE (including, except for parcels, REGISTRATION) may be effected on packets to many countries (not U.S.A.) at the following rates:—5*d.* for £12; and 2*d.* for every additional £12 up to 5*s.* 11*d.* for £400. COMPENSATION up to 20*s.* (32*s.* if over 11 lb.) is also given on *uninsured* parcels to or from Newfoundland, India and the smaller colonies, Egypt, with many larger foreign countries, except U.S.A., if certificate of posting is produced. Only packets containing nothing but valuable papers (banknotes, etc.) or valuable documents (plans, etc.) can be insured as *letters*; *other* valuable articles should be sent as insured parcels, or as "insured boxes."

INSURED BOX POST.—Jewellery and similar articles (*not* letters, valuable paper, or commercial papers, except an open invoice) may be sent in strong boxes by letter mails to some British colonies, Argentine, Austria, Belgium, Brazil, China, Danzig, Denmark, Egypt (not Sudan), France and many French colonies, Germany, Holland, Hungary, Italy, Japan, Luxembourg, Palestine, Portugal, Sarre, Sweden, Switzerland. Postage 2*d.* per 2oz. (minimum 10*d.*); maximum weight 2lb., size 12×4×4 in. Customs declarations must be filled in. Insurance rates and limit as above.

* Including French India, Andamans, and agencies in Tibet (Gyangtse, Pharijong, Yatung-Chumbi), on Persian Gulf (Bahrein, Dubai, Muscat), and Baluchistan (Gwadur, Pasni).

† Casablanca, Fez, Marrakesh, Mazagan, Mogador, Rabat, Safi in French, Larache, Tetuan in Spanish zone.

‡ Rate to Bushire, Bunder Abbas, Lingah, Mohammerah; Bonzilup.

[For other notes, *see* p. 499.]

CASH ON DELIVERY.—A reciprocal service exists between Great Britain and various parts of the Empire and certain Foreign Countries. Fees for collection: 4½*d.* for Trade Charge (amount to be collected) not exceeding £1, with 2½*d.* extra for each additional £1 of Trade Charge up to the maximum, which is £40 (fee 8*s.* 6*d.*) but in some countries £20 or £30. Addressee has generally also to pay on delivery, besides Customs if any, a further fee (6*d.* in U.K.) not prepayable. If Trade Charge cannot be collected the rules for undeliverable parcels apply.

INTERNATIONAL EXPRESS SERVICE.—Delivery by special messenger of correspondence (locally including parcels up to 11 lb.) to or from certain countries (*e.g.* West and Central Europe, except Spain, and Union of S. Africa), or certain towns in the same, has now been arranged. 6*d.* is paid by the sender, the rest by addressee.

MONEY AND POSTAL ORDERS.

ADVICE OF PAYMENT: 2*d.* inland (and to I.F.S.), 3*d.* for foreign and colonial orders (to certain countries). Payment may also be stopped (fee 4*d.*); or deferred (at time of issue).

Inland (and I.F.S.) Ordinary Money Orders.

The poundage charged is, for sums not exceeding £3, 4*d.*; £10, 6*d.*; £20, 8*d.*; £30, 10*d.*; £40 (maximum), 1*s.* No order may contain a fractional part of 1*d.* The rules and regulations are on the forms issued. *No poundage is charged for M.O. in payment of many Revenues (including Income Tax)* if official "notice to pay" is produced, or of *Savings Certificates.*

Inland Telegraph Money Orders.

Money may be transmitted by Telegraph Money Order from any Money Order office which also despatches telegrams, and may be made payable at any Money Order office which also delivers telegrams, and at some other offices.

Poundage at the same rate as for Ordinary Inland Money Orders, *plus* supplementary fee of 2*d.*, and cost of official Telegram of Advice. If the order is to be delivered at payee's address any charge for porterage must be prepaid.

Postal Orders.

British Postal Orders are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on week-days. They are also issued and paid in almost all parts of the Empire, in Egypt, Palestine, and at the British Agencies in Morocco (p. 500, *note* †) including Tangier. They are *paid* (but not *issued*) at 55 Canadian offices, in Iraq, and (to soldiers only) in Australia. They are issued, with a counterfoil to be retained by the sender, for every 6*d.* up to 20*s.*, and for 21*s.* Poundage: 6*d.* to 2*s.* 6*d.*, 1*d.*; 3*s* to 15*s.*, 1½*d.*; 15*s.* 6*d.* upward, 2*d.* The name of payee must be inserted. They must be presented for payment within 3 months from last day of the month of issue, or a fresh poundage will be charged. Adhesive British Postage Stamps (*not* perforated, and not exceeding 3 in number) may (except for Canada) be affixed to the *face* of an order, to increase its value by 1, 2, 3 4 or 5 pence.

Ordinary Money Orders Abroad.

These, which are payable in nearly all countries, should be taken out 1 or 2 days before despatch of mail. Poundage, £1, 6*d.*; £2, 1*s.*; £3, 1*s.* 6*d.*, and thereafter 3*d.* per £1 or part thereof. Limits of amount, £20 or £40. Period of validity, 6–12 months.

Telegraph Money Orders Abroad.

Only to certain countries, *e.g.*, to Canada, India and U.S.A., and to certain towns only in others, *e.g.*, Australia, New Zealand, South Africa, Egypt and Palestine. Poundage at same rate as for Ordinary Money Orders abroad, *plus* cost of official Telegram of Advice (at deferred rate if desired, in most British Possessions), *plus* supplementary fee of 6*d.* for Newfoundland and foreign countries, 1*s.* for British Empire and Mandates, Egypt (Canada 6*d.* if telegram is full-rate).

TELEGRAMS.

Inland.

Telegrams may be handed in at a telegraph office, or, if prepaid, posted or handed to a rural postman. Rate throughout British Isles, 12 words or less 1*s.*, each further word 1*d.*; the address, which may be telephonic (*e.g.*, "Jones, London North 154"), is charged for; (an abbreviated address may be registered for £2 per annum, and is then inserted free of charge in Sell's Directory, published at 8 & 9 Johnson's Court, Fleet Street, London, E.C. 4). Payment in stamps affixed to the form by the sender. Original or redirected telegrams, or replies, handed in on *Sundays*, and (except in Scotland) *Good Friday, or Christmas Day* are charged 6*d.* extra. Replies may be prepaid up to 48 words; the voucher issued to addressee may be used, or its value refunded to sender, within 12 months. Receipt for charges 1*d.* Certified copy 6*d.*, sometimes more. The charge includes delivery within 3 miles (1 in Irish F.S.) of the nearest telegraph delivery office, or, if this be a head office, within the town postal limits—beyond that limit the charge is 6*d.* per mile, calculated from the free delivery limit, to be paid by sender (in I.F.S. by addressee). Usual hours 9 a.m. to 7 p.m.; larger offices 8 a.m. to 7, 7.30 or 8 p.m. (*see* below and p. 504). For Sunday and Holidays, *see* above, below, and p. 504.

LATE FEES.—A telegram may often be got through from an office which is open to one which may, perhaps, be closed for telegraphic business by payment of the following extra fees: 1*s.* for the telegraphist, 1*s.* for the messenger, and 6*d.* an hour for the telegraphist if he has to wait for a reply. In the same way postmasters may accept telegrams after the usual hours on payment of 1*s.* for the postmaster, 1*s.* for the telegraphist, and 1*s.* for a messenger if it be necessary to call the telegraphist.

COUNTING, &c.—Plain language, *i.e.*, Latin or any modern European language, is charged for according to the number of words; all other words or unintelligible combinations of letters are charged one word *per* 5 letters. *The following count as one word*:—(1) All names of towns and villages in U.K. (*not* of branch or sub-offices or districts in towns, unless in addition to street name); (2) all names of railway and coastguard stations (*not* in towns) with public telegraph; (3) words *ordinarily* written as one or with hyphen, as "cannot" "to-day," &c.; (4) *Names* with prefix "St.," "De," "De la," "O'," "Mac," but not hyphened surnames; (5) each five *figures* (th, &c., in ordinals count as two figures); (6) each initial, *except* London Postal Districts (p. 498—A.M.—P.M.—E.M.S. (in address), which are one word each group; (7) signs of punctuation, and the symbols a/c, b/l, s/s, c/o/%; counts as one word or as three figures); (8) names of telegraph offices abroad written in the form in which they occur in the International List of Telegraph Offices.

NIGHT TELEGRAPH LETTERS with full ordinary address, in plain language, for delivery (except on Sundays) by first morning post, may be sent before midnight between offices marked *t* below (with Fleet Street and House of Commons T.O. in London) with additional fee of 1*s.* (before 10 p.m.) and Londonderry (8 p.m.), at 1*s.* for 36 words or less, and 1*d.* per 3 words beyond 36. Reply prepaid for 1*s.* to 4*s.* extra.

Abroad.

In the following list the names of countries on places are followed by the ordinary or FULL RATE per word (minimum charge, 1*s.* 3*d.*) from any part of the United Kingdom, whether transmitted by cable or by radio-telegraphy (wireless). OTHER RATES are indicated by signs referred to in footnotes. Certified copy : 5*d.* per 50 words or less (minimum 1*s.* 3*d.*).

Rules for counting of words are more or less as for inland (*see* above); in *address*, name of terminal office coming under class (8) counts as one word. In plain-language telegrams (which must be in roman characters) 15 letters, in code 10, in cipher 5, is the maximum number counting as one word. *Prepaid Replies* (minimum 10*d.*) are allowed from most places, but not at any Reduced Rate. The indication for this "RP," counting as one word, must be paid for ("RPD" if Urgent *q.v.*).

URGENT TELEGRAMS or replies, at three times Full Rates, are allowed to or from all places or regions in the list *except* those followed by the sign ‡, and *except* by certain routes. Minimum charge, 2*s.* 6*d.*; the word "Urgent" must be paid for.

REDUCED RATES (not available for radio-telegrams): (*A*) *Deferred Telegrams*, in plain English (indication LCO, charged one word) French (LCE), or sometimes language of country of destination (LCD), are accepted at usually *half* the Full Rate on condition that they may, if necessary, be deferred during transmission in favour of Full-rate Telegrams. This service applies to all regions, places, or rates in the list *except* (i) Europe, ii: those marked thus ‡. When the deferred rate is other than half the full rate it is given next after the sign *d*. (*B*) *Letter Telegrams*, charged at about quarter rates, must be in English or French. *Week-end Letter Telegrams* (TWT) normally delivered on Monday mornings, must reach Central Telegraph Office, London, by Saturday night; *Night Letter Telegrams* (TLT), may be handed in at any time of any day, for delivery next morning (unless it be Sunday): *Daily Letter Telegrams* (DLT) are for delivery not *less* than 48 hours after acceptance. The "indication" (shown above) must be paid for one word according to the kind of letter telegram sent. The signs *nd*, *lt*, *dlt* in the list below show the countries to which the respective services extend; the two prices following the sign are those of (i) the first 20 words or less, (ii) each further word.

SUNDAY AND HOLIDAY ARRANGEMENTS.

On SUNDAY throughout the U.K. no *Parcel Post, Money and Postal Order*, or *Savings Bank* business is transacted, nor is there any delivery even to callers of letters, &c., except by Express Services (4) and (5) below. *In London* all but 27 post offices are closed. These open in the morning, 25 of them (including those mentioned in the next paragraph, on p. 502, or on p. 502 also in evening (stamps, telegrams). St. stations chiefly S. of the Thames, besides those on p. 502, send telegrams, mostly at train times. The general collection (10 p.m. to midnight) is for *Monday* mails and first London delivery. Letters for *Sunday Mails* must be posted with extra stamps (late fee) at the places and by the times indicated below. *Registered* (post in special boxes; late fee: ½*d*. inland, 2*d*. abroad): Day Mails: (1) Continent: at G.P.O., up to 7 a.m. Night Mails: (2) Continent: G.P.O., 6 p.m.; (3) N. Europe (*vid* Hook): Liverpool St. Sta. (G.E.R.), 8.15 p.m.; (4) France, Italy, Switzerland, Spain, Portugal, Algeria, Tunis, as for 5 and 6 below: Victoria (L.B. & S.C.) 3.20 p.m.; (5) Inland: (i) (*a*) G.P.O, 6 p.m.; (*b*) 24 offices open on Sundays, 4.45 to 6 p.m.; (*c*) 3 offices not open 5.15 to 5.30 p.m.; (ii) up to 6 p.m. in boxes at *any* of termini referred to under (iii) below (exc. Cannon St. or at Charing +), and Victoria, up to 6.30 p.m. at *appropriate* terminus up to times marked *s* on p. 498 (under late fees, Inland Mails), and Charing + (Kent, &c.) 9.30 p.m. *Registered* (to be handed in; late fees: at sorting carriages 1*s*. 6*d*., elsewhere 3*d*. Inland, 6*d*. abroad): Mails and (6) Victoria (L.B. & S.C.) Telegraph Office, 6.30 a.m., 5.55 p.m. respectively; (4) Same as for 5 below, also Victoria sorting carriage 8.20 p.m.; (5) P.O.s referred to under 5 i *b* above, 5 minutes before special box closes; also at Centr. Tel. Office, 5.55 p.m.; and sorting carriages referred to under 5 ii above; Euston 8.15 a.m. train. *Outside London* all Head Offices and most country telegraphic Sub-offices open from 9–10.30 a.m. (Scotland 9–10 a.m.) for stamps, telegrams, registration; but all town Sub-offices, and most non-telegraphic offices, are closed. Many stations send railway letters (*q*). Inland telegrams at train times. There is a collection and night despatch in most towns.

Express Sunday Delivery (Service 4) is available *only* to and from London and a few Provincial Head Offices. The offices marked *x* on pp. 501 *x*, together with the following in London, complete the list: G.P.O., W. and S.W. District Offices, and among Branch Stations: Camberwell Green, Chapel Street, Grosvenor Hammersmith Broadway, Holloway, Stratford, and Swiss Cottage. Letters, &c. (not parcels) are accepted up to time of posting for general Saturday night mails (for Belfast, locally earlier); fee 1*s*., besides postage and usual express fees (calculated in London from G.P.O.). *Outside London*:

Express Delivery by messenger of a telephoned message (Service 5, p. 496) is on Sundays restricted to the London Postal District; but a letter reaching "Central Telegraph Office, London, E.C. 1," early on Sunday morning will be telephoned to the addressee in the London Telephone Area if the envelope be marked conspicuously "For Sunday telephone delivery," with a broad perpendicular line back and front, usual postage being prepaid on the envelope, and 3*d*. per 30 words or less by stamps affixed to the enclosed message.

CHRISTMAS DAY and GOOD FRIDAY.—*In London* there is one message delivery, Sundays &c., on Christmas Day; none on Good Friday. Offices are usually opened as on Sundays, but in some cases for shorter hours. *Outside London*: In Scotland business is as on week-days. In England and N. Ireland there is one delivery of letters and parcels; no acceptance of parcels. Offices open as Sundays.

BANK HOLIDAYS.—*London*: One morning delivery of letters and parcels. Collection of letters, evening (from Head District and Branch Offices only) and late (general); parcels are accepted, in the morning, but are not despatched. Head District Offices (p. 422) open for most business (but not ordinary Money Order, Savings, Licence, Pensions). *Outside London*: In *Scotland*, business is generally as usual. In *England and Ireland* only one letter and parcel delivery, and generally one despatch (early in rural districts). Smaller offices are closed; the more important open in morning, some also in evening, for parcels, express, &c., and answering only postal orders. Telegraph offices nearly all open 9 to 10.30 a.m. and generally at the same hours, if any, as on Sunday evenings.

PUBLIC HOLIDAYS in *Scotland*: Telegraph mostly as usual, other business as English Bank Holidays. One delivery only on Local Holidays. On New Year's Day one delivery of letters and parcels, no parcel, M.O., P.O., &c., business; hours as on Sundays.

Wireless Telegraphy.

Post Office as Licensing Authority.—By the Wireless Telegraphy Acts, 1904-25, it was made illegal to install or work wireless telegraphy in the United Kingdom or on board British ships in territorial waters except with the Postmaster General's licence. The Merchant Shipping (Wireless Telegraphy) Act, 1919, made it compulsory for all British sea-going ships over 1,600 tons to carry wireless apparatus. The Post Office conducts the inspection of such apparatus under the Acts, and also the examination of Wireless Operators and Watchers for the Postmaster General's Certificate.

Ship and Shore Service.—The ship and shore stations of the Marconi Company and Lloyds, 10 in number, were bought by the Postmaster General in 1909. The service has since been reorganised and now comprises 12 stations, viz:—Cullercoats, Fishguard, Humber, Land's End, Malin Head, Niton, North Foreland, Port Patrick, Seaforth, Valentia, Wick, and Devizes.

Anglo-Continental Wireless Services. — Post Office wireless services having been instituted side by side with the cable services to the following Continental countries:—Italy, Poland, Estonia, Hungary, Czechoslovakia, the Free State of Danzig, Russia and Rumania.

The services with Poland (in part), Danzig and Estonia are carried on *viâ* the Stonehaven Station (near Aberdeen), which is also available for communication with Scandinavia and Iceland during cable interruptions; while the services with Italy, Hungary, Czechoslovakia (in part), and Rumania are carried on *viâ* the Northolt Station (near London). The latter station is also used for the transmission of news and commercial intelligence intended for reception in certain European countries

Oxford and Cairo Stations.—The high-power stations at Leafield, near Oxford, and at Abu Zabal, near Cairo, were completed in August, 1921, and April, 1922, respectively, and a regular service between these stations was opened in May, 1922, for the transmission of telegrams between Great Britain on the one hand, and Egypt, Palestine, Iraq, Transjordania, Syria, Abyssinia, Erythrea, and Italian Somaliland on the other hand. The Oxford station is also used for the transmission of press messages to Halifax (Nova Scotia), and for the services to Czechoslovakia and Poland.

New Super-power Station at Rugby.—A new super-power station was opened at Rugby on January 1, 1926. The station has a power of 1,000 kilowatts and is capable of communication with any part of the globe. It is used for the broadcasting of the British Official news messages and for transmitting telegrams and news messages to ships at sea.

Marconi Company's Stations at Caernarvon and Ongar.—The only privately-owned wireless stations in this country at present carrying on commercial services with other countries are the Marconi Company's stations at Caernarvon, used for communication with the United States, and at Ongar, used for communication with France, Switzerland, Spain, Austria, Yugo-Slavia and Russia. The Ongar station also exchanges telegrams *viâ* Vienna with Bulgaria, Greece and Turkey.

Beam Stations.—Two groups of stations on the "beam" system, each consisting of two units, have been erected for the Post Office by the Marconi Company under contract: (x) for communication with Canada and South Africa, and (z) for communication with Australia and India. The transmitting unit of the group of stations for communication with Canada and South Africa is situated near Bodmin, and the receiving unit near Bridgwater. The transmitting unit of the group for communication with Australia and India is situated near Grimsby, and the receiving unit near Skegness.

All the stations are controlled from the Central Telegraph Office, London, which is thus placed in direct communication with Montreal, Cape Town, Melbourne (or Sydney) and Bombay. The rates are two-thirds of the corresponding cable rates in force in July, 1924, except in the case of the Canadian service, where the rates are the same as the existing cable rates.

* Radiotelegrams.

The *Address* of a radiotelegram should contain name of addressee, of ship, and of coast-station to be used. Messages for *H.M Navy* must have in the address "Warship" followed by the name of the vessel and (*a*) if it be abroad, the name of the coast station [if this name is not known, sender should enquire of the Secretary, Admiralty, London, by reply-paid telegram or letter, stating when it is proposed to send the message]; if it be *at sea* in the Mediterranean, the only coast station allowed is Rinella (Malta); (*b*) if the ship be in home waters, the word "Wireless" (*see* Note 2). Radios to H.M. Ships cannot be sent through Devizes or Rugby Radio. In the case of the *Mercantile Marine*, "Steamship" should precede the name if confusion with name of some telegraph office is otherwise possible; if name of nearest coast station is uncertain the message may yet be got through by other means (*see* Notes 2 and 3), while if the name of the ship is not known, sufficient particulars of the voyage (names of ports, &c.) may be substituted, at sender's risk, under services *A* 1, *B* 1, and *B* 2 only. *Prepayment of Replies* is admissible except for messages through Athens or St. Pierre and Miquelon. *Counting of words*, etc., the subject to the rules for ordinary Telegrams Abroad; the name of ship and (if written in standard form) name of coast station count as one word each.

The *Cost of Transmission (per word)* from any telegraph office is the sum of three rates: rate for cable or other message to the coast station (denoted by *t* below); coast station charge (*c*); and ship charge (*s*). The charges and services may be classified as follows:—

A. Ordinary Distance, to all ships: 1. *Through Post-Office coast stations†* (range 250—300 miles): (*t*) + (*c*) = 7*d.* Ship charges (*s*) are as follows:—(i) H.M.Navy *nil*; (ii) ships of most nationalities, including British, 4*d.*; (iii) Argentine, Belgian, Danish, Dutch, Greek, Norwegian and Portuguese ships, 8*d.*, but with a minimum 3*s.* 4*d.*; (iv) Spanish and Swedish ships, 3*d.*, minimum 2*s.* 6*d.*; (v) Finnish ships, 1½*d.*, minimum 1*s.* 3*d.*; (vi) Lettonian ships, 1½*d.*, minimum 1*s.* 2. *Through coast stations abroad*: (*t*) = rate for *full-rate* telegram to the country in which coast station is situated (see list under Beam Stations). Telegrams *A* 2 and *B* 2, which vary from 0 to 10*d.*, is given in the same list, after the name of a country or place with a coast station, preceded by the sign *c* (*see* Note 3); (*s*) same as given under *A* 1 (*s*).

B. Long-distance Communication with certain ships beyond range of ordinary stations: 1. *Via P.O. station "Devizesradio"* ("continuous wave", range about 1,500 m.) *to ships* (ships of about 319) having long-range *sending* apparatus; rates same as under *A* 1. 2. *Via P.O. station "Rugbyradio"* (which must appear in address) at 12 a.m. and (exc. Sun.) 7 p.m. (range world-wide) to the above-mentioned 319 ships, as well as others (about 1,896) with long-range receiving apparatus; ships are unable to reply or acknowledge receipt to this station. Rates, (*t*) + (*c*) = 1*s.* 2*d.*, (*s*) = same as under *A* 1(*s*). 3. *Via the following coast-stations* abroad to the

* "Radiotelegram," as used in the official Postal Guide, denotes only a message to or from a ship at sea, and includes no other kind of radiotelegraphic message.

NOTE 1.—The word "Wireless" *may* be substituted for name of a particular P.O. coast station in services *A* 1 and *B* 1, but not *C* 1; and *must* be so substituted in messages for one of H.M. ships known by the sender to be within 250 miles of the British Isles (service *A* 1)—in this case the P.O. ascertains proper coast-station.

NOTE 2.—Messages intended to pass through ordinary-distance coast stations in Newfoundland or *east* coast of Canada (not Louisburg) may have "Montreal" in place of the name of any particular station, similarly those for coast stations on east coast of Canada (except Cape Race) or either coast of U.S.A. may bear "New York." The inclusive charge in both cases is 1*s.* 9*d.* per word.

NOTE 3.—If *m* follow the coast-station charge shown after *c* in list, and not otherwise, this charge is subject to a minimum equal to the cost of 10 words; but if a number follow the *m*, then the minimum is equal to the cost of that number of words. Thus (*c* -*m* 8) denotes a coast-station charge of 2*d.* per word, with a minimum of 16*d.*

At the Imperial Conference of Oct. 1926, the Secretary for Air, Sir Samuel Hoare, laid down two broad propositions :—

(1) That the Empire is in urgent need of better communications.

(2) That their improvement will require a sustained and united effort.

As an illustration of the power of the new instrument now within their reach, he remarked that there was no technical or operational reason why by aeroplane or airship London should not be brought within a fortnight of the furthest cities and territories of the Empire. Journeys could be reduced to the following periods :—

	Days.
Canada	3½
India	5
Cape Town	6
Australia	11
New Zealand	13

The Secretary for Air referred to the opening at the end of 1926 of a regular civil air line between Cairo and Karachi enabling seven or eight days to be saved on the journey from England to India. He showed how this might become, given the necessary co-operation, the first section of an Empire air route to the Far East stretching to Australia and New Zealand. There must also, he said, be an Empire air route from London to the Cape, with branches diverging to the West African Dependencies. Here again a small beginning was being made during the next few months, as "an enterprising pioneer" had organised an experimental service covering 1,400 miles between Khartoum and Kisumu. For the creation of these two long-distance air routes the co-operation of the overseas Governments was essential for the provision of suitable landing grounds. Empire airship routes were also dealt with in the statement. The two great airships which the British Government is building will be completed in a year's time. It is then proposed to fly at least one of the airships regularly to and from India for a full period of trial. It is also hoped, if the Dominions so desire, to make demonstration flights to the capitals of the Empire. These two airships are of 5,000,000 cubic feet capacity, or about 150 tons gross lift.

CIVIL AVIATION.

RETURNS supplied voluntarily by civil air transport firms in the United Kingdom for the year 1925 show that for Great Britain and on the Continental route 37,485 flights were made, the mileage totalling approximately 1,031,000, of which 862,000 was over regular air routes. The number of passengers carried was 80,571, and the weight of goods carried amounted to 454·8 tons. During this period 85 pilots were licensed for the first time and 217 licences were renewed, the number of licences current at the end of the year being 182 ; 98 aircraft were licensed for the first time and 151 licences were renewed, the number of licences for aircraft in force at the end of the year being 214.

In 1925 there were no accidents resulting in death or injury to occupants.

THE first Act obtained for the construction of a railway was that of the Surrey Iron Railway Company in 1801 for a line 9½ miles long from Wandsworth to Croydon. During the following 47 years parliamentary sanction was granted for construction of thousands of miles of railways and was known as the "railway mania" period.

The Railways Regulation Act of 1840, the first of the General Acts, provided for a month's notice being given to the Board of Trade before opening; for returns of traffic to be made by the companies, as also of accidents involving personal injury; for Government inspection of works, for the approval of bye-laws, &c. Afterwards were passed Acts for their better regulation, and for the conveyance of troops, 1842, the Railways Further Regulation Act of 1844, the Railways Clauses Consolidation Act, 1845, and the Canal and Railway Carriers Act of the same session.

The Cheap Trains Act, 1883, amended by the Finance Act, 1921, provides that fares not exceeding the minimum fare shall be exempt from duty, but fares for return or periodical tickets shall be exempt from duty only where the ordinary fare for the single journey does not exceed that rate. On all other fares a duty of 2 per cent. is charged between stations within one urban district. Such district shall contain not less than one hundred thousand inhabitants, and must be of a continuous urban as distinguished from a rural or suburban character. Outside this area the duty payable is 5 per cent. The expression "minimum fare" means the lowest fare normally charged to an adult or a child, as the case may be, for a single, a return, or a periodical ticket, as the case may be, for any journey, and the expression "normally charged" means charged otherwise than to a special class of passengers or on a special occasion.

Officers or men in the military or police forces, when travelling on public service, are charged three-fourths or one-half of ordinary passenger rates, according to number travelling. The Act does not extend to Ireland.

Hiring of Special Trains.—The charges per mile for hire of special trains are 10s. Single and 15s. Return, plus the ordinary fare for each passenger according to class of vehicle hired. Minimum £6.

The Workmen's Compensation Act, 1897.—This Act, which received the Royal assent on Aug. 6, 1897, came into operation on July 1, 1898.

The Railways Act, 1921, which received the Royal assent on Aug. 19, 1921, amalgamated all railways in Great Britain (with a few exceptions) into four groups, viz., Great Western, L. & N.E., Lon. Mid. & Scottish, and Southern. Details of this Act are given in previous editions of Almanack.

Irish Free State Railways Act, 1924 (Acht Na Bothar Iarainn, 1924), dated July 23, 1924. The Act in general corresponds very closely to the British Railways Act of 1921. Details of this Act are also given in previous editions of Almanack.

Steamers of less than 100 tons gross, and Sailing vessels of less than 100 tons net, are not included.
Vessels trading on the Caspian Sea, and *Wood* vessels trading on the Great Lakes of North America, are not included.
Japanese Sailing vessels are not recorded in Lloyd's Register Book.
In the absence of satisfactory information most of the sailing vessels belonging to Greece, Turkey, and Southern Russia are also omitted.

SHIPBUILDING.

DURING 1925-26 the committee of Lloyd's Register passed plans for 361 new vessels of 1,089,360 tons gross—a figure substantially below that for 1924-25; of this total projected tonnage 68·3 per cent. (744,030 tons) is to be built in Great Britain and Ireland, and 31·7 per cent. (345,330 tons) abroad, the percentage of the amount to be built at home showing an increase of 13·3. The countries contributing to the total include :—

Country.	No. of Vessels.	Gross Tons.
Great Britain and Ireland	269	807,627
British Dominions	14	14,679
Germany	27	198,172
Italy	20	69,690

Oil (including steamers capable of burning either coal or oil)	21,736,823

The *M.S. Augustus*, under construction at Sestri Ponente, near Genoa, to the order of the Navigazone Generale Italiana, will be the largest and highest-powered oil-engined vessel afloat.

During 1925-26 refrigerating installations were fitted in fifty-one vessels, representing a total insulated capacity of nearly 4,400,000 cubic feet. Among these are the *M.S. Upwey Grange*, which has thirty-two insulated cargo chambers of a total capacity of 550,830 cubic feet.

Mercantile Shipping.

On June 30, 1925, the sea-going Mercantile Marine of Great Britain and Ireland of 100 tons and upwards had a total tonnage of 19,440,711 gross tons, of which 19,304,670 tons were steamers and motor ships, and 136,041 sailing vessels. In 1923 there were 1,624 motor vessels, aggregating 428,214 gross tons, registered as trading vessels, and 4,712 motor vessels (51,413 tons net) registered as fishing vessels. In 1923 there were 198,513 British seamen employed (with 55,935 Lascars and 11,477 other foreigners) in trading vessels; there were also 57,525 British regularly (and 10,066 occasionally) employed in fishing vessels.

Wrecks.—In 1924, 47 sailing vessels (4,702 gross tons) and 133 steam vessels (103,826 gross tons), a total of 180 vessels (108,528 gross tons), were totally lost at sea. In 1924 the following lives were lost through wrecks at sea—from sailing vessels, crew 10, passengers *nil*; from steam vessels, crew 161, passengers *nil*—a total of 171. The years with the heaviest losses of life at sea were 1912 and 1914. In 1912 the total of 2,335 included 673 of the crew and 845 passengers on *S.S. Titanic*; in 1914 the total of 1,778 included 171 of the crew and 840 passengers on *S.S. Empress of Ireland*.

THE KINGDOM OF ENGLAND.

Position and Extent.—The Kingdom of England occupies the southern portion of the island of Great Britain and lies between 55° 46′ and 49° 57′ 30″ N. latitude (from the mouth of the Tweed to the Lizard), and between 1° 46′ E. and 5° 43′ W. (from Lowestoft to Land's End). England is bounded on the north by the summit of the Cheviot Hills, which form a natural boundary with the Kingdom of Scotland; on the south by the English Channel; on the east by the Straits of Dover (Pas de Calais) and the North Sea; and on the west by the Atlantic Ocean (which washes the Cornish coast), the Principality of Wales and the Irish Sea. The total area of the kingdom is 50,851 square miles. At the *Census* of 1921 the population numbered 35,678,530 (an increase of 1,633,240 in the decennial period).

Relief.—There is a natural orographic division of England into the hilly districts of the north, west and south-west, and the undulating downs and low-lying plains of the east and south-east. In the extreme north the *Cheviot Hills* run from east to west and divide England from Scotland, culminating in the Cheviot, 2,676 feet above mean sea level. Divided from the Cheviots by the Tyne Gap is the *Pennine Chain*, running N. by W. to S. by E., with their highest point in Cross Fell, 2,930 feet above mean sea level. West of the Pennines are the *Cumbrian Mountains*, which contain in *Scafell Pike* (3,210 feet) the highest land in England, and east of the Pennines are the *Yorkshire Moors*, their highest point being Urra Moor (1,489 feet). South of the Pennines there are heights above 2,000 feet in the *Peak of Derbyshire* (highest point 2,088 feet), and in *Dartmoor* (High Willhays, 2,039 feet). In the western county of Shropshire are the isolated Wrekin (1,335 feet), Long Mynd (1,674 feet), and Brown Clee (1,805 feet); in Herefordshire the Black Mountain reaches 2,310 feet, in Worcestershire the Malvern Hills reach 1,395 feet, in western Monmouthshire are the Sugar Loaf (1,955 feet) and Coity (1,905 feet), and the Cotteswold (or Cotswold) Hills of Gloucestershire contain Cleeve Cloud (1,134 feet).

Hydrography.—The *Thames* is the longest and most important river of England, with a total length of 210 miles from its source in the Cotteswold Hills to its outflow into the North Sea. The lower river is navigable by ocean-going steamers to London Bridge, and small craft reach Lechlade, 160 miles from the mouth. The Thames is tidal to Teddington (60 miles from its mouth), and its upper stream is connected with the Severn by a canal at Lechlade; the Wilts and Bucks canal enters at Abingdon, and the Wye canal at Reading. The principal tributaries are the Cherwell, Lee, Kennet, Wey, Mole and Medway. The Thames forms county boundaries almost throughout its course, and on its banks are situated the capital of the British Empire; Windsor Castle, the home of the Sovereign; Eton College, the first of the public schools; and Oxford, the oldest university in the kingdom. The *Severn* is the longest river in Great Britain, rising in the north-eastern slopes of Plinlimmon (Wales) and entering England in Shropshire, with a total length of 220 miles from its source to its outflow into the Bristol Channel, where it receives on the left the Bristol Avon, and on the right the Wye, its other tributaries being the Vyrnwy, Tern, Stour, Teme and Upper (or Warwickshire) Avon. The Severn is tidal below Gloucester, and a high bore or tidal wave sometimes reverses the flow as high as Tewkesbury (13½ miles above Gloucester). The scenery of the greater part of the river is very picturesque and beautiful, and the Severn is a noted salmon river, some of its tributaries being famous for trout. Navigation is assisted by the Gloucester and Berkeley Ship Canal (16¾ miles), which admits vessels of 250 tons to Gloucester, other canals connecting with the Thames, Trent, Dee and Mersey. The *Severn Tunnel*, which carries the Great Western Railway under the river, 14 miles below the Sharpness Bridge, was begun in 1873 and completed in 1886 (at a cost of £2,000,000) after many difficulties from flooding, &c. The tunnel is 4 miles 624 yards in length (of which 2½ miles are under the river). Of the remaining English rivers those flowing into the North Sea are the Tyne, Wear, Tees, Ouse and Trent from the Pennine Range, the Great Ouse (160 miles) from the Central Plain, and the Orwell and Stour from the hills of East Anglia. Flowing into the English Channel are the Sussex Ouse from the Weald, the Itchen from the Wiltshire and Hampshire Hills, and the Axe, Teign, Dart, Tamar and Exe from the Devonian Hills; and flowing into the Irish Sea are the Mersey, Ribble and Eden from the western slopes of the Pennines and the Derwent from the Cumbrian Mountains. The *English Lakes* are noteworthy rather from their picturesque scenery and poetic associations than from their size. These lie mainly in Cumberland, but partly in Westmorland and Lancashire, the largest being Windermere (10 miles long), Ulleswater and Derwentwater.

Islands.—The *Scilly Islands* form part of the county of Cornwall, and are distant 25 miles from Land's End. The group consists of about 40 islands, with a total area of about 4,000 acres, only St. Mary's, Tresco, St. Martin's, St. Agnes and Bryher being inhabited, the total population in 1921 being 1,749. The capital is Hugh Town, in St. Mary's. The climate of the Scilly Islands is unusually mild, and vegetation is luxuriant, semi-tropical plants flourishing in the open. The *Isle of Wight* forms an administrative county and is separated from Hampshire by the Solent and Spithead. The total area is 147 sq. miles, with a population in 1921 of 94,697. The climate is mild and healthy, and many watering places have grown up during the last century. The capital is Newport, at the head of the estuary of the Medina, Cowes (at the mouth) being the chief port; other centres are Ryde, Sandown, Shanklin, Ventnor, Freshwater, Yarmouth, Totland Bay and Bembridge.

Climate.—The south-westerly winds from the Atlantic Ocean penetrate to the heart of the country, affecting the temperature of the greater part of the kingdom, and only the coastal regions of the east have a modified continental climate. The mean annual temperature is about 50° Fahrenheit, varying from 52° in the Scilly Islands to 48° at the mouth of the Tweed, and generally the west of England is mild and wet in winter and cool and less wet in summer, while the east is cool and dry in winter and spring and hot and less dry in summer and autumn, the wettest region being the Lake district of Cumberland and the driest in the Thames estuary and the Lincolnshire Wash.

EARLY INHABITANTS.

Prehistoric Man.—A skeleton found at *Galley Hill*, near Northfleet, Kent (in 1895), has been ascribed to a man of Central Asian race of the Early Stone Age, and stone implements of the remote Eolithic, Palæolithic and Neolithic periods are abundantly found throughout England. The Neolithic period is held to have merged into the Bronze Age about 2000 to 1500 B.C., and a date between these years has been given to *Stonehenge* (presented by Sir C. H. E. Chubb to the Nation in 1908, and now preserved as a national monument). Stonehenge (10 miles N. of Salisbury, Wiltshire) consists of two circles of menhirs (the largest monolith being 22½ feet in height), only 16 remaining in position in the outer circle, while two of the five triple sets are still in position in the inner circle. The use for which the temple or monument was erected is the subject of many conjectures.

The Celtic Invasion.—In the latter part of the Bronze Age the *Goidels*, a people of Celtic race, and in the Iron Age another Celtic race of *Brythons*, invaded the country and brought with them Celtic civilization and dialects, place names in England bearing witness to the spread of the invasion over the whole kingdom.

The Roman Conquest.—Julius Cæsar raided Britain in 55 B.C. and 54 B.C., and in 43 A.D. the conquest of the country was undertaken by the Roman Emperor Claudius, who sent Aulus Plautius with a well-equipped army of 40,000 men, and himself visited Colchester (Camulodunum) and Londinium. The British leader from 48–51 A.D. was *Caractacus* (strictly Caratăcus), who was finally captured and sent to Rome. By 70 A.D. the conquest of South Britain was completed, a great revolt under *Boadicea* (strictly Boudicca), Queen of the Icēni (Norfolk), being crushed in 61 A.D. In 122 A.D. the Emperor Hadrian visited Britain and built a continuous rampart, known as *Hadrian's Wall*, from Wallsend to Bowness (Tyne to Solway), remains of which are still traceable. The Romans administered Britain as a Province under a Governor, with a well defined system of local government, each Roman municipality ruling itself and the surrounding territory. Colchester, Lincoln, York, Gloucester and St. Albans stand on the sites of five Roman municipalities, while London was the centre of the road system and the seat of the financial officials of the Province of Britain. A well preserved Roman town of about 100 acres was first uncovered in the 18th century at *Silchester* (Calleva Atrebatum), 10 miles south of Reading, and since 1890 the whole site has been investigated. Four main groups of roads radiated from London, and a fifth (the Fosse) ran obliquely from Ermine Street (at Lincoln), through Leicester, Cirencester and Bath to Exeter. Of the four groups radiating from London one ran S.E. to Canterbury and the coast of Kent, a second to Silchester and thence to parts of Western Britain and South Wales, a third (now known as *Watling Street*) ran through Verulamium (St. Albans) to Chester, with various branches, and the fourth reached Colchester, Lincoln, York and the eastern counties. *Christianity* reached the Roman Province of Britain from Gaul in the 3rd century (or possibly earlier), the Bishops of Londinium, Eboracum (York), and Lindum (Lincoln) attending the Council of Arles in 314. The Roman garrison of Britain was much harassed in the 4th century by Saxon pirates, who invaded the eastern counties from the Wash to Spithead, while about 350 A.D. incursions in the north of Irish (Scotl) and Picts became most formidable, and towards the end of the century many troops were removed from Britain for service in other parts of the Roman Empire. Early in the 5th century Gaul was taken from the Romans by Teutonic invaders, and Britain was cut off from Rome; officials were no longer sent to the island, the garrison was left to defend itself, and appears to have been driven inland by the Northern and Saxon invaders, and to have been conquered and absorbed by the Celtic inhabitants, whose language and customs re-emerged.

Anglo-Saxons and Normans.—The Celtic Britons appear to have called in the Saxons to resist the raids of the Picts and Scots, and eventually the *English* (Angles, Saxons and Jutes) drove the Britons into the mountain fastnesses of the West (Strathclyde, Wales and Cornwall), the name of *Welch* (old English *Waelisc* = Foreign) being given to the islanders by the invaders from the continent. The area thus conquered was divided into several kingdoms, of which the chief were Northumbria (Bernicia and Deira), Mercia (Middle Angles), and Wessex. The heathen Angli (whose gods Tī, Woden, Thunor and Frigg are commemorated in "Tuesday, Wednesday, Thursday and Friday") were converted to Christianity by a mission under Augustine (dispatched by Pope Gregory in 597), which established Archbishoprics at Canterbury and York, and the whole of England appears to have been converted by the end of the 7th century. In the 8th century Offa, King of Mercia, is stated to have built a wall and rampart, afterwards known as *Offa's Dike*, from the mouth of the Dee to that of the Wye, as a protection against the Welsh. The greatest of the English kingdoms was *Wessex*, with its capital at Winchester, and the greatest of the Wessex kings was *Alfred the Great* (871–901), who resisted the incursions of the Northmen (Danes) and fixed a limit to their advance by the Treaty of Wedmore (878). In the 10th century the Kings of Wessex recovered the whole of England from the Danes, but subsequent rulers were unable to resist the invaders, and England paid tribute (*Danegelt*) for many years, and was ruled by Danish Kings from 1016 to 1042, when Edward the Confessor was recalled from exile. In 1066 Harold (brother-in-law of Edward and son of Earl Godwin of Wessex) was chosen King of England, but after defeating a Northumbrian revolt under his brother Tostig (aided by an invading army of Harold Hadraada of Norway) at Stamford Bridge in Yorkshire (Sept. 25), he was himself defeated at the *Battle of Hastings* (or Sautlache) on Oct. 14, 1066, and the Norman Conquest secured the throne of England for Duke William of Normandy. Since the *Norman Conquest* all attempts to invade England have been defeated.

ENGLISH COUNTIES.

For Administrative purposes England is divided into 50 *Administrative Counties* (under the Local Government Act of 1888). The boundaries of these Administrative Counties differ in many cases from those of the older Geographical Counties, while the areas of the 72 *County Boroughs* created under the Act of 1888 are excluded from the County Areas, and the population of the Boroughs is separately enumerated. The area, population and chief officers of the Administrative Counties are shown overleaf.

AVERAGE HEIGHTS AND WEIGHTS.

The average heights and weights of men in the United Kingdom have been tabulated as follows. The weights include *clothing*, which is generally calculated at one-twenty-fourth of the whole.

	Average Height.	Average Weight.
Scotsmen	5 ft. 8¼ in.	11 st. 11 lb.
Irishmen	5 ft. 8 in.	10 st. 13 lb.
Englishmen	5 ft. 7¼ in.	11 st. 1 lb.
Welshmen	5 ft. 6½ in	11 st. 4 lb.

LONDON, the capital of England and of the British Empire, and the greatest city in the world, is situated on both banks of the River Thames, 50 miles from its outflow into the North Sea.

The City of London represents London within its ancient boundaries. The City is the financial and business centre of London, and includes the head offices of the principal banks, insurance companies, and mercantile houses, in addition to buildings ranging from the historic interest of the Roman Wall, the Norman Tower and the 14th century Guildhall, to the massive splendour of St. Paul's, and the architectural beauty of Wren's spires (Bow Church, St. Bride's, St. Dunstan's in the East, &c.).

The City of Westminster, which is bounded by the City of London on the east, by Chelsea and Kensington on the west, by Paddington, St. Marylebone and Holborn on the north, and by the Thames and Chelsea on the south, was formed into a borough by the London Government Act of 1899, and was created a city by Royal Charter of Oct. 19, 1900, the Council consisting of a Mayor, 10 Aldermen and 60 Councillors. Extending from the eastern end of the Strand to Kensington Gardens, and from Oxford-street to the Thames, it includes within its boundaries a large number of the finest buildings in London. The Abbey and the Roman Catholic Cathedral, the Houses of Parliament and the Law Courts, Buckingham Palace and St. James's, and the principal Government offices, Clubs and Theatres are situated in Westminster, which also includes the fashionable residential districts of Mayfair and Belgravia. Westminster is the richest of the London areas, the rateable value of property being £9,105,229 in 1922.

Metropolitan Boroughs.—Under the London Government Act of 1899 the administrative functions of the various vestries in the Metropolitan districts surrounding the City of London were transferred to 28 Metropolitan Boroughs, of which one became afterwards the City of Westminster. The area covered by these boroughs extends northwards to include Stoke Newington, southwards to Wandsworth and Lewisham, eastwards to Woolwich, and westwards to Hammersmith.

London County Council.—For County purposes the affairs of London are administered by the London County Council, which was created by the Local Government Act of 1888.

Miscellaneous Authorities.—The Poor Law is administered in the Metropolitan area by the *Metropolitan Asylums Board*, and by 31 *Boards of Guardians*; for Police purposes the administration is invested in the City Corporation as to the *City Police* and in the Home Office as to the *Metropolitan Police*. The authority for the supply of water is the *Metropolitan Water Board*, while the River Thames is administered as to its tidal portion by the *Port of London Authority* and above Teddington by the *Thames Conservancy*, the lighthouse and pilotage authority being *Trinity House*. The bridges are maintained in the City of London by the *Bridge House Estates* Committee of the Coporation of the City, and in the remaining area by the London County Council. The lighting of London is carried out by private enterprise, and in some cases by the Borough Councils, while locomotion is provided by the London County Council as the Tramway authority, and by private enterprise as to underground or other railways and motor vehicles.

THE CORPORATION OF THE CITY OF LONDON.

LONDON was famed for its vast conflux of traders and its abundant commerce even in the first century of the Christian era. From the Romans it is said it received municipal institutions, which have endured in their main features to the present day. In Saxon times it was in reality a small independent State, and its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them, and about eight years after he granted a charter, which is still preserved. It is addressed to William the Bishop, Godfrey the Portreeve, and all the Burgesses, and promises that they shall be "law worthy" (*i.e.*, possessed of privileges) as they were in the days of Edward the Confessor. The Portreeve, however, received the Norman title of Bailiff, which, in 1191, was changed to Mayor; the first holder under the new name being Henry Fitzalwyn, who filled the office for 24 years. On his death a new charter was granted by King John in 1214, which directed the Mayor to be chosen annually, which has ever since been done, though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality four times, A.D. 1397, 1398, 1406, 1419); and many modern cases have occurred. The title of *Lord Mayor* was not in general use in the outer world until about 1545. The Lord Mayor is elected at Michaelmas; he is sworn into office on November 8, and on the following day presented to the Lord Chief Justice at the Royal Courts of Justice, to take the final declaration of office—the pageant, conducted with some degree of civic state, being popularly known as the *Lord Mayor's Show*.

Aldermen were first appointed by a charter of Henry III. in 1242, and were elected annually between 1377 and 1394, when a charter of Richard II. directed them to be chosen for life. The *Common Council*, elected annually on St. Thomas's Day (Dec. 21), was at an early date substituted for a popular assembly called the Folkmote. At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having as many as 16 members, and none less than four. *Sheriffs* (as well as aldermen) were Saxon officers, who usually had charge of a large district. The time of their appointment for London is uncertain, but they appear in ancient records as early as A.D. 1130. At first they were only the officers of the Crown, and were named by the Barons of the Exchequer; but King John gave them, in the first year of his reign, permission to choose their own Sheriffs. The citizens, however, lost this privilege, as far as the election of Sheriff of Middlesex is concerned, by the Local Government Act, 1888, but they continue as heretofore to choose the Sheriffs of the City of London. They are appointed on Midsummer Day, and enter on office at Michaelmas.

Officers.—The Recorder was first appointed in 1298. The Chamberlain is an ancient officer. There were at one time two Chamberlains—the King's Chamberlain and the Chamberlain of the Guildhall. The former appears to have fallen into abeyance *circ.* 1319. The first contemporary record of the office of City Chamberlain is 1271. The Town Clerk (called Common Clerk) and Common Serjeant (now appointed by the Crown) are mentioned as officers in the charter of Edward II., A.D. 1319, but the offices can be traced to a much earlier date than this.

The Right Honourable the Lord Mayor 1926–1927.

Col. Sir Rowland Blades, Bt., M.P., *born* April 15, 1868; *Common Councilman*, 1913; *Alderman of Bassishaw*, 1920; *Sheriff*, 1917; *Lord Mayor of London*, 1926; *Address*, The Mansion House, E.C. 2 ..... £10,000

Private Secretary (2nd year), Sir Wm. J. Soulsby, K.C.V.O., C.B., C.I.E.

* The above is abstracted from the 293rd "City's Cash Account" of the series extant—A.D. 1633 to 1925-26. (The Accounts earlier than A.D. 1633 were believed to have been destroyed in the Fire of London; but two years' Accounts, *temp.* Queen Elizabeth, have been discovered among the Corporation Archives, as exceptions to that belief.) The Volumes are in full detail, signed by the Auditors, and in perfect preservation. The above extract is from the 142nd Annual Printed Account of the Corporation, A.D. 1784 to 1925-26. The Accounts are prepared and stated as directed by Resolutions of the Court of Common Council of the 5th June, 1903, the 14th December, 1905, and 25th January, 1917, upon Reports of the Coal and Corn and Finance Committee, and they are printed in conformity with the 82nd Standing Order of the Court of Common Council. The Accounts are made up to the end of March and are issued in the form prescribed by those Orders, and show the Income and Expenditure applicable to the year on the various Funds.

THE CITY GUILDS (LIVERY COMPANIES).

In the majority of cases the designation of the Company gives a clue to the trade which gave rise to the guild, the Broderers (Embroiderers), Cordwainers (cobblers), Fletchers (arrow makers), Loriners (bridle, bit, and spur makers), Poulters (poulterers), Scriveners (legal writers), Upholders (upholsterers), and Vintners (wine sellers) retaining the ancient name of the trade. The order of precedence is given in parentheses after the name of each Company.

9,259 Liverymen of the Guilds are entitled to vote at elections in *Common Hall* (*see* p. 540). The actual net number is, however, smaller, as many belong to more than one Guild; and only those who have residential or other qualification in the City have the *Parliamentary* vote in that district.

The Liveries of the Loriners' and the Stationers' are the most numerous liverymen, the Fletchers' the least, comprising only seventeen.

THE LONDON FIRE BRIGADE. *Headquarters:* 94 Southwark Bridge Road, S.E. 1.

PREVIOUS to the formation of the Metropolitan Fire Brigade in 1866 the churchwardens and overseers of every parish had been compelled, under an Act passed in 1774, to maintain an engine for putting out all fires occurring within their own boundaries; and from about 1830 the leading fire insurance companies had jointly organised and worked a fire-engine establishment of their own. On January 1, 1866, under the Metropolitan Fire Brigade Act, 1865, the Metropolitan Board of Works took over these responsibilities. On January 1, 1867, the Board also took over from the Royal Society for the Protection of Life from Fire (founded 1844) the service of the saving of Life from fire. By the passing of the Local Government Act, 1888, the London County Council assumed control of the Fire Brigade. In 1904 the title of the Brigade was altered from "Metropolitan Fire Brigade" to "London Fire Brigade."

On March 31, 1926, the complement of the Brigade consisted of :—1 chief officer; 4 divisional officers; 2 assistant divisional officers; and 1,919 officers, firemen, coachmen, and pilots: a technical and clerical staff of 179, and an ambulance service staff of 155. There were 62 land fire-stations, 13 ambulance stations, 3 river stations and 1 river repairing depot. The appliances included 87 motor fire engines, 65 motor escape vans, 11 electrically driven escape vans, 2 electrically driven motor ladders, 6 petrol-electric motor ladders, 1 petrol motor ladder (in addition to tenders, &c.), 10 hose carts and 114 fire escapes, 2 long fire ladders, 62 miles of hose, 2 steam and 2 motor fire floats, 55 smoke helmets, 399 hook ladders and 293 hook belts. There were 1,646 street fire alarm posts, 108 telephone lines from station to station and 363 telephone lines to public and other buildings. The number of calls to which the Brigade responded during the year ended Dec. 31, 1925, totalled 7,476, and the fires numbered 5,268, of which 29 were classed as "serious."

THE LONDON COUNTY COUNCIL.

Offices, The County Hall, Westminster Bridge, S.E. 1, and Old County Hall, Spring Gardens, S.W. 1.

Hours 9.30 to 5 (Monday to Thursday), 9.30 to 5.30 (Friday), 9.30 to 12.30 (Saturday).

Meets on Tuesday at 2.30 p.m.

THE London County Council was constituted under the Local Government Act of 1888. London is an *administrative* county, covering an area of 117 square miles.

The City of London is an electoral division of the county. The County of the City of London is a county for *non-administrative* purposes, such as quarter sessions, justices, &c.; and the Metropolis outside the City is a county for *non-administrative* purposes, by name the County of London, in which the justices continue their judicial duties.

The Council comprises a chairman, 20 aldermen, and 124 councillors, together 145, or, if the chairman be also an elected member or alderman, 144. The term of office for aldermen is 6 years, and ten retire every 3 years. The councillors are elected for 3 years. The councillors are elected directly by the ratepayers, and the councillors elect the aldermen. The positions of aldermen and councillors are the same, except as to the term of office.

The method by which the Council discharges the multitudinous duties entrusted to it is a generous delegation of powers to committees under well defined rules, subject to the reservation to the Council itself of all questions of principle, and to periodical reports of action taken.

The *Finance Committee* have important statutory powers. No costs, debt or liability exceeding £50 may be incurred by the Council except upon a resolution passed on an estimate submitted by the Finance Committee. The Council is the principal money-raising body for all the local authorities in the county, and has a net debt, according to the latest returns, of £59,805,000 (of which £28,103,000 represents debt incurred for revenue-producing undertakings), and an annual expenditure of about twenty-seven millions, of which twelve and a half millions are expended on education. The *Mental Hospitals Committee* administer the duties falling on the Council under the Lunacy Acts and the Mental Deficiency Act, 1913. The Council has mental hospitals and other institutions for the care of mental defectives with accommodation for over 20,000 patients. The *Housing Committee* perform the duties cast upon the Council by the various Housing Acts, including the clearance of insanitary areas and the building of working-class dwellings. The total capital expenditure incurred up to March 31, 1926, in respect of all schemes was £20,400,000, and very large works are still in progress.

The *Improvements Committee* are responsible for the carrying out of street improvements and the construction of bridges (outside the City of London) and tunnels across the river Thames. The Council has decided to rebuild Waterloo Bridge, but has deferred action pending the report of the Royal Commission on Cross River Traffic in London. Powers were obtained in the Session of 1924 to reconstruct Lambeth Bridge and to carry out street improvements in connection therewith.

The *Metropolitan Main Drainage* system covers about 149 square miles, including certain districts outside the county, and comprises 382 miles of main, storm-relief, intercepting and outfall sewers, eleven pumping stations, two sewage precipitation stations, and five sludge vessels. The sewage is conveyed to the outfalls at Barking and Crossness, and there the solid matters held in suspension are precipitated, and the sludge is taken out to sea. The Council is carrying out experimental work in connexion with other systems of sewage treatment. The total capital outlay on main drainage is over £15,000,000, and further expenditure, amounting to several millions, is in progress for a scheme to relieve certain districts from flooding after heavy falls of rain.

The Council is the *Tramway Authority* for London. The system (including about 9 miles belonging to the Leyton Urban District Council but worked by the London County Council) extends over 165 street miles, all of which are electric lines (mostly underground conduit). The whole of this great system is worked by the Council, and through running with various systems outside the County of London is now maintained, to the great advantage and convenience of the travelling public. The total capital outlay on tramways amounted, on March 31, 1926, to £16,875,000, and the net debt outstanding to £9,110,000. The results of working for the year 1925–26 were gross receipts £4,262,700, surplus on working £316,479, deficiency, after payment of interest on capital outlay and providing for repayment of debt, £114,629, which was charged on the rates.

The *Education Committee* comprises thirty-eight members of the Council and twelve co-opted members, of whom not less than five are required to be women. The Council has approved a programme of educational work extending over a period of three years from April, 1925, providing for developments in all branches of education at a total capital cost of over £2,300,000, and involving ultimately additional annual expenditure of £800,000. A further programme is being prepared in respect of the three years commencing April, 1927.

Amongst the *Other Powers and Duties* of the Council may be mentioned the following:—Sanctioning of loans required by the councils of the metropolitan boroughs; acquisition and maintenance of parks and open spaces: the sanctioning of local sewers; town planning; controlling the building line, and the naming of streets and numbering of houses; supervising buildings and district surveyors; dangerous structures; cattle diseases; controlling storage of explosive substances and petroleum; infant life protection; gas, gas-meter, and electricity-meter testing; testing weights and measures; licensing of slaughter-houses and of cow-houses; supervision of common lodging-houses; the granting of music and dancing licences; public health, including treatment of tuberculosis and diagnosis and treatment of venereal diseases; historic buildings and monuments; inspection of factories and certain other buildings to secure means of escape from fire; administration of the

shops Act, the Children Act, and the Midwives Acts; licensing and inspection of employment agencies; registration of massage establishments; licensing of premises under the Cinematograph Act; registration of motor cars; collection of duties on motor cars, dog and establishment and certain other local taxation licences; registration of War charities; and welfare of blind persons. A *Motor Ambulance* service has been installed with thirteen stations spread over the county and special facilities for calls by telephone.

The *Expenditure* of the Council, including loans to other local authorities, is met by two chief sources of supply—capital money raised by the issue of Stock, Bonds or bills, or by the use of the Sinking Fund of the Council's debt, and current income raised in a county rate or by the revenue of undertakings. Certain contributions, including education grants, are also received from the Imperial Exchequer. All borrowings by the Council are subject to the provision of a sinking fund, under Treasury approval, sufficient to repay all expenditure generally within a period of 60 years (in a few cases the limit is 80 years). The total Stock outstanding at September 30, 1926, was £88,500,885, out of total issues of £97,632,379. These figures are exclusive of the issues of Bonds, the amounts outstanding at September 30, 1926, being £2,705,300 London County 5¼ per cent. Bonds, and £3,909,920 Local Bonds for Housing.

The *Rating* for the year 1926–27, as shown by the statement below (which relates to rate and debt accounts only), amounts to 3*s.* 5¾*d.* in the pound over the whole county, including the City, and a further rate over the county outside the City of 3¼*d.* in the pound, together 3*s.* 9½*d.* Of the total rate, 2*s.* 8¼*d.* is for education. The total rate for 1925–26 was 4*s.* 2½*d.* and for 1924–25, 4*s.* 1½*d.* The *Assessable Value* of the County of London on April 6, 1926, was £55,917,174 a 1*d.* rate over the whole county producing £232,988.

THE PRINCIPAL ENGLISH CITIES.

BIRMINGHAM.

BIRMINGHAM (Warwickshire), the chief centre of the hardware trade of the world, is 113 miles N.W. of London. The municipal area is 43,601 acres (about 68 square miles), with a population at the census of 1921 of 919,438.

The chief industries are brass working, jewellery and precious metals, iron, machinery, small arms and ammunition, railway rolling stock, glass making, electro plating, motor engineering, cycles and chemicals.

The principal buildings are the Town Hall, built in 1832–1850 on the lines of the Temple of Jupiter Stator at Rome, with a large hall; the Council House and Corporation Art Gallery and Museum (1878); the University (Aston Webb, 1909); the Central Library; the 13th century Church of St. Martin (rebuilt 1873); the Cathedral (formerly St. Philip's Church, built by Archer, a pupil of Wren's), the Roman Catholic Cathedral of St. Chad (Pugin), and the Wesleyan Central Hall. A memorial bust of Abraham Lincoln was unveiled in 1921. Birmingham was incorporated as a borough in 1838, and was created a city in 1889; it is governed by a Lord Mayor and City Council of 30 Aldermen and 90 Councillors. The city returns 12 members to Parliament. The origin of the name is obscure, as Bromwycham, "the home on the hill by the heath," is disputed. The city was a Saxon town, and William de Bermingham was Lord of the Manor in the early part of the 13th century.

Principal City Officers.

Rt. Hon. Lord Mayor (1926–1927), Alfred Henry James, C.B.E.
Recorder, Sir Henry Maddocks, K.C. (1925).
Stipendiary Magistrate, The Rt. Hon. Lord Ilkeston (1910).
Town Clerk, F. H. C. Wiltshire (1918).
Clerk of the Peace, Joseph James (1905).
Coroner, Isaac Bradley (1897).

LIVERPOOL.

LIVERPOOL (Lancashire), on the right bank of the river Mersey, 3 miles from the Atlantic and 194 miles N.W. of London, is one of the greatest trading centres of the world and the principal port in the United Kingdom for the Atlantic trade. The municipal area is 24,102 acres (which includes 2,883 acres in the bed of the river Mersey) (about 33 square miles, excluding the bed of the river), with a population at the census of 1921 of 803,118. The net tonnage of British and Foreign ships engaged in ocean trade arriving in the port during 1924 was 13,185,360, and of those departing 12,572,997; these figures exclude 2,317,626 tons for arrivals and 3,063,983 for departures in the coasting trade, while the value of the sea-borne trade of the port was stated at £582,580,575 for 1924. The docks, on both sides of the river, have a linear quayage of about 37 miles, and the Gladstone dock will accommodate the largest vessels afloat. The dock authority is the Mersey Docks and Harbour Board. The chief import is cotton, those next in importance being grain, provisions, sugar, fruit, oil, timber and tobacco.

The principal buildings are the Cathedral, erected from the designs of Sir Gilbert Scott and consecrated in 1924; when completed this will be the largest ecclesiastical building in England; St. George's Hall, erected 1838–1854, from the designs of Harvey Lonsdale Elmes, at a cost of £300,000, and regarded as the finest modern example of classical architecture; the Town Hall, erected 1754 from the designs of Wood; the Walker Fine Art Gallery; the University; the Royal Infirmary; the Municipal Offices; and the Custom House.

Liverpool was incorporated as a borough early in the 13th century and was created a city in 1880. The Corporation consists of a Lord Mayor and a City Council which comprises 38 Aldermen and 113 Councillors. The City returns 11 members to Parliament. The name is believed to be derived from Norse words meaning the "Pool of the Slopes."

Principal City Officers.

Rt. Hon. Lord Mayor (1926–1927), F. C. Bowring.
Recorder, Edward G. Hemmerde, K.C. (1909).
Police Magistrate, Stuart Deacon (1910).
President, Court of Passage, Sir Wm. F. Kyffin Taylor, K.B.E., K.C.
Coroner, A. G. Inglis.
Town Clerk, Walter Moon, £3,300 (1922).
Clerk of the Peace, R. D. Cripps.
Medical Officer of Health, A. A. Mussen, M.D., D.P.H.

MANCHESTER.

MANCHESTER (Lancashire), the centre of the world's cotton trade, is 189 miles N.W. of London. The municipal area is 21,690 acres (about 34 square miles), the population at the census of 1921 being 730,307.

Manchester is the distributing centre of the cotton spinning and weaving of Lancashire for the whole world, and of butter and foodstuffs for the most densely populated part of England. It also contains large engineering and machinery works and factories of hats, clothing, india-rubber goods, chemicals, &c. The city is connected with the sea by the *Manchester Ship Canal* (opened in 1894), which has a total length of 35½ miles, a depth of 28 feet, and a minimum width at the bottom of 120 feet. The net tonnage of ships engaged in the Foreign Trade was 2,805,349 for arrivals and 2,476,316 for departures in 1924, the value of the sea-borne trade of the port being £114,626,893 in 1924. The net tonnage of arrivals in the Coasting Trade was 524,836, and of departures 1,013,607 net tons in 1924. In 1925 the weight of sea-borne merchandise which passed over the Waterway amounted to 5,622,405 tons, as compared with 5,181,615 tons in 1924.

The principal buildings are the Town Hall, erected in 1877 from the designs of Alfred Waterhouse, R.A.; the Royal Exchange, built in 1869, enlarged at cost of £80,000 and reopened by the King, 1921; the Free Trade Hall, erected from the designs of Walters, in 1856, on the site of the "Peterloo Massacres" (Aug. 16, 1819) in St. Peter's Fields; the Art Gallery; the Whitworth Institute; the 17th century Chetham Library; the Rylands Library (1899), which includes the Althorp collection; the University (Owens College); and the 15th century Cathedral (formerly the parish church). Manchester is one of the principal centres of political, literary and scientific advancement, and the Hallé Concerts have placed the city in the forefront of musical development. The *Manchester Guardian* newspaper exercises a widespread influence throughout the English-speaking world.

The town received a charter of incorporation

in 1838 and was created a city in 1853. The Lord Mayor presides over a Corporation of 35 Aldermen and 105 Councillors. Manchester returns 10 members to Parliament. The Latin name of the city was *Mancunium*.

Principal City Officers.

Rt. Hon. Lord Mayor (1926-1927), J. H. Swales.
Recorder, Walter Greaves-Lord, K.C. (1925).
Stipendiary Magistrate, Edgar Brierley (1902).
Town Clerk, P. M. Heath (1922).
Clerk of the Peace, E. M. Redhead.

LEEDS.

LEEDS (Yorkshire, West Riding) is favourably situated in the coal and iron districts of England, 185 miles N.N.W. of London, and is the centre of the woollen industry and the wholesale clothing trade. The city has also the largest share of the leather trade of the United Kingdom, in addition to large rope works, and factories of thread, linen, glass and earthenware, with metal casting, machinery and machine tools, steam engines, railway wagons, and other engineering works. Leeds is connected with the Mersey in the west by the Leeds and Liverpool Canal, with the Humber in the east by the Aire and Calder Navigation, and is an important railway centre.

The municipal area is 30,137 acres (over 47 square miles), the population at the census of 1921 being 458,232.

The principal buildings are the Town Hall (1858), the Royal Exchange (1872), the Philosophical Hall, the Municipal Buildings and Art Gallery, the University and the Leeds Institute of Science, Art and Literature (1865). The Parish Church (St. Peter's) was rebuilt in 1840; the 17th century St. John's Church has a fine interior with a famous Renaissance screen; the 17th century Mill Hill Chapel was rebuilt in 1849. Kirkstall Abbey (about 3 miles from the centre of the city), founded by Henry de Laci in 1152, is one of the most complete examples of Cistercian houses now remaining.

Leeds was first incorporated by Charles I. in 1626, made a county borough in 1889, and was created a city in 1893. The Lord Mayor presides over a corporation of 17 Aldermen and 51 Councillors. The city returns 6 members to Parliament. The earliest forms of the name are *Loidis* or *Ledes*, the origin of which is obscure.

Principal City Officers.

Rt. Hon. Lord Mayor (1926-1927), Hugh Lupton.
Recorder, John Albert Compston, K.C. (1919).
Stipendiary Magistrate, Horace Marshall (1910).
Clerk of the Peace, Sir Arthur Copson Peake (1896).
Town Clerk, Thomas Thornton (1924).

SHEFFIELD.

SHEFFIELD (Yorkshire, West Riding), the chief centre of the heavy steel and cutlery trade, is situated in the extreme south of Yorkshire, 159 miles N.N.W. of London, at the junction of the Sheaf, Porter, Rivelin and Loxley with the river Don. The city has an area of 21,625 acres (about 49 square miles), with a population at the census of 1921 of 519,239. The principal industries are the manufacture of heavy steel (armour plates, rails, tyres, axles, engine castings, &c.), cutlery, and instruments, in addition to engines and general machinery, tanning, confectionery, bicycles, iron and brass founding, silver refining, brush making, and many other industries. Sheffield plate (silver rolled on other metals) made during the years 1742-1840, when electroplating superseded the process, is greatly prized by collectors.

The principal buildings are the 14th century Parish Church (St. Peter's), the Town Hall (1897), the Cutlers' Hall (1832), Corn Exchange, Market Hall, Museum, Mappin Art Gallery, Ruskin Museum and the University.

The Saxon town of *Escafeld* was created a county borough in 1888 and a city in 1893, the Chief Magistrate becoming a Lord Mayor in 1897. The Corporation includes 17 Aldermen and 51 Councillors. Sheffield returns 7 members to Parliament.

Principal City Officers.

Rt. Hon. Lord Mayor (1926-1927), J. G. Graves.
Recorder, William James Waugh, K.C. (1915).
Master Cutler (1926-1927), David Flather.
Town Clerk, Sir William E. Hart (1913).
Clerk of the Peace, G. E. Smith.

BRISTOL.

BRISTOL (Gloucester and Somerset), astride the River Avon and within 8 miles of the estuary of the River Severn (Bristol Channel), is a city and seaport 119 miles W. of London, with a municipal area of about 18,700 acres and a population at the census of 1921 of 376,975.

The principal industries are shipbuilding, rope making, chocolate, sugar and tobacco factories, glass and earthenware, soap, leather and chemical works, breweries, and copper, lead and iron works. The docks comprised within the Port are the City Docks, 6 miles from the entrance to the river Avon; the Royal Edward and Avonmouth Docks, at the mouth of the river; and the Portishead Docks, to the westward of the river entrance. The net tonnage of ships (engaged in the Foreign Trade) entered in 1925 was 2,066,913 tons, and of those cleared 1,526,068 tons, the value of the seaborne trade being stated at £40,474,020 for 1924; the net tonnage of arrivals in the Coasting Trade was 1,148,417, and of the departures 1,644,675 net tons in 1925. The principal imports are grain, fruit, oils, ore, timber, hides, cattle and general merchandise, and the chief exports are galvanised iron, tinplates, machinery, manufactured oils, chemicals, strontia, and unmanufactured clay.

The chief buildings, in addition to the 14th century Cathedral (rebuilt by Street 1868-1888), the 14th century Church of St. Mary, Redcliffe (described by Queen Elizabeth as "the fairest, goodliest and most famous parish church in England"), and the 15th century Temple Church, are Canynges' House, the Merchant Venturers' Almshouses, St. Peter's Hospital, the Council House, Guildhall, Exchange (erected from the designs of John Wood in 1743), Colston Hall, the University and Clifton College. The *Clifton Suspension Bridge*, with a span of 702 feet over the Avon, was projected by I. K. Brunel (the designer of the *Great Eastern*) in 1836, but was not completed until 1860.

Bristol was a Royal Borough before the Norman Conquest, and in 1899 its Chief Magistrate (Sir Herbert Ashman) became a Lord Mayor. The Corporation includes 23 Aldermen and 69 Councillors. The city returns 5 members to Parliament. The earliest forms of the name are *Brigstowe* and *Bristow*.

Principal City Officers.

Rt. Hon. Lord Mayor (1926-1927), E. M. Dyer.
High Steward, His Grace the Duke of Beaufort, T.D.

Recorder, Henry Holman Gregory, K.C. (1926).
Sheriff, F. E. Sampson.
Town Clerk, Josiah Green.

KINGSTON UPON HULL

HULL (officially "Kingston upon Hull") is situated in the East Riding of Yorkshire, at the junction of the Hull with the Humber, 22 miles from the North Sea and 181 miles N. of London. The municipal area is 9,359 acres (about 15 square miles), with a population of 287,150 at the census of 1921.

Hull is the principal seaport for shipping the manufactures of Yorkshire and Lancashire to Northern Europe, and among its principal imports are grain from Russia and America and timber from Scandinavia, in addition to iron, fish, butter (from Denmark and Siberia), and fruit. The net tonnage of ships engaged in the Foreign Trade in 1924 was 5,450,067, for arrivals and 4,845,336 for departures, the value of the seaborne trade being £121,186,307 in 1924. The net tonnage of arrivals in the Coasting Trade was 827,726 and of departures 1,401,984 net tons in 1924.

The chief buildings, in addition to the Docks, are the Parish Church (Holy Trinity), 272 feet in length (the longest parish church in England), the Guildhall (1915), Exchange (1866), Chamber of Commerce, Corn Exchange, Market Hall, City Hall, Custom House Dock Offices, Royal Institution (1854), Wilberforce's House and Trinity House (1753). A Municipal Art Gallery is in course of establishment under the gift of Mr. T. R. Ferens.

The name of *Wyke-upon-Hull* was changed to Kingston-upon-Hull by Edward I. in the 13th century. The town was incorporated in 1576 and made a county borough in 1888. The Corporation consists of a Lord Mayor, 16 Aldermen and 48 Councillors. Hull returns 4 members to Parliament.

Principal City Officers.

Rt. Hon. Lord Mayor (1926-1927), Watson Boyes.
High Steward, Rt. Hon. T. R. Ferens, P.C.
Recorder, Henry Thomas Kemp, K.C. (1917).
Sheriff (1926-1927), Maj. Peter Robson.
Town Clerk, H. A. Learoyd, M.A., LL.B.
Coroner, John Divine, M.D.

BRADFORD.

BRADFORD (Yorkshire, West Riding), 192 miles N.N.W. of London and 8 miles W. of Leeds, in the coal and iron district, is the centre of the woollen and worsted trade. The city is connected with the Mersey in the west and with the Humber in the east by canals, and is an important railway centre. The municipal area is 22,879 acres (about 36 square miles), with a population at the 1921 census of 285,979.

The principal textile industries are worsteds, woollens, silks and cottons, and there are also important engineering and iron works, and quarries of freestone.

The chief public buildings, in addition to the 15th century Cathedral (formerly the Parish Church), are the Town Hall (1873), Exchange (1867), Cartwright Memorial Hall (1904), commemorating the inventor of the power loom, the Windsor (Baths and Public Halls, 1905), Temperance Hall (1837), Grammar School, Technical College (1882), and the Mechanics' Institute (1832).

The Saxon township was created a parliamentary borough in 1832, a county borough in 1888, and a city in 1907. The Corporation consists of a Lord Mayor, 21 Aldermen and 63 Councillors. Bradford returns 4 members to Parliament.

Principal City Officers.

Rt. Hon. Lord Mayor (1926-1927), Richard Johnson.
Recorder, Frank Beverley (1926).
Stipendiary Magistrate, Beaumont Morice (1914).
Town Clerk, N. L. Fleming (1920).

NEWCASTLE-UPON-TYNE.

NEWCASTLE UPON TYNE (Northumberland), on the north bank of the Tyne estuary, 8 miles from the North Sea and 272 miles N. of London, has an area of 8,452 acres (13 square miles) and a population of 278,400 at the Census of 1921.

The city is conveniently placed on the estuary, in the neighbourhood of the Northumberland and Durham coalfields. Its exports include coal, chemicals, pig iron, iron and steel manufactures and machinery; the chief imports being wheat and grain, fruits, iron, iron ore and steel, petroleum, sulphur ore, timber and wood, and potatoes. The net tonnage of ships engaged in the Foreign Trade was 7,205,071 for arrivals and 8,536,788 for departures in 1924, the value of ocean-borne trade being £43,228,065 in 1924; the net tonnage of arrivals in the Coasting Trade was 3,638,040 and of departures 2,514,118 net tons in 1924. The chief industries are shipbuilding, metal works and machinery, chemicals, glass, brick, tile and earthenware, and rope making.

The principal buildings include the (11th century) "New" Castle, of which the walls, keep and chapel are well preserved, the Cathedral (St. Nicholas), St. Andrew's Church (11th century), St. John's (14th century), St. George Jesmond, the Roman Catholic Cathedral of Hexham and Newcastle, Holy Trinity War Memorial, Guildhall (1658), Moot Hall (1810), Exchange (1860), Central Public Library and Laing Art Gallery, Wood Memorial Hall (1870) and the Custom House. The city is connected with the south bank of the Tyne by four bridges, of which the old High Level Bridge (1849) was designed by Robert Stephenson and carries the railway and roadway; the new High Level (Edward VII.) Bridge (1906) carries the railway only.

The pre-Norman borough of *Monkchester* was re-named Newcastle in the 11th century when the castle was erected as a defence against the Scots. In 1400 it was made a county borough, and in 1859 was incorporated. The City Corporation now includes a Lord Mayor (1906), 19 Aldermen and 57 Councillors. Newcastle-upon-Tyne returns 4 members to Parliament.

Principal City Officers.

Rt. Hon. Lord Mayor (1926-1927), Arthur William Lambert, M.C.
Recorder, His Honour Llewellyn Archer Atherley Jones, K.C. (1906).
Sheriff (1926-1927), Robert Stanley Dalgliesh.
Town Clerk and Clerk of the Peace, Arthur Maule Oliver, O.B.E. (1907).

NOTTINGHAM.

NOTTINGHAM (Nottinghamshire), the principal manufacturing centre of hosiery and lace, stands on the left bank of the Trent, where the tributary stream Leen enters the river, 125 miles N.N.W. of London. The municipal area is 10,935 acres (17 square miles), and includes an open market-place of 5½ acres in the centre of the city, with a population at the Census of 1921 of 262,624.

The city is connected with the North Sea and the Atlantic by the river Trent and canals and is an important railway centre. The principal industries are cotton, silk and merino hosiery, lace, bleaching, dyeing and spinning, tanning, engineering and cycle works, brewing, and the manufacture of tobacco, &c.

The chief buildings are the 11th century Nottingham Castle (restored in 1878, and now the City Museum and Gallery of Art), St. Mary's, St. Peter's, and St. Nicholas's Churches, the Roman Catholic Cathedral (Pugin, 1842–4), the Guildhall and Sessions Court (1887), Shire Hall, Albert Hall, Exchange, University College, Hospital and Eye Infirmary.

Snotengaham or *Notingeham*, "the home of the sons of Snod" (the Wise), is the Anglo-Saxon name for the Celtic *Tuigogobaue*, "Cave Homes." The city possesses a Charter of Henry II., and was created a city in 1897. The Corporation comprises a Mayor, 16 Aldermen and 48 Councillors. The city returns 4 members to Parliament.

Principal City Officers.

Mayor (1926–1927), J. H. Freckingham.
Recorder, Hugo J. Young, K.C. (1920).
Town Clerk (1912) *and Clerk of the Peace* (1921), William John Board, O.B.E.
City Coroner, Charles Lambert Rothera, B.A.

THE FIFTY LARGEST TOWNS IN ENGLAND
(Census of 1921.)

NOTE.—The official Census of 1921 was postponed from the usual date to June 19; in consequence of the postponement the annual migration from towns to sea-side and other holiday resorts had already set in, and many *visitors* were thus credited as *inhabitants*, with a corresponding loss to the figures for the towns of which they are inhabitants. This anomaly is reflected in the population figures in the Municipal Directory following this page, such figures being supplied from returns compiled by the Medical Officers of Health.

STRATFORD-ON-AVON.

Shakespeare's Birthplace (April 23, 1564), at Stratford on-Avon, has been for over 200 years the goal of pilgrims. It was bought for £3,100 in 1847 and given to the nation. (Restored in 1857.) Managed by 26 Trustees (16 *ex-officio*). Holds library of rare editions, pictures, and relics. In the garden are many trees and plants named by the poet.

Clopton Bridge, built of stone, on 19 arches, about 1490 by Sir Hugh Clopton, Stratford native, and Lord Mayor of London.

Guild Chapel and Guildhall.—Built A.D. 1296. In the old hall young Shakespeare could witness strolling companies performing (mentioned in Records). In chapel were discovered beneath whitewash, 1804, mural allegorical paintings, done by mediæval priests.

Hall's Croft.—Unaltered old-timbered residence of Susanna, poet's daughter, wife of Dr. John Hall, churchwarden and poet's executor.

Harvard House.—Built 1596 by Alderman Thomas Rogers, whose descendant (John Harvard) founded Harvard University, U.S.A.

Hathaway Cottage.—At Shottery, one mile from Stratford, is the little thatched farmstead, the undisturbed birthplace of Anne Shakespeare, poet's wife, who bore him three children, Susanna, Hamnet, and Judith. Contains curious Tudor and Jacobean furniture. National property, controlled by Birthplace Trustees.

King Edward VI. School.—Founded by Thomas Jollyffe, priest, in Henry VI. reign; incorporated by Edward VI. Here Shakespeare acquired his "little Latin, less Greek," and matchless English.

The Shakespeare Memorial.—Mainly due to munificence of C. E. Flower (1830–92) and his wife. Group comprises *Library*, with 10,000 volumes of Shakespeare editions and ana, including rare Wm. Jaggard collection. *Gallery* of pictures (including unique "Droeshout" portrait). *Museum* of antiques and relics (including Irving collection). *Lecture rooms.* Tower, affording views of 50 miles. *Gardens*, and *Statuary* (Lord Ronald Gower's gift). *Theatre*, burnt down in 1926, is to be rebuilt by public subscription organized by *The Daily Telegraph*. Special celebrations and performances, with floral procession to tomb, mark the birthday, April 23, each year.

New Place.—Site of the poet's retirement. Shakespeare bought this estate in 1597; retired to it about 1610; died there April 23, 1616. House was rebuilt about 1700, and demolished by Francis Gastrell, the iconoclast, 1759.

The Cage.—For 36 years the home of Judith, poet's younger daughter, who married Thomas Quiney, vintner.

Town Hall.—Erected 1633; rebuilt 1768. Contains details of the unbroken sequence of Bailiffs and Mayors since A.D. 1202 (including the poet's father, John Shakespeare). Exhibits: Gainsborough portrait of Garrick; four Corporation Maces, gilt silver of 15-16th Century, and ancient Corporate Sword.

Trinity Church.—Dates from A.D. 692. Of cathedral-like proportions. Shelters remains of poet and family.

THE PRINCIPALITY OF WALES.

PHYSICAL GEOGRAPHY.

Position and Extent.—The Principality of Wales occupies the extreme west of the central southern portion of the island of Great Britain, with a total area of 7,467 sq. miles, and a population (1921) of 2,206,712. It is bounded on the N. by the Irish Sea, on the S. by the Bristol Channel, on the E. by the English counties of Cheshire Salop, Hereford and Monmouth, and on the W. by St. George's Channel. The greatest length from N. to S. (Point of Air to Barry Island) is 136 miles, and the greatest breadth from W. to E. (St. David's Head to the English border) is 92 miles. Separated from the mainland by the Menai Straits is the Welsh island-county of *Anglesey* or Môn (276 sq. miles), communication with which is facilitated by the Menai Suspension Bridge (1,000 ft. long), built by Telford in 1826, and by the tubular railway bridge (1,100 ft. long) of the L. & N.W. Railway, built by Stephenson in 1850. Holyhead harbour, on Holy Isle (N.W. of Anglesey), provides accommodation for a fast steam packet service to Kingstown and Dublin (70 miles).

Population.—The population at the *Census* of 1921 was 2,206,712 (or, inclusive of Monmouthshire, 2,657,412).

Relief.—Wales is generally mountainous, the chief systems being those of North Wales (Snowdon 3,571 ft., Carnedd Llywelyn 3,484 ft., Carnedd Dafydd 3,426 ft.); Berwyn (Aran-fawddy 2,970 ft.); Powys (Plinlimmon 2,462 ft., Drygan Fawr 2,115 ft., Radnor 2,163 ft.); and the Black Mountain, Brecknock Beacons and Black Forest ranges (Carmarthen Van 2,632 ft., Brecon Beacon 2,862 ft., Pen-y-gaver fawr 2,660 ft.).

Hydrography.—The principal river of those rising in Wales is the *Severn* (*see* England), which flows from the slopes of Plinlimmon to the English border, dividing Montgomeryshire on its way. The *Wye* (130 miles) also rises in the slopes of Plinlimmon, and flows between Radnor and Brecon on its course to England. The *Usk* (56 miles) flows into the Bristol Channel, through Monmouthshire. The *Dee* (70 miles) rises in Bala lake and flows through the Vale of Llangollen, where an aqueduct (built by Telford in 1805) carries the Pontcysyllte branch of the Shropshire Union Canal across the valley. The estuary of the Dee is the navigable portion, 14 miles in length and about 5 miles in breadth, and the tide rushes in with dangerous speed over the "Sands of Dee." The *Towy* (68 miles), *Teifi* (50 miles), *Taff* (40 miles), *Dovey* (30 miles), *Tâf* (25 miles), and *Conway* (24 miles), the last named broad and navigable, are wholly Welch rivers.

The largest natural lake in Wales is *Bala* (Llyn Tegid) in Merionethshire, 4 miles long and about 1 mile wide; *Lake Vyrnwy* is an artificial reservoir, about the size of Bala, and forms the water supply of Liverpool, while Birmingham is supplied from a chain of reservoirs in the Elan and Claerwen valleys.

EARLY HISTORY.

Celts and Romans.—The earliest inhabitants of whom there is any record appear to have been subdued or exterminated by the *Goidels* (a people of Celtic race) in the Bronze Age, and a further invasion of Celtic *Brythons* followed in the ensuing Iron Age. The *Roman* conquest of South Britain and Wales was for some time successfully opposed by *Caradoy* (Caratâcus), King of the Silures, a tribe inhabiting the present counties of Glamorgan, Brecon, Radnor and Monmouth. In A.D. 78 the conquest of Wales was completed under Julius Frontinus, and communications were opened up by the construction of military roads from Chester to Carleon-on-Usk and Caerwent, and from Chester to Conway (and thence to Carmarthen and Neath). *Christianity* was introduced (during the Roman occupation) in the 4th century, and the faith thus established was preserved (after the withdrawal of the Roman garrison) by native effort, and was carried to the northernmost corners of the British Isles by missionaries to the Hebrides and to the Orkneys and Shetlands.

The Anglo-Saxon Attacks.—The Anglo-Saxon invaders of South Britain drove the Celtic Goidels and Brythons into the mountain fastnesses of Wales, and into Strathclyde (Cumberland and S.W. Scotland) and Cornwall, giving them the name of *Waelisc*, or Welsh. (=Foreign). The West Saxons' victory of Deorham (577) isolated the Waelisc of Wales from those of Cornwall, while the battle of Chester (613) similarly cut off communication with the Waelisc of Strathclyde. In the 8th century the boundaries of the Welsh were further restricted by the annexations of Offa, King of Mercia, and counter-attacks were largely prevented by the construction of an artificial boundary from the Dee to the Wye (Offa's Dyke). In the 9th century *Rhodri Mawr* united the country against further incursions of the Saxons by land and against the raids of Norse and Danish pirates by sea, but at his death his three provinces of *Gwynedd* (N.), *Powys* (Mid.) and *Dehenbarth* (S.) were divided among his three sons—Anarawd, Mervyn and Cadell—the son of the last-named being Howel Dda, who codified the laws of the country, while Lewelyn ap Seissylit (husband of the heiress of Gwynedd) again united the provinces and reigned as Prince from 1015–1022.

The Norman Conquest.—After the Norman conquest of England William I. created Palatine counties along the Welsh frontier, and Robert FitzHamon, the Norman Earl of Gloucester, raided South Wales and erected fortresses from the Wye to Milford Haven. Henry I. introduced Flemish settlers into South Wales, but after his death the Welch rose under the leadership of *Griffith ap Rhys* and routed the Norman-Flemish forces at the fords of the Teifi (Cardigan) in 1136. From the early years of the 13th century the house Gwynedd, in the north, gained an ascendency over the whole of Wales, and Llewelyn ap Iorwerth was in constant strife with England for recognition as an independent sovereign; but Llewelyn, the son of Iorwerth, was killed in 1282 during hostilities between the Welsh and English, and his brother David was captured and executed by the English in 1283. On Feb. 7, 1301, Edward of Carnarvon, son of Edward I., was created *Prince of Wales*, a title thenceforward borne by the heir apparent to the throne of England.

The Welsh are a distinct nationality, with a language and literature of their own, and the national bardic festival (Eisteddfod), instituted by Prince Rhys ap Griffith in 1176, is annually maintained. These *Eisteddfodau* (sessions) form part of the *Gorsedd* (assembly), which is believed to date from the time of Prydian, a ruling prince in an age many centuries before the Christian era.

CARDIFF.

CARDIFF (Glamorgan), at the mouth of the rivers Taff (Caer Taff), Rummey and Ely, the port of the South Wales coal fields, has a municipal area of 13,628 acres, and a population (1921) of 219,688. The principal industries include ship repairing, rope making, steel, copper, lead and zinc works, iron and steel foundries, patent fuel works, engine wagon works, flour mills, chemical factories, paper mills, breweries, jam, vinegar and ice factories, tin plate and paint works. The chief imports are grain, timber, pitwood, ore, fruit, butter, cheese, frozen and chilled meat, live cattle, canned goods, sugar, potatoes. The exports include coal, coke, patent fuel, iron and steel manufactures, tin plates, &c.

The principal buildings are Cardiff Castle, built in the 11th century, the National Museum of Wales, Public Library, the University College of South Wales and Monmouthshire, the Registry of the University of Wales, Technical College, City Hall and Law Courts, and Glamorgan County Hall. The city returns 3 members to Parliament.

City Officers.

Rt. Hon. Lord Mayor (1926-27), William Grey.
Stipendiary Magistrate, W. St. J. F. Williams.
Recorder, Lt.-Col. Sir Rhys Williams, Bt., D.S.O., K.C., M.P. (1922).
Town Clerk & Clerk of the Peace, Cecil G. Brown, LL.B.

SWANSEA.

SWANSEA (Glamorgan), at the mouth of the River Tawe, is the chief centre of the copper, tinplate and spelter industry of the United Kingdom, and contains the largest tube works in the country. The trade of the port also includes coal, patent fuel, ores, and the import and export of oil (National Oil Refineries). There is also a large ship-repairing industry. The trade is principally with France, Italy and Belgium. The municipal area is 24,193 acres, with a population at the census of 1921 of 159,600. Included in the borough is the health resort of Mumbles.

The principal buildings are the Norman castle (re-built in 1330), the Royal Institution of South Wales, founded in 1835 (containing Museum and Library), and the 17th century Grammar School, founded by Hugh Gore. Swansea was chartered by King John, and incorporated as a borough by Henry III. The borough returns 2 members to Parliament.

City Officers.

Mayor (1926-27), D. J. Bassett.
Recorder, R. E. L. Vaughan-Williams, K.C.
Town Clerk, H. L. Laug-Coath.

THE KINGDOM OF SCOTLAND.

Position and Extent.—The Kingdom of Scotland occupies the northern portion of the main island of Great Britain and includes the Inner and Outer Hebrides, and the Orkney, Shetland, and many other islands. The Kingdom lies between 60° 51′ 30″ and 54° 38′ N. latitude and between 1° 45′ 32″ and 6° 14′ W. longitude, its southern neighbour being the Kingdom of England, with the Atlantic Ocean on the N. and W., and the North Sea on the E. The greatest length* of the mainland (Cape Wrath to the Mull of Galloway) is 274 miles, and the greatest breadth (Buchan Ness to Applecross) is 154 miles. The total area of the Kingdom is 31,520 square miles (land and water). The population (at the census of 1921) was 4,882,288, an increase of 121,394 since the census of 1911, or 2·5 per cent.

Relief.—There are three natural orographic divisions of Scotland. The *Southern Uplands* have their highest points in Merrick (2,764 feet), Rinns of Kells (2,668 feet), and Cairnsmuir of Carsphairn (2,612 feet), in Kirkcudbright; Hartfell (2,651 feet) in Dumfries; and Whitecoomb (2,695 feet), in Peebles. The *Central Lowlands* include the valleys of the Tay, Forth and Clyde, and the cities of Edinburgh, the capital of the Kingdom, and Glasgow, its principal seaport. The heather-clad *Northern Highlands* extend almost from the extreme north of the mainland to the central lowlands, and are divided into a northern and southern system by the *Great Glen*; they contain, in the central Grampian Hills, *Ben Nevis* (4,406 feet), the highest point in the British Isles, and Ben Muich Dhui (4,296 feet). The *Cheviot Hills* form a natural boundary between Scotland and England, their highest point being Cheviot Hill (2,676 feet).

Hydrography.—The principal river of Scotland is the *Clyde* (106 miles), one of the most important rivers in the world, with the greatest commercial estuary in Scotland. The Clyde is formed by the junction of Daer and Portrail water, and flows through the city and port of Glasgow to the Firth of Clyde. During its course it passes over the picturesque *Falls of Clyde*, the largest falls in the British Isles, Bonnington Linn (30 feet), Corra Linn (84 feet), Dundaff Linn (10 feet), and Stonehyres Linn (80 feet), above and below Lanark. The *Tweed* (96 miles) has important woollen industries ("Tweeds") in its valley. The *Tay*, noted for its salmon, and the longest river in Scotland (117 miles), flows into the North Sea, with Dundee (the centre of the jute industry) on the estuary, which is spanned by the *Tay Bridge* (2 miles 73 yards), opened in 1887 to replace that destroyed by a gale (Dec. 28, 1879). The *Dee* (90 miles), a noted salmon river, flows through scenery of unequalled beauty to the North Sea at Aberdeen. The *Spey* (110 miles), the swiftest flowing river in the British Isles, and also noted for its salmon and its scenery, flows into the Moray Firth. The *Forth* (66 miles), navigable to Stirling, is spanned by the *Forth Bridge*, constructed 1882–9 at a cost of £3,000,000, with a length of 5,330 feet (with approaches 8,295 feet).

The *lochs* are the principal hydrographic feature of the Kingdom, both on the mainland and in many of the Islands. The largest in the Kingdom and in Great Britain is *Loch Lomond* (24 miles long), with Lochs Awe, Tay, Rannoch and Ericht in the Grampian valleys; *Loch Ness* (24 miles long and 800 feet deep), with Lochs Oich and Lochy, in the Great Glen; and Lochs Shin (30 miles) and Maree in the northern Highlands.

Orkney.—About 6 miles N. of the Caithness coast, separated from the mainland by the *Pentland Firth*, is the island county of Orkney, a group of 90 islands and islets ("holms" and "skerries"), of which one-third are inhabited. The total area of the group is 375½ square miles, with a population (1911) of 25,896. Kirkwall, in *Pomona* (or mainland), the largest island of the group, is the capital of the county. Many of the Orkney (and Shetland) Islands contain *brochs* (Pictish towers) and other Pictish and Scandinavian remains. *Scapa Flow*, between Pomona and Hoy, was the war station of the Grand Fleet from 1914–9 and the scene of the scuttling of the surrendered German High Seas Fleet (June 21, 1919).

Shetland.—About 50 miles N. of Orkney (with the detached Fair Isle at 25 miles N.) is the island county of Shetland, a group of about 100 islands and islets, of which 29 are inhabited. The total area of the group is 551 square miles, with a population (1911) of 27,911. Lerwick, in *Mainland* (the largest and principal island), is the capital of the county. *Fair Isle*, the southernmost of the group, is famous for hand-knitted hosiery, and *Unst* for the finest of the Shetland woollen work, for which the county is famous. *Muckle Flugga*, about 1 mile N. of Unst, is the most northerly of the group and of the British Isles (60° 51′ 30″ N. lat.).

*Western Islands.**—Off the W. coast, at varying distances, and extending from Sutherland to Argyll, are over 500 islands and islets, of which 102 are inhabited. The total area of these Western Islands is 2,812 square miles, with a population of close on 80,000, but owing to the mountainous surface of the land only about 300 square miles are under cultivation. The *Inner Hebrides* include the island of *Skye* (643 square miles—capital, Portree, famous as the refuge of Prince Charlie after his defeat at Culloden, Invernessshire, in 1746), which contains the *Cuillins* (Sgurr-na-Banachdich, 3,243 feet), *Red Hills* (Ben Caillich, 2,403 feet), and many other picturesque mountains; *Mull* (367 square miles),

* *Land's End to John o' Groats.*—The customary measurement of the Island of Great Britain is from the site of John o' Groat's house, near Duncansby Head, Caithness (at the N.E. extremity of the island) to Land's End, Cornwall (at the S.W. extremity), a total distance of 597 miles in a straight line and (approximately) 900 by road. But the site of the house of John de Groot (with its 8 doors and octagonal table, to solve the question of precedence between John and his 7 brothers) is about 4 miles S.W. of Duncansby Head, while Dunnet Head (also in Caithness) extends further N. than Duncansby. John de Groot is believed to have obtained permission to settle in Caithness (from the Netherlands) in the reign of James IV. (1488–1513).

* *The Hebrides.*—Until the closing years of the 13th century "The Hebrides" included other Scottish islands in the Firth of Clyde, the peninsula of Kintyre (Argyllshire), the Isle of Man, and the (Irish) Isle of Rathlin. The origin of the name is stated to be the Greek *Eboudai*, latinized as *Hebudes* by Pliny, and corrupted to its present form. The Norwegian name *Sudreyjar* (Southern Islands) was latinized as *Sodorenses*, a name that survives in the Anglican bishopric of "Sodor and Man."

containing *Ben More* (3,185 feet), *Ben Buy* (2,354 feet), and *Ben Creach* (2,289 feet); *Jura* (160 square miles), with a chain of hills culminating in the *Paps of Jura*, Beinn-an-Oir (2,571 feet), and Beinn Chaolais (2,407 feet); *Islay* (235 square miles), and many smaller islands. The *Outer Hebrides*, separated from the mainland by the *Minch*, include *Lewis-with-Harris* (770 square miles), celebrated for its homespun "Tweeds," *North Uist*, *South Uist*, *Barra* and other islands. Thirteen miles W. of *Stornoway* (the largest town of Lewis and of the Hebrides) are the "Druidical" remains of *Callernish*, a well-preserved series of monolithic circles, cruciform in general arrangement, but generally regarded as a heathen monument of the remote Stone Age.

Climate.—The climate of Scotland is influenced by the much indented coast line and (like that of South Britain) by the *Gulf Stream Drift*, which emerges from the Gulf of Mexico as a strong current about 30 miles in width, with a speed of about 4 miles per hour; the stream gradually loses its velocity and becomes shallower and cooler, until at about 35° N. lat. (off Cape Hatteras) it ceases to be a distinct stream and its surface waters are carried across the Atlantic by the prevailing westerly winds. The climate is more bracing and less treacherous than that of England, the average duration of sunshine on the east coast being greater than on the east coast of England, while the south-western section is no wetter or more relaxing than the corresponding section of England. The mean winter temperature is in the neighbourhood of 35°, and that of summer about 58° Fahrenheit.

EARLY HISTORY.

Prehistoric Man.—North Britain appears to have been invaded in Palaeolithic times by a succession of races, who died out or were exterminated by other immigrants. The earliest race of which there is any record is that since known as the *Picts*, believed to be of non-Aryan origin, and stated to have been named *Picti* by the Romans on account of the tribal habit of painting the body. The Picts seem to have inhabited the whole of North Britain and to have spread over the north of Ireland. *Picts' Houses* are most frequent in the northern counties of Caithness and Sutherland and in the Orkney Islands, and it is generally believed that the Picts were driven northwards by later Celtic immigrants. Celtic *Goidels* and *Brythons* arrived from Belgic Gaul during the latter part of the Bronze Age and in the early Iron Age, and except in the extreme north of the mainland and in the islands the civilization and speech of the people were definitely Celtic at the time of the Roman Invasion of Britain.

The Roman Invasion.—In A.D. 80 Julius Agricola extended the Roman conquests in Britain by advancing into *Caledonia* as far as the "Grampian" Hills, but after a victory at *Mons Graupius* (since corrupted to "Grampius") he was recalled, and no further advance was made for about 60 years, when the Roman frontier was carried to the isthmus between the Forth and Clyde and marked by the *Wall of Pius*, towards which ran military roads from the Cheviots. The Roman occupation of Southern Caledonia was not so effective as that of South Britain, and before the close of the second century the northern limit of Roman Britain had receded to *Hadrian's Wall*, from the Tyne to Solway Firth, where it was maintained until about 450 A.D.

The Scots.—During the later years of the Roman occupation the garrison was continually harassed by Pictish tribes north of the Wall, aided by Scots (the Gaelic tribe then dominant in Ireland), and when the garrison was withdrawn these *Picts* and *Scots* were the principal enemies of the Celtic Brythons, who are believed to have called in the Saxons to protect them from the invasions of their neighbours. A relic of the struggle between Pict and Brython is still to be seen in the *Catrail*, or Picts' Work Dyke, of Roxburgh (from Torwoodlee, near Galashiels, to Peel Fell in the Cheviots). *Christianity* was introduced into Southern Caledonia about 380 by missionaries from Romanized Britain, who penetrated to the northern districts and islands. After the withdrawal (or absorption) of the Roman garrison of Britain there were many years of tribal warfare between the Picts and Scots, the Brythonic Waelisc (Welch) of Strathclyde (South-west Scotland and Cumberland), and the Anglo-Saxons of the Lothians. The Waelisc were isolated from their kinsmen in Wales by the victory of the West Saxons at Chester (613), and towards the close of the 9th century the Scots under *Kenneth Macalpine* became the dominant power in Caledonia. In the reign of Malcolm I. (943–954) the Brythons or Waelisc (Welch) of Strathclyde were brought into subjection, the lowland kingdom of the English (Lothian) being conquered by Malcolm II. (1005–1034). From the close of the 11th century until the middle of the 16th there were constant wars between Scotland and England, the outstanding figures in the struggle being *William Wallace*, who defeated the English at Stirling Bridge (1297), and *Robert Bruce*, who won the victory of Bannockburn (1314). James IV. and many of his nobles fell at the disastrous battle of *Flodden* (1513), and in 1603 James VI., the Stuart King of Scotland and the heir to the Tudor line of England (his mother, Mary "Queen of Scots," was the great-granddaughter of Henry VII.), succeeded Queen Elizabeth on the throne, his successors reigning as Sovereigns of Great Britain. After the abdication (by flight) of James VII. and II., the crown devolved upon William III. (grandson of Charles I.), and Mary (daughter of James VII. and II.) and, their issue failing, upon Anne (second daughter of James VII. and II.). Anne's children died young, and the throne devolved upon George I. (great-grandson of James VI. and I.). In 1689 Graham of Claverhouse "roused the Highlands" on behalf of James VII. and II., but died after a military success at Killiecrankie. In 1715, armed risings led to the indecisive battle of Sherriffmuir, but the movement died down until 1745, when the "Young Pretender" defeated the Royalist troops under Sir John Cope at Preston Paus and advanced to Derby in England (1746). From Derby, the adherents of "James VIII. and III." (the title claimed for his father by the Young Pretender), fell back on the defensive, and the *Jacobite* movement was finally crushed by the Royalist troops under the Duke of Cumberland at *Culloden* (April 16, 1746).

The Hebrides did not become part of the Kingdom of Scotland until 1266, when they were ceded to Alexander III. by Magnus of Norway. Orkney and Shetland fell to the Scottish Crown as a pledge for the unpaid dowry of Margaret of Denmark, wife of James III., in 1468, the Danish suzerainty being formally relinquished in 1590.

EDINBURGH.

EDINBURGH, the Capital of the Kingdom, has a municipal area of 32,402 acres, and a population (Census of 1921) of 420,281 (over the enlarged area). The boundaries were extended in 1920 so as to include the Burgh of Leith and part of the suburban district of the County of Midlothian. The city is built on a group of hills and contains in Princes Street the most beautiful thoroughfare in the world. The principal buildings are St. Giles's Church (restored 1879-83), and St. Mary's (Scottish Episcopal) Cathedral (Sir Gilbert Scott), the Castle (which contains, in St. Margaret's Chapel, the oldest building in Scotland), Parliament House (the present seat of the judicature, containing the Advocates' and Signet Libraries), the University, the General Register House (Robert Adam), Royal Scottish Academy, National Portrait Gallery, and Holyrood Palace (containing parts of the royal palace of James IV. and V.). The city is governed by a town council of 71 members, and sends 6 members to Parliament (including the member for Leith).

Rt. Hon. Lord Provost (1926-27), Alexander Stevenson.

Town Clerk, Andrew Grierson, S.S.C., J.P.

City Chamberlain, Robert Paton.

GLASGOW.

GLASGOW, a Royal Burgh, City and County of a City, and the principal commercial centre in Scotland, has a municipal area of 29,551 acres, and an estimated population of 1,113,482. The city occupies the north and south banks of the Clyde, one of the chief commercial estuaries of the world, and its trade was valued at £85,302,000 in 1924, the tonnage of the ships entering (1925-26) being 6,720,409 tons, of those cleared 6,647,192 tons. The principal industries are iron and steel works, shipbuilding, chemicals, leather, woollens, muslin-weaving, distilling, inkle-making, tobacco, cotton-mills and furniture. The chief buildings are the Early English Cathedral, built early in the 13th century, and incorporating part of an earlier structure, the University (Sir Gilbert Scott), the City Chambers, the Royal Infirmary and the Western and Victoria Infirmaries, the Art Galleries and the Mitchell Library. The City is governed by a town council of 113 members, and sends 15 members to Parliament.

Rt. Hon. Lord Provost (1926-27), David Mason.

DUNDEE.

DUNDEE, a City, Parliamentary, Municipal and Royal Burgh, on the left bank of the River Tay, 42 miles N. of Edinburgh, has a municipal area of 6,678 acres, and a population (Census 1921) of 168,315 (an increase of 8,036 since 1911). The principal buildings are University College (St. Andrews University), the Technical Institute, High School, Albert Institute and the Caird Hall Buildings. The harbour affords dock accommodation of nearly 35 acres. The principal industries are jute manufacture in all its branches, and various forms of linen weaving, the making of preserves, shipbuilding, engineering, dyeing, and brewing. The City is governed by a town council of 34 members and sends 2 members to Parliament.

Rt. Hon. Lord Provost (1926-27), William High.

Town Clerk, W. H. Blyth Martin.

Treasurer (vacant).

ABERDEEN.

ABERDEEN, a City and a Royal, Municipal and Parliamentary Burgh, 130 miles N.E. of Edinburgh, received its charter as a Royal Burgh from William the Lion in 1179. The municipal area is 6,748 acres, with a population (Census 1921) of 158,969 (a decrease of 4,922 since 1911). The tonnage of the ships entered in 1925 was 866,363 tons. The chief industries are granite quarrying and working, white fish, salmon and herring fisheries, engineering, chemicals, brewing, distilling, shipbuilding, paper-making, and woollen, jute and linen manufacture. The principal buildings are the East and West Churches of St. Nicholas, Municipal Offices, Marischal College, King's College, Roman Catholic pro-Cathedral, Public Library, H.M. Theatre, Art Gallery and Museum, and the Cathedral of St. Machar (14th century). The City is governed by a Town Council of 34 Members, and sends 2 Members to Parliament.

Rt. Hon. Lord Provost (1926-27), Andrew Lewis.

Town Clerk, George S. Fraser.

Position and Extent.—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,531 sq. miles and its geographical position between 51° 26′ and 55° 21′ N. latitude and from 5° 25′ to 10° 30′ W. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizen Head), is 302 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Armagh Head), is 174 miles. The island is occupied for the greater part of its area by the *Central Plain*, with an elevation of 50 to 350 ft. above mean sea level, with isolated mountain ranges near the coast line. The principal mountains, with their highest points, are the *Sperrin Mountains* (Sawel 2,240 ft.) of County Tyrone in the North; the *Mountains of Mourne* (Slieve Donard 2,796 ft.) of County Down, and the *Wicklow Mountains* (Lugnaquilla 3,039 ft.) in the North-East; the *Derryveagh Mountains* (Errigal 2,466 ft.) of County Donegal in the North-West; the *Connemara Mountains* (Twelve Pins 2,695 ft.) of County Galway in the West; *Macgillicuddy's Reeks* (Carrantuohill 3,414 ft., the highest point in Ireland) in the South-West; and the *Galtee Mountains* (3,018 ft.) of County Tipperary, and the *Knockmealdown* (2,609 ft.) and *Comeragh Mountains* (2,470 ft.) of County Waterford, in the South. The principal river of Ireland (and the longest in the British Isles) is the *Shannon* (240 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The *Slaney* flows into Wexford Harbour, the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Bay, and the *Suir*, *Nore*, and *Barrow* to Waterford Harbour. As in Scotland, the principal hydrographic feature is the *Loughs*, of which Lough *Neagh* (150 sq. miles) in the north-east is the largest in Ireland and the British Isles, others being the Shannon Chain of *Allen*, *Bodery*, *Forbes*, *Ree* and *Derg*, and the Erne Chain of *Gowna*, *Oughter*, *Lower Erne*, and *Erne*, in the central plain; *Melvin*, *Gill*, *Gara* and *Conn* in the north; and *Corrib* and *Mask* (joined by a hidden channel) in the south. In County Kerry, to the east of Macgillicuddy's Reeks, are the famous *Lakes of Killarney*. The climate of Ireland is more equable than that of Great Britain, and the rainfall is more evenly distributed. The variation in mean temperature is only about 3° Fahrenheit, the summer extremes being 59° in the N. and 62° in the S.

Primitive Man.—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island, while the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age a Celtic race of *Goidels* appear to have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the south-east, while *Picts* from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the *Scoti*, who afterwards established themselves in Scotland.

Legendary History.—According to Irish legends, the island was settled by a Milesian race, who came from Scythia by way of Spain, and established the *Kingdom of Tara*, about 500 B.C. The supremacy of the *Ardri* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Oriel, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn M'Coul (Fingal) to connect Antrim with Scotland (Staffa).

Christianity.—Christianity did not become general until the advent of St. Patrick. *St. Patrick* was born in Britain about 389, and was taken to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organise the Christian religion throughout the island.

Later History.—The Roman conquest of Britain was not extended to Ireland, and little is known of the history of the country until the invasions of *Northmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as Findgaill (White Strangers) and the Danes as Dubgaill (Black Strangers), names which survive in "Fingall," "MacDougall" and "MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (land of the Irish), the Provinces of Ulster, Leinster and Munster being survivals of the Norse *Ulaidstadr*, *Laigin-stadr* and *Muman-stadr*. The outstanding events in the encounters with the Northmen are the *Battle of Tara* (980), at which the Hy Neill king Maelsechlainn II. defeated the Scandinavians of Dublin and the Hebrides under their king Amlaib Cuarán; and the *Battle of Clontarf* (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Briars of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 Dermod MacMurrough (Diarmait Mac-Murchada), the deposed king of Leinster, sought assistance in his struggle with Ruadvi O'Connor (the high king of Ireland), and visited Henry II., the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom, and Dermod enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as *Strongbow*, who landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermod's daughter. In 1172 (Oct. 18) Henry II. himself landed in Ireland, with a force larger than Strongbow's, and obtained homage from the Irish kings, but Anglo-Norman rule underwent many fluctuations in the succeeding centuries, being confined in the early 15th century within the English "Pale" of 600 square miles. In the reign of Henry VII. English rule was greatly extended, and the administration of Irish affairs was anglicised by *Robert Poyning*, Lord Deputy of Ireland, who summoned the *Parliament of Drogheda* (Dec. 1494), at which were enacted the Statutes of Drogheda, afterwards known as *Poyning's Law*, making the legislature of Ireland subordinate to and dependent on that of England. A later parliament conferred on Henry VIII. the title of King of Ireland.

EDUCATION.

On Dec. 31, 1925, there were 2,006 Public Elementary Schools with 200,287 pupils. In 1924–25 there were 72 Preparatory, Intermediate and Secondary Schools recognised by the Ministry of Education, with 9,357 pupils, and 97 Centres of Technical Instruction, with 20,177 students; and the Queen's University at Belfast, with 79 Professors and Lecturers, and 1,240 students.

FINANCE.

Taxation is imposed in Northern Ireland on account of certain "Reserved Services" by the Imperial Government, which collects and remits the balance after cost of collection, to the Northern Exchequer; with regard to other services the Parliament of Northern Ireland has control. The Northern Government makes a contribution to the Imperial Exchequer in return for services carried out by the Imperial Authorities. The revenue accruing to the Northern Irish Exchequer in 1925-6 was £12,725,747, the expenditure being £12,675,667; estimated revenue and expenditure 1926-27 £11,659,000.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—In 1925 there were 329,447 acres under corn crops (oats, 322,063 acres), 206,596 under green crops (potatoes, 154,384), 37,786 under flax, 9,346 under fruit, and 478,149 under hay, a total acreage of 1,061,324. The Irish Free State—Saorstat Eireann.

THE GOVERNOR GENERAL.

His Excellency Timothy Michael Healy, K.C., *born* 1855, *appointed Governor General* Dec. 6, 1922 ..... £10,000

CONSTITUTION AND GOVERNMENT.

UNDER the *Irish Free State (Agreement) Act*, 1922, the Irish Free State (*Saorstat Eireann*) is a coequal member of the Community of Nations forming the British Commonwealth of Nations. The Constitution, as issued by the Crown, June 16, 1922, contains five Sections, of which Section I. is declaratory of Fundamental Rights. (1) The coequality of the Irish Free State. (2) Power of government derived from the people, in accordance with the Constitution. (3) Irish domicile for seven years, or Irish parentage on either side, conferring Irish nationality, and men and women having equal rights as citizens. (4) Irish the national language, English being recognised as an official language. (5) No titles or honours may be conferred on any citizen, except with the approval or advice of the Executive Council. (6) Liberty of the person inviolable. (7) Dwelling of each citizen inviolable. (8) Freedom of conscience and profession and practice of religion, and no law establishing or prohibiting religion may be passed. (9) Free speech and right of lawful assembly. (10) Free education for all citizens. (11) Natural resources of the State inalienable.

Section II. provides for a legislature (Oireachtas) of the King and two houses, the Chamber of Deputies (*Dail Eireann*) and the Senate (*Seanad Eireann*), the former elected by secret ballot and by direct vote of all citizens above the age of 21 years who comply with the existing electoral laws and consisting of not less than one member for each 30,000 of the population and not more than one member for each 20,000 of the population. The latter, consisting of 56 Senators and of 2 Senators from each University, elected by all citizens above the age of 30 years who comply with the existing electoral laws. Every citizen who has reached the age of 21 years is eligible for the Chamber of Deputies; the Senate is composed of citizens who have reached the age of 35 years and have done honour to the nation by reason of useful public service, or who are specially qualified as representing important aspects of the nation's life. Parliament shall hold at least one session each year and members are required to take the following oath:

I..... do solemnly swear true faith and allegiance to the Constitution of the Irish Free State as by law established, and that I will be faithful to His Majesty King George V., his heirs and successors by law in virtue of the common citizenship of Ireland with Great Britain and her adherence to and membership of the group of nations forming the British Commonwealth of Nations.

Provision is made for the "Initiative" of proposals for laws or constitutional amendments on a petition of 50,000 voters on the register; and for the submission of any bill passed by both houses to a "Referendum" for the decision of the people.

In this Section also Article 45 declares that the Parliament (*Oireachtas*) has the exclusive right to regulate the raising and maintaining of such armed forces as are mentioned in the scheduled Treaty in the territory of the Irish Free State, and every such force shall be subject to the control of the Parliament. Save in the case of national invasion, the Irish Free State shall not be committed to active participation in any war without the assent of the Parliament.

Section III. vests the Executive Authority in the King and provides that it shall be exercised in accordance with the law, practice, and constitutional usage governing the exercise of the executive authority in the case of the Dominion of Canada, by the representative of the Crown. The Executive Council (*Aireacht*) is responsible to the Chamber, and consists of not more than twelve Ministers (*Airi*) appointed by the representative of the Crown, of whom four ministers shall be members of the Chamber, and a number not exceeding eight chosen from all citizens eligible for election to the Chamber, who shall not be members of Parliament during their term of office, and who, if at the time of their appointment they are members of Parliament, shall by virtue of such appointment vacate their seats; provided that the Chamber may from time to time, on the motion of the President of the Executive Council, determine that a particular Minister or Ministers, not exceeding three, may be members of Parliament, in addition to the four members of the Chamber above mentioned.

Section IV. establishes a Judiciary, consisting of Courts of First Instance, and a Court of Final Appeal to be called the Supreme Court (*Cuirt Oachtarach*). The Courts of First instance include a High Court (*Ard Chuirt*), invested with full original jurisdiction in and power to determine all matters and questions whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction with a right of appeal as determined by law. The decision of the Supreme Court shall in all cases be final and conclusive, and shall not be reviewed or capable of being reviewed by any other Court, Tribunal or Authority whatsoever. Provided that nothing in the Constitution shall impair the right of any person to petition his Majesty for special leave to appeal from the Supreme Court to his Majesty in Council or the right of his Majesty to grant such leave.

Section V. contains certain Transitory Provisions to meet the special circumstances incidental to the establishment of the Legislature, &c.

Judges, High Court, J. Creed Meredith; W. E. Wylie; W. J. Johnston; H. Hanna; John O'Byrne ..... each £2,500

DEFENCE.

The total strength of the land forces is 1,664 officers and 12,560 other ranks. In accordance with the Treaty, the defence by sea of Great Britain and Ireland is undertaken by Imperial Forces. At the expiration of 5 years from the date of the Treaty (Dec. 6, 1921), a conference is to be held with a view to the undertaking by Ireland of a share in her own coastal defence. The Army vote for 1926–7 was £2,475,470.

EDUCATION.

Primary Education, with compulsory attendance, is directed by the State, which also pays the teachers and contributes to the cost of the buildings; the estimated expenditure on Primary Education in 1926–7 was £3,664,781. Secondary Education is in private hands and is largely conducted by Religious Orders, the State contribution in 1926–7 being £288,838. There are two Universities in Dublin, of which the National University has 3 constituent colleges (Cork, Galway and Dublin); in 1922 the Professors, &c., at the two Universities numbered 220, and the students 3,410.

FINANCE.

The total Exchequer receipts for 1925-6 are estimated at £27,000,000, of which tax revenue is expected to yield about £21,500,000, derivable in almost equal proportions, from Customs, Excise and other Duties (including Income Tax). The heads of duty are much the same as in Great Britain, except that there is no tax on tea, raw cocoa, coffee and chicory, and the Safeguarding of Industries Act has been repealed. The duties on Beer, Cocoa Preparations and Sugar Confectionery differ slightly from those in operation in Great Britain. An *ad valorem* duty, varying from 15 per cent. to 33⅓ per cent., is payable on imports of Boots and Shoes, Candles, Glass Bottles and Jars, Soap, Wearing Apparel, Blankets, Bedsteads and Furniture, and Corporation Profits Tax is also levied; but about four-fifths of the total yield from Customs and Excise is attributable to Beer, Spirits and Tobacco. The rates of Estate Duty on large estates are considerably lower in the Saorstat than in Great Britain.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—In 1925 there were 847,705 acres under corn crops, 704,899 under green crops, 10,688 under flax, 7,909 under fruit, and 2,265,173 under hay, a total of 3,836,374 acres. The principal produce in 1925 was: oats, 585,563 tons; potatoes, 2,138,374 tons; turnips, 3,299,373 tons; mangolds, 1,318,878 tons; flax, 1,526 tons; and hay, 4,279,828 tons. The *Live Stock* included 3,991,358 cattle, 2,813,062 sheep, 731,500 pigs, 183,589 goats, 387,761 horses, 21,854 mules, and 196,917 asses.

Minerals.—Over 2,000 persons were employed in the mines and quarries in 1921. 88,232 tons of coal were won in 1921.

Fisheries.—Over 14,500 persons were employed in the fisheries in 1925, the total value of all fish landed being £413,000.

TRADE.

The total trade of the Irish Free State for 1925 was valued at £107,284,078, being £62,913,230 for Imports and £44,370,848 for Exports: the Imports from Great Britain were valued at £44,185,138, and the Exports to Great Britain at £36,656,721; the Imports from Northern Ireland at £6,812,109 and the Exports to Northern Ireland at £6,465,024.

The Indian Empire extends over a territory larger than the Continent of Europe without Russia. Legally, "British India" means all territories governed by the King-Emperor through the Governor-General of India, or through any governor or other officer subordinate to the Governor-General of India; while "India" means British India, together with any territories of any prince or chief under the suzerainty of His Majesty, exercised through the Governor-General of India or through any governor or other officer subordinate to the Governor-General of India (Act 52-3 Vict., c. 63, s. 18). There are tracts of tribal territory on the N.W. and N.E. frontiers under the political influence, though not yet under the administrative rule, of the Indian Government.

Boundaries.—The political boundary of India marches with Persia and Afghanistan from the Gulf of Oman to Povalo Schveikovski on the Taghdumbash Pamir. From this point the frontier—in many parts not yet clearly defined—touches the Chinese Empire and Nepal, till the limits of French Indo-China are reached on the Upper Mekong. The Indian frontier, on leaving the Mekong, marches with Siam till it reaches the sea at Victoria Point, half-way down the Malay peninsula. Beyond the sea the Indian Empire includes the Andaman and Nicobar Islands, the Laccadive and Minicoy Islands, Aden and Perim, besides protectorates over Socotra, Bahrein, and various chiefships along the coast from Aden to the Persian Gulf. Continental India, including Baluchistan, reaches from 8° to 37° N. latitude, and from 61° to 101° E. longitude. Delhi, the new capital, lies in 77° E. long.

Area and Population.—The total area of India proper is about 1,805,000 square miles, with a population of nearly 319 millions (about three-fourths of the population of the British Empire). The British Provinces, as distinguished from the Indian States, comprise 61 per cent. of the area, and nearly 78 per cent. of the population. The details are as follows:—

* Districts and Administered Territories.

Physical Features.—Excluding Burma, which forms no part of the Indian peninsula, we may broadly divide the country into three sections, viz., the Himalayan region, the northern river-plains, and the southern table-land.

The Himalayas.—The Himalayas (which lie partly beyond the frontier), with their southern offshoots, form the natural northern boundary of India. The Himalayan range runs for 1,500 miles from N.W. to S.E., with a varying breadth of 150 to 200 miles, and attains a general height of 20,000 feet above the plain, culminating in the loftiest peaks yet measured on the globe—Mount Everest, 29,141 feet, Kunchinjunga, 28,146 feet, and Dhaulagiri, 26,826 feet, near the centre of the range; and Mount Godwin Austen, 28,250 feet, near its junction with the Hindu Kush. The line of perpetual snow is at about 16,000 feet. The Himalayas collect and store up water for the plains below. The slopes afford a representation of the tropical zone (especially on the southern slopes to the E.), the temperate zone (particularly to the S.W. of the range), and the arctic zone as the upward journey is taken from the plains. In the Himalayas are several sanatoria, including Murree, Simla, Mussoorie, Naini Tal, and Darjiling. Himalayan vegetation includes such varied species as the tree-fern, ilex, pine, oak, fir, deodar (cedar), rhododendron, barley, oats, millet, and many domestic vegetables. The fauna are as varied as the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear, elephant, monkey, and tiger, with eagles, partridges, and pheasants. Between the Himalayas and the plains to the S.E. is the great fever-haunted Tarai or Duar jungle, densely forest-covered and full of big game.

The Great Plain.—The northern river-plains, lying at the foot of the Himalayas, comprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from one another, four rivers take their rise in the Himalayas. The sources of two are on the north side—the Indus, which flows westward for 1,800 miles, and the Tsan-po or Brahmaputra, which flows eastward for nearly 1,500 miles. The other two, on the southern slope, are the Sutlej, which, after flowing W. and S.W. for 900 miles and collecting various other streams, joins the Indus, and the Ganges, which, during a journey S.E. and E. of about 1,550 miles, drains almost all the Bengal plain. The Brahmaputra, after flowing along the northern side as far as the eastern extremity of the Himalayas, turns sharply to the S., then to the W., and finally joins the Ganges, 75 miles from where their combined streams enter the Bay of Bengal. Thus the Himalayas supply India with the water gathered on both slopes. The Indus and Ganges, with their tributaries, are the source of an extensive system of irrigation by canals. The richest, most populous, and most historically famous part of India lies in the basins of these great rivers. Formerly the Ganges was the only great highway of Bengal; it is still the fertiliser and the water-carrier. But a close network of railways is increasingly used for transport. The richness of the Indo-Gangetic plain, with its ample rainfall, enables it to support a dense population, almost wholly agricultural. The density of the population rises in some districts to 900 per square mile. On the other hand, in Baluchistan there are only 6 persons to the square mile. The population has increased most in the densest areas, and pressure on the soil is severe in parts of Bihar and the United Provinces. In Northern India there are two harvests, *rabi* (spring) crops being reaped in March and April, *kharif* (autumn) crops in October to December. In the north we find wheat, pulse, maize, millet, barley, and tea; while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopards, hyænas, jackals, squirrels, elephants, deer, crocodiles, and snakes. Salt, mica, and coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety of palms. The Aravalli range, the primeval chain of India, divides Rajputana from the Central India States. To the N.W. of the peninsula lies the mountainous, barren, and thinly populated region of Baluchistan.

The Deccan. Just as the Himalayas on the N. and the Hindu Kush and Suleiman Mountains on the N.W. form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due E. from the head of the Gulf of Cambay, north of the Nerbudda River, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhyas. The Eastern and Western Ghauts all but complete this environing triangle of mountain ranges. In the extreme N.W., south of the Vindhyas, and parallel to them, but north of the Western Ghauts, we find the Nerbudda and the Tapti flowing westwards, their basins being sharply defined by the Satpura Mountains, which lie midway between them. As the Western Ghauts lie close to the coast, and afford no exit for rivers, there are no streams on the Malabar coast south of the Tapti; all the rivers flow eastwards, through defiles in the Eastern Ghauts, into the Bay of Bengal. The four chief rivers are the Mahanuddy, in the extreme N.E. (520 m.), the Godavery (900 m.), the Kistna (800 m.), and the Cauvery (472 m.), at intervals further to the south. The physical geography of Southern India has shaped its history: the S.W. coast, shut in by mountains,

is very primitive and moves slowly; the S.E., open and easy of access by sea and towards the interior, has made great progress. The mountain slopes of this region, especially those of the Western Ghauts, which rise to 8,000 feet in the Nilgiris, are still covered with the splendid vegetation of primeval forests. Teak, ebony, satinwood, sandalwood, palm, and bamboo abound. The jungles in the E. are very deadly. The tiger, bison, leopard, deer, and various smaller game afford sport. Snakes are found everywhere. In the valleys and on the higher plains many valuable crops are raised, chiefly rice, millet, cotton, oilseeds, coffee, tea, indigo, tobacco, and chinchona. The black cotton soil is very fertile. There is irrigation by dams, wells, tanks, and canals. The southern tableland has furnished considerable supplies of minerals. At present the minerals principally worked are coal, manganese ore, mica, monazite, and gold.

Burma.—Beyond the Bay of Bengal is the large province of Burma, watered by the Irrawaddy and its tributaries and by the Salween. The delta region is flat; further inland are hills and rolling downs; while the north is mountainous. Rice is the chief staple. Millet, cotton, sesamum, and tobacco are also grown. The forests, particularly of teak, make a considerable contribution to the exports. Petroleum is produced on a considerable scale, and jade, wolfram, and rubies are mined. The fauna include monkeys, jackals, tigers, elephants, bison, and deer.

Climate.—About half of India is within the tropics, but the greatest extremes of heat and cold are in the N.W. In the Himalayas the climate is moist and cold. In Northern India it is dry, and the winters are rather cold. In tropical Southern India the climate is more equable. Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea. India depends for its fertility upon the monsoon rains. The S.W. monsoon brings moisture from the ocean south of the Equator, and reaches the west coast early in June and the northern provinces late in June. The mountains arrest these currents and precipitate rainfall, which averages 60 inches in the sub-Himalayan region, 39 inches in the Indo-Gangetic plain, and 30 inches in the Deccan, but is small in Sind and Rajputana. Madras benefits by the N.E. monsoon in the autumn.

Population.—The fifth general census of India was taken on the 18th March, 1921. The final census returns gave a population of 318,942,480, as compared with 315,156,396 in 1911 (for details *see* p. 573), an increase in the ten years of about 1·2 per cent. The census total of 1921 is divisible into 247,003,293 (or over 77 per cent.) for British India, and 71,939,187 (or over 22 per cent.) for Indian States. India is not over-populated, for two-thirds of the people live on one-quarter of the area. In Burma, Assam, and elsewhere a much larger population might subsist. There were in 1921 33 towns with a population of over 100,000. Urban areas of over 5,000 people comprise only about 10 per cent. of the total population.

Caste.—Owing to the operation of the caste system India is broken up into a large number of mutually exclusive aggregates, the members of which are forbidden by an inexorable social law to marry outside the group to which they themselves belong. A caste may be defined as a collection of families, or groups of families, bearing a common name, which usually denotes or is associated with a specific occupation. The boundary of a caste may be said to be fixed by the rule restricting intermarriage, but its social status depends on the occupation of its members and their habits in respect of diet. The chief castes are:—Sheikh (33,388,000), Brahman (14,255,000), Chamar (11,225,000). Ahir (9,032,000), Rajput (8,773,000), Burmese (7,827,000), Jat (7,375,000), Maratha (6,566,000).

Religions.—The population by religions in 1921 includes 216,734,586 Hindus (68 per cent. of the total), 68,735,233 Muhammadans (21 per cent.), 11,571,268 Buddhists (3·6 per cent.), nearly all in Burma, leaving nearly 7 per cent. for all other religions, including 4,754,064 Christians (seven-twelfths of whom are in Madras, Travancore, and Cochin), 3,238,803 Sikhs, 1,178,596 Jains (a decline), 101,778 Parsis, and 9,774,611 described as Primitive or Animists, who believe in magic and strive to propitiate impersonal forces. The Muhammadans, who are increasing faster than the Hindus, are infected with the caste system and other Hindu characteristics. The number of Indian Christians has increased nearly threefold since 1872.

Occupations.—Over 72 per cent. of the population was in 1921 dependent on pasture and agriculture. Industrial occupations support 33,000,000 persons, of whom nearly one-fourth are dependent on textile industries. The most important of these are industries connected with cotton, which employ nearly 6,500,000 persons, the majority of whom depend on hand-weaving. The public services support over 4,825,000 persons.

Sex.—Marriage is almost universal owing to religious obligations. The movement against infant marriage and enforced widowhood is gaining ground. There were in 1921 over 26,834,000 widows in India. The males outnumbered the females in 1921 in the proportion of 1,000 to 945.

Languages.—India has 222 vernacular languages, of extraordinary variety. The languages spoken by 316,056,000 persons in 1921 are grouped in seven families. The principal languages are Western Hindi (spoken by 96,714,000 persons), Bengali (49,295,000), Telugu (23,601,000), Marathi (18,798,000), Tamil (18,780,000), Punjabi (16,231,000), Rajasthani (12,681,000), after which come Oriya, Kanarese, Gujarati, Burmese, and Malayalam. Hindustani, a dialect of Hindi, has become the literary language of Hindustan, and is the *lingua franca* of India. English is understood by many.

A Brief Sketch of Indian History.

ALEXANDER'S invasion of India (326 B.C.) is the first landmark of Indian history. A dim outline of earlier events can be traced from the evidences of race and language, from the traditions contained in ancient Indian literature, from accounts by later Greek and Chinese writers, and from coins and inscriptions. The oldest Indian books are supposed to date from about 1500 B.C.; they are written in Sanskrit, a language akin to Persian and to the principal European languages. The writers of these books were Aryans, a race which, as their traditions indicate, came into India from north of the Hindu Kush. They found in India, and conquered, a population of yellow-skinned type in the Himalayan districts, and a short, dark-skinned race, of low civilisation, in the rest of India. Of both these types there are still survivals. The religion and metaphysics of the Aryans are to be found in the *Vedas* and *Upanishads;* their epics, the *Mahabharata* and *Ramayana*, extol their mythical heroes; while in the *Code of Manu* we find a picture of Indian society, rather as the priestly caste of the day wished it to exist, than as it actually existed. The ascendancy of the Brahman priesthood over the soldier class of Kshetriyas is represented as fully established. The system of caste, originating in the attitude of the *Aryas* (kinsmen) to the dark and servile aborigines, generally prevails, and the people are organised in village communities. In the sixth century B.C. a new religion arose, called Buddhism. Its founder was Gautáma, a prince of the Kshetriya caste, who took the name of Buddha, the "awakened," and died about 487 B.C. His supposed remains were discovered near Peshawar in 1900. His tenets are contained in the *Tripitaka*, the Buddhist gospel. Buddhism was, in India itself, mainly a social reform, a revolt against the pride of caste and the exclusiveness of the Brahman priesthood. It prevailed widely from 250 B.C. to 350 A.D., but was never quite general, and existed side by side with Brahmanism, which it never succeeded in ousting. At length it lost ground, less through persecution than through a change in popular feeling; and before the twelfth century it had become practically extinct in India itself, though it still flourishes not only in Siam, China, and Japan, but also in Nepal, Burma, and Ceylon. Its decline in India was accompanied by a revival of Brahmanism, much modified.

According to Herodotus the twentieth satrapy of Persia at one time included part of the north-west of India. Alexander (326 B.C.) did not penetrate beyond the tributaries of the Indus, though he sailed down the river. At his death his Indian possessions fell to Seleucus, whose ambassador, Megasthenes (306 B.C.), has left an account of the country under the rule of Chandragupta, the Greek Sandracottus. Me-

gasthenes describes the democratic village communities of the Punjab, speaks of the people as brave and truthful and adverse to litigation, and notes the absence of slavery. Asoka (272–231 B.C.), the grandson of Chandragupta, whose edicts on stone pillars throw light upon this period, was a convert to Buddhism, which became the State religion. Our last contributors to a knowledge of India before the period of continuous authentic history are the Buddhist pilgrims from China who visited the country between 399 and 695 A.D.

The influence of the Greek conquest was swept away by the Scythians, who poured in many waves, between about 165 B.C. and 320 A.D., over Northern India. Their inroads left a lasting influence on the character of the population, and profoundly modified the religious beliefs and domestic institutions of the Hindus. The sixth century was a period of confusion. The emperor Harsha (606–648), after many years of fighting, made himself master of Northern India, and ended his reign in piety and peace. From about 650 to 950 anarchy prevailed.

The Arab conquest of Persia, towards the middle of the seventh century, brought the successors of Muhammad to the Indus, and in N.W. India they made some temporary acquisitions; but three centuries were to pass before the foundations of a durable Muhammadan empire were laid. It was in 999 that Mahmud of Ghazni (in Afghanistan) began a long series of incursions into India, no fewer than fifteen expeditions taking place between 999 and 1027, one of which carried him beyond the Jumna, while another ended in the capture of Somnath, in Kathiawar. The succeeding dynasties of Afghan kings held power in India for 500 years; but their advance was gradual, for it was not till 1206 that Delhi was taken and the greater part of Hindustan annexed by Kutb-ud-din, whose memory is perpetuated by the Kutb Minar, near Delhi. The first Muhammadan invasion of the Deccan took place in 1294.

THE MOGUL EMPIRE.—The Muhammadan Mongols, or Moguls, after overrunning Central and Western Asia, arrived in 1219, under Genghis Khan, on the frontiers of India, but did not cross the Indus. During the reign of the last monarch of the Taghlak line, the famous Tamerlane (or Timur) burst into India at the head of a mighty host, captured and sacked Delhi in 1398, and laid waste a great part of Hindustan. A period of weak dynasties followed; frequent invasions from without, and general misrule and anarchy within, paved the way for larger conquests by the Mogul Emperors. In 1526 *Babar*, a direct descendant of Timur, overthrew the last of the Afghan kings at Panipat, and founded the MOGUL EMPIRE, which at his death extended from the Oxus river in Central Asia to the borders of the Gangetic delta. His son, *Humayun* (1530–56), lost the whole of the territory conquered by Babar, but recovered a portion of it (including Delhi) shortly before his death. His victor was Sher Shah Sur, who reigned from 1540–1545. *Akbar the Great*, Humayun's son (1556–1605), spent a long reign in firmly establishing the empire; at his death his dominions extended over Kabul, Kandahar, and all India north of the Nerbudda. Moreover, of the Muhammadan kingdoms of the Deccan, Ahmednagar, Berar and Bidar were absorbed, and Bijapur and Golconda forced to pay tribute. Akbar followed up his conquests by important financial reforms. He was tolerant in religion, and just to all classes of his subjects. Among the great men of his time were the Hindu, Todar Mall, his able finance minister; Abul Fazl, the historian of his reign; and Faiz, the poet. *Jahangir* (1605–27) received in 1616 Sir Thomas Roe, the ambassador of James I. Under *Shah Jahan* (1627–1658) the Mogul Empire reached the zenith of its glory. Many stately buildings, including the Taj Mahal at Agra, testify to his magnificence and taste. The close of Shah Jahan's reign was embittered by the rivalries of his four sons. *Aurangzeb* (1658–1707) defeated and killed his brothers and kept his father a prisoner till death (1666). Aurangzeb had great ability and courage, but religious intolerance, distrust and dissimulation characterised his chequered career. His reign, in some respects splendid, ended in failure. He brought the Mogul Empire to its greatest extent by conquering and incorporating all India as far south as Tanjore. But from this time the decline of the empire began. Four sons disputed the right of succession, and *Bahadur Shah* (1707–12) secured the crown. After four short-lived emperors *Muhammad Shah* (1719–48), grandson of Bahadur, came to the throne. His viceroys became rebellious, and so contributed to the success of the Mahrattas, who subdued the Deccan. About 1724 part of the Deccan became practically independent under Nizam-ul-Mulk (ancestor of the present Nizam). In 1738, to avenge an alleged insult, Nadir Shah of Persia invaded India, captured Delhi, gave orders for a general slaughter of the inhabitants, and carried off enormous plunder. All the country west of the Indus was lost to the empire. On the death of Muhammad, the phantom rulers, *Ahmad Shah* (1748–1754) and *Alamgir II.* (1754–1759), occupied the throne, and were succeeded by *Shah Alam* (1759–1806), who came to terms with the British.

THE MAHRATTAS.—As the Moguls declined, the power of the Mahrattas increased. They were Hindus, and their country was in the Western Ghats, to the east of Bombay. The founder of their power was *Sivaji* (1627–1680), a chieftain of the family of Bhonsla, who became famous by his raids in the Deccan, and aimed at founding a Hindu kingdom. *Balaji Vishvanath* (1712–1720) Peishwa, or Prime Minister, succeeded in making that office of paramount importance and hereditary in his family, Sivaji's descendants thenceforth holding a merely nominal position. Under the Peishwas, aided by Scindia, Holkar, and the Gaekwar, who formed independent States about this time, the Mahrattas rapidly extended their territory and influence, conquering Gujarat, Malwa, Berar, and Orissa. Although they were severely defeated at Panipat in 1761 by Ahmad Shah, the Afghan invader, they remained for some time the first power in India, and were the most dangerous opponents of the English. Too often their rule degenerated into a system of organised plunder. With the Pindaris, a horde of freebooters who followed in their train, they became a scourge to the country. It was not until both Pindaris and Mahrattas were finally overthrown in 1818 that India enjoyed the blessings of internal peace. The Mahratta empire, containing within itself the seeds of disintegration, was fated to bend before the superior sway of Europeans, who had gradually extended their power in India.

THE SIKHS.—The Punjab lay beyond the reach of the Mahrattas. There the decay of the Mogul

empire gave the opportunity, not to a nation, but to a religious sect, united by military discipline, to establish territorial dominion. The founder of the Sikh religion was *Nanak Shah*, a Hindu reformer, born near Lahore in 1469. He preached the one God, purity of life, and abolition of caste. He had ten successors, named *gurus* or apostles, ending with *Govind Singh* (1708). The sect, though cruelly persecuted, survived, and gradually adopted a political organisation. It became a power under *Ranjit Singh* (1780–1839), who, revolting against the Afghan Amir, by whom he had been appointed Governor of Lahore, founded the kingdom of the Punjab. The powerful army he had organised brought on the collision with the British, and after two wars the Sikh kingdom was annexed, and became the province of the Punjab (1849).

EUROPEAN ADVENTURE.—From time immemorial the lucrative trade of Europe with India and the farther East has enormously enriched in turn each nation that has held it. In the 15th century it was mainly possessed by the Venetians on the European side, and by the Arabs on the Eastern side. The chief trading centres of the Arabs were Calicut, Ormuz, Aden, and Malacca. Seeing the large profits to be derived from this trade, the rising nations of Europe in the 15th century sought to obtain a share. Hence the ardour of the navigators who set out to discover an ocean route to India. The sea route round the Cape of Good Hope was discovered by Vasco da Gama, who anchored before Calicut in May, 1498. From that time until they lost their naval supremacy, a century later, the *Portuguese* enjoyed practically a monopoly of Indian trade. The first Portuguese viceroy, Francis of Almeida (1505–1509), established numerous factories and fortresses; while his successor, Alfonso de Albuquerque, captured Goa (1510), and extended the Portuguese dominion, notably on the Malabar coast. This dominion for 60 years from 1542 was tantamount to an entire regulation of the Asiatic coast trade with Europe from the Persian Gulf to Japan. It was stained by great cruelty. Up to the union of the crowns of Spain and Portugal in 1580 under Philip II., the Portuguese brought Indian products to Lisbon, whence the Dutch carried them to other parts of Europe. But when Philip II., on account of the Dutch revolt, shut Lisbon against them, the *Dutch* were driven to trade directly with the East. In 1602, by amalgamating existing trading companies, they formed "The Dutch East India Company," and the principal Portuguese settlements in the East were gradually captured. By 1661 the Portuguese held only those remnants of their Indian possessions which they still hold. The Dutch, who had some small trading factories, were in turn forced by the British to relax their hold on India. *French* and *Danish* East India Companies were established in 1601 and 1616 respectively. The latter achieved little, but, as will be seen directly, the French had a brief but brilliant period of influence in the middle of the 18th century.

ENGLISH DOMINION.—At the close of the 16th century the English became eager to share in the profits of Indian commerce. After some smaller ventures, the London East India Company was incorporated by Queen Elizabeth by royal charter on 31st December, 1600. There were 217 subscribers of the capital of £68,373, and the official title was "The Governor and Company of Merchants of London trading to the East Indies." A second charter in 1609 made the Company's privileges perpetual. The Portuguese resisted the new competitors, who nevertheless obtained a permanent footing at Surat after several stubborn engagements off Swally in 1612. In 1615 the British ambassador, Sir Thomas Roe, supported by the Emperor Jahangir, greatly improved the position of the Company. In 1639 the English acquired a strip of land on the east coast, built a factory there, fortified it, and named it Fort St. George; in 1653 this settlement of Madras became a Presidency. In Charles I.'s reign rival enterprises led to confusion and piratical excesses, but in 1657 co-operation and discipline were secured by the charter granted by Cromwell to a single company comprising the whole body of merchants. The charter was renewed by Charles II., in whose reign the Company enjoyed great prosperity. When, in 1662, Charles II. married Katharine of Braganza, a part of her dowry from Portugal was the Island of Bombay; in 1668 he transferred all his rights over it to the Company for an annual payment of £10. In 1687 Bombay replaced Surat as the seat of the western Presidency. Although in 1633 the Company had obtained certain treaty rights in Bengal from the Mogul, and in 1651 a factory had been established at Hooghly, yet in that part of India they held no territory as in Bombay and Madras. In 1688 the Muhammadan rulers forced them to abandon their settlement, but being invited to return, they laid, in 1690, amid swamp and jungle, the foundations of the Presidency of Fort William, which was destined to develop into the city of Calcutta. In 1693 a new charter was granted to the company. In 1698 a charter was granted to a rival company called "The English East India Company," to distinguish it from the old "London Company." After a brief period of conflict and trade losses, the rival companies came to terms in 1702; and in 1708 they were amalgamated under the title of "The United Company of Merchants of England trading to the East Indies."

When Great Britain engaged in war with France in 1744, the rival Companies of England and France came into collision, with the result that Madras was captured in 1746. Had Dupleix been well supported from home, he might have founded a French empire in India. The first reverses of the English were retrieved by Clive, whose gallant defence of Arcot (1751) was followed up by a series of brilliant movements, culminating in the utter defeat of the French army by Coote at Wandiwash in 1760, and in the capture of Pondicherry in 1761, which completed the ruin of the French Company. Since then the territory retained by the French in India has been insignificant; and in it they are forbidden by treaty to hold any considerable military force. The tragedy of the Black Hole of Calcutta (1756) summoned Clive from Madras, and his victory at Plassey over the Nawab of Bengal in 1757 made British influence predominant.

Clive was appointed first Governor of Bengal in 1758. In 1760 he returned home, and in 1763 the English were again embroiled in Bengal, but completely defeated their opponents at Buxar (1764). In 1765 Clive (now Lord Clive) returned to Bengal as Governor, and before he left finally in 1767 he succeeded in reforming the services, in which great abuses existed. Owing

to Clive's efforts, the Company in 1765 received from the Emperor at Delhi the *diwani* or fiscal administration of Bengal, Bihar and Orissa, with the Northern Circars (Madras), and 25,000,000 people came under their government. Thus were laid the foundations of England's territorial dominion in India.

After an interval of misrule *Warren Hastings* (1772-85) was appointed Governor of Bengal, and in 1774 Governor-General, on the creation of that office under the Regulating Act of 1773. He vigorously reformed the revenue system and judicial procedure. Hastings was the first great administrative organiser of the British possessions. He greatly increased the power and territory of the Company, notwithstanding the opposition of his Council. Mysore in 1760 had been seized by Hyder Ali, a Mussulman adventurer, and a powerful and inveterate enemy of the English. By repelling Hyder Ali's memorable invasion of the Carnatic (1780), and defeating the triple alliance of the Nizam, the Mahrattas, and Hyder Ali, Hastings probably saved British India. On his return to England he was impeached on a number of charges, but acquitted.

The first administration of *Lord Cornwallis* (1786-93) was marked by a thorough reform of the Company's Civil Service, by the introduction of a permanent settlement of the land revenue, by a reform of the judicial system, and by the third Mysore War, in which he defeated Tippoo, the son and successor of Hyder Ali. The rule of *Sir John Shore* (1793-98) was uneventful.

The administration of the *Marquess Wellesley* (1798-1805) was distinguished by many important events. Tippoo, as hostile to the English as Hyder, was in 1798 in secret correspondence with the French, who were then dominant in the military councils of the Nizam and of Scindia, were established in Mauritius, and under Napoleon, then engaged in his Egyptian campaign, were aiming at a great Eastern Empire. Lord Wellesley saw the necessity of crushing this dangerous Power, and the Fourth Mysore War ended in the capture of Seringapatam (1799), the death of Tippoo, and the conquest and restoration of Mysore to a representative of the family of Hindu Rajas whom Hyder Ali had dethroned. The Treaty of Bassein (1802) broke up the Mahratta confederacy, but led to the Second and Third Mahratta Wars, which curtailed the power of Scindia and Holkar, and increased the strength and extent of the Company's dominions. Lastly, Lord Wellesley developed, if he did not initiate, a system of subsidiary alliances with Native States, which aimed at making the British the one paramount Power, while giving greater security than the balance of power attempted by his predecessors. Wellesley doubled the territories of the Company, and transformed a mercantile body into a political power with a preponderating influence throughout India. During the brief second administration of *Lord Cornwallis* (1805), and that of *Sir G. Barlow* (1805-7), Wellesley's policy of subsidiary alliances was reversed.

Lord Minto (1807-13) established peaceful relations with the Punjab, Afghanistan, and Persia, through the mediation of Metcalfe, Elphinstone, and Malcolm respectively. On the renewal of the Company's charter in 1813 the monopoly of Indian trade was abolished.

Under the *Marquess of Hastings* (1824-23) a severe struggle with Nepaul ended with the Treaty of Sagouli (1816), which still regulates India's relations with that State. The annexation in 1818 of the territory of the Mahratta Peishwa enlarged Bombay Presidency to its present dimensions. Lord Hastings in the same year crushed the marauding Pindaris of Central India, who had devastated the country in all directions. Reviving Lord Wellesley's policy of alliances, he settled on their existing basis the relations of the Supreme Power with the feudatory States of Rajputana and Central India. He encouraged education. *Lord Amherst* (1823-8) succeeded Lord Hastings. Encroachments on British districts by the King of Ava and his insolent refusal of all redress led to the first Burmese War, which cost 20,000 lives and nearly £14,000,000, but gave to India the provinces of Aracan and Tenasserim, and, practically, Assam.

While *Lord William Bentinck* was Governor-General (1828-35), steam communication with India was introduced, suttee (or widow-burning) was abolished, educated natives were admitted more freely into the service of the Company, and various reforms were passed affecting education, the liberty of the Press, finance, and justice. The new charter of the East India Company in 1833 abolished the remaining monopoly of Chinese trade, introduced reforms in the constitution of the Indian Government, made the North-West Provinces a separate administration, and abolished the restrictions on the residence of British subjects in India. The resolution of *Lord Auckland* (1835-42) to support Shah Shuja against Dost Muhammad brought on the first Afghan War (1839-42), and the serious disaster attendant on the fatal retreat from Cabul. The administration of *Lord Ellenborough* (1842-44) saw the conquest of Sind by Sir Charles Napier and its annexation (1843). *Lord Hardinge* (1844-48) conducted in person the first Sikh War, and fought a series of severely contested battles, ending with Sobraon (1846).

Lord Dalhousie's administration (1848-56) was fruitful in events. The Second Sikh War resulted, after severe fighting, in the submission of the Sikhs and the annexation of the Punjab (1849). The second Burmese War (1852), deprived the King of Burma of Pegu. Lord Dalhousie promoted the introduction of railways and the telegraph. He established cheap postage, promoted steam navigation with England *viâ* the Red Sea, and opened the Ganges Canal. His annexation policy was much criticised at home. It proceeded on the principle that British being preferable to native rule, gross misrule or a break in the natural succession justified, in the interest of the subject populations, the transfer of a native State to the British Government. In 1849 this "doctrine of lapse" was applied to Satara, and in 1853 Jhansi similarly became British territory; while on the death of the last of the Mahratta Princes of Nagpur, his territory was annexed, and became the Central Provinces in 1853. In 1856, after repeated warnings to the tyrannical ruler of Oudh, that kingdom was also annexed, without bloodshed or fighting.

Earl Canning (1857-62), who succeeded Lord Dalhousie, left England pledged to pursue a policy of peace, but he was destined to face the greatest crisis that has threatened British rule in India. A mutiny of sepoys broke out on the 10th May, 1857, at Meevut, and spread through the whole Bengal Army. Delhi was for some months in the possession of the rebels, and many chiefs joined the revolt. The siege of Delhi, the

massacre at Cawnpore, the relief of Lucknow, and the Central India campaign stand out among the stirring events of that momentous time. Although the control of Indian affairs was vested in the Cabinet through the Board of Control, the great mutiny was laid to the charge of the East India Company, whose eventful annals were brought to a close by the transfer of the entire administration of India to the Crown.

INDIA UNDER THE CROWN.—The "Act for the Better Government of India" established the authority of the Crown; and a Proclamation to the Princes, Chiefs, and People of India, dated the 1st Nov., 1858, announced the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honourable East India Company." Legislative Councils were established. *Lord Canning* was succeeded in 1862 by *Lord Elgin*, who, however, died in Nov., 1863.

Sir John (Lord) Lawrence (1861-69) reformed the finances, which had been seriously burdened by the heavy military expenditure necessitated by the Mutiny. His administration was marked by the Bhutan War (1864) and by the terrible Orissa Famine of 1866. He encouraged irrigation.

Lord Mayo (1869-72) effected many administrative reforms, instituted State railways, promoted the construction of roads and canals, and inaugurated the system of provincial finance, which has since been extended.

During the tenure of office of *Lord Northbrook* (1872-76) the late King Edward VII., then Prince of Wales, visited India. The Viceroy devoted attention to finance and to famine relief. In 1875 the reigning Gaekwar of Baroda was deposed for misrule and disloyalty.

Lord Lytton's administration (1876-80) was made eventful by a terrible famine in Southern India and by the Second Afghan War. In 1877 the Queen assumed the title of EMPRESS OF INDIA.

The peaceful term of the *Marquess of Ripon* (1880-84) was marked by the extension of local self-government, and by fiscal, judicial, educational, and other reforms.

His successor was the *Marquess of Dufferin* (1884-88). In 1885-6 occurred the Third Burmese War, by which Upper Burma with the Shan States was annexed. The N.W. frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased. The first Indian National Congress met in 1885.

The *Marquess of Lansdowne* (1888-94) continued his predecessor's policy of strengthening the army and consolidating British influence on the frontier. The Indo-Afghan boundary was defined, and a serious outbreak in Manipur was suppressed. He took the first step in currency reform by closing the Indian mints to the free coinage of silver. He reconstituted the Legislative Councils in 1892 by introducing a more popular element, and conferring a limited right of interpellation and criticism in financial matters.

The viceroyalty of *Lord Elgin* (1894-99) was full of events. In 1895 an outbreak in Chitral made necessary a large military expedition to relieve the garrison. Plague broke out in 1896, and has raged more or less severely ever since. In 1896-7 an area of 307,000 sq. ms., with a population of 70 millions, was visited by a grievous famine. In 1897 the border tribes from Chitral to Baluchistan rose against the British garrisons. In the Tirah campaign that followed over 40,000 troops were employed. Several boundaries were settled under Lord Elgin, notably those with Russia on the Pamirs and with France on the Mekong. The frontiers of Afghanistan, Persia, and China were also defined. The general Customs tariff, abolished in 1882, was reimposed in 1894.

Lord Curzon (1899-1904 and 1904-5) succeeded Lord Elgin. In 1899 the pound sterling was made legal tender in India concurrently with the rupee, at the exchange of Rs. 15 to £1. In 1899-1900 occurred one of the worst famines on record, the tracts affected covering 475,000 sq. ms. with a population of 60 millions. Lord Curzon's term of office was a period of reform and reconstruction. He appointed Commissions of Inquiry on irrigation, railways, universities, agricultural banks, excise, and police, all of which suggested important reforms. He instituted agricultural banks and departments, and initiated legislation to free the cultivators from the money-lenders. The famine codes were amended. A new province, under the direct control of the Governor-General in Council, was created, called the North-West Frontier Province (1901). The Aden and the Perso-Afghan boundaries were delimited. An Imperial Cadet Corps of native princes and nobles was inaugurated. Educational policy was reviewed and reforms introduced. A much-needed reform of the police was undertaken. Lord Curzon also secured a perpetual lease of Berar from the Nizam. In 1904 a mission with a military escort proceeded to Tibet, and secured a favourable treaty. During Lord Curzon's absence in England for a few months in 1904 *Lord Ampthill* occupied the post of Viceroy. *Lord Curzon* was reappointed in Dec., 1904. In 1905 the treaty with Afghanistan was renewed. The Viceroy reduced the dimensions of Bengal, and constituted a new province, called Eastern Bengal and Assam, by combining parts of Bengal with Assam. He carried out great reforms in the Army in conjunction with Lord Kitchener (appointed Commander-in-Chief in 1902), but, differing from certain proposals made by the latter, and finding that he lacked the support of the Home Government, he resigned (Aug., 1905).

Lord Minto succeeded in Nov., 1905. The Prince of Wales (now H.M. King George) made a tour in India during the winter of 1905-6. For some years after 1905 there was agitation among Bengalis owing to the partition of Bengal, and a Seditious Meetings Act was passed in Nov., 1907. In his Budget speech in 1907 the Secretary of State, Viscount Morley, foreshadowed important reforms in Indian administration, designed to associate the people more closely with the Government. He nominated two Indian members to his own Council, and an Indian member to the Governor-General's Council. He appointed Commissions to inquire into railways, into the possibilities of financial and administrative decentralisation, and into the conditions of factory labour, and action was taken on their reports. In 1908 the unrest in Bengal assumed an anarchical character. To mark the fiftieth anniversary of the transfer of India to the Crown a royal proclamation was issued in Nov., 1908, promising extended self-government. Owing to the continued unrest in 1909 and 1910, a Press Act, to control printing presses, was passed.

Lord Hardinge succeeded in Nov., 1910. The Indian Legislative Council in June, 1911, prohibited indentured emigration from India to Natal after 1 July, 1911, and a new Seditious

Meetings Act was passed. A great Durbar was held at Delhi on 12 December, 1911, by H.M. King George, to announce his Coronation. On this occasion the King-Emperor also made announcements of new and far-reaching steps in Indian policy, viz., the transfer of the seat of Government from Calcutta to Delhi, and the creation of a Governorship for the presidency of Bengal, of a Lieut.-Governorship for Bihar, Chota-Nagpur, and Orissa, and of a Chief Commissionership for Assam. Delhi was chosen as the capital on geographical, historical, and political grounds. The provincial changes involved a partial rescission of the partition of Bengal and the abolition of the province of Eastern Bengal and Assam, created in 1905. Bengal as reconstituted is a compact Bengali-speaking province, placed under a Governor in Council. A new province, Bihar and Orissa, was formed, including Chota-Nagpur and the Sambalpur district. Assam again became a separate province, under a Chief Commissioner. The reconstituted provinces came into existence on 1 April, 1912. In pursuance of recommendations by the Decentralisation Commission, enhanced powers in respect of appointments and expenditure were granted to local governments having a quasi-permanent provincial settlement. Moreover, greater permanency was arranged for in financial settlements with the provinces, the control of the Government of India being relaxed. In Dec., 1912, the Viceroy took formal possession of the new headquarters at Delhi. The State entry was marred by an attempt on the life of the Viceroy. The outbreak of *The Great War* in August, 1914, was the signal for an outburst of loyalty and devotion to the King-Emperor on the part of the princes and peoples of India. Practically all the ruling chiefs placed their military forces and the resources of their states at the disposal of the Government.

Following on the outbreak of war serious disturbances were started in the Punjab and elsewhere by emigrants returning from Canada and the United States imbued with revolutionary ideas. Order was restored as a result of measures taken under the Defence of India Act, which was passed in March, 1915. Several tribal risings on the North-West Frontier were promptly and rigorously suppressed. Lord Hardinge's term of office as Viceroy was extended from November, 1915, to March, 1916. The Viceroy announced in March, 1916, that it had been decided eventually to abolish the system of indentured emigration from India. Lord Hardinge put forward proposals for post-war constitutional reforms.

Lord Chelmsford succeeded in April, 1916. The year 1917 was marked by certain symptoms of unrest and the development of an agitation for constitutional changes towards self-government, or, in its extreme form, "Home Rule for India."

The Public Services Commission, appointed during Lord Hardinge's administration, reported. Three leading Indians attended the Imperial War Cabinet. Action was taken against the Mahsuds and Mohmands on the North-West Frontier. The Lahore and Burma conspiracy trials were concluded and the leaders sentenced.

Towards the end of 1917 the Secretary of State visited India in connexion with a development of constitutional progress. The year 1918 was marked by some symptoms of unrest; the Rowlatt Committee, appointed in 1917, reported, and revealed evidence of the association of the Bengal seditionists with German plots; anti-Moslem riots broke out in Berar, and Muhammadans organised agitation leading to disturbances in Madras and Calcutta. The operations against the Marris were closed. The Bombay Government took the first steps towards obligatory primary education; a policy of more complete local self-government was decided on by the Government of India. The Home Rule League continued its activities. The influenza epidemic spread to India, and it is estimated that over 12 million deaths in British India and Indian States resulted. The Industrial Commission, appointed in 1916, issued a report. In 1919 a bill was introduced into Parliament embodying the proposals of the "Montagu-Chelmsford Joint Report," and eventually passed. During the year considerable distress occurred in consequence of the partial failure of the 1918 autumn crops throughout Northern India and the Peninsula, and relief measures were undertaken. Serious disturbances in the Punjab and Delhi, resulting in many deaths, followed on a "passive resistance" movement, inaugurated by Mr. Ghandi against the "Rowlatt" Bills, introduced by the Government of India, on the recommendation of the "Rowlatt" Committee, for renewing some of the powers which the Government had provided themselves during the War to deal with sedition. The movement spread to Bombay, and the local government was forced to deport Mr. Horniman, the Editor of the *Bombay Chronicle*. The murder of the Amir and the subsequent events in Afghanistan were followed by an inroad of Afghans and some frontier tribes into India, necessitating prompt military action by the Government of India. The "Sadler" Commission on the Calcutta University reported during the year, and made drastic proposals for recasting the Indian secondary and university educational system. Noteworthy features in the progress of India during the year were the appointment of an Indian, Lord Sinha, as Under-Secretary of State for India in the Home Government, and the representation of India at the Peace Conference by two Indians, H.H. the Maharajah of Bikanir and Lord Sinha. The policy underlying the Government of India Act, 1919, mainly based on the recommendations of the "Montagu-Chelmsford" Report, viz., the increasing association of Indians in every branch of the Administration, with a view to the progressive realisation of responsible government, was carried forward a further stage in 1920 by the Home Parliament, which, by rules, laid down the details of the constitution of the new Central and Provincial Governments (*see* pp. 586 and 589). One section of the India Home Rule for India party, dissatisfied with the Act, threatened non-co-operation with the Government in the future working of the reforms, and with the assistance of some Muhammadans, Mr. Gandhi, a Hindu, commenced a movement to carry out the threat, but the support of the "Moderate" wing of the party, including that of Mrs. Besant, was given to the Government. A prominent and distinguished Indian, Lord Sinha, was designated as the first Governor of Bihar and Orissa. The Amir's representatives visited India and discussed with officers of the Indian Government the possibility of a resumption of more friendly relations. Bolshevik propaganda created an unhealthy political atmosphere in some quarters.

Fighting with the Mahsuds on the North-West frontier continued throughout the year, in consequence of which the Viceroy announced Government's intention to occupy Central Waziristan, and to continue the railway from Jamrud towards the Khyber. Unrest, due in some measure to labour trouble, evidenced by an unprecedented number of strikes, and partly to unsatisfied political aspirations, was prevalent during the year. Government, in pursuance of its policy of making India commercially more self-supporting, instituted several inquiries into various trades and industries, and appointed a committee to inquire as to whether the adoption of a system of preferential tariffs would be beneficial. Further steps towards employing more largely Indians in the various Government services and for the improvement of conditions of service and pay of both European and Indian members of the same were taken. Several large works programmes were sanctioned. The recommendation of the Exchange and Currency Committee for the linking of the rupee to gold and the adoption of an exchange rate equivalent to one-tenth of the gold contents of the sovereign, *i.e.*, an exchange rate of Rs. 10 to the £, was adopted. With a view to increasing banking facilities steps were taken to establish a large Imperial Bank. A *High Commissioner for India* in London, with a separate establishment, responsible to the Government of India for certain agency work, previously performed by the India Office, was appointed. The Army in India and the Medical Services Committees respectively reported. The Army in India Committee attempted to determine the part to be played by the Army in India in a scheme of Imperial Defence and to analyse the steps which must be taken to make the Army, both in its administration and its personnel, more efficient and more attractive to the right type of soldiers.

In January, 1921, the new Indian Legislature, Provincial Councils, and the Chamber of Princes, were inaugurated by the Duke of Connaught.

Lord Reading succeeded in April, 1921. The battle between constitutionalism and revolution continued. Unrest, riots, agrarian disturbances, strikes, and movements designed to embarrass the Government were prevalent. A conflict between Sikhs at Nankana resulted in many deaths. Mr. Gandhi, the Ali brothers, and their associates, continued to advocate non-co-operation with the Government and boycott of the reforms. The utterances of the Ali brothers forced Government to order their arrests. The Moplahs, Muhammadan fanatics of Malabar, resisted the ordinary processes of law, and a widespread outbreak of violence ensued, directed against Government, civil officers, and Hindus, forced the authorities to take strong military measures for its suppression. Frontier disturbances and fighting continued. Failure of the crops in some parts necessitated the opening of relief works. The deficit in the Budget, due mainly to war commitments, compelled Government to impose additional taxation. Special missions were sent to Afghanistan and Tibet. The Railway Committee reported and recommended drastic changes, including the termination of the system of management of railways by Government companies domiciled in England. The Jails Committee reported, and Government announced its intention to abolish the Andamans penal settlement. Large development and irrigation schemes were sanctioned.

In November the Prince of Wales visited India. In 1922 the battle between constitutional and unconstitutional agitation proceeded. The Government avoided any excessive severity *vis-à-vis* the movement, but arrested Mr. Gandhi, who was sentenced to six years' imprisonment. Attempts were made to secure greater powers for the Indian legislature, for the immediate abolition of the distinction between votable and non-votable items in the Budget, and for the submission of the whole Budget to the vote of the Assembly. A Committee was appointed with a view to making retrenchments and securing economy in the national expenditure. The Budget showed a deficit necessitating additional taxation. The Government found it necessary to give to Ruling Princes some measure of protection against attacks in the Press, and the Indian States (Protection against disaffection) Bill was brought forward in the Legislature, but leave to introduce it was refused. Lord Reading decided to make use of the special powers vested in the Governor-General under the Government of India Act, and, as the passage of the Bill was, in his judgment, essential for the interests of British India, certified it under section 67B of the Government of India Act.

The Fiscal Commission reported and advised the adoption of a policy of protection.

The Hon. V. Srinivasa Sastri visited the Dominions, as a representative of the Government of India, to discuss with the leaders of political thought the disabilities of Indians in the self-governing Dominions. In external affairs the subject uppermost in the minds of the Indian people was the revision of the Treaty of Sèvres. There was peace on the tribal frontier except in Waziristan. Some of the Wazir and Mahsud tribal sections entered into satisfactory engagements. The Government of India engaged in attempts to arrive at a better understanding with the Union of South Africa regarding the recommendations of the Asiatic Inquiry Commission. The machinery of the Legislature was extended by the appointment of advisory Standing Committees for the various departments. Twenty-three Acts and Regulations supplementing the criminal law were repealed. The Assembly agreed to the proposal to devote 150 crores of rupees (£100,000,000) to the rehabilitation of railways during the next five years. A Central Advisory Board for Railways was established.

In 1923 Burma was constituted a Governor's Province. A Royal Commission, with Lord Lee of Fareham as Chairman, was appointed to consider and report on the organisation and general conditions of the Superior Civil Services of India. The "Inchcape" Retrenchment Committee, appointed in 1922, reported and recommended a total reduction in the Budget of Rs. 19¼ crores (£12,833,000 at 15 rupees to the £), the largest cuts being in military expenditure (Rs. 10½ crores = £7,000,000), railways (Rs. 4½ crores = £3,000,000), posts and telegraphs (Rs. 137 lakhs = £913,000). The Government proposed to raise the salt tax. Its proposals were defeated in the Assembly, whereupon Lord Reading certified the Bill under the provisions of section 67B of the Government of India Act as essential for the interests of British India. The Government accepted the principle of

Protection but declared that it should be applied with discrimination; hitherto the Indian tariff had been a revenue tariff. A trade Convention was concluded with Afghanistan. A Bill was passed providing for the removal of existing racial distinctions in the criminal procedure applicable to Indians and non-Indians. The new frontier policy was further developed by the completion of various roads for mechanical transport within Waziristan and along the Derajat border: Jandola and Razmak were held by regular troops pending the completion of this road programme. The question of the status of Indians in Kenya excited much interest and controversy. After full consideration His Majesty's Government decided on the adoption of a communal system of representation. Whilst on three points decisions favourable to Indians were pronounced, the policy of the Home Government on others conflicted with the views of the Government of India and the aspirations of Indians, and demands were made in the Indian Legislature for retaliatory measures. The Secretary of State (Viscount Peel), the Maharajah of Alwar and Sir Tej Bahadur Sapru represented India at the Imperial Conference, at which a Resolution was passed recommending each Dominion of the Empire concerned to set up a Commission to consider, in conjunction with a Commission of equal number from India, how far the principle laid down by the Imperial Conference of 1921 that Indians lawfully resident overseas should not suffer derogation of rights of citizenship, had been given effect to and to what extent it could be further applied. Demands for the expansion of the Indian Constitution were made in the Indian Legislature, but the Secretary of State declined to submit the question to Parliament, on the ground that the experience of the working of the new Constitution had not yet been adequately tested. In 1923-24 the elections for the Legislative Assembly and the Provincial Councils were held. The total electorate was 990,979 for the Legislative Assembly and 5,810,345 for eight Provincial Councils. The Swarajists obtained a majority in the Central Provinces and increased their numbers in nearly all the other Provincial Councils and in the Legislative Assembly. When the new Councils met Government proposals were blocked and the Governor-General was again forced to "certify" the Budget after it had been rejected in the Legislative Assembly. In the Central Provinces and Bengal the Governors were compelled, in consequence of the opposition, to take over all the "transferred" subjects from the Indian Ministers. Conspiracies and methods of violence to further political aims were revived during the year, and the Bengal Government was given special powers to deal with violent crime. The Punjab was greatly disturbed by the Sikh invasion of the Nabha State. The Royal Commission on the Superior Civil Services, appointed in 1923, reported and recommended financial improvements for the Indian Civil and other Services. Further Indianisation of the Services was recommended, viz., 60 per cent. of Indians in the Indian Civil Service as compared with 39 per cent., in the Police 50 per cent., and in the Forests Services 75 per cent. During the year a Legislative Council was set up in Coorg.

Early in 1925, the Swarajist leader, Mr. Das, repudiated the policy of violence, but asked in return for the cessation of "repressive" measures. A committee was appointed to enquire into the difficulties arising from or inherent in the working of the Constitution, and recommended many alterations, particularly that the control of the Secretary of State should be relaxed in purely Indian matters. The terms of reference did not, however, extend to the larger question of a complete revision of the Constitution, contemplated in Montagu-Chelmsford scheme of 1918. The Viceroy came home to confer with the Home Government, and on his return to India announced the decision that the moment for such an enquiry had not arrived. The political situation was somewhat confused by the sudden death of the Swarajist leader, Mr. Das, who was succeeded by Mr. J. M. Sen Gupta Das. The first railway electrification scheme in India was inaugurated in Bombay, and in Madras the Mettur-Cauvery irrigation project, by which 300,000 acres will be brought under irrigation, was commenced. The Government extended the policy of protection by granting a bounty on steel manufactured in India. In Bombay the mill-hands struck against a reduction of wages, and Government was asked by the mill-owners to repeal the cotton excise duty. The Khyber Pass Railway, 27 miles in length, from Jamrud—some three miles from the entrance of the Pass—to Landi Kotal, on the Afghan border, was opened.

In 1926 the Finance Member announced, for the fourth year in succession, a balanced budget, and that, consequently, more expenditure on medical research, education, sanitation, &c., was contemplated. The Cotton Excise duty was abolished.

H.E.H. the Nizam of Hyderabad asked for the restoration of the Province of Berar, which had been leased in perpetuity to the British Government in 1902. The Government of India were unable to agree to the grounds on which the claim was based.

It was decided to reconstruct the Royal Indian Marine as a combatant force so that India may ultimately undertake her own naval defence.

The Government of India decided to prohibit the export of opium for medical purposes, thus taking the lead in initiating the measures for which the Geneva Protocol provides.

Lord Irwin succeeded Lord Reading as Viceroy in April, 1926.

In the United Provinces a Bill was passed to improve the lot of tenants in Agra Province by facilitating occupancy tenure and for the prevention of unauthorised imposts by landlords.

The Royal Commission on Indian Currency and Finance recommended that the gold value of the rupee should be fixed at 1s. 6d., that the currency authority should be put under a statutory obligation to buy and sell gold or gold exchange at appropriate prices to maintain the ratio, that a central bank should be created apart from the Imperial Bank and that measures should be taken to establish a gold standard for India. Government announced their intention to adopt the ratio of 1s. 6d. and to pass the necessary legislation to put the matter on a statutory basis.

Following the success of the Government mission for the suppression of slave trading in the Hukawng valley an expedition was sent

to the Kachin tribal chiefs in Burma with the object of endeavouring to persuade the chiefs to agree to the abolition of the system of tribal slavery in the area lying between the head waters of the Irrawaddy. In Nepal the slave liberation scheme, formulated by the Prime Minister of that State, was completed at a cost of £275,000.

Important changes in the administration of the State of Hyderabad were made by H.H. the Nizam following representations by the Supreme Government.

A Royal Commission was appointed to study and to find remedies for the difficulties of the Indian peasantry.

The Secretary of State for India, H.H. the Maharajah of Burdwan and Mr. D. T. Chadwick represented India at the Imperial Conference.

A Committee was appointed to enquire into the Back Bay reclamation scheme at Bombay (doubts having arisen whether the original scheme was practicable) and to report whether it should be abandoned, completed in part or completed entirely.

During the year there was a recrudescence of communal and religious strife between Moslems and Hindus, and serious riots, with great loss of lives, occurred in most parts of India, particularly in Kohat, Calcutta and Delhi. The Government of Bengal was obliged to proclaim a state of emergency.

The position of Indians in South Africa was the subject of negotiatons between the Governments of India and South Africa, and, following a visit of a South African deputation to India, an Indian mission was sent to South Africa by the Indian Government, with a view to a Conference for the better understanding and appreciation of the respective points of view and of the difficulties of the two Governments.

The elections for the Indian Assembly and Provincial Councils were held towards the close of the year, and were contested on a communal platform.

IMPIRIAL LEGISLATION.—Legislation for India in England is chiefly of a constitutional or financial character. *The Regulating Act* (1773), which created the first Governor-General, a Council of five members, and a supreme court with a chief judge, was the first statute that recognised the East India Company as a ruling body. Pitt's *India Act* (1784) left the business and most of the patronage to the Court of Directors, but gave the supreme civil and military authority to a Board of Control, whose president represented India in the House of Commons. In 1793 the Company's charter was renewed; in 1813, on a further renewal of the charter, the trade of India was thrown open; while on the next renewal in 1833 the Company's monopoly of the China trade was abolished, and they became a non-commercial governing body. In 1853 the Company's charter was renewed for the last time, and the Indian Civil Service was thrown open to competition. By "An Act for the Better Government of India" (1858), all the territories governed by the East India Company were transferred to the Crown, and all the powers exercised by the Company and the Board of Control were vested in the Secretary of State for India, assisted by a Council. Under this Act as amended by Acts of 1889, 1907, 1915 and 1919, at least one-half of the members of Council must have served in India for 10 years, and must not have left India more than 5 years prior to their appointment. The number of members may be 12 and must not be less than 8, and is at present 8. Their term of office is now 5 years, with power of extension. There are now 3 Indian members. In 1877 (under the Royal Titles Act) Queen Victoria assumed the title of Empress of India. By the Indian Councils Act (1909) the imperial and provincial Legislative Councils were enlarged, their powers of interpellation and criticism enhanced, and the elective element extended, special provision being made for the representation of landholders, the professional classes, Muhammadans, and European and Indian traders and planters. The executive councils of Madras and Bombay were increased in size, and power was given to constitute executive councils in provinces under Lieut.-Governors. The Government of India Act (1912) created a Governor of Bengal, established an Executive Council for Bihar and Orissa, and authorised the creation of legislative councils in provinces under Chief Commissioners. The Indian High Courts Act (1911) empowered the Government of India to increase the number of High Court judges from 15 to 20, to establish new High Courts, and to appoint temporary judges. An Act to consolidate the Imperial Legislation relating to the Government of India was passed in 1915. The Government of India Act, 1919, confers on provinces a larger measure of independence of the Government of India; it distinguishes the functions of local governments and local legislatures from the functions of the Governor-General in Council and the Indian Legislature; it provides for the devolution of authority in respect of provincial subjects to local governments, for the allocation of revenues to those governments and for the use under the authority of the Governor-General in Council of the agency of local governments in relation to central subjects; it provides for the transfer of some provincial subjects to the administration of the Governor acting with Ministers. It gives borrowing powers to local governments. It lays down that the major provinces shall be governed, in relation to reserved subjects, by a Governor in Council, and in relation to transferred subjects by a Governor acting with Ministers, appointed from among the elected Members of the local legislative Council. It confers extended powers on local legislatures. For the Supreme or Central Government, it provides that the Legislature shall consist of the Governor-General and two Chambers, viz., the Council of State and the Legislative Assembly. It provides for the appointment of an Auditor-General and a Public Services Commission on India. A Statutory Commission is to be appointed 10 years after the commencement of the Act for the purpose of enquiring as to the desirability of a further extension of the principle of self-government in India.

INDIAN LAW.—The law administered in the Indian courts consists mainly of: (1) The enactments of the Indian Legislative Councils (imperial and provincial) and of the bodies that preceded them; (2) statutes of the British Parliament applicable to India; (3) the Hindu and Muhammadan laws of inheritance and domestic law; (4) the customary law affecting particular castes and races.

The Government of India.

EMPEROR OF INDIA—H.I.M. GEORGE V.

Secretary of State—The Right Hon. Earl of Birkenhead, P.C.

THE SECRETARY OF STATE FOR INDIA is the head of the Indian Administration in England, and as a member of the Cabinet he is solely responsible to, and represents the supreme authority of, Parliament. Subject to the provisions of the Government of India Act and rules made thereunder, the Secretary of State can impose his orders on the Government of India. In matters requiring secrecy (*e.g.*, foreign policy and the affairs of Indian States) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. Indian Government business in England is transacted at the India Office and at the office of the High Commissioner for India (*see* pp. 196–7).

The King-Emperor appoints the Governor-General, the Governors of the 9 major Provinces (Bengal, Madras, Bombay, the United Provinces, Bihar and Orissa, the Punjab, the Central Provinces, Assam and Burma), the Commander-in-Chief, the Members of the Executive Councils of the Governor-General and of Governors, and the Judges of the High Courts. The term of these appointments, except judgeships, is usually 5 years.

Subject to the Secretary of State's direction, the supreme executive authority in India, in both civil and military affairs, is the Governor-General in Council. The Governor-General's Executive Council now contains 7 members including the Commander-in-Chief (three of whom must have served in India 10 years), as well as himself. Ordinarily, the opinion of the majority prevails, but the Governor-General is empowered in special circumstances to overrule the majority. In accordance with the Government of India Act, 1919, and rules thereunder, the *Indian Legislature* consists of the Governor-General and two Chambers, viz., the Council of State and the Legislative Assembly (*see* p. 586 as to their constitution). Except as otherwise provided by or under the Act, a Bill is not deemed to have been passed unless agreed to by both Chambers. The Act confers powers on the Governor-General of securing essential legislation in emergencies, subject to disallowance by His Majesty in Council; of returning Bills for reconsideration, and of vetoing proposed legislation affecting the safety or tranquillity of British India. The Indian Budget is submitted to both Chambers, and is voted on by the Legislative Assembly except in regard to certain specified heads, but the Governor-General in Council can act, notwithstanding a refusal or reduction of grants, where essential to the discharge of his responsibilities, and he may authorise expenditure necessary for the safety and tranquillity of British India or any part thereof. Differences of opinion between the two Chambers may be referred for decision by the Governor-General to a joint meeting of members of both Chambers appointed for the purpose. Although the Government does not command a majority in the Indian Legislature, it is necessarily given the power to reject adverse votes, since its responsibility is not to the Indian Legislature, but to Parliament.

The seat of the Supreme Government is at Delhi, the summer headquarters being still at Simla.

Business is conducted by 9 Departments—Finance; Foreign and Political; Home; Legislative; Commerce; Industries and Labour; Education, Health and Lands; Army; and Railways. Each Department is in the charge of a Secretary to Government (the Foreign and Political Department has both a Foreign and a Political Secretary), and is under the care of a member of the Viceroy's Executive Council, who has authority to deal with affairs of minor importance, and to select what is worthy of the consideration of the Governor-General and his Council. The Governor-General himself superintends the Foreign and Political Department. The *Finance Department* deals with public accounts, loans, taxation, opium, currency, banking, mints, &c. The *Foreign and Political Department* conducts relations with external politics, relations with Foreign States, frontier tribes, relations with Indian States and Feudatories within the limits of India, and, through its Political Residents and Agents in the various Indian States, supervises their administration and regulates their relations with the paramount Power. The Political Residents in the Persian Gulf and Muscat look after the commercial and political interests of India in those quarters. The *Home Department* deals with the internal politics, civil service, judicial affairs, prisons, police, &c. The Legal Member of Council takes charge of Government Bills in connexion with the *Legislative Department*. The department of *Commerce* deals with trade and shipping, ports, &c. The department of *Industries and Labour* deals with industries, stores, labour, public works, post-office, telegraphs, civil aviation, communications, irrigation, factories, &c. The Army is under the *Army Department*, of which the Commander-in-Chief has charge in Council. The *Education, Health and Lands Department* has the control of education, local government, sanitation, land revenue and surveys, agriculture, famine, meteorology, forests, foodstuffs, &c. Railway administration is entrusted to a *Railway Department*, which is in the charge of the Commerce Member of Council.

British India is divided into 15 *Local Governments and Administrations*, viz.:—Under Governors, Madras, Bombay, and Bengal, still termed Presidencies, the United Provinces, the Punjab, Bihar and Orissa, the Central Provinces, Assam, and Burma; under Chief Commissioners, who are under the immediate authority of the Governor-General in Council, the North-West Frontier Province, British Baluchistan, Delhi, Ajmer-Merwara, Coorg, and the Andaman and Nicobar Islands.

The Governors of Madras, Bombay and Bengal are permitted to communicate direct with the Secretary of State.

The unit of administration throughout British India is the District, the executive head of which is the District Officer, called Collector-Magistrate or Deputy-Commissioner, as the case may be. In subordination to a Commissioner, who corresponds direct with the Provincial Government,

he has control in every department of administration, and is the responsible head of his jurisdiction. There are 273 Districts in British India.

There are separate *High Courts* for both civil and criminal cases in Madras, Bombay, Bengal, Bihar and Orissa, and in the United Provinces of Agra and Oudh, the Punjab and Burma, and a Chief Court in Oudh. Appeals may be carried to the English Privy Council. The Central Provinces, Berar, Coorg, Sind, and the North-West Frontier Province have each a *Judicial Commissioner's Court.*

PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.*

Under the Government of India Act, 1919, and rules made thereunder, the local governments are given a large measure of independence of the Supreme Government. The Act distinguishes the functions of local governments and local legislatures of the Provinces from the functions of the Governor-General in Council and the Indian Legislature. The Supreme Government is given authority over certain subjects, classified as "Central," such as defence, political relations, railways, tariffs, &c. Other administrative heads, classified as "Provincial"—viz., local self-government, public health, education, public works, water supply, land revenue administration, famine relief, agriculture, excise, administration of justice, &c., are wholly or partly handed over to Provincial Governments with responsibility, subject to certain limitations, within their own areas, for administering them. In the nine major or "Governors'" Provinces—i.e., Madras, Bengal, Bombay, the United Provinces, Bihar and Orissa, the Central Provinces, the Punjab, Assam and Burma—provincial subjects are further divided into "reserved" and "transferred subjects," the administration of, and responsibility for, which rests with the Governor and his Executive Council and with the Governor and Ministers respectively. Ministers are chosen from among the elected members of the Legislative Council by, and hold office during the pleasure of, the Governor. They are directly responsible to the Legislative Council for the administration of the "transferred" subjects, but can be overruled by the Governor if he considers their policy inconsistent with the discharge of his responsibilities.

The Act legislates for a transition from a bureaucratic to a self-government system and for the gradual transfer of more subjects to the Ministers. Matters of departmental or minor importance are dealt with, as a rule, by the Governor, his Council, and the Ministers sitting in conclave, but the decision on reserved subjects rests with the Governor in Council, and that on transferred subjects with the Ministers, subject to the Governor's intervention and control.

Legislative Councils have an elected majority, and normally a life of three years, but may be sooner dissolved by the Governor. The previous sanction of the Governor-General in Council is required to the introduction of certain classes of Provincial Bills. The Governor has powers of veto in regard to proposed legislation affecting the safety or tranquillity of his Province or any part of it, or of another Province, and can secure legislation essential to the discharge of his responsibilities for reserved subjects. Such Bills must be sent to the Governor-General for the signification of His Majesty's pleasure, but in emergencies the Governor-General may assent to them, subject to disallowance by His Majesty in Council. Governor has powers of assenting to, of withholding assent to, or of returning for reconsideration, other Bills, but must in certain circumstances send them for consideration to the Governor-General, who may reserve them for His Majesty's pleasure.

Provincial Budgets are voted on by the Legislative Councils, but the Governor has power to act, in respect of a demand for reserved subjects, notwithstanding a refusal or a reduction of grants, if the demand is essential to the discharge of his responsibilities for the subject, and in cases of emergency he can authorise such expenditure as may be necessary for the safety or tranquillity of his Province. Certain heads of expenditure do not require an annual vote: a deadlock is thus avoided in case of irresponsible action by the Legislative Council in the matter of supply.

Of the members nominated to the Indian Legislature and Provincial Legislative Councils some represent certain communities and interests. Males over 21 (18 in the case of Burma) years of age possessing certain qualifications (residence within the constituency and the possession of certain property qualifications, the payment of land revenue, rent, local taxes, income-tax or municipal rates) are eligible for the franchise. Women are not qualified for registration, but the disqualification may be removed in certain circumstances in any Province, or in all. The franchise is low, and gives the vote to small cultivators and some wage earners. The electorate of 1924 comprised over 5,800,000 persons.

(1) MADRAS (area, 142,260 sq. miles; pop. 42,318,985) was not only the oldest, but the most important of the three original Presidencies before Clive's conquest of Bengal, though it was small in extent until the annexation of the Carnatic in 1801. With a coast-line of 1,730 miles the province has no good natural harbour, but an artificial harbour has been constructed at Madras at great expense. The province is not naturally fertile, though irrigation systems in the river deltas have enormously increased the produce of the soil, and have yielded a large profit to the State. Rice, millet, and other food-grains, oilseeds, cotton, indigo, spices, tobacco, tea, &c., are cultivated. Manganese ore is mined and exported. Madras is served by the South Indian and by the Madras and Southern Mahratta Railways, the latter connecting it with Bengal on the north and Bombay on the west. About 89 per cent. of the people are Hindus. There are 1,361,000 native Christians, mainly Roman Catholics. Many natives of the Presidency emigrate to Burma and Ceylon, some only temporarily. The languages principally spoken are Tamil, Telugu and Malayalam. Madura (138,894) and Trichinopoly (120,422) famous for their Hindu temples, are the chief cities after the capital.

(2) BOMBAY.—The Island of BOMBAY was part of the dowry of the Infanta of Portugal (1662), and was made over by Charles II. to the East India Company in 1668. The greater part of the present territory was obtained by annexations from the Mahrattas, and by the lapse of the Satara State. Sind was conquered in 1843. The province (including *Sind*, but not *Aden* and *Perim*, which are also attached to it) contains 122,979 square miles (about equal in size to the British Isles), with a population of 19,291,719. Eastern Sind is desert. The administration of Sind (which occupies about two-fifths of the Presidency) is in some respects separate. About 76 per cent. of the people of the Presidency are Hindus, and 20 per cent. Muhammadans. The Parsis (83,000) who are very prominent in trade, are mainly found in Bombay. Marathi, Gujarati, Sindhi, Kanarese and Western Hindi, are the principal languages. Millet and other food-grains and oil seeds are cultivated. Cotton is largely produced for export and for manufacture in the constantly extending cotton-mills of Bombay and Ahmedabad. The chief railway systems are the Bombay, Baroda and Central India with the lines worked by it to the north, and the Great Indian Peninsula (with the Indian Midland) eastwards; south-eastwards is the Madras and Southern Mahratta system; while Karachi (Sind) is the port for the extensive North-Western Railway system. Ahmedabad (274,007), Poona (214,796), Sholapur (119,582), Surat (117,434), and Karachi (216,883), the capital and chief port of Sind, are the most important cities. For Aden and Perim, *see* p. 595.

(3) BENGAL (area of newly-constituted province, 76,843 sq. miles, with population of 46,695,536) was placed under a Lieutenant-Governor in 1854. The old Bengal Presidency included practically all Northern and Central India, but subsequently the province consisted of part of Bengal proper with Bihar, Orissa, and Chota-Nagpur. Fifteen districts of Eastern Bengal were detached in 1905 and combined with Assam, while one district from the Central Provinces was added to Bengal. This partition was revoked in 1911, and Bengal now includes five Bengali-speaking divisions. About 54 per cent. of the population are Muhammadans and 43 per cent. Hindus. The principal languages are Bengali and Western Hindi. For the most part the province is a great alluvial plain, very populous and productive. The chief products are rice, jute, oilseeds, sugar, tobacco, silk, tea, and coal. The East Indian Railway is the great artery of the Ganges Valley. The Eastern Bengal Railway, running north, and the Bengal-Nagpur, south, from Calcutta, are also important. Important cities are Dacca (119,450), now the second capital, and Howrah (195,301), a great jute-manufacturing centre adjoining Calcutta.

(4) The UNITED PROVINCES of AGRA and OUDH, called "North-Western Provinces and Oudh" until 1902 (area, 106,295 sq. miles; pop. 45,375,787), forms the upper part of the great Ganges plain to the W. of Bengal, lying between the Himalayas and the hilly border of the central plateau. Originally (excluding Oudh) it formed part of the Bengal Presidency, but in 1835 a separate administration was formed under a Lieutenant-Governor. OUDH was annexed in 1856 and placed under a Chief Commissioner. After 1877 the two administrations were combined. The chief products are wheat, rice,

barley, pulse, tobacco, millet, cotton, sugar, and oilseeds. About 85 per cent. of the population are Hindus and 14 per cent. Muhammadans. Western Hindi is the chief language. The province is served by the East Indian, Oudh and Rohilkhand, and Rohilkhand and Kumaon Railways. Among the important cities may be named the ancient city of Agra (185,532), containing the Taj Mahal and other great works of architecture, the sacred Hinducity of Benares (198,447), the great manufacturing centre, Cawnpore (216,436), Lucknow (240,566), Bareilly (129,459), and Allahabad (157,220).

(5) The PUNJAB (area, 99,846 sq. miles; pop. 20,685,024) occupies the N.W. angle of the great northern plain of India, and derives its name from the "Five Rivers" which, descending from the Himalayas, traverse the plain and unite in the Indus. It was annexed in 1849. Up to 1853 it was under a Board of Administration, who were then superseded by a Chief Commissioner, who was made Lieutenant-Governor in 1859, when also the Delhi Division was transferred to the Punjab from the North-West Provinces. The Punjab is mainly agricultural, and, owing to the scanty rainfall, depends largely for its harvests on vast irrigation canals, which are still being greatly extended, and are highly remunerative. The principal crops are wheat, millet, barley, maize, pulse, oilseeds, sugar, and cotton. The Punjab possesses rich deposits of rock-salt, which, with wheat and other grains and cotton, form the principal exports. Timber is scarce. 55% of the population are Muhammadans, and 32% are Hindus. The Sikhs number about 3,107,000 in the Punjab and Punjab States, to which they are mainly confined. Panjabi, Western Punjabi and Western Hindi are the chief languages. The various branches of the North-Western and Southern Punjab Railways serve the province. Amritsar, the sacred city of the Sikhs, has 160,218 people.

(6) BURMA is bounded by Tibet on the north, by China, French Indo-China, and Siam on the east, and by Assam, Bengal and the sea on the west. It is the largest province, having a total area of 233,707 sq. miles, about equal to Spain and Portugal, with a population of 13,212,192. These figures include the Shan States and Chin Hills. Many immigrants come from Bengal, Madras, and China. Tenasserim and Arakan were annexed after the first Burmese war in 1826, Pegu after the second war in 1852, and Upper Burma and the Shan States after the third war in 1885. The Shan States form a minor administration distinct from that of Burma though under the same Executive Government and not subject to the jurisdiction of the Burma Legislature. The province is thinly peopled; but, owing to remarkable prosperity, the population has increased 9 per cent. in 10 years. The inhabitants belong to numerous tribes, who are distinguished by a variety of manners, languages, and religions. Burmese and Shangale are the chief languages. Buddhism, now almost confined to Burma, so far as the Indian Empire is concerned, is the religion of 85 per cent. of the people. The Burmese are much better educated than the natives of India proper, education being conducted by Buddhist monks. The delta country of Lower Burma is flat, but above Prome there is upland, hilly country. Rice, the main product of the delta region, is largely milled at Rangoon and exported. The principal export after rice is teak, which comes from the extensive forests of Burma and the Shan States, and overland from Siam. Burma is fairly rich in minerals, especially petroleum, rubies, jadestone, and wolfram. The Irrawaddy and its chief tributaries, the Chindwin, the Shweli, and the Myitnge, form important waterways. The main stream is navigable beyond Bhamo, 900 miles from its mouth, and carries much traffic. There are considerable exports by land to Western China. The Burma Railways have reached Myitkyina, in the Upper Irrawaddy, while a branch has been built to the Shan States, which lie in the Salwin basin.

(7) BIHAR AND ORISSA (area of new province, 83,181 sq. miles, with pop. of 34,002,189). This province, which came into existence on 1 April, 1912, comprises Bihar, Orissa, and Chota-Nagpur, hitherto forming part of Bengal, as well as the Sambalpur district transferred to Bengal from the Central Provinces in 1905. Bihar is liable to extreme temperatures. The population is exceedingly dense. Orissa and Chota-Nagpur are ill-watered and liable to drought. Orissa has a variety of races and a considerable seaboard. The highlands of Chota-Nagpur are thinly peopled and contain a large aboriginal population. The Patna High Court came into existence on March 1, 1916. Bihar and Orissa yields the greater part of India's output of coal and mica. Rice, wheat, oilseeds, sugar, and tobacco are cultivated. 82 % of the people are Hindus, and the great Hindu temple of Juggernaut is at Puri, in Orissa. There is a variety of languages, Western Hindi and Oriya being the chief. The railway systems are the East Indian, Bengal and North-Western, and Bengal-Nagpur.

(8) The CENTRAL PROVINCES and BERAR (area, Central Provinces alone, 82,109 sq. miles; pop. 10,837,444). The Central Provinces were formed in 1861 out of territory taken from the North-West Provinces and Madras, but originally belonging to the Mahratta Kingdom of Nagpur. The country, hilly and forest-clad, contains a large population of aboriginal tribes. The people are mostly Hindus, and they speak mainly Western Hindi and Marathi. The province, which is served by the Indian Midland, Great Indian Peninsula, and the Bengal-Nagpur Railways, possesses coal and manganese ore, and produces rice, wheat, millet, pulse, oilseeds, and cotton. There are cotton mills at Nagpur.

Since 1st October, 1902, BERAR has been amalgamated with the Central Provinces. Berar (area, 17,767 sq. miles; pop. 3,075,316), which lies to the north of Hyderabad, was placed in British hands by the Nizam in 1853, in payment of arrears, and its revenues were charged with the future cost of the Hyderabad Contingent (which was in 1903 incorporated in the Indian Army). In 1902 Berar was leased in perpetuity to the Government of India on payment of £167,000 a year to the Nizam. Berar is purely agricultural. It is very fertile, and yields cotton, millet, oilseeds, &c. The chief language is Marathi, and most of the people are Hindus.

(9) ASSAM (area, 53,015 sq. miles; pop. 7,606,230) was constituted a separate administration in 1874 out of certain Bengal districts, most of which had been ceded by Burma in 1825. It was combined in 1905 with part of Bengal to form a new province, Eastern Bengal and Assam, but again became a separate administration in 1912. A range of mountains divides Assam into the Surma and Brahmaputra valleys, of which the chief towns are Sylhet and Gauhati respectively. The people are mainly Hindus and Muhammadans, and the chief languages are Bengali and Assamese. The Assam-Bengal railway serves the province. Tea and rice are the principal products. Assam contains nearly 900,000 immigrants from other parts of India, chiefly coolies for tea-gardens. Seat of Government, Shillong.

(10) The NORTH-WEST FRONTIER PROVINCE was constituted in 1901 by the transfer from the Punjab of portions of the districts of Hazara, Peshawar, Kohat, Bannu, and Dera Ismail Khan (area, 13,419 sq. miles; pop. 2,251,340, partly estimated). Attached to the Province are the five trans-border political agencies of Malakand, Khyber, Kurram, Tochi, and Wano, together with tribal areas under the control of the Deputy Commissioners of the five settled districts first above mentioned. The officer in charge is directly responsible to the Government of India. The people are chiefly Muhammadans, and the chief languages are Pashto and Western Punjabi. The province produces wheat, barley and other grains, oilseeds, cotton, &c. It has a considerable trade with Afghanistan.

(13) BRITISH BALUCHISTAN (area, 54,228 sq. miles; pop. 420,648) was constituted a separate administration in 1888, under the Governor-General's Agent in Baluchistan, who also controls the affairs of the native States of Baluchistan up to the Persian frontier. The districts it comprises (Sibi, Quetta, Pishin, Thal-Chotiali, Nushki, Zhob, Chagai, Nasirabad, and the Bolan) were acquired partly from Afghanistan by the treaty of Gundamuk (1879), partly from the Khan of Kalat by arrangement. Baluchistan consists largely of mountains and sandy deserts, and is sparsely populated. A large part of the people lead a pastoral, nomad life. In religion they are Sunni Muhammadans, and Pashto is the chief language. The Afghan-Baluch frontier was demarcated in 1896–7. To Chaman, on this frontier, a railway runs *viâ* Quetta and is continued to Mirjawa. The Khan of Kalat, the head of a loose confederacy, receives about £19,000 per annum for quit-rents, subsidy, &c. British troops occupy Quetta, commanding the Bolan Pass, and have the treaty right to occupy any other position.

Since 1858 Port Blair, in South Andaman, has been used as an Indian penal settlement. Much valuable timber, worked by convict labour, is obtained. The *Nicobar Islands*, almost due south of the Andamans, were first occupied by the British in 1869. They comprise 19 islands. The principal products are coco-nuts.

Chief Commissioner, Lt.-Col. M. L. Ferrar, C.I.E., O.B.E. ..... Rs. 3,000

The *Laccadive Islands* comprise 14 islands (nine inhabited), distant 200 miles from the Malabar coast of the Madras Presidency, in which they are included. (Pop. 10,600 in 1911.)

Aden and Perim.—From old time the peninsula of Aden, situated on the southern coast of Arabia and lying on the Red Sea trade-route between Europe and the East, has been an important trade centre. Its trade decayed after the Portuguese discovery of the Cape route, but with the opening of the Suez Canal it regained more than its old importance. It was occupied by the British in 1839. It is now a great coaling station and port of call, and an emporium for the trade of the adjacent African and Arabian coasts. It is the only fortified point between Egypt and Bombay, and may be regarded as an outpost of the Indian Empire. Aden and Perim—a small unfortified island serving as a coaling station at the southern entrance to the Red Sea, occupied in 1857—form part of the Bombay Presidency, and have an area of 80 square miles and a population of 56,500. Aden is a free port. The chief industries are salt and cigarette manufacture. The traffic in arms and ammunition is subject to special regulations. The total seaborne trade in 1924–25 was £10,890,000. In 1924–25, 1,315 vessels called at Aden, and 483 at Perim. The British Government has treaty engagements with, and subsidises, the neighbouring Arab tribes, both inland and along the coast (Hadramaut), from the Straits of Bab-el-Mandeb to Muscat territory at Ras Sair.

The *Kuria Muria* Islands, to the S. of Omân, have been in British possession since 1854. In 1834 the East India Company occupied *Sokotra* (area, 1,400 sq. miles), 150 miles from Cape Guardafui, which has a pastoral Muhammadan population roughly estimated at 5,000, mainly Arabs. A formal protectorate was established in 1886. The Sheikh receives a small subsidy, and is pledged not to cede the island to any foreign Power.

INDIAN APPOINTMENTS.

THE higher civil administration of British India is recruited from four sources—1. Open competitive examination in England and India. 2. The Indian Army. 3. The patronage of the Secretary of State. 4. The patronage of the Local Governments.

The Civil Service of India.—The annual examination ordinarily commences in London July-August. Candidates must be over 21 and under 24 on Aug. 1 in the year of examination. Application for permission to compete must be made on or before June 1, on forms that can be obtained from the Secretary, Civil Service Commission, London, W. 1. Examination fee, £8. Selected candidates are on probation in England for one or two years, and receive an allowance of £300 if of European domicile, or £350 if of Indian domicile, if they pass their probation at one of the Universities or Colleges approved by the Secretary of State, conduct themselves well, and comply with all the rules laid down for their guidance. A final examination is held in Indian law, language, &c. A first-class passage to India will be engaged for selected candidates. In case of failure to pass the final examination, or to execute the usual covenant and to proceed to India, all allowances received must be refunded. The salary of a covenanted civil servant commences usually at Rs. 7,200 a year. The Regulations for competitive examinations to be held in India can be obtained from the India Office, London.

The Indian Army.—Candidates for commissions in the Indian Army are required to pass the Army Entrance Examination held by the Civil Service Commissioners. Candidates must be between 18 and 19 years of age (in

the case of candidates already serving in the Army the upper limit of age will be 21). Of the cadetships for the Indian Army offered, some are allotted to King's India Cadets nominated by the Secretary of State for India, and the remainder being offered to candidates in the order of their passing the entrance examination. A few direct appointments to the Unattached List for the Indian Army are made by the War Office from candidates nominated by the principal Universities in the United Kingdom. A few direct appointments are also offered to officers of the Territorial Army and Supernumerary Reserve between the ages of 21 and 25 who undertake the final examination of the Royal Military College, Sandhurst, under arrangements made by the War Office. At the end of the period of training at Sandhurst, cadets recommended for commissions are gazetted to the Unattached List for the Indian Army. On appointment to an Indian regiment, an officer's minimum initial pay is at the present moment 12*s.* 4*d.* a day. Regulations and examination papers can be obtained from His Majesty's Stationery Office, Imperial House, Kingsway, W.C.

Indian (Imperial) Police Force.—A competitive examination is usually held in London and other centres in June of each year in conjunction with the Army and Air Force Examination. A fee of £4 is required from candidates examined in London, and a fee of £5 from those examined in other centres. Save as provided in the regulations a candidate must be a European British subject. Indian and Burmese candidates are eligible if they have been resident in the United Kingdom for not less than five years. Candidates must be above 19 and under 21 years of age on Aug. 1; must be unmarried, and if they marry before reaching India must forfeit their appointments. Applications to compete at the examination must be made on forms to be obtained from the India Office, Whitehall, London. Successful candidates are required to undergo a strict medical examination; are examined as to their ability to ride. Free passage to India is granted to probationers. The initial pay is Rs. 350 per month, plus an overseas allowance of Rs. 100 per month, rising to Rs. 450 in the case of probationers with non-Indian domicile. The pay proceeds by increments to Rs. 700, and thence to Rs. 1,350 per month, subject to efficiency bars, with prospects of promotion to higher posts.

The patronage of the *Secretary of State for India* is small. Appointments of *Chaplains* of the Church of England and the Church of Scotland to the Indian Ecclesiastical establishments are normally made, on the occurrence of vacancies, by the Secretary of State for India from amongst candidates nominated by the Indian Chaplaincies Board of the Church of England and the General Assembly's Committee on Indian Churches respectively. Church of England candidates must be between 27 and 34 years of age, and Church of Scotland candidates must be under 34 years of age. On appointment chaplains receive a salary of Rs. 600 per month, rising by annual increments to Rs. 1,500 per month.

Indian Railway Service of Engineers.—The Secretary of State in Council from time to time makes a number of appointments of Asst. Executive Engineers on Indian State Railways. In making these appointments he acts with the advice of a Selection Committee. Application forms can be obtained from the Secretary, Services and General Dept., India Office, Whitehall, London. Every candidate must have attained the age of 21, and not attained the age of 25. Candidates must produce evidence that they have obtained one of the University degrees or passed one of the examinations specified in the Regulations, and must have had at least one full year's practical experience of civil engineering under a qualified civil engineer. Those whose qualifying diploma has been obtained without a college course must have had a full three years of such practical experience. Every European candidate must be a British subject. All selected candidates are on probation in the first instance on an initial pay (including overseas pay) of Rs. 525 a month and are required to execute agreements for three years, at the end of which period, if they have given satisfaction, their services are retained. The pay rises by increments to Rs. 1,025 in the 9th year and to Rs. 1,675 in the 24th year of service, with possibilities of promotion to higher posts. From time to time a number of appointments of Asst. Executive Engineers in the Public Works Dept. in India are made under regulations, which are generally the same as for the Indian State Railways.

Indian Forest Service.—In making appointments, the Secretary of State for India in Council acts with the advice of a Selection Committee. Applications for appointment must be made on a printed form to be obtained from the India Office, Whitehall, London, S.W. 1. The normal age limits are over 21 and under 24 on the 1st January of the year of candidature. No person will be deemed qualified who shall not satisfy the Secretary of State that he is a British subject. Selected candidates must be prepared to give an undertaking that they will not marry before reaching India. Any breach of this undertaking will entail forfeiture of appointment. Every candidate must be of good physique and good character. Candidates must have obtained a degree or diploma in Forestry at a University of Great Britain or Ireland, and must possess such practical knowledge of Forestry as will enable them to take up duty as an Assistant Conservator of Forests without undergoing further training in Europe. Candidates are required to produce evidence that they have a fair knowledge of either German or French. Preference is given to candidates who possess an Honours degree in Natural Science in addition to the abovementioned qualifications. Applications are accepted from candidates who, on the 1st July of the year of candidature, have already sat at an examination for a degree or diploma in Forestry, but who have not learned the result of the examination, subject to the condition that their applications will not be proceeded with if they are found to have failed at the examination when the result is announced. On appointment to the Indian Forest Service the salary commences at Rs. 475 and rises by increments to Rs. 1,800, with prospects of promotion.

Further information regarding these and other Indian appointments can be obtained on application, from the Under-Secretary of State, India Office, Whitehall, London, S.W. 1. Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations, which can be consulted at the India Office.

THE FINANCES OF INDIA (CENTRAL GOVERNMENT AND PROVINCIAL GOVERNMENTS FOR THE YEAR ENDED MARCH 31, 1925.

(In lakhs of rupees.)*

Separation of Central and Provincial Finances.

The Government of India Act, 1919, was designed *inter alia* to secure a greater measure of independence for Provincial Governments, and to this end provision was made, in the Act and in Rules subsequently published under authority of the Act, for the delimitation of the functions of Government, as between the Government of India and the chief Provincial Governments and for the definite assignments to each of these Provincial Governments of specific revenues of their own. Effect has been given to these measures of devolution in the nine "Governor's Provinces," viz.: Bengal, Madras, Bombay, the United Provinces, the Punjab, Bihar and Orissa, the Central Provinces, Assam and Burma, and in the Province of Coorg. As regards these provinces the functions of Government has been classified as either "central subjects" or "provincial subjects." A general authority to control all matters coming under the latter head, subject to certain expressed provisos, is devolved upon the Local Governments concerned.

The sources of revenue available to Local Governments for the purpose of defraying their administrative charges consist, in the main, of the receipts from those provincial subjects which are revenue-producing, the principal heads being Land Revenue, Irrigation, Stamp Duties and Excise. In addition, a local Government is given a small share in any expansion of Income Tax (otherwise a "central" source of revenue) that may be due to an increase of the total assessed incomes within the Province over that of 1920–21.

When the division of the sources of revenue was made between the Central and Provincial Governments, it was realized that the Central Government would be left insufficiently provided. It was therefore arranged that an annual contribution should be made by eight of the local Governments to the Central Government. The annual contributions fixed at the outset aggregated 983 lakhs of rupees. They were not, except in case of emergency and with the sanction of the Secretary of State, to be subject to increase, and should reduction of the aggregate be found possible, reductions were to be made in fixed proportions from the quotas of the several Provinces. The general policy which it is intended to pursue in the matter is a progressive reduction of provincial contributions with a view to their ultimate cessation. The provincial contributions for 1926–27 have been fixed at:—Madras, Rs. 165 lakhs; Bombay, 56; Bengal, nil; United Provinces, 151; Punjab 86; Burma, 50; Bihar and Orissa, nil; Central Provinces, 22; Assam, 15. Total Rs. 545 lakhs.

The revised financial arrangements outlined above came into force from April 1, 1921, as from what date all "provincial" revenue and expenditure ceases to be included in the estimates and accounts of the Central Government. In the case of Coorg the separation was made on April 1, 1924.

* A lakh = Rs. 100,000. (*See* p. 604 for the Indian system of notation.)

* Including Contributions to the Central Government.

Net Revenue and Expenditure of the Central Government.

The figures of Gross Revenue just given include the net receipts of railways and other commercial undertakings without any deduction on account of interest charges, the total receipts from the sale of opium, and the receipts of certain spending departments; while the figures of Gross Expenditure include the interest charges of commercial undertakings, and the cost of cultivation and manufacture of opium. This method of compiling the figures causes the revenue available for administrative purposes and the expenditure on such purposes to appear greater than they really are. A statement of the net revenue and expenditure of the Central Government for 1924-25 is therefore given in the table below, which shows the *net* revenue derived from commercial undertakings, after deducting all expenditure including interest charges, similar adjustments being made under other heads of revenue and expenditure by deducting (1) the cost of cultivation and manufacture of opium from sale receipts, and (2) the receipts of the spending departments from the gross expenditure incurred by them. The cost of the establishments maintained for the collection of revenue is not shown as a deduction from revenue, but as a separate head of expenditure.

Burden of Taxation.—If taxation proper be divided among the population of British India, without allowing for certain portions of Salt, Excise, and Customs duties which fall on persons in the Indian States, the burden in 1924-25 was estimated at Rs. 4·1 per head, or, if land revenue (which is akin to rent) be added, Rs. 5·5 per head. The Budget of 1919-20 introduced a duty of 50 per cent. on excess profits, but this tax was discontinued in 1920-21. The Budget for 1920-21 amended the super-tax law. The Budget for 1921-22 imposed additional taxation under the heads of postal charges, railway surcharge, import duties and taxes on income. The Budget for 1922-23 increased railway passenger fares,

postage rates, the general customs *ad valorem* duty on imported goods, the income-tax, and the super-tax. The Budget for 1923-24 raised the salt tax from Rs. 1¼ to Rs. 2½ a maund. The Budget for 1924-25 reduced the salt tax to Rs. 1¼ per maund and imposed a specific duty on certain materials for match manufacture. No additional taxation was proposed in 1925-26, but certain minor amendments were made in the Customs Tariff. No additional taxation was imposed in 1926-27.

DEBT AND ASSETS.—On March 31, 1926, the debt of India (Central) amounted to Rs. 41,799 lakhs in India and £342,295,000 in England; Provincial, Rs. 610 lakhs. Miscellaneous obligations (Savings Bank balances, &c.) amounted to about Rs. 94 crores. Its advances to Native States, corporations, agriculturists, &c., stood at Rs. 1,150 lakhs. Other assets were the Gold Standard Reserve of £39,999,000, and the cash balances in England and India, £14,908,000 and Rs. 2,515 lakhs respectively.

LAND REVENUE.—This is the oldest and the most important source of revenue. The State is the paramount landlord in India, and the land revenue is the State's share in the rent of the soil. In most of Bengal and Bihar and Orissa, about one-fourth of Madras, and part of Assam the land revenue has been permanently fixed; elsewhere generally the assessments, or settlements, are revised periodically (usually once in 20 or 30 years). The nature of the settlements varies in different provinces. In parts of Bengal and Bombay, the greater part of the United Provinces, the Punjab, the N.W. Frontier Province, and the Central Provinces the settlement is with large proprietors or proprietary village communities (*zamindari*), and the estate is assessed as a whole. Elsewhere (especially in Burma, Berar, Bombay and Sind, Assam, and most of Madras) the *raiyatwari* tenure prevails, and each raiyat, or peasant proprietor, holds direct from the State. In temporarily settled zamindari districts the land revenue usually amounts to about 50 per cent. of the rental paid to the landlord by the cultivating tenant, while in temporarily settled raiyatwari districts the revenue varies from 20 per cent. of the gross produce down to much smaller proportions, averaging about 8 per cent. Private improvements are exempt from assessment. The gross land revenue paid to the State (Central and Provincial; Governments) in 1924-25 amounted to Rs. 3,583 lakhs (£23,890,000).

THE OPIUM REVENUE.—Poppy may now be grown only in parts of the United Provinces (Bengal opium) and in the Central Indian (Malwa) States. Except in these States the manufacture is a Government monopoly. In 1924-25, 1,860 chests of Bengal opium were sold for export, in addition to 4,693 chests sold direct to Governments of Borneo, Netherlands (Indies), Hong Kong, Straits Settlements, &c. The gross revenue from Bengal opium, including the value of opium sold by the Excise Department for consumption in India, was £2,532,000. The expenses of production, &c., were £1,570,000. Formerly, most of the opium exported from India was consumed in China; but the Government of India, in furtherance of the efforts of the Chinese Government to suppress the growth and consumption of opium in China, decided in 1907 to reduce progressively the amount of Indian opium exported to China, and as from March 31, 1917, export of Indian opium to China is prohibited. In 1926 the Government of India announced its intention to restrict the export of opium except for medicinal purposes.

EXCISE.—Licence fees and duties are levied on the manufacture and sale of intoxicating liquors, opium, and other drugs. The revenue, owing partly to stricter administration and partly to enhanced duties, has greatly expanded in recent years, and amounted to Rs. 1,952 lakhs (£13,011,000) gross in 1924-25 (Central and Provincial Governments).

CUSTOMS.—The net revenue was 4,575 lakhs (£30,502,000) in 1924-25. (For tariff *see* pp. 603-4.) the export duty on rice yielded 119 lakhs (£792,000), and the countervailing duty on Indian cotton goods 212 lakhs (£1,415,000): the countervailing duty was abolished in 1926. The export duty on jute produced 371 lakhs (£2,476,000).

INCOME TAX is levied on non-agricultural incomes at the following rates:—

Annual Income.			*Rate of Tax per Rupee.**
Rs. 2,000 and over			5 pies
,, 5,000	,,		6 ,,
,, 10,000	,,		9 ,,
,, 20,000	,,		12 ,,
,, 30,000	,,		15 ,,
,, 40,000	,,		18 ,,

In the case of companies and registered firms, whatever the total income, the rate is 18 pies in the rupee.

Super-tax is leviable in addition to ordinary income tax on incomes of Hindu undivided families at 1 to 6 annas in the rupee on incomes over Rs. 75,000, and on the taxable incomes of companies above Rs. 50,000 at a flat rate of 1 anna in the rupee. Rs. 1,62½ lakhs (£10,808,000) were received from taxes on income in 1924-25.

STAMPS.—Stamps yielded 1,327 lakhs gross (£8,846,000) in 1925-26. About two-thirds of the revenue is from court fees and one-third from commercial stamps.

SALT.—The salt duty was reduced from Rs. 2½ to Rs. 2 a maund (82 lb.) in 1903, to Rs. 1½ in 1905, and to R. 1 in 1907. It was increased to Rs. 1¼ on March 1, 1916, to Rs. 2½ from March 1, 1923, and reduced to Rs. 1¼ from March 1, 1924. Rs. 739 lakhs (£4,927,000) was received from salt in 1924-25.

FORESTS.—About 99,000 square miles of forests are reserved and scientifically worked by the State, while about 150,000 square miles besides are under State control. A third of the revenue comes from Burma.

POSTS AND TELEGRAPHS.—The Post Office in 1924-25 conveyed 1,244 million of letters, postcards, newspapers, &c., and issued 34 million of money orders. Inland letter rates are the lowest in the world. The length of telegraph wires in India on March 31, 1925, was 477,839 miles, and the number of messages sent in 1924-25 was nearly 20 millions. The capital outlay amounted to Rs. 2,189 lakhs (£14,596,000) at the end of 1924-25. The Indian Postal and Telegraph services were amalgamated on April 1, 1914. The combined services showed for the year 1925 a surplus of 74 lakhs (£475,000). The net receipts of the Indo-European Telegraph Department amounted to 11 lakhs (£73,000) in 1924-25. Its capital expenditure to the end of 1924-25 was £1,215,000.

* 12 pies = 1 anna; 16 annas = 1 rupee; 10 rupees = £1 (statutory rate), but at present the rupee has a fluctuating value. *See* recommendations of Royal Commission, p. 583.

RAILWAYS.—Nearly all the railways in India are owned by the State and administered by a Railway Board, though many are leased to and worked by companies. The mileage open for traffic on March 31, 1925, was 38,270. Of the mileage open about 50 per cent. was on the standard gauge (5½ ft.), and about 41 per cent on the metre gauge. On March 31, 1925, the total capital at charge was Rs. 740 crores (£493,700,000). The net earnings of the railways in 1924–25 amounted to 4,538 lakhs (£30,257,000), showing a percentage of 6·2 on total capital at charge. The number of passengers "operating" was 576 millions, and the goods traffic amounted to 77 million tons. Rates are very low, third-class passengers travelling on the average over four miles for a penny. The net gain from State railways was 678 lakhs (£4,523,000) in 1924–25. The total capital expenditure on State and other railways in 1924–25 was 1,550 lakhs (£10,333,000).

IRRIGATION.—The total capital outlay on State irrigation works up to March 31, 1925, was £62,390,000, which, apart from the advantages to cultivators and protection against famine, yielded a profit to the State, after payment of interest charges, of about £2,316,000. The area irrigated by Government irrigation works, excluding the Indian States, amounted to 27·2 million acres, while the annual value of the crops raised amounted to over 1½ times the total capital expended on the works. Two-fifths of the irrigation revenue comes from the Punjab.

HOME CHARGES.—The net expenditure in England, chargeable to Revenue, amounted in 1924–25 to £25,114,000. The main items were:—Interest on Railway Debt and Annuities, £8,388,000; Interest on Ordinary Debt, £4,523,000; Stores, £2,729,000, of which £2,221,000 was for Marine and Military Stores; payments for British forces, troop service, &c., £2,985,000; Army non-effective charges, £3,625,000; Civil annuities, pensions, &c., £1,887,000; Furlough payments, civil and military, £1,294,000; home administration, £216,000. The expenditure of the Indian Government in England is met by bills or telegraphic transfers drawn on India by the Secretary of State, and sold by him in London for sterling.

CURRENCY.—The principal coin in use is the silver rupee, containing 165 grains of fine silver and 15 grains of alloy, and weighing in all 180 grains troy. Up to 1893 the Indian Mints were open by law for the unrestricted coinage of silver into rupees. Owing, however, to the almost continuous fall in the value of the rupee from 1871 to 1893, legislation in the latter year closed the mints to the public, with a view to eventually fixing the exchange. For a time the rupee continued to fall, but subsequently it rose, and between 1898 and 1916, was practically stable at 1*s.* 4*d.* The Act of 1899 made the British sovereign legal tender in India at the ratio of 15 rupees to the sovereign, the rupee, however, remaining also legal tender to any amount, but the ratio was altered to 10 rupees in 1920. In 1907 it was decided that half the profit on silver coinage should be applied to capital expenditure on railways; the other half of the profit, and the whole of the interest, being added to the gold standard reserve. In June, 1912, it was decided that no portion of the profit was to be used for railway purposes until the total sterling assets of the Gold Standard Reserve amounted to £25,000,000. From April 1, 1921, the interest on investments in the Gold Standard Reserve, when that Reserve reaches £40,000,000, is appropriated in reduction of the rupee securities created for the special purpose of the Currency Reserve. The total receipts from profit on coinage, interest and discount, and profit by exchange up to March 31, 1926, amounted to £50,341,000. Of this sum £1,123,655 has been used for capital expenditure on railways; the remainder has been paid to the Gold Standard Reserve, for the purpose of maintaining the rate of exchange between England and India. On March 31, 1926, the investments of this fund in sterling securities amounted to £39,999,175 (estimated value), while £825 was held in cash in England. India has a paper currency. The 1, 2½, 5, 10, 50, and 100 rupee notes are legal tender everywhere in India, but other notes only within their circles of issue. In 1918 a branch of the Royal Mint was established at Bombay for the minting of gold coins.

ARMY.—The Army in India consists, first, of British troops, about 68,000; and, secondly, of Indian troops (largely Muhammadans), about 164,000, excluding followers. In addition, the Indian State troops furnished by Indian States contribute 21,000, including cavalry, transport corps, and sappers. Further, there are 37,000 European and Eurasian volunteers (efficients). For police duties and frontier service the regular military is supplemented by frontier militia and local levies. During the period (1902–9) when Lord Kitchener was Commander-in-Chief, considerable changes were effected in the organisation and training of the Army. On June 1, 1907, there was a redistribution of the Army of India. The net military expenditure (including marine) has risen from about £20,000,000 in 1912–13 to about 5,563 lakhs (£37,090,000) in 1924–25. The estimated net expenditure for 1926–27 is 5,488 lakhs (£36,587,000). During the Great War of 1914–18 the Government of India recruited on a voluntary basis over 800,000 combatants and more than 400,000 non-combatants, giving a grand total of about 1·3 million men. 1,215,000 officers and men were sent on service overseas from India; the total Indian casualties were 101,000. In 1917 the bar hitherto precluding the admission of Indians to King's Commissions was removed; the pay and pensions of the Indian soldiery were improved. India has an Auxiliary Force on a volunteer basis. Ague is the chief cause of sickness among British troops, and enteric fever the chief cause of death.

The ROYAL INDIAN MARINE consists of 10 sea-going vessels, and numerous smaller steamers and launches.

Director R.I.M., Bombay, Capt. E. J. Headiam, C.S.I., C.M.G., D.S.O.....Rs. 2,800

In 1926 it was decided that the Royal Indian Marine shall be abolished, and that the vessels shall be transferred to the Royal Indian Navy, which will take its place, and will be constructed as a combatant force to enable India to enter upon the final stage of her development, and ultimately to undertake her own naval defence. The fleet will consist, in its first stage of development, of four sloops, two patrol-craft vessels, four trawlers and two survey ships, together with one depôt ship. Indians will be eligible for commissioned rank.

EDUCATION.—Elementary education is based, so far as possible, on an adaptation of indigenous institutions and traditions. Higher education is an imported product. It is popular, and has undoubtedly been attended with beneficial results. As is natural with an imported product, its development is marked by some crudities, and its influence has to some extent been unsettling. It has appealed to the natural intellectuality of the people, and has succeeded only partially in stimulating practical application. There are 15 Universities, viz., those of Calcutta, Madras, Bombay, Allahabad, Benares (Hindu), Patna, Dacca, Aligarh (Muhammadan), Lahore, Hyderabad, Mysore, Lucknow, Rangoon, Nagpur and Delhi. In State institutions education is secular. The institutions in 1924–25 numbered 228,229, and the scholars 9,797,344, including 1,045,882 females, excluding scholars in night schools in some Provinces. Of the institutions, about 75 per cent. are maintained by the State or aided by grants, the rest being private and unaided. Of the total expenditure on education in 1924–25, £13,926,000, £3,124,000 came from fees, and £8,476,000 from Government revenues or local and municipal funds. The census of 1921 showed that only 139 males and 21 females per thousand are literate, in the sense of being able to write a letter and read the reply thereto.

LOCAL SELF-GOVERNMENT, municipal and rural, in its present form, is a product of British rule. The municipalities at the end of 1924–25 numbered 763, controlling a total population of nearly 19 millions, and receiving an income of £7,378,000 from rates and taxes (octroi, taxes on houses and lands, water, lighting, and conservancy rates, &c.) and £2,328,000 from other sources (excluding loans). Out of 12,158 members of municipal bodies 1,044 were officials and 11,144 non-official. In almost all districts in British India there are local district boards, partly representative. Over 30 per cent. of their total expenditure of about £8,087,000 in 1924–25 was devoted to civil works, 37 per cent. to education, and the remainder largely to sanitation and hospitals.

JUSTICE, POLICE, AND PRISONS.—There are over 9,460 officers exercising civil and criminal jurisdiction. Many of the superior and the great majority of the inferior officers are Indians. In 1924, 2,193,000 civil suits were instituted; 2,298,000 persons were tried, and 1,067,000 convicted, in criminal cases, of whom 692 were sentenced to death and 556 executed, 1,585 to transportation, and 173,257 to imprisonment. The strength of the police in 1924 was 14,083 officers and 182,099 men. There were 770 prisons, with a daily average of 127,178 prisoners. At the convict settlement of Port Blair (Andamans) there were 8,139 prisoners on March 31, 1925.

VITAL STATISTICS.—The reporting of vital occurrences is still defective. The recorded death rate for British India in the decennium ended 1913 ranged between 38·21 per 1,000 in 1908 and 28·72 in 1913; it was 35·9 per 1,000 in 1919 and 28·49 in 1924. There were over 12 million deaths from influenza during 1918–19. Fevers of various kinds are by far the commonest cause of death, cholera, dysentery and diarrhœa, smallpox, and (since 1896) plague being other chief causes. The reported deaths from plague up to the end of 1924 were about 11,581,000 in India as a whole. Over 19,800 people were killed by snakes and 2,590 by wild animals in 1924. In 3,688 hospitals and dispensaries, maintained mostly from public funds, 39,600,000 patients were treated in 1924. The number of persons vaccinated in 1924–25 was 10,712,000. According to the census of 1921 there were 102,400 lepers.

SURVEYS.—The Survey Department superintends forest and cadastral surveys, as well as trigonometrical and topographical surveys, special explorations, and map production. Marine, geological, botanical, and archæological surveys are in operation. The Meteorological Department is of great service in forecasting rainfall.

TRADE OF INDIA.—Among the countries constituting the British Empire, India comes second to the United Kingdom itself in the volume of its sea-borne trade, which almost equals that of Canada and Australia combined. The ordinary course of Indian trade shows yearly a large net export of merchandise and a net import of treasure. The table (p. 598) exhibits the leading figures for the last five years in thousands of pounds sterling (Rupees being converted at the rate of 15 to the £).

During the year 1925–26 as compared with 1924–25 the value of the imports decreased by Rs. 6,118 lakhs (£40,784,400), and the exports decreased by Rs. 1,473 lakhs (£9,826,186). In imports the principal articles showing increases were:—Motor cars and cycles (£418,000); mineral oils (£467,000); spices (£414,000); provisions (£397,000); instruments (£343,000). There were large decreases in cotton yarns and manufactures, sugar, dyes, metals.

In the export trade (Indian merchandise) raw jute increased by £5,902,000; jute manufactures by £4,715,000; raw cotton by £2,509,000, and rubber by £1,008,000. There were decreases in grain and flour (£11,351,000); tea (£4,181,000); seeds (£2,354,000); petroleum (£1,034,000); and raw wool (£848,000).

As will be seen, the bulk of the imports consists of manufactured articles, while two-thirds of the exports consist of food, tobacco, and raw materials.

The following statement shows the chief articles of the foreign trade of India in 1925–26 (converted at Rs. 15 = £1):—

CUSTOMS DUTIES.—The general import tariff is 15 per cent. *ad valorem*. The principal exceptions to the general rate are as follows:—Cotton twist, yarn and thread pay 5 per cent., other cotton goods 11 per cent. Arms and certain "luxury" articles, including gold and silver manufactures, motor cars, &c., and silk piece goods, pay 30 per cent., sugar 25 per cent., cigars 75 per cent., cigarettes Rs. 7 or Rs. 10 As. 8 per 1,000, spirits generally Rs. 21 As. 14 a gallon, salt Rs. 1¼ a maund (82 lb.), gold and silver plate 30 per cent., Kerosene As. 2 p. 6, and motor spirit, 4 As. per gallon, mineral oil 7½ per cent.; (an excise duty of As. 6 per gallon is levied on motor spirit and an excise duty of A. 1 per gallon on kerosene produced in India), coal As. 8 a ton. Some machinery and certain iron, steel, and railway materials pay 10 per cent. A few other articles pay 2½ per cent. There are protective duties at special rates on coal tubs, and on iron and steel and certain manufactures thereof. The duty on manufactured tobacco is Rs. 2 As. 4 per lb., matches Rs. 1 As. 8 per gross, splints for match-making 4½ As. per lb., veneer for making match boxes 6 As. per lb., beer As. 8 per gallon, perfumed spirits Rs. 36 a gallon. Gold, metallic ores, living animals, raw hides skins,

raw cotton and wool, certain agricultural requisites, quinine, and a few other articles are free. There are export duties of As. 3 a maund on rice, Rs. 1½ per 100 lb. on tea, Rs. 4½ per bale of 400 lb. on raw jute other than cuttings, in the case of which the rate is Rs. 1¼ per bale; Rs. 20 per ton on jute sacking, Rs. 32 per ton on hessians, and 5 per cent. *ad valorem* on raw hides and skins.

SHIPPING.—In 1924–25 the number of vessels engaged in the foreign trade which entered and cleared with cargoes and in ballast at ports in British India was 8,022, with a tonnage of 17,056,072. Of this tonnage, nearly 73 per cent. was under the British flag.

PORTS.—The chief ports are Bombay, Calcutta, Rangoon, Karachi, and Madras. The total value of the coasting trade was £141,000,000 in 1924–25.

FOREIGN LAND TRADE OF INDIA.—The most important countries in the land trade are Nepal and the Shan States. The imports of merchandise and treasure in 1924–25 were £15,393,000, and the exports £12,492,000.

AGRICULTURE is by far the most important occupation of the people of India. In British territory in 1924–25, 259,800,000 acres were cropped Of the total area cropped nearly 9 per cent. was under wheat, 30 per cent. under rice, and 39 per cent. under other food-grains and pulses, 5½ per cent. under oilseeds, and 7 per cent. under cotton, jute, and other fibres. Sugar, tea, and tobacco are other important crops. The total area under irrigation was 48 million acres.

BANKS.—In addition to the Imperial Bank of India, which is closely associated with the Government, there are joint-stock banks, European and Indian, and many small native banks. In 1924 there were 29 Indian joint-stock banks, whose head offices are located in India, in addition to 18 exchange banks, with head offices outside India, and 8 Indian co-operative banks, with capital and reserve of Rs. 5 lakhs and over. The capital of the Imperial Bank of England was Rs. 562 lakhs; reserve, Rs. 480 lakhs; deposits, Rs. 8,421 lakhs; and cash balance, Rs. 1,360 lakhs. The corresponding figures for the Indian joint-stock banks were: capital, Rs. 690 lakhs; reserve, Rs. 380 lakhs; deposits, Rs. 5,250 lakhs; cash balance, Rs. 1,130 lakhs. The 18 exchange banks with head offices not located in India had:—capital, £72½ million; reserve, £58 million; deposits, £845 million outside India, and Rs. 7,063 lakhs in India; cash balances £115 million outside, and Rs. 1,637 lakhs in India. The 8 Indian co-operative banks had a capital of Rs. 47¼ lakhs; a reserve of Rs. 21·7 lakhs; deposits, Rs. 451 lakhs; loans outstanding, Rs. 354 lakhs; and cash balances amounting to Rs. 19 lakhs. The proportion per cent. of cash to liabilities on deposit was:—18% in the case of the Imperial Bank; 20% for exchange banks doing a considerable portion of their business in India; 31% for other exchange banks; and 13 to 21% in the case of Indian joint-stock banks.

CO-OPERATIVE CREDIT SOCIETIES.—In 1924–25 there were in British India and Indian States 1,895 central, 64,281 agricultural and 5,432 non-agricultural societies, with a total membership of 2,629,830 and a capital of £32,128,000. The Central Banks shewed a profit of £258,174, and agricultural and non-agricultural societies £679,657.

MINERALS.—The output of coal in India in 1924 was 21,176,000 tons. The production has much increased in recent years. Nine-tenths of the total comes from Bengal and Bihar and Orissa. The production of crude petroleum in India (chiefly Burma) has increased from 19 million gallons in 1897 to 295 millions in 1924. The production of salt is about 1,444,000 tons. The production of manganese ore was about 803,000 tons, and of saltpetre 8,543 tons. The yield of gold (nearly all from Mysore) was about 396,000 oz. Monazite and tungsten ore have now taken an important place in the list of minerals of economic value produced in India. The output of the former in 1924 was 622 tons, and of the latter 739 tons.

MANUFACTURES.—In India the ancient village handicrafts still survive, though they suffer more and more from the competition of machine-made goods. Cotton-weaving is by far the most important hand industry. There were 6,406 factories in 1924 subject to the Indian Factories Act, employing 1,456,000 persons, including 235,000 women and 72,500 children; the percentage of factories maintaining a week of 48 hours or less for men is 27, the corresponding percentage for women was 31. The maximum weekly hours for children are 36. The 305 cotton mills at work in British India and Indian States in 1924–25, mostly in Bombay and Ahmedabad, contained 8,286,000 spindles and 150,680 looms. Up-country cotton mills have increased. In 1925–26 the production was 719 million lb. of yarn (mostly of low counts) and 465 million lb. of woven goods. There is a tendency to produce finer yarns and to pay more attention to weaving. The 90 jute mills, mostly situated in or near Calcutta, contained 1,067,000 spindles and 50,300 looms. There were, in 1924, 17 woollen and 8 paper mills, 13 breweries, and various other factories.

JOINT STOCK COMPANIES.—In 1924–25 there were 5,205 joint-stock companies registered in British India and in the Indian States, with a paid-up capital of Rs. 27,614 lakhs (£384,100,000). The companies were classified as follows:—Trading and manufacturing, 2,069; banking and loan, 923; tea and other planting, 498; mining, 358; cotton mills, 298; jute mills, 54; other mills and presses, 200; estate, &c., 103; insurance, 80; railways, transport, &c., 191; navigation, 26; sugar, 45; others, 360.

In addition there were 786 companies registered elsewhere than, but working in, British India and Indian States, with a capital of £648,000.

They were classified as follows:—Trading and manufacturing, 279; banking and loan, 32; tea and other planting, 210; mining, 35; cotton mills, 10; jute mills, 7; other mills and presses, 2; insurances, 138; railways and other transport, 36; navigation, 18; sugar, 2; others, 17.

INDIAN SYSTEM OF NOTATION.—The Indian numerical notation system differs from the European. Large numbers are punctuated as crores and lakhs and not in hundreds, thousands and millions. A *lakh* is one hundred thousand (written out as 1,00,000), and a *crore* is one hundred lakhs or ten millions (1,00,00,000). Thus, 1,68,00,000 is read as 1 crore 68 lakhs. A lakh of rupees (Rs. 1,00,000), may be read as equal to £6,666 at 15 rupees—the rate adopted for conversion in this article. The exchange value of the rupee has fluctuated considerably and is at present about 1*s.* 6*d.* (*See also* pp. 601). The rupee is divided into 16 annas and may be now considered as equivalent to 1*d.* The anna is subdivided into 12 pies (1/12*d.* approximate value).

STATES OF THE RULING PRINCES AND CHIEFS OF INDIA.

The States in India whose chiefs are in subordinate alliance with, or under the suzerainty of, the King-Emperor, comprise about two-fifths of the area, but only two-ninths of the population of India. Their administration, with a few unimportant exceptions, is not under the direct control of British officials, but it is subject, in varying degrees, to the Supreme Government. The chiefs are entitled to British protection, but have no power of making war and peace, or of sending ambassadors to one another or to foreign States; the military force they maintain is strictly limited; no European is allowed to reside at any of their courts without special sanction; and in case of misrule the Supreme Government can dethrone the chief or temporarily suspend him from the exercise of his powers. In matters of Imperial interest, trade, main lines of railway, &c., the Supreme Government has jurisdiction. Some States pay tribute, most do not. Tributes aggregating £549,000 (£233,000 from Mysore) were paid to the Government of India in 1924-25. Generally speaking, the States are governed by their Princes, Ministers, and Councils, with the advice of a political officer of the Supreme Government. This officer may have charge, as British Resident, of one large State, or may be the Agent for a group of States. A common characteristic of all Indian States, important or insignificant, is that in their territory British Indian law does not run. For them the Indian Legislature or the Provincial Legislative Councils cannot legislate; and over them the High Courts or Chief Courts of the Provinces have no jurisdiction.

The Assigned Districts of Mysore (Bangalore), Kalat (Quetta), and Berar are still technically Indian States territory. The Shan States, on the other hand, are technically part of British India, though administered by local Sawbwas or petty chiefs. Excluding these territories, the Indian States have a combined area of 711,032 square miles, and a population of 71,939 187. They maintain in the aggregate a considerable body of troops of inferior military organisation in addition to their Indian State forces. Many treaties provide that States shall furnish troops on the requisition of the Supreme Government, and troops of Indian States served in almost every Indian campaign of the 19th century. Lord Curzon inaugurated an Imperial Cadet Corps of Indian princes and nobles. The States vary greatly in size and importance. Hyderabad is nearly as large as Great

Britain, and the Nizam enjoys a very large revenue. On the other hand, in Kathiawar and elsewhere, where family custom has led to minute sub-division, there are many chiefs of single villages. In these petty estates the nominal chief may have some very limited magisterial powers, but the administration is regulated and carried on by the Supreme Government in its executive capacity. The amount of control thus exercised over an Indian State in its internal affairs depends on a number of considerations, and varies from State to State. The rulers have not necessarily any religious or tribal connexion with the majority of their subjects. Thus the Nizam of Hyderabad is a Muhammadan, but most of his people are Hindus. Although the Indian States, large and small, number 662, only about 200 are of any real importance. The majority represent the scattered military chiefships which sprang from the ruins of the Moghul Empire in the 18th century. The rulers of Gwalior, Indore, and Baroda are all descendants of successful generals who then rose to power. Most of these States are of more recent origin than the British power in India. A unique step was taken in 1910, when a new Indian State was created out of the family domains of the Maharaja of Benares.

The salutes enjoyed by the Indian princes indicate their relative importance. Those with eleven guns or more are addressed as His Highness. On pages 605–6 are the names of 73 ruling, chiefs who have salutes of eleven guns or more with some particulars of their States. Some well-known Indians of title, such as H.H. the Agha Khan, G.C.S.I., G.C.I.E., the Maharaja of Darbhanga, G.C.I.E., and the Maharajah of Burdwan, K.C.S.I., K.C.I.E., are not ruling chiefs.

The States of Hyderabad, Mysore, Baroda, Kashmir, Sikkim, and Kalat, and those belonging to the Rajputana and Central India Agencies, 175 in all, are under the direct supervision of the Governor-General in Council. The remainder, chiefly minor States, are under the supervision or control of various Provincial Governments. The States of first magnitude, which have a superior Resident, are Hyderabad, Mysore, Baroda, Kashmir, Jaipur, Udaipur, and Gwalior.

The Indian States may be thus classified:—

1. *Hyderabad*, the premier State in India (capital, Hyderabad, pop. 404,187—the fourth city in India). This State is in the centre of the Deccan or central plateau of Southern India. The ruling dynasty is of Turkoman origin, and is descended from Asaf Jah, who became Viceroy of the Deccan in 1712, and then independent of the Mogul Emperor. Telugu and Marathi are the chief languages. Wheat, rice, and cotton are produced. The Nizam's Guaranteed Railway is the principal line. 2. *Mysore*. This State, situated on a plateau in Southern India, was administered by the Indian Government from 1831 to 1881, when it was restored to native rule, under a somewhat strictly framed instrument of transfer. In Dec., 1913, the instrument was replaced by a new Treaty putting the relations between the British Government and the State on a footing more in consonance with the actual position of the Maharaja among the feudatory Chiefs of India. Kanarese and Telugu are the chief languages. There is a Mysore State Railway. Millets, pulses, and rice are the principal crops. Mysore has important goldfields. 3. *Baroda*, situated in Western India in Gujarat and Kathiawar and much interlaced with British districts. The reigning Gaekwar was the adopted heir of the ruler deposed in 1875 for misgovernment and misconduct. 4. The Himalayan Hill States, west of Nepal, including Kashmir. The important frontier State of *Kashmir* (capital, Srinagar, pop. 141,735) was granted to Gholab Sing by Lord Hardinge, after the First Punjab War (1846). It comprises Jammu, Kashmir, Ladakh, Gilgit, and Baltistan. A British force stationed at Gilgit watches the northern passes and controls the feudatory chiefships of Hunza and Nagar; while on the west the subordinate chiefship of Chitral is occupied by British troops, depending for their support on the Peshawar border 5. *Sikkim*, a frontier State situated on the borders of Tibet, between Nepal and Bhutan, acknowledged the British protectorate in 1890, when also the boundaries of Tibet were defined by the Sikkim-Tibet Convention. 6. The Sikh States, in the Sirhind plain, south of the Sutlej. The most important of these is *Patiala*. 7. Rajputana, comprising the ancient sovereignties lying between Sind and the United Provinces. *Rajputana* (pop. 9,844,384) extends some 460 miles from north to south, and is 530 miles in breadth, and is larger than the British Isles. About half of the area is desert. It comprises 20 States of varying size and importance. Of these 17 are ruled by hereditary Rajput chiefs, two by Jat chiefs, and one by a Muhammadan. The Governor-General's Agent's headquarters are at Ajmer; he has under him Residents for Eastern and Western Rajputana, and about twenty other officers, distributed among the States to supervise the administration, and give advice when it is required. The most important States are *Jodhpur* (*Marwar*), *Udaipur* (*Mewar*), and *Jaipur*. The Rajput dynasties, the most ancient in India, go back before the Mogul Empire, and resemble feudal monarchies. 8. The States of *Central India*, lying to the north of the Nerbudda and to the south and east of Rajputana, although in the aggregate one-third less in extent than those of Rajputana, are nearly four times as numerous. All but 17 are petty chiefships. The most important are *Gwalior* and *Indore*, which include between them one-half of the whole area. The 31 minor States of Bundelkhand (largest, *Rewa*) are in political relation with the Central India Agency *Bhopal*, one of the principal Muhammadan States in India. 9. The Malayalim States of *Travancore* and *Cochin*, lying together in S.W. India. These important States, attached to Madras Presidency, represent ancient Hindu dynasties. 10. The three northern Muhammadan States of Khairpur (Sind), Bahawalpur, and Rampur. 11. Kalat (including Makran and Kharan) and Las Bela, with tribal areas in the possession of the Marri and Bugti tribes. 12. Gujarat, including Kutch and the numerous petty chiefships of Kathiawar. 13. The Southern Mahratta States. 14. The numerous Afghan and Baluch tribes of the N.W. frontier, inhabiting the mountains from the north of Peshawar to the base of the Suleiman range, a distance of 800 miles. The names of some of these tribes, Waziris, Orakzais, Afridis, &c., have become familiar owing to the many expeditions against them. 15. The aboriginal Gond and Kol tribes, under petty princes of aboriginal or Rajput blood, in Chota-Nagpur, Orissa, the Central Provinces, and the Jaipur (Vizagapatam) Agency. 16. The Indo-Chinese group of States, and the numerous hill tribes of the N.E. frontier.

NEPAL.

Sovereign, His Majesty Maharaja Dhiraja Tribhuhana Bir Bikram Jung Bahadur Shah Bahadur Shamsher Jang; *succ.* 1911. Salute in British territory, 21 guns.

Prime Min., H. H. Maharaja General Sir Chandra Shamsher Jang, Bahadur Rana, G.C.B., G.C.S.I., G.C.M.G., G.C.V.O., D.C.L. Personal salute in British India, 19 guns.

Nepal (area, about 54,000 sq. miles; pop. 5,60c,000) lies between British India and Tibet on the S. slopes of the Himalayas, and includes Mt. Everest (29,141 ft.). Amid the sterile mountains lie many fertile valleys. The lower hills are covered with jungle, in which wild animals abound. Rice, wheat, &c., are grown. Nepal is divided into four provinces. In 1924-25 its exports to British India were £3,880,000, while its imports amounted to £1,863,000. The chief trade route is that between Kathmandu and the Bihar and Orissa frontier (76 miles). Nepal exports rice and other grains, hides, oilseeds, *ghi*, cattle, jute, &c., and imports cotton goods and yarn, sugar, salt, spices, metals, &c. The revenue, realised chiefly from land rent, forests, customs, &c., is over £1,000,000. The aborigines are Mongolian in type, and their religions are Buddhism and Hinduism. The country was conquered in 1769 by the Gurkhas, who are Hindus and claim to be Rajputs. Their frequent aggressions led to a war with the British in 1814-6. Relations have now long been friendly. The policy of seclusion is, however, consistently followed by the Nepal rulers. The real political power rests with the Prime Minister. This office is always held by a member of his family, the succession being determined by special rules. The present Prime Minister, Sir Chandra Shamsher Jung, paid a most successful visit to England in 1908. The army numbers about 45,000. By arrangement with Nepal, India obtains many fine recruits for its Gurkha regiments. During the Great War, and in the subsequent Afghan war, the Nepal Government rendered unstinted and unconditional assistance to the British Government in men, money and material. A new Treaty was concluded in December, 1923, between the British and Nepalese Governments, by which *inter alia* the internal and external independence of the State was recognised.

Bhutan (area, about 20,000 sq. miles; pop. about 250,000, mainly Buddhists) also lies on the S.E. of the Himalayas, and its products resemble those of Nepal. In 1863, owing to outrages on British subjects, portions of it were annexed to India, an annual allowance being paid by the Indian Government as compensation. By a treaty in 1910 this allowance was fixed at £6,667, and Bhutan agreed to be guided in its external relations by the advice of the British, who, however, will not interfere in its internal affairs. The former dual government of a spiritual chief and a temporal chief came to an end when the Tongsa Penlop, the chief councillor and virtual ruler, the late Sir Ugyen Wangchuk, K.C.S.I., G.C.I.E., was chosen hereditary Maharaja in 1907. He has a salute of 15 guns in British territory. The estimated annual revenue is £13,000. Bhutan's total trade with India in 1924-25 was over £65,000. There is no British Resident.

AFGHANISTAN.

Amir of Afghanistan and its Dependencies, H.M. Amir Amanulla Khan; *succ.* 1919. Salute in British territory, 21 guns.

Afghan Minister in London, Shuja-ud-Daula Khan, 25 Knightsbridge, S.W. 1.

Afghanistan lies on the N.W. frontier of India. Estimated area, 245,000 sq. miles, and pop. 6,380,500. It is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1896–7), on the N. by Asiatic Russia (boundary fixed 1886–7 and 1893–5), and on the E. by the N.W. Frontier Province (boundary fixed 1895). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus on the branch line from Merv, and thence N.E. to the Oxus, which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1895. The Indo-Afghan frontier was settled by the Durand agreement of 1893. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures. The population is very mixed. The Duranis have predominated since 1747, especially in Kandahar; next come the Ghilzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Muhammadans, except the Hazaras and Kizilbashes, who belong to the Shiite sect. The national tongue is Pushtu, but Persian is more universally spoken.

Afghanistan is divided into five major provinces, Kabul, Kandahar, Herat, Turkestan, and Badakshan (with Qataghan, Kafiristan (now Nuristan), and Wakhan), and four minor provinces, the Eastern, Southern, Farah, and Maimena, which are under governors, with subordinate nobles and judges, police, and revenue officers. Amir Abdurrahman (1880–1901) established a strong central government, with a regular civil and military organisation, including offices for public works, posts, police, finance, trade, &c. He first formed a national army, paid and controlled by himself. It comprises about 90,000 regulars and irregulars, but lacks discipline and cohesion. Considerable quantities of rifles and artillery have been purchased in Europe under arrangements made with the Government of India. Factories for arms and ammunition, and for various commercial products, have been erected in Kabul. The Afghan laws are Islamic sacred laws, tribal laws, and those of the Amir, who is the Court of Appeal. They have recently been codified under the name of the "Fundamental Law." Recently steps have been taken to develop education, hitherto controlled by the mullahs. Two schools under French and German superintendence respectively have recently been opened. Most of the people are industrious cultivators, and the country has become fairly settled, peaceful, and prosperous. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet,

maize, and *dal*. Afghanistan is rich in fruits. Sheep and transport animals are bred. Silk, woollen, and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, and gold are found. The roads are generally unsuitable for wheeled traffic, but are being improved. Goods are conveyed by pack animals. The chief trade routes to India are the Khaiber Pass route, from Kabul to Peshawar (220 miles), along which a motor service was established by the late Amir, and the road from Kandahar to Chaman (70 miles). The Sind-Pishin railway is now completed to the Baluchistan-Persian frontier. The trade of Afghanistan with India in 1924–25 was about £3,640,000. The exports to India are mainly fruits and nuts, raw wool, and *ghi*; while the imports therefrom are chiefly cotton yarn and piece goods, metals, leather goods, tea, and sugar. The Afghan customs duties are heavy. There is a large export of wool to Persia and Russia, cotton and silk goods, sugar, &c., being taken in exchange. The annual revenue is unknown, and consists largely of payments in kind. It may amount to £1,500,000. There are taxes on land, a grazing tax, customs duties, stamps, fines, poll-taxes, receipts from State lands, monopolies, and factories, and mining royalties.

As the result of a British mission to Kabul in 1904–5 the engagements which had existed with the Amir Abdurrahman since 1880 were renewed by the treaty of March 21, 1905. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence.

His Majesty the late Amir Habibullah Khan was assassinated on February 20, 1919; his brother, Nasrulla Khan, by a *coup d'état* thereupon seized and temporarily held the reins of government at Kabul, but the Amir's third son, Amanulla Khan, soon after declared himself, and was recognised as, Amir. Afghan troops crossed the Indian frontier on May 3, on which the Indian Government took immediate steps to expel them; fighting followed and Dakka was occupied by British troops, but overtures were made by the Amir and a treaty of peace was signed in August. By this treaty Afghanistan is left officially free and independent.

A treaty was signed by representatives of Afghanistan and Great Britain on the Nov. 22, 1921, by which the two Governments agreed to respect one another's internal and external independence; to recognise boundaries then existent, subject to a slight re-adjustment near the Khyber; to receive Legations at London and Kabul and consular officers at Delhi, Calcutta, Karachi, Bombay and Kandahar and Jalalabad respectively. The Afghan Government are allowed to import free of customs duty such material as is required for the strengthening of their country. The export of goods to British territory from Afghanistan is permitted. A Trade Convention has been concluded and one to deal with Posts and Telegraphs is under consideration.

MESOPOTAMIA AND THE PERSIAN GULF.—For three centuries England has taken the lead in the Gulf trade. She has suppressed piracy, slavery, and inter-tribal warfare on land and sea, made surveys, and laid down buoys and cables. Vigorous measures have been taken against gun-running. England and India still have the lion's share of the trade, the bulk of which is conducted by Indians, who make Bombay their *entrepôt*. The Arabian shores are low-lying deserts, the Persian coasts mountainous; at the head of the Gulf are great alluvial plains. The heat is intense in summer. Natural harbours are few. The British Government have been entrusted with the mandate for Mesopotamia. Municipal Councils, representative divisional councils, and a Council of State have been set up. Emir Feisal was elected King in 1921. The port of Basra has been greatly developed and a large capital expenditure has been incurred on railways during the British occupation. *High Commr., Mesopotamia*, Sir Henry Dobbs, K.C.S.I., K.C.I.E. (*See also* pp. 763–5.)

Bahrein (capital, Manama), governed by Sheikh Sir Hamid Isa bin Ali al Khalifah, K.C.I.E., C.S.I., and under the protectorate of the Indian Government, is the largest of a group of islands half-way up the Gulf, near the Arab coast (El Hasa). It is the headquarters of extensive pearl fisheries, and a distributing centre for the adjacent mainland. Pearls are the only notable export; rice, cotton goods, dates, sugar, and spices the chief imports. In 1923–24 the value of the exports was £808,539, and of the imports £1,721,686. The people (about 115,000) are Muhammadans. The Sheikh has been in treaty relations since 1820 with the Government of India, who have a Political Agent at Bahrein. In 1880 he engaged not to make treaties with any other State.

The Sultan of *Oman* (Muscat) is in treaty relations with, and subsidised by, the Government of India, who have a Political Agent at his Court.

The independent tribes on the *Pirate* (Arab) *Coast* from Ras-el-Kheima to Odeid are bound under treaties with the Indian Government (dating from 1820, and confirmed in 1853 by a Treaty of Perpetual Peace) to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs. The British Political Resident in the Persian Gulf is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In 1892 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the Arab coast ports largely consists in exports of pearls to India *viâ* Lingah and Bahrein.

Important caravan routes converge at *Koweit*, which has an excellent harbour. The Sheikh is under treaty obligations with the Indian Government.

PERSIA (*q.v.*) borders on Baluchistan and Afghanistan. The demarcation of the Perso-Baluch frontier, partially carried out in 1872 and 1895, was completed in 1905.

ASIATIC RUSSIA.—A portion of what was once the Russian Empire is conterminous with Persia and Afghanistan. The Trans-Caspian Railway runs, *viâ* Merv, to Samarkand and Andijan, with a branch to Tashkent. The Murghab Valley branch from Merv to Kushk on the Afghan frontier, opened in 1898, brings the Russian railways within 70 miles of Herat, and within 450 miles of the Chaman terminus of the Indian railways. Another important strategic line connects Tashkent directly with Orenburg. The Amu-Darya, or Oxus, which separates Bokhara from Afghanistan for 330 miles, is navigated by Russian steamers.

CHINA.—India is in contact with two dependencies of China, Chinese Turkestan and Tibet, and one province, Yunnan.

Chinese Turkestan is surrounded by the mountains of Tianshan, the Pamirs, and Kuenlun. There are three difficult passes into Russian Turkestan and two still more difficult ones into India. The boundary between Kashmir and Chinese Turkestan has not been officially defined. There is a British consul-general at Kashgar (Brevet-Major G. V. B. Gillan). Trade with India is chiefly carried over the Karakoram Pass (18,500 feet) *viâ* Ladakh, in Kashmir.

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly defined), from Kashmir to Burma, but is separated therefrom by the Himalayas. India imports from Tibet wool, borax, salt, and musk, in exchange for cotton and woollen goods and grain. The total trade in 1924–25 was about £772,000. Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces. Under the Anglo-Chinese Sikkim Convention of 1890, a trade mart was opened at Yatung; but as the Tibetans persistently disregarded the Convention, a political mission was despatched from India, with a military escort. It reached the capital, Lhasa, after sharp fighting, on August 3, 1904. A new Convention was signed (Sept. 7), providing for the erection of boundary pillars between Sikkim and Tibet; for three trade marts, with British and Tibetan agents; for unrestricted traffic by existing routes; and for payment of an indemnity. The Tibetans pledged themselves not to alienate any territory or grant concessions to, or permit the intervention of, any foreign Power. By the Convention of Peking (April, 1906) China accepted the Conventions of 1890 and 1904, and declared that no foreign State should interfere in Tibet, while England also undertook not to interfere in the administration of Tibet or annex territory. By the Anglo-Russian Convention of Aug., 1907, both Powers recognised the suzerain rights of China in Tibet, agreed to maintain its territorial integrity, to refrain from intervention in its internal administration, to treat with Tibet only through the Chinese Government, not to send representatives to Lhasa, not to assign any territory to either Power, and not to obtain railway, mining, or other concessions; but direct relations between British commercial agents and Tibetan authorities under the Conventions of 1904 and 1906 are permitted. In Dec., 1905, the ruler of Tibet, the Tashi Lama, visited India. The Dalai (or Sacred) Lama, who fled before the British advance on Lhasa, returned to Tibet in Jan., 1910. The Chinese had meanwhile strengthened their hold over the administration, despite the opposition of the Lamas, or monks, who resented the loss of their authority. In Feb., 1910, the Dalai Lama again fled to India, pursued by Chinese troops. He was then deposed by the Chinese Emperor. The British Government refused the Dalai Lama's appeal for their intervention, but allowed him to remain at Darjilling. He left India in June, 1912, for Lhasa, where sharp fighting occurred between the Chinese and Tibetans, the former being worsted. In August, 1912, the British Minister at Peking presented a Note to the Chinese Government, urging that China should not actively intervene in internal administration in Tibet. To this the Chinese Government agreed, and representatives of the British, Chinese and Tibetan Governments met in conference at Simla in Oct., 1913, to discuss the relations between the three countries. A convention, the terms of which have not been made public, was initialled by the three representatives, but the Chinese Government have so far refused to ratify it.

Yunnan is a Chinese province to the N.E. of Burma. By Anglo-Chinese agreements of 1894 and 1897 a boundary was fixed between Burma and Yunnan, and arrangements were made regarding trade, extradition, &c. Part of the boundary is still undefined. By an agreement of 1896 Great Britain and France agreed to share equally all privileges or advantages that might be conceded by China in Yunnan. Trade with Yunnan is chiefly by a difficult route from Bhamo, in Upper Burma. The direct trade was about £1,743,000 in 1924–25. Burma imports from Yunnan hides, raw silk, &c., and exports cotton goods, &c. Tēng-yuēh and Ssumao, near the Burma frontier, are treaty "ports." There are British consuls at Tēng-yuēh and Yunnan-fu.

SIAM (*q.v.*) marches with Burma for many hundreds of miles through mountainous country, and considerable trade is carried on over this frontier, mainly with Chiengmai. Burma imports from Siam teak, cattle, silk goods, &c., and exports cotton goods, &c. In 1924–25 the value of the total trade was about £533,000. The boundary of Burma and N.W. Siam was demarcated in 1892–3. France in 1904 recognised the portion of Siam west of the Menam basin, including the Malay peninsula and adjacent islands, as within the British sphere of influence.

Canada was originally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first settlement (Quebec) was founded by them in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of THE DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America.

The Dominion of Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska and part of the coast of Labrador), from 49° North latitude to the North Pole, and from the Pacific to the Atlantic Ocean.

Relief.—From a physical point of view Canada may be divided into an eastern division, a western division, the Red River Valley, in long. 97°, forming the separating line, and a northern division. The eastern division comprises two areas, presenting radically distinct aspects:—(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Montreal, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 95,000 square miles, contributing to the great river system of the St. Lawrence. The northern division, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, is pre-eminently a region of waterways, and including the great Laurentian mountain range. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to may also be said to possess two areas equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 49° and 54°, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second area, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains (Mount Robson, 13,068 feet) and the Selkirk and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded. The highest mountain peaks in Canada are Mount Logan, 19,850 feet, and Mount St. Elias, 18,008 feet, both in the Yukon.

Climate.—The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months. The soil is generally fertile and all the products of the temperate zone are cultivated.

THE LEGISLATURE.

Parliament consists of a Senate and a House of Commons. The *Senate* consists of 96 members, nominated for life by the Governor-General, distributed between the various provinces thus: 24 for *Ontario*, 24 for *Quebec*, 10 for *Nova Scotia*, 10 for *New Brunswick*, 4 for *Prince Edward Island*, 6 for *British Columbia*, 6 for *Manitoba*, 6 for *Alberta*, and 6 for *Saskatchewan*; each Senator must be thirty years old, a resident in the province for which he is appointed, a natural-born or naturalised subject of the King, and the owner of a property qualification amounting to $4,000. The Speaker of the Senate is chosen by the Government of the day. The *House of Commons* is elected every five years at longest, and the Parliament consists of 245 members, elected as follows: 82 for *Ontario*, 65 for *Quebec*, 14 for *Nova Scotia*, 11 for *New Brunswick*, 17 for *Manitoba*, 14 for *British Columbia*, 4 for *Prince Edward Island*, 16 for *Alberta*, 21 for *Saskatchewan*, and 1 for *Yukon*. The House of Commons is also composed of natural-born or naturalised subjects of the King; no property qualification is necessary, its members are elected upon a very wide suffrage, and at the General Election in Dec. 1921 women exercised the franchise on the same terms as men for the first time in a Federal Election. For electoral purposes each province is divided into districts, returning a member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum. Members of the Upper and Lower Houses receive $4,000 per Session, with travelling expenses and deductions for non-attendance.

The Houses of Parliament were destroyed by fire on Feb. 6, 1916, the new buildings being started the same year; the foundation stone was laid by H.R.H. the Duke of Connaught (Gov. Gen.), Sept. 1, 1917, and the corner stone of the main tower by H.R.H. the Prince of Wales, Sept. 1, 1919. The Speaker's Chair in the new House of Commons (a replica of that at Westminster) was presented in 1921 by Viscount Ullswater (ex-Speaker of the House of Commons of the United Kingdom) on behalf of the Empire Parliamentary Association of the Houses of Lords and Commons.

THE JUDICATURE.

The Judicature.—Justice is administered, as in England, by judges, police magistrates, and justices of the peace, of whom the first-named are appointed by the Governor-General, for life from among the foremost men at the Bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and five puisne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by separate judges and its sittings may be held anywhere in Canada. The Provincial Courts include the Court of Chancery, Court of King's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure, while trial by jury prevails.

DEFENCE.

The Militia of Canada is classified as Reserve and Active, the latter being subdivided into Permanent and Non-permanent Forces. The *Permanent Force* consists of 15 units of all arms of the service, with an establishment limited to 10,000 (with a strength in 1925 of 3,600). The *Non-permanent* Active Militia is made up of cavalry, artillery, machine-gun, signalling and other corps, with a total establishment of 10,509 officers and 112,352 other ranks. The *Reserve Militia* is a framework designed to serve as a basis for contingent military organisation; drill and training are voluntary and entail no expense to the public.

Expeditionary Force in the Great War.—The number enlisted up to the cessation of hostilities was 595,441, of whom 418,052 were sent overseas. Over 80% of all enlistment was voluntary. The total outlay for the War is estimated at $2,000,000,000.

Royal Canadian Navy.

The Royal Canadian Navy consists (Oct. 1925) of 2 Destroyers and 4 Mine-sweepers on the Active List and 1 Light Cruiser and 2 Submarines on the Reserve List, with a personnel of 513 officers and men. There is also a Naval Reserve (500) and a Naval Volunteer Reserve (1,000).

Royal Canadian Air Force.

The strength of the Royal Canadian Air Force, permanent service, was on March 31, 1925, 66 officers and 313 men.

Royal Canadian Mounted Police.

Headquarters: Ottawa.

Secretary, G. T. Hann.

EDUCATION.

Education is under the control of the Provincial Governments, the cost being met by local taxation, aided by grants from the several Provincial Governments. There are (1925) 29,687 elementary and secondary schools (attendance at the former being compulsory except in the Province of Quebec), with 2,018,975 pupils; and 82 colleges with 21,367 students. The 23 universities had 49,843 students in 1924-25.

In 1925 the live stock included 3,554,041 horses, 9,307,298 cattle, 2,755,556 sheep, 4,426,148 swine, and 48,133,969 poultry.

In dairy produce the total Dominion output of butter was 179,932,993 lb., valued at $66,933,456, and of cheese 178,350,346 lb., valued at $36,781,343.

Fur Farming.—A comparatively new industry, but one which is assuming appreciable proportions, is that of fur farming. There were 1,550 fur farms in the Dominion in 1924, mainly in Prince Edward Island, 1,466 of which were fox farms, the remainder being divided between mink, raccoon, marten, skunk, fisher, Karakul sheep, beaver, and muskrat. The total number of animals on the farms at the end of 1924 was 37,101, valued at $8,389,497; born in captivity, 28,658; sold from farms, 13,022, value $2,549,180; pelts sold, 7,304, value $661,081, the total sale for live animals and pelts being $3,210,161 as compared with $2,174,365 in 1923.

Fisheries.—The fisheries are an important source of wealth, and include salmon, cod, halibut, whitefish, herrings, mackerel, and lobsters. The total value of the catch in the calendar year 1925 was $47,942,131 as against $44,534,235 in 1924 and $60,850,544 in 1918, the banner year of the fishery harvest. The capital invested in vessels, &c., engaged in catching operations in 1925 was $46,411,647, and the number of men employed 73,855. The number of canning and curing establishments in operation in 1925 was 852.

Lumbering.—The gross value of production, including (*a*) logging operations and (*b*) mill operations, was $220,968,765 in 1923, and $206,332,308 in 1924. The principal items of production in 1924 were sawn lumber $104,444,622, shingles $10,406,293, and laths $5,975,253.

Industrial Statistics.—Industrial establishments of all kinds in 1924 had a total capital of $3,538,813,460, the gross value of the products being $2,695,053,582. These industries employed 508,503 hands, the total pay roll for whom was $559,884,045.

Minerals.—Some minerals produced in 1925 were as follows: Gold, 1,735,735 oz. ($35,880,826); zinc, 109,268,511 lb. ($8,328,446); copper, 111,450,518 lb. ($15,649,882); nickel, 73,857,114 lb. ($15,946,672); lead, 253,590,578 lb. ($23,127,460); cobalt, 1,116,492 lb. ($2,328,517); silver, 20,228,988 oz. ($13,997,150); asbestos, 200,389 tons ($8,988,360); coal, 13,734,968 tons ($49,261,952); gypsum, 740,383 tons ($2,389,891); salt, 233,746 tons ($1,470,697); natural gas, 16,902,897 M. cu. ft. ($6,833,005). The total value of the mineral output, 1925, was $226,583,333.

Finance.—The Ordinary Receipts of the Provincial Government for 1924 were $40,540,924, and the Ordinary Expenditure $48,866,569.

Agriculture and Live Stock.—The total area is 234,163,200 acres, and in 1924 the area of cleared land was about 15,000,000 acres, of which 10,264,614 acres were under field crops. The total value of the agricultural production in 1921 was $463,381,991. Cheese factories produced 104,219,238 lb. of cheese in 1924 valued at $16,907,561, and creameries made 59,954,581 lb. of butter valued at $20,742,843. In 1924 there were 663,875 horses, 2,917,302 cattle, 870,279 sheep, 1,807,903 pigs, and 16,751,345 poultry. Free grants of land are obtainable in the great clay belt of Ontario, opened up by the Temiskaming and Northern Ontario railway. Improved farms, orchards and small holdings can be bought on reasonable terms in the older settled parts of the Province. There is a scheme of land settlement, with free land and financial assistance for returned soldiers, both Imperial and Canadian. There is always a demand for farm workers.

Log Products.—The gross production of logs and timber products and wood pulp amounted in 1923 to $128,328,088, or 30 per cent. of the lumber and pulp trade of the whole Dominion.

Manufactures.—Ontario is the chief manufacturing province of Canada. The total value of its manufactures in 1923 was $1,451,883,308. There were, in 1923, 262,770 employees, an invested capital of $1,775,493,340, and an annual wage bill of $268,662,730. The chief manufacturing centres in 1922 were Toronto ($394,065,052), Hamilton ($100,280,131), Ottawa ($49,202,686), Oshawa ($40,131,834), London ($35,487,959), and Ford ($31,690,257).

Minerals.—Ontario is the leading mineral Province in the Dominion, the output in 1924 being $75,556,333. The principal metals are gold, $25,669,262; silver, $6,717,975; nickel, $11,300,000; and copper, $3,808,000.

Hydro-Electric Power.—One of the greatest Government-owned public utility organisations in the world is the Ontario Hydro-Electric Commission, supplying light and power from Niagara and elsewhere. These works are now supplying over 400,000 horse-power, and further developments are under construction.

Principal Cities.—CAPITAL, TORONTO, population (1921) 521,893, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity; Hamilton, the "Birmingham of Canada" (114,151); Ottawa, the Federal capital (107,843), with a large lumber trade and woodenware manufactories; London (60,959); Brantford (29,440); Kingston (21,758); Peterborough (20,994); Windsor (38,591); Fort William (20,541); Kitchener (21,763); Guelph (18,128); St. Catharine's (19,881); Sault Ste. Marie (21,092).

QUEBEC.

Area and Population.—The Province of Quebec contains an area estimated at 703,653 square miles, with a population (1921) of 2,561,111, an increase since the last Census of 355,474. In 1912 the Province was enlarged by 351,000 square miles by the addition of the greater part of the Labrador Peninsula, known as *Ungava* (or New Quebec).

Government.—The Government of the Province is vested in a Lieutenant-Governor, the Council of Ministers, a Legislative Council consisting of 24 members appointed for life, and a Legislative Assembly of 85 members elected for five years, to represent the 86 electoral districts of the Province (Charlevoix and Saguenay counting as one).

Agent-General for Quebec in England, Hon. L. J. Lemieux, 38 Kingsway, W.C.2.

Finance.—The actual revenue for the year 1925-6 was $27,206,335 and the actual expenditure $26 686,189. The bonded debt (June 30, 1926) was $78,004,926 and the net funded debt $56,426,558.

Production and Industry.—The gross value of manufactured products in 1924 was $776,232,244, the principal manufacturing centres being (1924): Montreal ($444,852,084), Quebec ($29,362,009), Three Rivers ($28,903,467), Shawinigan Falls ($21,205,310), Valleyfield ($11,169,992), Sherbrooke ($10,881,569) and Hull ($10,056,907). The lumber industry is still by far the most important trade, but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to organise an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of over 130,000,000 acres, of which 45,000,000 are under licence to cut timber. The wood-pulp industry is assuming great importance; several large factories have recently been built, and the value of the output, which was only $2,516,683 at the Census of 1911, was, in 1925, $50,490,231. Improved farms may often be obtained in the eastern townships, largely occupied by settlers from Great Britain, at from £4 to £6 per acre, including dwelling-house, outbuildings, and fencing; while unimproved lands may be bought from the Government at 60 cents per acre, and the purchase-money paid in five instalments. The area of land subdivided for the purpose of settlement unsold on June 30, 1925, was about 8,000,000 acres. In 1925 the production of dairy industry products was cheese 51,761,908 lb. (valued at $11,185,139), and butter 49,128,804 lb. (valued at $19,538,651). In 1925 there were in the Province 345,079 horses, 1,841,558 cattle, 843,579 sheep, 784,143 swine, and 7,029,000 poultry.

Education.—The Superintendent of Instruction, assisted by a Council of 44 members, is invested with the central control of Education. The schools, both Roman Catholic and Protestant, are maintained partly by local taxation and partly by Government grants. There were, in 1924, 8,014 schools with 583,905 scholars, including the high and superior schools and 18 normal schools supported by the State. There are also Schools of Agriculture, Commercial and Classical Schools, and four Universities—two Protestant (McGill University, Montreal, and Bishop's College, Lennoxville); and two Roman Catholic (Laval University, Quebec, and Montreal University).

Principal Cities.—CAPITAL, QUEBEC (population, 95,193), historic city visited annually by thousands of tourists, and one of the great seaport towns of Canada; and Montreal (population, 618,506), the commercial metropolis, and the principal centre of the Canadian grain export trade, situate at the confluence of the Ottawa and St. Lawrence Rivers. Ocean-going steamers ascend the St. Lawrence as far as Montreal. Other important cities are Hull (24,117), Sherbrooke (23,515), Trois Rivières (22,367), Verdun (25,001). Population figures from the 6th Census (1921).

NOVA SCOTIA.

Area and Population.—NOVA SCOTIA is a peninsula between 43° 25′-47° N. lat. and 59° 40′-66° 25′ W. long., and is connected with New Brunswick by a low fertile isthmus about thirteen miles wide. It comprises an area (with Cape Breton Island) of 21,428 square miles (360 miles of which consists of lakes, rivers and inlets of the sea) with a total population, at the Census of 1921, of 523,837, an increase since the last census of 31,499 persons.

Government.—The Government is administered by a Lieutenant-Governor, aided by an Executive Council, a Legislative Council, and a Legislative Assembly of 43 members.

Agent-General for Nova Scotia in England, John Howard, 31 Spring Gardens, Trafalgar Square, S.W. 1 ..... $8,000

Agriculture and Live Stock.—About 10,000,000 acres are fit for tillage, and the soil is of good average fertility. The climate is delightful, the winter being less severe than in most of the other parts of the Dominion. In 1924 there were about 5,000,000 acres of land occupied, of which about 2,000,000 acres were under crop, 3,000,000 acres in pasture and partially wooded lands, and about 70,000 acres in gardens and orchards. Fruit is extensively cultivated, and Nova Scotia apples yielded a crop of 956,056 barrels in 1925, the principal fruit belt being the Annapolis Valley. The products of the farms in 1925 was valued at $39,120,000 (gross). Improved farms of 100 to 250 acres, with house and buildings, may be obtained at from £100 to £1,000, whilst the Government offer uncleared Crown lands at $80 per 100 acres, or 80 cents per acre for any additional quantity. Through the Land Settlement Act, the Government gives practical assistance to skilled farmers. There is a Government agricultural college and experimental farm at Truro for men and women, and a well-equipped technical college at Halifax. In 1925 the live stock included 291,972 cattle, 273,499 sheep, and 860,225 poultry.

Manufactures.—In 1924 the gross value of the manufactures was $64,573,092. The capital invested was $108,535,273, and 16,093 hands were employed; the principal industrial centres being Sydney ($6,540,934) and Halifax ($10,131,247).

Fisheries.—The total value of the fisheries in 1925 was $10,213,687, and the number of persons employed was about 20,000.

Minerals.—Mineral products in 1925 were valued at $17,625,612; the coal deposits are extensive and are estimated to last for 200 years. 3,842,978 gross tons were produced in 1925. Iron ores are plentiful, and extensive manufactures of iron and steel are carried on at Sydney and Sydney Mines, Cape Breton.

Principal Cities.—CAPITAL, HALIFAX (population 58,372), one of the terminals of the Intercolonial Railway Branch of the Canadian National Railways, with a magnificent harbour, is one of the principal winter ports of Canada, and the *entrepôt* of a large trade with the West Indies and South America. A shipyard for the building of large ocean-going steamers, with a dry dock, is one of the leading industries. Other towns are Sydney (22,545); Glace Bay (17,007).

CAPE BRETON ISLAND.

Cape Breton Island, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,975 square miles, with a population of about 130,000, inhabitants. The chief city, Sydney (pop. 22,545), on the eastern coast, has valuable collieries in the neighbourhood and is the site of the largest steel works in Canada. The plate mill recently erected will supply the steel plates required by the various steel shipbuilding plants of Canada. The Canadian National Railway connects the island with the mainland by rail.

NEW BRUNSWICK.

Area and Population.—NEW BRUNSWICK is situated between 45°—48° N. lat. and 63° 47′—69° W. long., and comprises an area of 27,985 square miles, with a population in 1921 of 387,876, an increase since the last census of 35,987 persons. It was first colonised by British subjects in 1761, and in 1783 by the inhabitants of New England, who were dispossessed of their property in consequence of their loyalty to the British Crown.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 48 members elected by the people.

Lieutenant-Governor, Hon. William F. Todd, LL.D. $9,000

Executive.

Premier and Attorney-General, Hon. J. B. M. Baxter..... $3,000
Minister of Public Works, Hon. D. A. Stewart 3,000

The live stock (1925) included 216,486 cattle, 151,349 sheep, 60,370 pigs, and 50,008 horses. Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. The fisheries include salmon, cod, mackerel, herring, and shad; value of the fisheries (1925) $4,798,589. In 1925 the cheese factories in operation produced 1,130,773 lb., value $230,434, and the creameries 1,279,472 lb. of butter ($469,318).

Manufactures.—The gross value of the output of manufactured goods in 1924 was $67,456,026, the principal manufacturing centre being St. John ($26,552,152). The chief industrial pursuits arise from the produce of the forests and the fisheries. Natural gas has been found in immense quantities in Albert County, and the south-eastern section of the Province is remarkably rich in oil shales. Coal is found; also silver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable quantities.

Principal Cities.—CAPITAL, FREDERICTON; population (1921), 8,114. St. John (pop. 47,166) is one of the principal winter ports of Canada, and is connected by C.P.R. and Canadian National Railways with Montreal; Moncton (17,488).

MANITOBA.

Area and Population.—Manitoba, originally the Red River Settlement, is situated in about the centre of the continent, between 49° 50° N. lat. and 95° 101° W. long., with a total area of 251,832 square miles and a population (1921 Census) of 610,118, an increase since the last census of 148,724, or 32·23 per cent.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 6 Ministers, who are members of the Legislative Assembly of 55 members, each in receipt of an annual sessional allowance of $1,500.

Lieut.-Governor, Hon. Theodore Arthur Burrows $9,000

Finances.—The ordinary receipts of the provincial government in 1924 were $19,621,208, and the expenditure $21,476,272.

Agriculture and Live Stock.—The field crops of British Columbia were valued in 1924 at $17,392,000, which was a falling off from previous years. The live stock (1924) included 42,555 horses, 262,122 cattle, 54,218 sheep, 42,672 swine and 2,191,605 poultry. The butter output totalled 3,671,370 lb., valued at $1,374,340, and the cheese 317,539 lb., worth $79,744.

Production and Industry.—The gross value of the output of manufactures in 1923 was $175,606,992, the principal manufacturing centres being Vancouver ($71,221,905), Victoria ($10,498,975), New Westminster ($7,809,423) and Prince Rupert ($2,322,375). The yield of the other industries in 1924 was: minerals, $52,208,533; lumber, lath and shingles (1923), $49,729,827; fisheries, $21,257,567. There are extensive coal measures, and a vast and compact area of merchantable timber; the mines have produced over $800,000,000, and are still in the early stages of development. Only one-tenth of the available agricultural and fruit lands is at present settled, and there are miles of pulpwood as yet unexploited. There are undeveloped deposits of magnetite and hematite iron. The climate is healthful and temperate. The principal exports are fish, coal, gold, silver, minerals and timber.

Principal Cities.—CAPITAL, VICTORIA. Population 1921, 38,727. Other centres are Vancouver (117,217), New Westminster (14,495), Nanaimo (9,088).

PRINCE EDWARD ISLAND.

Area and Population.—Prince Edward Island lies in the southern part of the Gulf of St. Lawrence, between 46° 2′–47° 0′ N. lat. and 62° 0′–64° 30′ W. long. It is about 130 miles in length, and from 4 to 34 miles in breadth; its area is 2,184 square miles (rather larger than that of the English county of Norfolk), and its population (Census, 1921) 88,615 (47,069 males and 46,659 females in 1921), a decrease from the last census of 5,113 persons. The island was first settled by the French, who held it for many years as a fishing station. The British took it from them in 1745, but afterwards restored it; they seized it again, however, during the Seven Years' War (1756–1763) and compelled the greater part of the French inhabitants to leave, and from that time it has remained British.

Government.—The Government is vested in a Lieut.-Governor and an Executive Council, and a Legislative Assembly of 30 members elected by the people, 15 as Councillors (with a property qualification) and 15 as Assembly-men (on manhood suffrage).

Agriculture and Live Stock.—The value of the field crops in 1925 was estimated at $15,426,480. The soil consists for the most part of a rich red loam, uniform in character and peculiarly suited to the growth of grasses. Nearly the whole of the land is now cleared, and improved farms can be bought at from $20 to $60 an acre (including buildings), according to condition and locality. The breeding of silver black foxes in captivity is an established and profitable industry. There are about 450 fox ranches, conducted by incorporated companies and private partnerships or individuals. The live stock included 32,752 horses, 119,974 cattle, 87,229 sheep, 52,114 pigs, and 941,490 poultry.

Manufactures.—The gross value of the manufactures in 1925 was $3,720,874, against $2,326,708 in 1900.

Principal Cities.—CAPITAL, CHARLOTTETOWN (Pop. 12,347), on the shore of Hillsborough Bay, which forms a good harbour. Other towns are Summerside (3,228), Souris (1,094), and Georgetown (884).

ALBERTA.

Area and Population.—The Province of Alberta has an estimated area of 255,285 square miles, including about 2,360 square miles of water, with a population (1921) of 588,454, an increase since the 1911 Census of 214,159.

Government.—The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of 60 members, elected for five years, representing 51 electoral districts into which the Province is divided. The Executive Council consists of eight members.

CAPITAL, REGINA. Population (1921), 34,432. Other large centres are Saskatoon (25,739), Moose Jaw (19,285), and Prince Albert (7,558).

TERRITORIES.

THE YUKON TERRITORY was constituted a separate political unit in 1898. It is governed by a Gold Commissioner and a Territorial Council of three elected members. The area of the Territory is 207,076 square miles. The population in 1921 was 4,157 (2,819 males and 1,338 females). Mining is the chief industry. The gold output for the year ending Dec. 31 1925, was $1,791,641.

Gold Commissioner, Geo. P. Mackenzie.

THE NORTH-WEST TERRITORIES, as now constituted, have been divided into 3 Provincial Districts, *Mackenzie, Keewatin*, and *Franklin*. They are governed by a Commissioner, a Deputy-Commissioner and 5 Councillors appointed by the Governor in Council. The area of the Territories is 1,309,682 square miles. Population in 1921, 7,988.

Commissioner, N.W.T., W. W. Cory, C.M.G.

WRANGEL ISLAND.

Wrangel Island (or Long's Island), in the Arctic Ocean off the N.E. coast of Siberia, was discovered by James Long in 1849, and was occupied by shipwrecked members of Stefansson's Arctic expedition in 1914. On Sept. 21, 1921, the British flag was hoisted on the island by an expedition despatched to the island by Stefansson, the annexation being notified to the Government of the Dominion of Canada on March 17, 1922. A relief expedition was dispatched to the island in 1923, but the party left on the island is assumed to have perished. The Russian government vessel *Krasny Oktiabr* is reported to have hoisted the Russian flag on the island on Aug. 20, 1924. The island is the resort of polar bears, and its highest point is Berry Peak (2,300 ft.), in the centre of an arctic plain.

VITAL STATISTICS.

The birth rate in England and Wales for 1925, at 18·3 per 1,000 persons living, was the lowest recorded since civil registration was instituted in 1837.

The records from the British Dominions show wide variations in birth, death, and marriage rates. The highest birth rate was 27·1 in the Province of New Brunswick and the lowest 10·0 in the Federal Territories of Australia, which also had the lowest death rate at 2·5 per 1,000, the next lowest being 6·7 in the Province of Saskatchewan. The highest marriage rate was 17·9 in the Transvaal Province.

PHYSIOGRAPHY.

The Island of Newfoundland is situated between 46° 37'-51° 37' N. latitude and 52° 44'-59° 30' W. longitude, on the north-east side of the Gulf of St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle. The island is about 317 miles long and 316 miles broad, and is triangular in shape, with Cape Bauld (N.), Cape Race (S.E.), and Cape Ray (S.W.) at the angles. The coast is extremely rugged, and the coastal regions are mountainous, the north and east being cold during winter and early spring owing to the quantities of ice brought down from the Greenland seas. The interior is undulating and is covered with tolts (round hills) interspersed with lakes, rivers, and swamps, but containing many fertile valleys, where the climate is favourable to agriculture, and a great wealth of forests, mainly of spruce, fir, pine, and birch. The climate is salubrious, and the people are a strong, brave, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80°.

GOVERNMENT.

Newfoundland, the oldest English colony, was discovered by John Cabot on June 24, 1497; the first land seen was hailed as *Prima Vista*—the present Cape Bonavista. The island was afterwards visited (1500) by the Portuguese navigator Gaspar de Cortereal, and soon became the centre of an extensive fishing industry, with settlements of Portuguese, Biscayans, and French. In August, 1583, the island was formally occupied by Sir Humphrey Gilbert, in the name of Queen Elizabeth, and by the Treaty of Utrecht (1713) the whole island was acknowledged to be British. A Governor was first appointed in 1728, and in 1855 "Responsible Government" was accorded to the island.

The executive is entrusted to a Governor, appointed by the Crown, aided by an Executive Council, with a Legislature of two houses. The *Legislative Council* is appointed by the Crown and consists of 24 members; the *House of Assembly* consists of 36 members, elected by the people, every male British subject aged 21 being entitled to the franchise.

DEFENCE.

Newfoundland contributed 11,922 men to the fighting forces of the Empire during the War, in addition to 3,000 enlisted in Canadian and other forces.

EDUCATION.

Education is denominational, and is assisted by Government. Primary and Secondary schools were attended in 1922 by 55,152 pupils. The Government grants in 1922 amounted to $814,495.

RELIGION.

At the Census of 1911 and 1921 the following statistics were obtained:—

Religion.	1911.	1921.

1924–25 ...	36,404,674	23,590,186	59,994,860

The trade was chiefly distributed in 1924–25 as under:—

Country.	Imports from.	Exports to.
United Kingdom	$11,357,585	$7,146,320
United States	9,976,292	2,704,606
Canada.....	3,759,788	1,682,804
Portugal	20,689	2,893,874
Spain	145,118	2,681,509

The principal imports are flour, textiles, coal, hardware, and provisions; the principal exports are codfish, cod and seal oil, pulp and paper, herrings, seal-skins, tinned lobsters, iron pyrites, and other minerals; the total value of the fishery products in 1924–25 was upwards of $13,042,902.

PRODUCTION AND INDUSTRY.

The inhabitants are chiefly located on the coast-line of the shore and bays, nearly 10,000 being engaged in fishing—for cod in summer, a large proportion of which is exported to South America—and seal fishing in winter and spring. Agriculture, mining, and lumbering are also engaging attention and affording means of employment, while large pulp and paper mills have been erected. The larger portion of the interior is practically in a state of nature, but the railways have opened up large tracts of rich agricultural, mineral, and timber lands hitherto of small value. A valuable discovery of copper has been made at Little Bay, about 200 miles from St. John's.

COMMUNICATIONS.

Railways.—There were 905 miles of railway open in 1926 and 47 miles of private line. The trans-insular line runs to Port-aux-Basques, *viâ* Exploits River and Bay of Islands, with branch connexions to Placentia, Bonavista, Bay de Verde, Hearts Content, Trepassey, the principal settlements in Conception Bay, and to Lewisporte (in Notre Dame Bay). Communication between various points on the coast and Sydney, C.B., is maintained by a fleet of 14 first-class steamers.

Posts and Telegraphs.—There were 885 post offices in 1925 (139 of which were also telegraph offices) and 82 telegraph offices additional, dealing with 4,000,000 letters and post-cards, 3,600,000 newspapers and books, and 325,400 parcels. 250 telephone stations are open, mostly in post offices. There are 5,200 miles of telegraph line and 2,000 miles of postal telephone wire. Postal and telegraph revenue, $523,443; expenditure, $1,263,656, of which $421,986 was paid as railway and coastal steamer subsidy.

Shipping.—On Dec. 31, 1925, the Mercantile Marine of Newfoundland consisted of 3,955 sailing vessels of 131,685 tons, and 154 steam and motor vessels of 29,607 tons. In 1922-23 the tonnage of vessels entered and cleared at Newfoundland ports was 2,294,080 tons, of which 1,342,595 tons were British.

TOWNS.

The CAPITAL, ST. JOHN'S (population 39,404), contains two cathedrals, several banks, and numerous public buildings. Other towns are Harbour Grace (3,825), Bonavista (4,025), Carbonear (3,320), and Twillingate (3,217).

HIGH COMMISSIONER.

High Commissioner in London, Capt. Victor Gordon, C.M.G., 58 Victoria Street, S.W. 1.

LABRADOR.

Labrador, a dependency of Newfoundland, forms the most easterly part of the North American continent, and extends from Blanc Sablon, in the Straits of Belle Isle, on the south, to Cape Chidley, at the entrance to Hudson's Straits (or to Cape Wolstenholme), on the north; the boundaries between Quebec and Labrador being a matter of keen controversy which came up for settlement before the Judicial Committee of the Privy Council in Oct., 1926. Labrador possesses valuable cod, herring, trout, and salmon fisheries. One of the grandest spectacles in the world is provided by the Great Falls of Labrador, on the Hamilton River. The inhabitants of this 850 miles of coastal America are mainly Eskimos, engaged in fishing and hunting. There are no towns, but there are Moravian Mission stations at Makkovik, Hopedale, Nain, Okak, Hebron, and Killinek. Pulp and paper mills have been founded at Sandwich Bay and Hamilton Inlet to deal with the almost inexhaustible supply of timber.

* Exclusive of full-blood Australian Aboriginals, who are estimated at 60,000.

The Australia mainland is probably the oldest of all land surfaces in either hemisphere, and may be regarded as the largest island or the smallest continent, being surrounded by the following waters:—*North*, the Timor and Arafura Seas and Torres Strait; *East*, Pacific Ocean; *South*, Bass Strait (which separates Tasmania from the Continent) and Southern Ocean; and *West*, Indian Ocean. The total area of the Continent is 2,948,366 English square miles, the island of Tasmania having an area of 26,215 square miles, and making a total area for the States and Territories of 2,974,581 square miles. The coast-line of Australia is approximately 12,210 miles, and the geographical position of the Continent is between 10° 41′-39° 8′ South latitude and 113° 9′-153° 39′ East longitude; the greatest length East to West is 2,400 miles, and from North to South 1,971 miles. Its nearest distance to England is about 11,000 miles.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area, the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. The whole continent is, roughly speaking, a vast, irregular, and undulating plateau, part of which is below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south. The Great Barrier Reef extends parallel with the East coast of Queensland for 1,200 miles, at a distance of about 60 miles from the mainland. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex, and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and south-eastern Australia, stretching far inland from the coastal range, is a fertile area devoted partly to agriculture, partly to dairying, while the inland districts particularly are admirably adapted to the rearing of sheep. The most extensive mountain system takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The highest peak, Mount Kosciusko, in New South Wales, reaches an elevation of 7,328 feet. The principal rivers are the Murray, which debouches on the south coast, after receiving the waters of its tributaries the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island: on the east coast, the Hawkesbury, Hunter, Clarence, Richmond, Brisbane, Mary, Burnett, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy; on the north, the Drysdale, Ord, Victoria, and Daly; and the Roper, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria. Lakes are numerous, but nearly all are salt; the scarcity of the natural water supply has been, however, mitigated by successful borings and by the construction of large dams. The work of conserving the vast quantities of water which run to waste in the wet season is being vigorously prosecuted by a system of locks and weirs on some of the rivers. Minerals comprise gold, silver, copper, zinc, iron, and coal in large quantities, antimony, tin, gypsum, magnesite, osmiridium, opal, sapphires, &c., and there are abundant supplies of building stones, clays, &c.

Climate.—The seasons commence about March 21 (Autumn), June 21 (Winter), Sept. 22 (Spring), and Dec. 22 (Summer). The climate is extremely dry, but, except in the tropical coast-land of the north, the continent is everywhere highly beneficial to Europeans, the range of temperature being smaller than that of other countries similarly situated.

GOVERNMENT.

The Government is that of a Federal Commonwealth within the British Empire, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Ministry of ten Ministers of State and such honorary Ministers who may be appointed thereto (there are at present two honorary Ministers). The Commonwealth was constituted by an Act of the Imperial Parliament dated July 9, 1900, and was inaugurated Jan. 1, 1901. Under the Constitution the Federal Government has acquired and may acquire certain defined powers as surrendered by the States, residuary legislative power remaining with the States. Trade and customs passed under Federal control immediately on the establishment of the Commonwealth; posts, telegraphs and telephones, naval and military defence, lighthouses and quarantine on proclaimed dates. The Commonwealth also now controls such matters as old age pensions, patents and copyrights, naturalization, navigation, &c. The right of a State to legislate is not abrogated except in connexion with matters exclusively under Commonwealth control, but where a State law is inconsistent with a law of the Commonwealth the latter prevails to the extent of the inconsistency.

THE LEGISLATURE.

The Federal Parliament consists of a Senate and a House of Representatives. The *Senate* contains 36 members, six from each of the Original States, elected for six years by universal suffrage. The *House of Representatives*, similarly elected for a maximum of three years, contains members proportionate to the population, with a minimum of 5 Representatives for each State. The House of Representatives, 1926, is made up of 28 for New South Wales, 20 for Victoria, 10 from Queensland, 7 from South Australia, 5 each from Tasmania and Western Australia, and 1 (entitled to debate but not to vote) from the Northern Territory. Members of the Upper and Lower Houses receive £1,000 per annum, with travelling expenses.

DEFENCE.

Navy.

The Australian fleet consists of the *Melbourne, Sydney, Brisbane, Adelaide*, 4 sloops, 2 destroyers, and several auxiliaries; 2 cruisers and 2 submarines are at present under construction. H.M.A.S. *Sydney* destroyed the German cruiser *Emden* at Cocos Island on Nov. 9, 1914. The personnel of the fleet is mainly Australian in character, although still supplemented to some extent by Imperial officers and men. The seagoing forces on February 1, 1926, consisted of approximately 435 officers and 4,301 petty officers and men. There is also a R.A.N. Brigade composed of members of the Citizen Naval forces, a section of the Commonwealth Compulsory Military Training System.

Army.

By a Federal Law of 1910 military training is compulsory on all male citizens between the ages of 12 and 26—in *Cadet Corps* 12–18, and *Citizen Soldiers* 20–26, with short periods of training in the field. The Universal Training Law was continued in 1922, but its operation is restricted to the more populous centres, and confined to youths of 17–21 years. On February 1, 1926, 45,273 were undergoing training. Australia had, up to the end of the Great War, enlisted no fewer than 416,809 men, fully equipped for service in the war: New South Wales, 164,030; Victoria, 112,399; Queensland, 57,705; South Australia, 34,959; West Australia, 32,231; Tasmania, 15,485. The Australian forces behaved with the greatest gallantry whenever engaged with the enemy. To December 31, 1919, their record of Honours and Decorations was V.C. 65, G.C.M.G. 3, K.C.M.G. 9, C.M.G. 149, K.C.B. 9, C.B. 42, K.B.E. 2, C.B.E. 33, O.B.E. 125, M.B.E. 99, D.S.O. 619, R.V.O. 2, R.R.C. 147, M.C. 2,366, D.C.M. 1,756, M.M. 9,926, M.S.M. 1,176, A.M. 3, D.F.C. 58, A.F.C. 16, A.F.M. 2, and 7,032 foreign decorations. The *Total Casualties* in the A.I.F. were: killed, 59,342; wounded, 166,819; sick, 87,957; not specified, 218—total, 314,336.

The total cost of the War to the Commonwealth Government from August, 1914, to the end of June, 1926, was £627,596,309, of which amount £251,864,595 was charged against revenue.

Air.

The permanent strength of the Australian Air Force as at June 30, 1926, was 88 officers and 628 airmen. The sum of £595,027 is provided on the 1926–27 Estimates for Air Force and Civil Aviation purposes.

The Customs and Excise Revenue is collected by the Commonwealth and partly repaid to the States at the rate of *25s.* per head of the population.

DEBT.

The total of the Commonwealth Public Debt on June 30, 1926, was £458,443,351, including a War Loan from the British Government of £86,865,883. Adding the indebtedness of the States to that of the Federal Government (and making allowances for certain amounts included in both) the total public debts of Australia amounted (June 30, 1925) to about £993,366,133. The Commonwealth has undertaken responsibility for the Northern Territory Debt and the Port Augusta–Oodnadatta Railway Debt, whose combined amounts were £2,193,496 at June 30, 1925. The other State Debts remain at the charge of the State Governments.

Banking.—On March 31, 1926, the Australian liabilities of the Banks of Issue throughout the Commonwealth amounted to £345,139,879, and the Australian assets to £362,094,967. On March 31, 1926, there were 4,131,698 depositors in the Savings Banks, the amount of deposits being £186,668,393.

Labour Statistics.—In 1925 there were 382 Trade Unions, with 795,722 members, of whom 96,323 were women. The estimated total number of employed persons over 20 years of age in 1925 was 1,200,592 males and 286,053 females. The number of unemployed members of trade unions averaged 8·8 per cent. Employers' Associations number 480, with membership of 103,350. Co-operative Societies in 1924 totalled 298, and sales £39,042,585. Retail Price Index No. for food, groceries and rent (4 and 5 rooms) 1925 (base 1911=1,000) 1,733; including clothing, fuel, light and other miscellaneous household expenditure (base Nov. 1914=1,000) 1,451. Melbourne Wholesale Price Index 1925 (base 1911=1,000) 1,844. Nominal Weekly Wage Index No., Australia, males (base 1911=1,000=51s. 3d.) 1,887=96s. 9d. Number of industrial disputes in 1925 was 499, involving 176,746 persons in a loss of 1,128,57c working days and £1,107,544 in wages.

COMMUNICATIONS.

Railways.—Total length of Government (and private) railways open at June 30, 1925, private lines being included in the totals and shown in parentheses:—

State.	Miles open.	
New South Wales	5,986	(331)
Victoria	4,542	(59)
Queensland	7,434	(1,319)
South Australia	3,577	(50)
Western Australia	5,041	(854)
Tasmania	904	(231)
Federal Capital Territory	5	—
Northern Territory	199	—

The gross earnings of all Government lines in 1924-25 were £44,967,464, working expenses £33,114,083, and net earnings £11,853,381, being at the rate of 3l. 9d. per train mile, and representing a return on the total cost (£376,114,845) of 4·29 per cent., as against 4 per cent. in 1923-24. In 1924-25 passenger journeys numbered 370,346,170, and 37,684,990 tons of goods and live stock were carried, the train miles run being 71,774,087.

Tramways.—There are 635 miles of tramways in Australia, 503 miles of which are of electric, 79 of steam, 46 of cable, and 7 of horse traction. The several Governments control 424 miles; municipal authorities, 165 miles; and the remaining 46 miles are operated by private companies and individuals. The total capital cost of tramways at June 30, 1925, was £24,110,042. The revenue of electric tramways for the year 1924-25 was £6,248,686, working expenses £5,170,814, and net revenue £1,077,872, or 4·18d. per car mile. 621,941,856 car miles were run and 621,692,000 passenger journeys recorded.

Shipping.—The entrances and clearances of vessels engaged in oversea trade at the various Australian ports in 1924-25 were: entered, 1,726 (5,596,400 tons); cleared, 1,723 (5,604,119 tons). Of the vessels entered, 1,278 of 4,255,917 tons were under the British flag and 448 of 1,340,483 tons under foreign flags.

Shipping entering the ports of the capital cities during 1924-25 was: Sydney 8,092 vessels of 9,131,675 tons, Melbourne 3,953 (6,939,642), Brisbane 1,157 (3,245,938), Adelaide 3,660 (4,935,155), Fremantle 665 (3,032,845), and Hobart 607 (737,633). At December 31, 1925, there were 2,461 vessels of a total net tonnage of 469,164 on the shipping registers of the several States.

Posts and Telegraphs.—In year ended June 30, 1925, there were 8,700 post and receiving offices, dealing with 997,398,104 letters, &c.; there were 8,576 telegraph stations, with 192,788 miles of wire, transmitting 17,132,145 telegrams, receiving 617,394 and dispatching 641,408 cablegrams. At the end of year 1924-25, 362,949 *Telephones* were connected with 4,078 telephone exchanges; approximately 274,000,000 "local" and 21,675,450 "trunk line" calls were recorded for the year. 61,357 wireless broadcasting listeners' licences were issued in 1924-25.

Motor Vehicles.—At June 30, 1925, there were 305,636 motor vehicles registered in the several States. These comprised 221,441 cars, 58,079 motor cycles, and 26,116 commercial vehicles; revenue derived from motor registration fees and motor tax, &c., £1,415,180 (1924-25).

Civil Aviation.—59 aeroplanes of various types were registered with the Department of Civil Aviation at June 30, 1925. During the year 4,893 flights of a total duration of 5,303 hours were effected: 404,420 miles were flown, and 6,091 passengers carried. On the subsidized aerial mail routes 208,600 letters were carried in Western Australia, 14,093 in Queensland, and 2,435 between Adelaide (S.A.) and Sydney (N.S.W.).

CAPITAL.—CANBERRA, in the Federal Capital Territory, transferred to the Commonwealth by the State of New South Wales on Jan. 1, 1911, is being laid out as the capital of the Commonwealth. A session of Parliament is to be opened at Canberra on May 11, 1927, which will from that date be the seat of government in place of MELBOURNE.

NORTHERN TERRITORY.

The Northern Territory occupies the centre of the continent between 129°—138° East longitude as far as 26° South latitude, and its administration was taken over by the Commonwealth on Jan. 1, 1911. The area is estimated at 523,620 sq. miles, and the population on March 31, 1926, was 3,701 (exclusive of full-blood aboriginals).

Limited portions of the country are considered to be quite suitable for tropical and semi-tropical agriculture, and the Federal Government grants suitable areas rent free for the original settler's lifetime or for 21 years (whichever shall be longer). The staple industry is pastoral, cattle and horses do well south of the 18th parallel. The chief rivers are Victoria, Adelaide, Daly, Roper, Liverpool, Goyder, McArthur, and the Robinson. The first five are navigable from 40 to 100 miles from their entrance for boats drawing 4 feet. Pearl fishing is carried on round the coast, the shell being of good quality. There are considerable mineral resources, gold, silver, lead, tin and mica being indicated, and when communications are opened up, the industry will become important. The only railway is from Darwin to Emungalan (200 miles). A further extension to Daly Waters (160 miles) is being proceeded with.

Darwin, the seat of Government, occupies an elevated site 80 feet above high-water mark, overlooking Port Darwin.

PAPUA.

The Territory of Papua, which was placed under the authority of the Commonwealth of Australia in 1906, comprises a part of the New Guinea mainland situated between the meridians of 141° and 150°50′ E. longitude, and between the 5th and 12th parallels of South latitude; also the Trobriand Group of islands, Woodlark, the d'Entrecasteaux Group, the Louisiades, the Conflict Group, and the Laughlan Group. The total area of Papua is 90,540 sq. miles, of which 87,786 are on the mainland. There is an Executive Council of nine members who, with five non-official members, form the Legislative Council. The white population in 1925 was 1,371. The official estimate of the native population is 275,000. In 1924, 61,180 acres were under crops (48,022 coconuts, 7,846 rubber and 3,878 sisal hemp). Owing to heavy rainfall Papua is well watered in most parts and possesses a large number of streams. The best known rivers are the Fly (650 miles long and navigable by steam launch for 500 miles) and the Purari. The climate is favourable to the cultivation of tropical products.

TERRITORY OF NEW GUINEA.

The part of "German New Guinea" over which Australia was given a mandate is situated in latitude between the Equator and 8° S., and in longitude between 141° E. and 156° E. It consists of Kaiser Wilhelm Land (70,000 sq. miles), Bismarck Archipelago (including New Britain, New Ireland, and islands adjacent to both (13,840 sq. miles), and the two northernmost Solomon Islands (3,400 sq. miles) (Bougainville and Buka). The principal river in Kaiser Wilhelm Land is the Sepik, which is navigable for 250 miles.

The climate is hot and moist along the coast, with a steady drop as the higher altitudes are reached. It is suitable to the growth of all tropical products. In 1924-25 there were 176,460 acres under crops (coconuts, 171,526). The white population in 1925 was 1,450; the native population in 1925 was 257,550. (Natives living in areas not under complete Government influence are not included in the above total, as no reliable estimate can be made.)

NORFOLK ISLAND.

This island is about 930 miles from Sydney and 400 miles from New Zealand. It is about five miles in length by three in breadth, and was discovered by Capt. Cook in 1774. Its area is 8,528 acres and circumference 20 miles. The climate is mild, with a mean temperature of 68° and an annual rainfall of 55 inches. The descendants of the mutineers of the *Bounty* were brought here from Pitcairn Island in 1856. The population in April, 1924, was 736.

1923	54,112	21,051	17,597
1924	53,670	20,821	18,077
1925	54,615	20,823	18,522

Vital Statistics—Annual rate per 1,000 of population in 1925:—Births, 24·00; Deaths, 9·15; Marriages, 8·14. Deaths under 1 year per 1,000 births, 54·9.

Religions.

All religions are free. There is no State Church. About three-fourths of the people are Protestants, the members of the Church of England in New South Wales, according to the Census of 1921, number 1,027,301; Roman Catholic 502,825, Presbyterian 219,932, Methodist 182,977, Congregational (Independent) 22,235, Baptist 24,722, Salvation Army 9,490, and Hebrew 10,150.

PHYSIOGRAPHY.

The Eastern or coastal district is traversed by the Great Dividing Range, the various portions of the Range in N.S.W. being (from N. to S.), Macpherson, New England, Liverpool, Main or Blue Mountain, Cullarin, Gourock, Monaro, and Muniong Ranges—the highest points being Mount Kosciusko, 7,328 feet, and Townsend 7,256 feet. The eastern or coastal district is watered by the Tweed, Brunswick, Richmond, Clarence, Bellinger, Macleay, Hastings, Manning, Karuah, Hunter, Hawkesbury, George, Shoalhaven, Clyde, Moruya, Tuross, Bega, Towamba, and Snowy Rivers. The western portion of the country is not so well watered, but immense reservoirs are being constructed for irrigation purposes, and there are many artesian bores. The Darling and the Murrumbidgee are both tributaries of the Murray, which has a total length of 1,609 miles, 1,200 miles forming part of the boundary between the States of New South Wales and Victoria.

Climate.—New South Wales is situated entirely in the Temperate Zone. The climate is dry and very healthy. At the capital (Sydney) the average mean shade temperature is 63·2°. The mean temperature in the shade for the north coast is 66° to 68°, south coast 54° to 63°, northern tableland 56° to 58°, southern tableland 43° to 55°; north-western slopes, the mean annual temperature ranges from 62° to 67°; in the Central-western slopes 58° to 62°, and in the Western Division from 62° to 67°.

GOVERNMENT.

New South Wales was first colonised as a British possession in 1788, and after progressive settlement a partly elective legislature was established in 1843. In 1855 "Responsible Government" was granted, the present Constitution being founded on the Consolidating Act of 1902. The executive authority is vested in a Governor (appointed by the King), assisted by a Council of Ministers.

THE LEGISLATURE.

Parliament consists of two Houses, the Legislative Council and the Legislative Assembly. Members of the *Legislative Council* (97 in August, 1926), are appointed by the Crown for life. Members are not entitled to remuneration, but travel free on the State railways

and tramways. The *Legislative Assembly* consists of 90 members. Each member of the Legislative Assembly receives £875 per annum, and members travel free over the Government railways and tramways in the State, and are provided with official stamped envelopes for the free transmission of correspondence through the post. The Women's Legal Status Act, 1918, removed disqualification regarding the election of women to be members of the Legislative Assembly. Natural-born or naturalised persons 21 years of age, who have resided 6 months in the Commonwealth, 3 months in the State and one month in the electoral district, are entitled to the franchise. At the last State General Election in June, 1925, of 678,749 male electors enrolled and qualified to vote in contested electorates 489,126, or 72·1, voted, and similarly of 660,331 female electors 438,853, or 66·6, voted.

Education.

Education.—Education is compulsory between the ages of 7 and 14 years. It is non-sectarian and free at all State schools. The total enrolment in 1925 in 3,219 State schools was 336,810, and the average daily attendance 269,302. In addition to the State schools there were, in 1925, 696 private colleges and schools, with 82,288 scholars, exclusive of many business and shorthand schools and schools at Charitable Institutions, &c. The University of Sydney, with which 5 colleges are affiliated, including the Women's College, was incorporated in 1851, and had 2,611 students (1,944 male and 667 female) in 1925. The State expenditure on Education (exclusive of Technical Education) was £4,197,033. The total number of students at State Technical classes numbered 26,796, and 1,327 attended at the State Agricultural College and Farms.

1925	38,822,588	39,579,038	201,702,307

Banking, &c. — There were (June 30, 1926) 17 banks within N.S.W., with total assets, £161,761,171, including advances, £123,950,187; coin, bullion, Australian Government Notes, and cash with Commonwealth Bank, £30,374,597; and liabilities, £135,609,364, including deposits, £130,211,899. The savings bank deposits on June 30, 1926, amounted to £73,807,651, representing 1,446,432 depositors. The amount assured in New South Wales in *Life Assurance* Societies in 1925 was £86,048,552 Ordinary, and £17,357,582 Industrial. The membership of *Friendly Societies* was 226,576, and the funds at June 30, 1925, were £3,042,054. Members of *Trade Unions* numbered 260,068, the funds of 199 Unions at Dec. 31, 1924, being £298,088.

Shipping.—Excluding coastal trade, 2,949 vessels entered ports of N.S.W. during the year ended June 30, 1926, the net tonnage being 8,555,894; the clearances were 2,933 vessels of 8,503,540 net tonnage. Sydney is the chief port. In the year ended June 30, 1926, the shipping entries at Sydney, including State coastal, were 7,652 vessels of 8,717,770 net tonnage. The dock accommodation at Sydney includes four large graving docks, five floating docks, and seven patent slips. At Newcastle there are five patent slips.

Railways.—The railways and tramways of New South Wales, with the exception of a few short lines, representing about 115 miles, are controlled by the State. At June 30, 1926, the mileage of the State railways open for traffic was 5,742, the capital cost amounted to £105,237,668, and the net earnings for the year 1925–26 to £4,419,039. There were also 228 miles of State tramways, the capital cost being £11,434,523, and the net earnings £299,500.

Roads and Bridges.—A Main Roads Board, of two engineers with special knowledge of road construction, and a president was constituted in 1924. Municipal councils are assisted in the construction and maintenance of the main

highways with the object of developing vacant lands, feeding the railways, and giving primary producers access to markets and providing better facilities for motor traffic. There are 104,764 miles of roads in New South Wales. Bridges over 20 ft. span number 4,916, the total length being 397,393 feet. The construction of an arch bridge over Sydney Harbour is in course of erection. This bridge will carry a roadway 57 ft. wide, two footways each 10 ft. wide, and four lines of railway. At high water there will be a headway of 170 feet. The contract price for a length of 3,770 feet of bridge is £4,217,721, and it is estimated that approaches, &c., will cost £1,275,000.

Posts, Telegraphs and Telephones.—The postal, telegraphic, and telephonic services are administered by the Commonwealth Government. In 1924–25 there were 2,664 post offices in New South Wales. The postal matter carried included 296,399,293 letters and postcards, 72,711,100 newspapers, 56,300,600 books, packets and parcels, and 8,901,836 telegrams were received and despatched. The telephone line connections numbered 107,497.

Trade.

The oversea imports into New South Wales during 1925–26 were valued at £64,005,975, and the oversea exports were, Australian produce, £52,565,597; other produce, £2,443,148; total exports, £54,008,745.

Production and Industry.

Agriculture is one of the principal industries of the State; 4,011,148 acres, excluding 3,337 acres double-cropped, were under cultivation during the year ended June 30, 1925, producing 59,767,000 bushels of wheat, 4,208,200 bushels of maize, 2,511,400 bushels of oats, besides other kinds of grain, with 57,274 tons of potatoes and 4,567 cwt. of dried leaf tobacco. Sugar-cane to the extent of 228,978 tons was crushed; and 1,171,336 gallons of wine, and 2,292,062 bushels of citrus fruit, 60,763 cases of bananas, and 6,404 dozen of pineapples obtained; almost every kind of fruit and vegetable is grown. The total area under wheat for the year 1925–26 was 3,656,943 acres, including 444,208 acres for hay, and 359,472 acres failed or fed off. The wheat yield was 33,815,000 bushels of grain and 445,690 tons of hay.

Land Alienation.—The total extent of land alienated and in process of alienation on June 30, 1925, was 63,096,007 acres, while the area of land neither alienated nor leased at the same date was 20,038,132 acres; the total area of the State, exclusive of Federal Capital area, being 198,936,500 acres.

Live Stock.—The great plains are admirably adapted for sheep-farming, and several breeds of sheep, including the celebrated merino, which was introduced in 1797. On June 30, 1925, there were 647,503 horses, 982,850 dairy cows, 1,893,404 other cattle, 47,100,000 sheep, 339,669 swine, 26,313 goats, and 368 camels. In 1924–25, 369,118,000 lb. (stated as in the grease) of wool were produced, in addition to 117,211,347 lb. butter, 7,705,596 lb. cheese, and 21,076,796 lb. bacon and ham. During 1924–25 there were 139,500 persons permanently employed in rural occupations, 123,200 being males, and 16,300 females.

Values of Rural Industries.—The agricultural industry was valued in 1924–25 at £28,785,000, dairying and farm-yard produce at £14,336,000, and pastoral industry at £47,968,000, a total of £91,089,000.

Forests, Fisheries and Trapping.—The value of these industries in 1924–25 was £5,039,000, and 8,300 persons were employed.

Mining Industry.—The goldfields were opened in 1851. Coal, coke, copper, silver, lead, zinc, bismuth, tin, iron, antimony, asbestos, platinum, alunite, wolfram, scheelite, magnesite, manganese, molybdenite, cobalt, marble, and kerosene shale, slate, silica, fluorspar, arsenic, diamonds, rubies, opals, and other precious stones are also found. The total value of minerals won during 1925 was £17,459,179, coal accounting for £9,302,515, silver, silver lead and ore £5,320,976, and gold £82,498. The value of the plant and machinery at all mines was £11,128,379. The mining industry gave employment to 29,500 persons during the year.

Manufacturing Industry.—In 1924–25 there were 7,906 manufactories and works; the employees numbered 165,760, of whom 126,496 were males and 39,264 females, the amount of £31,520,849 being paid in salaries and wages. Male workers, exclusive of working proprietors, received on an average an annual amount of £230 5*s.* 9*d.* and females £99 0*s.* 11*d.* The capital value of land, buildings and fixtures, if property of occupier, amounted to £27,456,055, and of plant and machinery £43,553,500. The machinery in use represented 756,766 h.p., including steam, 497,872 h.p.; gas, 21,050 h.p.; electricity, 231,451 h.p.; water, 1,769 h.p.; oil, 4,624 h.p. The value of output was £159,608,873; materials used, £94,955,332, and fuel consumed (including motive power rented), £5,609,490; the production, *i.e.*, value added to raw materials, was £59,044,051.

Iron and steel are produced at Lithgow and Newcastle. The total value of all primary industries in 1924–25 was £107,913,000, manufacturing £59,044,000, making a total for all industries £166,957,000, which is equal to £74 18*s.* 9*d.* per head of population.

Local Government.

For purposes of Local Government, with the exception of an area of 125,482 square miles in the sparsely-populated western division, the State is divided into 181 municipalities and 136 shires, governed by councils which are elected triennially. The councils are empowered to levy rates on the value of land, to float loans, to acquire land and works, to construct and maintain streets, jetties, wharfs, &c., to make regulations regarding cattle slaughtering, maintenance of public places, traffic, street and road lighting, public health and safety, management of parks, &c.

The basis of rating is almost wholly on the unimproved capital value of land, which in 1924 was £147,221,628 for municipalities, including the city of Sydney, and £144,710,409 for shires.

Towns.

Sydney, the chief city and capital, stands on the shore of Port Jackson, with a water frontage of 188 miles; the depth of water at the Heads is not less than 80 feet, and at the wharves from 30 to 50 feet. There are extensive plants for loading ships, and for storing and loading grain in bulk, also for replenishing coal and oil bunkers. For 13 miles Sydney Harbour extends inland, the finest harbour in the world, and is

surrounded by scenery of surpassing beauty. The principal wharves are situated in close proximity to the business centre of the city. The total area of water in the port is 14,284 acres, or about 22 square miles, of which 3,000 acres have a depth of from 35 feet to 160 feet; the rise and fall of the tide is from three to six feet. The city extends four miles north and south by three miles east and west, and contains 136 miles of streets, and a population of 106,350 (Dec., 1925); or, including suburbs, 2,425 miles of streets, and a population of 1,030,300. In addition to the Government buildings, there are the University and Colleges, National Art Gallery, museums, botanic gardens, zoological gardens, free public libraries, observatory, conservatorium of music, two cathedrals, numerous churches, and some large public hospitals. The parks within the metropolitan area are 26,467 acres in extent, in addition to which the National Park measures 33,800 acres, Kuring-gai Chase 35,300 acres, Kurnell, 248 acres and Parramatta Park, 252 acres. Other large towns are Newcastle (with suburbs), 98,050; Broken Hill, 23,760; Auburn, 16,790; Parramatta, 16,030; Granville, 16,110; Bankstown, 15,850; Lithgow, 13,310; Maitland, E. & W., 12,720; Lidcombe, 12,920; Goulburn, 12,350; Katoomba, 10,060; Bathurst, 9,300; Lismore, 9,140; Albury, 8,520; Cessnock, 9,270; Wagga Wagga, 8,350; Liverpool, 6,620; Fairfield, 6,710; Grafton and South Grafton, 6,220; Kurri Kurri, 6,250; Wollongong, 7,920; Orange, 7,700; Tamworth, 7,150; Fairfield, 6,710; Armidale, 3,540; Dubbo, 5,090; Glen Innes 4,740; Forbes, 4,650; Dundas, 4,730; Inverell, 4,470; Cowra, 4,230; Parkes, 4,130; Windsor, 4,110.

Approximate time in transmission of mails from London to Sydney, 28 days.

Dependency of New South Wales.

Lord Howe Island (436 miles north-east of Sydney). Lat. 31° 33′ 4″ S., Long. 159° 4′ 26″ E. Area, 3,220 acres. Pop., Dec., 1925, 114. The island is of volcanic origin and Mount Gower reaches an altitude of 2,840 feet. The affairs of the Island and the control of the Kentia palm seed industry are vested in a Board of Control, Office, Chief Secretary's Department, Sydney.

II.—VICTORIA.

The State of Victoria comprises the south-east corner of Australia, at that part where its territory projects farthest into the southern latitudes; it lies between the 34th and 39th parallels of South latitude, and the 141st and 150th meridians of East longitude. Its extreme length from east to west is about 420 miles, its greatest breadth is about 250 miles, and its extent of coast-line nearly 600 miles, the entire area being 87,884 square miles.

Population.—In 1925 the population numbered 1,684,017 (838,693 males and 845,324 females).

Increase of the People.

Religion.

There has been no State aid to religion since 1875. Members of the Church of England in 1921 numbered 601,809, "Protestants" 18,636, Presbyterians 257,072, Methodists 183,829, Baptists 32,305, Church of Christ 22,250, Independents 15,893, and Roman Catholics 322,565.

Physiography.

The *Australian Alps* and the *Great Dividing Range* pass through the centre of the State, and divide it into a northern and southern watershed, the latter sloping down to the ocean and containing, especially in the south-east, well-wooded valleys. The Murray River forms the northern boundary of the State, and has many Victorian tributaries. The capital stands upon the Yarra-Yarra, which rises in the southern slopes of the Dividing Range.

Climate.—The mean temperature over a period of 70 years was 58·4° Fahrenheit, the thermometer rising (on the average four days during the year) above 100° in the shade, and falling (on the average for about two nights in the year) below 32° F. The average number of days on which rain fell was 137, and the average yearly rainfall was 25·65 inches.

Government.

Victoria was originally known as the Port Phillip District of New South Wales, and was erected into a separate colony in 1851, with a partially elective legislature. In 1855 Responsible Government was conferred. The executive authority is vested in a Governor appointed by the Crown, aided by an Executive Council of 12 members.

Education.

Primary Education is compulsory, secular and free between the ages of 6 and 14, there being 254,144 children on the registers in 1924, the average attendance being about 67 per cent. *Secondary Education* is principally under private control, 64,265 pupils being in attendance at the 490 schools in 1924. There is a State-aided *University* at Melbourne, with four affiliated colleges (Trinity, Ormond, Queen's, and Newman) and a School of Mines at Ballarat.

Finance.

The revenue and expenditure and State Debt for five years are given as follows :—

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1921	19,054,475	18,941,698	97,317,831
1922	20,357,733	20,297,279	109,099,199
1923	21,634,677	21,611,309	118,562,029
1924	23,075,968	23,050,968	124,108,326
1925	24,304,887	24,170,483	131,169,565

Banking, &c.—There were (June 30, 1925) 16 banks, with total assets £98,506,442, within the State, and liabilities £99,816,407. The savings bank deposits (including amounts deposited in the Commonwealth Savings Bank) at June 30, 1925, amounted to £59,551,895.

Production and Industry.

Agriculture.—Of the 6,890,922 acres under cultivation in 1925–26, 2,513,494 were wheat crops and 437,696 oats, and 1,013,613 acres were cut for hay. In 1924–25, 1,368,765 gallons of wine were produced. The estimated value of production in 1924–25 was (including manufacturing values) £101,544,294.

Live Stock.—There were in 1926, 727,940 milch cows, producing 200,849,382 lb. of butter and 6,193,135 lb. of cheese; and 785,847 other cattle, 13,740,500 sheep, 339,601 pigs, and 463,051 horses.

Minerals.—The gold production in Victoria has declined very considerably, the amount produced in 1925 being 47,256 oz. (£200,958). Other minerals raised consisted principally of coal, antimony, tin and gypsum.

Trade and Industry.—Wool, gold (including specie), wheat, flour, biscuit, and butter are the staple productions of the State; and the manufactures (7,425 factories, &c., employing 154,158 hands in 1924–25) are mainly for home consumption. The chief exports oversea are: wool, lead, butter, wheat, flour and biscuit, leather, skins and hides, tallow, live stock, jams and jellies, milk and cream and preserved and frozen meats. The principal oversea imports of the State are iron and steel, machines and machinery, metals and metal manufactures, silks, velvets, &c., apparel and attire, bags and sacks, tea, cottons and linens, woollens and timber.

Towns.

Melbourne, the chief city and seat of federal government, is an episcopal see, and is distinguished for its university, museum, mint, public gardens, observatory, public library, hospital, its churches and other institutions. With its suburbs it contained (31st December, 1925) a population of 912,130 inhabitants. Other towns are Ballarat, 40,990; Geelong, 39,100; Bendigo, 35,700; Warrnambool, 8,020; Mordialloc, 7,220; Castlemaine, 7,170; Carrum, 6,500; Wonthaggi, 6,500; Mildura, 5,850; Hamilton, 5,200; and Ararat, 5,900.

Transmission of mails, approximate, 30 days.

Melbourne, distant from London 11,267 miles; transit, 32 to 37 days.

III.—SOUTH AUSTRALIA.

The State of South Australia is situated between 26° and 37° S. lat. and 129° and 141° E. long., the total area being 380,070 sq. miles.

Population.—In 1925 the population numbered 551,533 (282,790 males and 268,843 females).

Increase of the People.

Year.	Births.	Deaths.	Marriages.
1921	11,974	5,982	4,383
1922	12,001	4,608	4,143
1923	11,692	4,961	4,099
1924	11,592	4,870	4,121
1925	11,457	4,979	4,255

Birth rate 21·06, death rate 9·15, marriage rate 7·82 per 1,000 of population. Infantile mortality, 46·09 per 1,000 births, being one of the lowest rates in the world.

Religions.

Religion is free and receives no State aid. At the Census, 1921, the persons belonging to the principal religious denominations were as follows:—Church of England, 165,968; Methodists, 122,634; Congregationalists, 15,289; Baptists, 23,033; Lutherans, 24,606; Roman Catholics, 64,054; Presbyterians, 22,659; and Churches of Christ, 15,039.

Physiography.

The eastern portion of the State is divided longitudinally by the *Flinders Range*, which extends from the eastern side of the Gulf of St. Vincent to the Lakes Torrens and Eyre. The western portion is partly desert which can never be brought into cultivation. The northern portion of the State, between Lake Eyre and 26° South latitude, is also unpromising in comparison with the fertile land that surrounds the hill country of the east. Except for the Murray, which flows for some 250 miles through the south-eastern corner into the Southern Ocean, there are no rivers of importance in South Australia.

Climate.—The mean annual temperature at Adelaide is 63°, the winter temperature (July–August) averaging 53°, and the summer (November–March) 72°. During the summer months the maximum temperature at times exceeds 100°, but owing to the purity and dryness of the atmosphere the inconvenience is comparatively slight. The average annual rainfall at Adelaide, derived from 86 years' record, is 21·21 inches. This total is rather higher than the approximate average annual rainfall over the whole of the agricultural areas extending from Melrose to Cape Northumberland. In the Mount Lofty Ranges the mean yearly rainfall in places exceeds 40 inches, while on the Adelaide plains the precipitation has fallen as low as 16 inches.

Government.

South Australia was proclaimed a British Province in 1836, and in 1851 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1856, the executive authority being vested in a Governor appointed by the Crown, aided by a Council of 6 Ministers, and the Lieutenant-Governor.

Governor.

Governor of South Australia, His Excellency Lieut.-Gen. Sir George Tom Molesworth Bridges, K.C.B., K.C.M.G., D.S.O., *born* 1871 (1922) £5,000

The Legislature.

Parliament consists of a *Legislative Council* of 20 members elected for 6 years, one-half retiring every 3 years; and a *House of Assembly* of 46 members, elected for a maximum duration of 3 years. Election is by ballot, with universal adult suffrage for the House of Assembly for all British subjects, male and female; there is a small property qualification for electors to the Legislative Council, who numbered 144,936 in 1926, those for the Assembly numbering 300,606.

President of the Legislative Council, Hon. Sir J. L. Stirling, K.C.M.G. £800
Speaker of the House of Assembly, Hon. F. W. Birrell 800

The Judicature.

Law and Justice.—The Supreme Court is presided over by the Chief Justice and three Puisne Judges; there are Courts of Vice-Admiralty and Insolvency, as well as Local Civil Courts, with stipendiary magistrates and the usual Police Courts. The Supreme Court convictions average about 120 annually, which is at the rate of 1 in every 5,000 of the population.

Chief Justice and Judge of Vice-Admiralty, Hon. Sir G. J. R. Murray, K.C.M.G., B.A., LL.B. £2,500
Chief Judge, Hon. T. J. M. Napier, K.C. 2,000
2nd Judge, Hon. T. S. Poole, LL.B. 2,000
3rd Judge, Hon. H. A. Parsons, LL.B. 2,000

Education

Public Education (*Primary, Secondary and Technical*) is provided by the State, and controlled by a responsible Minister; it is secular, compulsory, and free; there are 1,029 State schools, with 3,127 teachers and 84,284 scholars; the expenditure in 1925 was £899,383. The Government grants Exhibitions and Scholarships, carrying the holders to higher schools and the University. Private schools number 184, with 873 teachers and 14,990 scholars. There is an endowed *University* at Adelaide, founded in 1874, with 732 undergraduates, and 1,186 other students; all classes are open to women. A State School of Mines and Industries has also been established with branches at 9 country centres, and technical education is also provided. The public library, museum, art gallery and local institutes are supported or assisted by the State.

Banking.—There are 10 banking institutions in Adelaide, in addition to the Commonwealth Government Bank, with over 300 branches and agencies, and £50,000,000 authorised capital, having a total liability of £26,885,000 and assets £25,053,000 in June, 1926. The savings banks

on June 30, 1926, had 490,000 depositors with £21,750,000 to their credit. Over 85 per cent. of the population have Savings Bank accounts. The total banking deposits, £44,950,000, averages nearly £80 per head of population.

PRODUCTION AND INDUSTRY.

Agriculture (1925-26).—Of the total area about one-half is farmed or grazed, and 5,500,000 acres cultivated—under wheat 2,500,000 acres, hay 500,000, oats 160,000, barley 240,000, orchards and vineyards 90,000, and potatoes 6,000 acres, with 1,800,000 acres lying fallow. Wheat produced 30,000,000 bushels. Oranges, lemons, apples, apricots, peaches, and all stone fruits, and olives are successfully grown, and fruit drying is profitable. There were 50,000 acres of vines, with a production of 23,000,000 gallons of wine; 100,000 cwt. of currants, and 120,000 cwt. of raisins. Considerable quantities of fruits (fresh and dried) and also wine are annually sent to oversea countries, principally the United Kingdom and the other Australian States. Brandy and other spirits are also produced. The land is also very suitable for the growing of all kinds of root crops and vegetables.

Live Stock (Dec. 31, 1925).—There were 6,810,495 sheep, cattle 373,597, horses 244,111, pigs 90,794.

Minerals.—Copper and gold, silver, lead, manganese, bismuth, iron, gypsum, salt, phosphate rock, coal, &c., are found, the total mineral output being valued at £1,028,471 (1925). Over £33,000,000 of copper have been produced since the foundation of the State.

Manufactures.—In 1925 there were 1,711 factories, employing 38,353 hands, the gross value of the output being £32,143,993, and the wages paid £7,150,658. Plant, machinery, land, and buildings were valued at £14,411,973.

Value of Production, 1924-5.—Crops, total value, £15,318,080, average per head, £28; manufactures, £1,332,374; pastoral, £8,137,801; minerals, £953,238; dairying, £2,152,713; poultry, &c., £1,148,322; fisheries and game, forestry, &c., £1,039,899. *Total value of production*, £40,082,427, average £74 per head.

Trade and Commerce, 1925-6.—The total value of the *Imports* was £13,903,176 (U.K. £5,910,054, or 43 per cent.; other British countries £2,069,905, or 15 per cent.; foreign countries £5,923,216, or 42 per cent.). The total value of the *Exports* was £19,273,608 (U.K. £9,760,976, or 51 per cent.; other British £2,877,030, or 15 per cent.; foreign countries £6,635,602, or 34 per cent.). The main items are wheat, flour, wool, meats, skins and hides, butter, tallow, leather, minerals, wines, fruits (fresh and dried), and minerals from Broken Hill.

Communication.—There are 3,500 miles of railway in South Australia, 140 miles of electric tramways, 44,000 miles of roads and several good harbours. The River Murray is used for conveying the produce grown on the irrigation settlements along its banks. There are 805 post offices in the State, which transmit annually 54,000,000 letters, 9,000,000 newspapers, 16,000,000 packets and parcels, and also 2,100,000 telegrams.

Shipping (1924-5).—Ships entered numbered 1,280, tonnage 4,573,822; British 1,112 (3,982,723 tons), foreign 168 (591,099 tons).

TOWNS.

ADELAIDE, the chief city and capital, population (1924) 303,614, inclusive of suburbs within 10 miles radius. Other towns are Moonta (4,000), Kadina (3,500), Wallaroo (5,500), Port Pirie (10,500) on the east, and Port Augusta (3,000) on the west of Spencer Gulf, and Kapunda (2,200), Gawler (4,500), and Peterborough (2,500) on the line from Adelaide to the north, Victor Harbor (3,000) in the south, and Mt. Gambier (6,000) in the south-east.

Transmission of mails from London to Adelaide, approximate, 29 days.

IV.—QUEENSLAND.

This State, situated in lat. 10° 40′—29° S. and long. 138°—153° 30′ E., comprises the whole north-eastern portion of the Australian continent.

Queensland possesses an area of 670,500 square miles (*i.e.*, equal to more than 5½ times the area of the United Kingdom).

POPULATION.—At the Census of 1921 the population numbered 755,972 (398,969 males and 359,003 females).

Increase of the People.

Year.	Births.	Deaths.	Marriages.
1921	20,333	7,143	5,965

1924	19,706	7,328	6,233
1925	20,283	7,545	6,471

Religion.

Since 1861 no State aid has been afforded to religion. At the Census of 1921 there were 309,786 Church of England, 172,662 Roman Catholics, 91,610 Presbyterians, 77,566 Methodists, 17,891 Lutherans, 14,735 Baptists, and 44,132 other Christians, with 4,267 Muhammadans and Pagans, besides "Indefinite," "No religion," &c.

PHYSIOGRAPHY.

The *Great Dividing Range* on the eastern coast of the continent produces a similar formation to that of New South Wales, the eastern side having a narrow slope to the coast and the western a long and gradual slope to the central plains, where the *Kirby's Range* divides the land into a northern and southern watershed. The Brisbane, Burnett, Fitzroy, and Burdekin rise in the eastern ranges and flow into the Pacific, the Flinders, Mitchell, and Leichhardt in the Gulf of Carpentaria, and the Barcoo and Warrego rise in the central ranges and flow southwards.

Climate.—At Brisbane the mean temperature for 1925 was 67·9°, the maximum and minimum shade temperatures being 105·7° and 37·1°; mean barometer, 30·002. The coastal regions are warm and moist, the plateaus dry and temperate, whilst in the very far west the rainfall is scanty. The rainfall during 1925 was 53·08 inches, and there were 138 wet days.

GOVERNMENT.

Queensland was constituted a separate colony with Responsible Government in 1859, having previously formed part of New South Wales. The executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of 10 members.

EDUCATION.

Primary Education is compulsory, secular, and free. In 1925 there were 1,707 State schools, including 156 Provisional and 13 High schools in operation, with 4,227 teachers and an average daily attendance of 106,994 children; and 181 private and 10 grammar schools, with 1,138 teachers and an average attendance of 23,399. A State-aided University was established during 1910.

FINANCE.

Revenue, Expenditure, and Debt of Queensland for five years ended June 30:—

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1922	12,311,378	12,499,970	85,691,228
1923	12,599,403	12,784,382	88,005,001
1924	13,428,039	13,415,332	91,128,556
1925	14,897,256	14,880,289	97,001,712
1926	15,999,728	16,154,404	102,449,511

Banking.—The banking assets (1925) £34,952,693, liabilities £33,104,358. The deposits on June 30, 1925, were £31,972,696. The Commonwealth Bank of Australia also has a branch in Queensland. The assets on December 31, 1925, amounted to £26,539,360, and the liabilities to £32,407,533. These liabilities include the depositors' balances in the hands of the Commonwealth Savings Bank Branch, amounting to £21,909,458 (equal to an average of £53 9s. 6d. to each depositor).

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—Of the total area of 429,120,000 acres the Government have parted with the fee simple of 17,508,805 and 88,071 acres granted without payment; under a system of deferred payment, 6,966,230 acres more are in process of alienation, and an additional area including preferential pastoral leases of 191,469,760 acres leased out for sheep and cattle runs, 82,469,364 acres for grazing farms and homesteads, 32,087,000 acres are held under occupation licence, 464,731 acres under gold-mining and mineral lease, 482,773 for special purposes and 3,548,169 acres perpetual lease, and scrub selections 50,812 acres, 17,354 acres sold as perpetual leases, prickly pear leases 1,296,800 acres, leaving 79,835,877 practically unoccupied. Wheat, oats, and barley flourish on the Darling Downs, while a still larger area is devoted to maize, which yields an average crop of about 22 bushels per acre. Both English and sweet potatoes are cultivated, as also are coffee, cotton, oranges, peaches, pineapples, grapes, bananas, coco-nuts, mangoes, plums, and various English fruits. India-rubber and sisal hemp plantations have also been recently started. In the year 1925, 485,585 tons of sugar were produced. The live stock in 1925 included 6,436,645 cattle, 20,663,323 sheep, 638,372 horses, and 199,598 pigs. Wool, meat, and butter are the principal products.

Forestry.—There are about 24,000,000 acres of commercial timberland in Queensland, of which there have been reserved for forestry purposes 5,256,365 acres. In 1924-25 the wealth produced by the timber industry of Queensland was between three and four million pounds, and there were 4,464 hands employed in the sawmills alone. At the end of 1924 some 7,000 acres of cut-out State forests had been subjected to re-afforestative treatment by the State Forest Service which employs 395 men, and is engaged actively in timber farming and wood-trading operations.

Minerals.—The total mineral output in 1925 was £2,012,677. There are rich deposits of gold, copper, tin, lead, silver, antimony, limestone, ironstone, and wolfram, while coal is found in several districts. The gold output in 1925 was valued at £197,118; silver, £53,003; copper, £254,074; tin, £161,500; coal, £1,037,956; wolfram, £184; molybdenite, £271; lead, £187,681; opals and gems, £35,573; arsenic, £11,150; cobalt, £18,014; zinc, £2,350.

Commerce.—The chief articles of export oversea, the produce of the State, in 1924-5 were: Wool, £11,992,952; meat, including extract, and bacon hams, and pork, £4,284,242; hides and skins, £837,958; tallow, £598,048; butter, cheese, and milk, £3,135,159.

TOWNS.

CAPITAL, Brisbane, with an area of 385 square miles. Population Census, April 4, 1921, 210,032. Estimated Dec. 31 1925, 263,711.

The contour of the Queensland coast-line and the relative position of its inland parts operate against any centralisation similar to that at Melbourne, Sydney, or Adelaide, and numerous

ports of considerable size extend along the coast:—Brisbane, Rockhampton (25,000), Maryborough (10,635), Townsville (27,500), Port Douglas, Mackay (7,100), Thursday Island, Cooktown, Cairns (8,500), Bowen and Bundaberg (9,500), Gladstone (2,300). Other places of importance are Ipswich (20,526), Toowoomba (23,394), Charters Towers (9,350), Gympie (8,769), Mt. Morgan (6,750), Warwick (6,800), Roma, and Cloncurry.

Religion.

All religions are free. In 1921 there were 88,158 members of the Church of England, 28,581 Roman Catholics, 24,975 Methodists, 15,735 Presbyterians, 4,880 Congregationalists and Independents, and 4,757 Baptists.

PHYSIOGRAPHY.

The surface of the country is generally hilly and timbered, with mountains from 1,500 to 5,000 feet in height, and expanses of level, open plains. There are numerous streams, the Derwent and the Tamar being the largest. The climate is fine and salubrious, and well suited to European constitutions; the hot winds of Australia do not reach the Island. At Hobart in 1921 the mean annual temperature was 55·5°, the mean temperature for Dec., Jan., and Feb. being 62·5°, and that of June, July, and Aug. 48·6°. The western side of the island is very wet, the eastern side having a rainfall similar to that of eastern England; the average rainfall varies from 20 inches to 100 inches in different parts.

GOVERNMENT.

The island was first settled by the British in 1803 as an appendage to New South Wales, from which it was separated in 1825. In 1851 a partly elective legislature was inaugurated, and in 1856 Responsible Government was added. In 1901 Tasmania became a State of the Australian Commonwealth, *q.v.* The State executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council or responsible Ministers.

GOVERNOR.

Governor of Tasmania, His Excellency Sir James O'Grady, K.C.M.G. (1924) £2,750
Private Sec., Capt. E. J. C. Stopp .....

AGENT-GENERAL IN LONDON.

Agent-General in London, Lt.-Col. R. Eccles Snowden, Australia House, Strand, W.C.2.
Official Secretary, H. W. Ely, I.S.O.

THE LEGISLATURE.

Parliament consists of two Houses, a *Legislative Council* of 18 members, elected for six years: and a *House of Assembly* of 30 members, elected by proportional representation for three years, the electors for the latter being all adult Tasmanians who have resided continuously in the State for 6 months; the electorate for the Council is smaller, having a property or educational qualification for both sexes.

President of the Legislative Council, Hon. W. B. Propsting, C.M.G. £500
Speaker of House of Assembly, Hon. Michael O'Keefe 500
Clerk of the House, Hy. McPherson 675

THE JUDICATURE.

There are justices of the peace and courts of petty, general and quarter sessions, and a Supreme Court with a Chief Justice and two Puisne Judges.

Chief Justice, Hon. Sir H. Nicholls (*b.* 1868)£1,800
Puisne Judges, Hons. N. K. Ewing; H. Crisp ....each 1,500
Solicitor-General, L. E. Chambers..... 750
Registrar Supreme Court, A. G. Brammall 625
Recorder of Titles, A. A. Richardson 675

EDUCATION.

Primary education is compulsory, secular, and free, there being 500 State schools in 1924, with 40,500 children on the registers. *Secondary* education is also provided by the State (5 high schools with 800 scholars), and by private endowment. There is a *University* at Hobart, and technical schools at Hobart, Launceston, Queenstown and Zeehan.

Banking.—Dec. 31, 1925, the banks of issue had total deposits £6,071,541; the savings bank deposits were £4,599,845.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—Of the total area of 16,778,000 acres there were, in 1924–25, 263,872 acres under crops. The live stock included 225,740 cattle, 1,614,085 sheep, 47,305 pigs, and 37,091 horses. The wool production was 10,483,452 lb. The butter produced amounted to 6,455,746 lb.

Electrical Energy.—The Hydro-Electric Department of Tasmania has completed an important waterpower development at the Great Lake, in the centre of the State. The capacity of the present installation is 63,000 h.p., and is now being increased to 75,000 h.p. The advantage of cheap power is steadily attracting new manufacturing industries.

Forestry Department.—Total area of timber land estimated at 9,600,000 acres. 31,200 acres have so far been dedicated as State forests. Timber reserves total 1,698,150 acres. Area held under lease or forest permits for sawmilling, logging, &c., 284,800 acres. The amount of timber milled for 1924-5 was 53,266,115 super feet, valued at £509,545. This is exclusive of timber used for piles, poles, fencing, and for practically all sleepers. Undressed overseas exports for 1924-5 (excluding exports to States within the Commonwealth) approximated 4,000,000 super feet. Exports beyond the Commonwealth are chiefly for harbour works and sleepers.

The utilisation of forest waste for the production of wood-pulp has, after long investigation, been put upon a practical basis, and production for market is expected to begin during 1926.

Minerals.—The chief minerals produced are copper, tin, silver, lead, coal and osmiridium, the value of all minerals produced in 1925 being £1,396,909.

Manufactures.—The chief factories for export are metallurgical, fruit preserving, woollen mills and confectionery; the value of production in 1924-5 was £4,175,000, the capital invested in the 675 establishments being £8,833,306.

TOWNS.

CAPITAL, Hobart. Population (1925), 55,260.

Other towns are Launceston (pop. 27,150), Devonport, Ulverstone, Burnie, and Queenstown.

VI.—WESTERN AUSTRALIA.

Includes all that portion of the continent west of 129° E. long., the most westerly point being in 112° 52′ E. long., and from 13° 30′ to 35° 8′ S. lat. Its extreme length is 1,500 miles, and 1,000 miles from east to west, and its total area 975,920 square miles.

POPULATION.—At the Census of April 4, 1921, the population was 332,213 (177,013 males, 155,200 females); in 1925 the total was estimated at 372,183 (199,596 males, 172,587 females).

Religions.

There is no State aid to religions. At the Census of 1921 there were 183,285 persons belonging to the Church of England, 64,488 Roman Catholics, 39,116 Methodists, and 28,377 Presbyterians.

Physical Features.—Large areas of the State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount Bruce (4,024 ft.) in the north-west division or that of Bluff Knoll (3,640 ft.) in the Stirling Range in the south-west. The coastal regions of the west and of the north are undulating, with an interior slope to the unsettled central portion of Australia. The Darling and Hamersley ranges of the west have a western slope to the Indian Ocean, into which flow many streams, notably the Swan, Murchison, Gascoyne, Ashburton, Fortescue, and De Grey. In the north the Fitzroy flows from the Leopold range into the Indian Ocean, and the Drysdale and Ord into the Timor Sea. The greater portion of the far interior may be described as a great tableland, with an altitude of from 1,000 to 2,000 ft. above sea-level, the surface of which consists in parts of sand-dunes, varied by wide stretches of clayey soils. Long, straggling rivers, broken during the summer into a series of pools, cross the country as far inland as the hills extend, widening in many cases nearer the coast into large sea-estuaries. The climate is one of the most temperate in the world, especially in the south-western portion, where excessive cold is never known and excessive heat is very rare. The summer heat, which is mostly dry, with hardly any rainfall, is during the greater part of the hot season relieved by cool sea-breezes in the afternoon. The winters are rainy, but with occasional dry spells of perfect weather. The average temperature of Perth (lat. 32° S.) for the past 29 years was 64·1°, while the mean for the barometer for 41 years was 30·018 inches. There are wet and dry seasons, the former lasting from May to October. The total rainfall at Perth during 1925 was 31·41 inches, the average for the past 50 years being 34·03. Of the area of Western Australia, which is equal to more than half that of European Russia, probably about two-thirds is suitable for pastoral purposes, immense tracts having already been proved eminently so. Some 40,000,000 acres are as yet neither alienated nor in process of alienation in the S.W., the portion more immediately fitted for agricultural purposes, especially for wheat, wine, and fruit. Considerable areas, however, are already under cultivation. Gold, coal, and other minerals in abundance are found in many parts, and wide stretches of land are covered with forests of great commercial value.

GOVERNMENT.

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. In 1890 responsible government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon an Amending Act of 1899, further amended by the Constitution Acts Amendment Act, 1911; the Executive is vested in a Governor appointed by the Crown and aided by a Council of responsible Ministers.

EDUCATION.

Education.—Education is compulsory and free, and numerous elementary schools are under the control of the Minister of Education. There are a training college, technical schools, a school of mines and a Goldfields High School at Kalgoorlie (State Secondary Schools in various centres and the capital), and a University. The total amount expended on education during the year ended June 30, 1926, was £595,213; in addition, a grant of £20,000 was made to the University.

FINANCE.

Revenue and Expenditure and gross public Debt for 5 years ended June 30:—

1926	8,808,166	8,907,308	70,010,920

Banking.—There were, including the Commonwealth Bank of Australia, 12 cheque-paying banks, formerly banks of issue, in the State on June 30, 1926, with total assets £20,066,370 and liabilities £15,161,168. The amount due to depositors in the State Savings Bank at June 30, 1926, was £6,346,713; in the School Savings Bank, £81,282; and in the Commonwealth Savings Bank the amount due to depositors in Western Australia on March 31, 1926, was £2,417,383.

PRODUCTION AND INDUSTRY.

Crops and Live Stock.—Of the total area (624,588,800 acres) 2,932,392 acres were under crops in 1925-26, wheat for grain accounting for 2,112,032 acres. In 1925 the live stock included 756,011 cattle, 6,865,950 sheep, 74,304 pigs, 21,705 goats, and 170,642 horses. There were about 5,000 acres of vineyards.

Manufacturing Industries.—There were on December 31, 1924, a total of 1,293 industrial establishments in the State employing either machinery or at least four hands. The total number of persons employed in them was 22,808. The combined output of these establishments was computed at £15,726,473.

Forestry.—The forests contain some of the very finest hardwoods in the world. Two of these, jarrah (*Eucalyptus marginata*) and karri (*Eucalyptus diversicolor*), are largely exported. The quantity of timber cut during 1925 is computed to have been over 200 million super feet.

Minerals.—The groups of the Coolgardie goldfields (covering a vast portion of the interior and extending to the 125th meridian), as well as other fields, are being constantly worked, the production of gold being 441,252 oz. in 1925. The total amount produced in the State from 1886 to June 30, 1926, is 36,484,597 fine oz. Magnetic iron, lead, copper, and tin ores exist in large quantities, as also coal.

Trade.—The principal ports are Fremantle, Albany, Bunbury, Geraldton, and Broome. The opening of the Trans-Australian Railway in Oct. 1917 afforded another means of ingress and egress, both for travellers and merchandise. The imports chiefly consist of provisions, sugar, tea, tobacco, spirits, beer, soap, machinery, ironmongery, clothing of various kinds, &c. Principal exports for the year ended June 30, 1926:—Wool, £3,527,865; timber, £1,522,958; sandalwood, pearl shell, hides and skins, £932,153; wheat, £4,186,714; flour, £1,294,311; and fresh fruit, £232,149.

TOWNS.

CAPITAL, Perth. Population (1925) of Metropolitan area, including Fremantle, 179,388.

Perth, the capital, stands on the right bank of the Swan River estuary, 12 miles from Fremantle. The King's Park (approximately 1000 acres), on a hill overlooking the city and the wide estuarine reaches of the river, possesses unique natural beauty. Other towns are Fremantle (including suburbs, 29,168), Albany (3,980), Kalgoorlie and Boulder (over 11,000), Bunbury (4,850), Claremont (6,219), Geraldton (4,200), Midland Junction (4,950), Northam (4,500), and Collie (3,550).

THE DOMINION OF NEW ZEALAND.

(By the Rt. Hon. J. G. COATES, M.C., *Prime Minister.*)

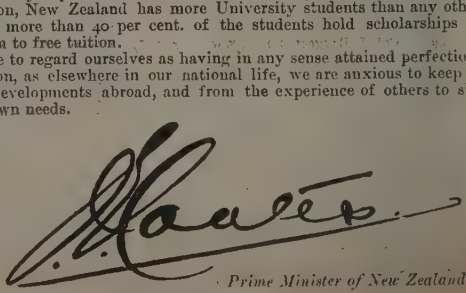
THE Dominion of New Zealand, farthest in point of distance from the heart of the Empire, is proud to think that the loyalty of her attachment to the British Commonwealth of Nations is nowhere exceeded. It is not uncommon for visitors to describe us as "more British than the British," and indeed the truth of this observation is borne out by a study of the racial composition of the people. The latest available census figures show that 99·35 per cent. of the population are of British nationality: where else could we find so near an approach to an homogeneous people? Whatever the future may bring forth, we may remain calmly confident that New Zealand's destiny lies in closest co-operation with the other free nations of the Empire, assured as we are that within the bounds of the Empire we find ample scope for the realisation of our ideals as a people.

Consistent with our anxiety firmly to preserve the Imperial connection, we accord by differential Customs rates a substantial measure of preference to British-made goods. To Great Britain, New Zealand directs some 80 per cent. of her exports, and we already hold an important position as a supplier of food and raw materials to British markets. It is becoming abundantly clear that the restoration and the expansion of Britain's over-seas trade, upon which depends her prosperity as a manufacturing nation, demand the fullest possible extension of inter-Empire trading. It is the earnest desire of the Government and the people of New Zealand in every possible way to assist in that development.

In the few decades during which white men have inhabited these islands, magnificent progress has been accomplished: yet pride in our past achievements does not make us unmindful of the need for vigorous progress in our time. It is no exaggeration to say that we have merely "scratched the surface of the land"—and of a very small part at that. Of the total area of the Dominion, less than 66 per cent. is occupied, and the improved land represents only 42 per cent. of that occupied area, or 28 per cent. of the whole area of New Zealand. One must of course recognise that an appreciable proportion of the "unoccupied" land cannot at an early date be profitably taken up; but there is still room for further settlement. Moreover, the intensive cultivation of the soil, the summoning of science to the aid of industry, promise to open up a new era of enhanced prosperity. Action is already under way for the establishment of a properly equipped College of Agriculture, of University standard, and for the co-ordination and strengthening of the scientific agencies of the Government. New Zealand possesses unrivalled facilities for exploiting the latent forces of nature, and the Government has accepted as a national responsibility the task of providing hydro-electric power on a comprehensive scale. Thus we shall at once furnish the motive-power necessary to the basic industries, and shall bring to the settler in the less accessible parts some of the amenities and comforts to which his labours unquestionably entitle him.

Generous provision is made in New Zealand for education. Illiteracy amongst the adult population has been reduced virtually to vanishing point—to such a level indeed that enquiry on the matter has been eliminated from the quinquennial census. Primary education, the full cost of which is defrayed by the general Government without recourse to local rates or taxes, is available free to every child, and 95 per cent. of the primary pupils are educated in State secular schools. Normally the highest class is passed at the age of fourteen years, and some 66 per cent. of the pupils who satisfactorily complete the primary course enter upon full-time secondary or technical education. The path to the University, too, is made easy by Government assistance to qualified students. In proportion to the population, New Zealand has more University students than any other country in the world, and more than 40 per cent. of the students hold scholarships or bursaries which entitle them to free tuition.

Withal, we are not prone to regard ourselves as having in any sense attained perfection, and with respect to education, as elsewhere in our national life, we are anxious to keep in constant touch with the developments abroad, and from the experience of others to sift what is best suited to our own needs.



Prime Minister of New Zealand.

PHYSIOGRAPHY.

The Dominion of New Zealand is distant about 1,200 miles south-east of the mainland of Australia, and consists of three main islands in the South Pacific Ocean, known as the North, South, and Stewart Islands, having a length of 1,100 miles, between 34° 22′ and 47° 18′ South latitude and 162° East longitude – 173° West longitude, with several groups of smaller islands lying at some distance from the principal group.

Geographical.—The two principal islands of New Zealand have a total length of 1,040 miles, the total coast-line reaching 4,330 miles. A large portion of the surface is mountainous in character. The principal range is that of the Southern Alps, having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several active and dormant volcanoes. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,515 ft.) are the most important. Of the numerous glaciers, the Tasman (18 miles by 1½) is the largest. The North Island in particular is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for considerable use in navigation. The more important include the Waikato (220 miles in length), Wanganui (140) and Clutha (210). Lakes (Taupo, 238 sq. miles in area; Wakatipu, 112; and Te Anau 132) are abundant; many of them of great beauty.

Meteorological.—Owing chiefly to its great length, New Zealand's climate varies very considerably in its different divisions. In general it is mild with an abundant rainfall. Snow is rarely seen except upon the higher levels. Annual averages:—North Island, mean temperature 56° F., rainfall 48 in. (days with rain 159); South Island, mean temperature 52° F., rainfall 43 in. (days with rain 150).

GOVERNMENT.

The west coast of the South Island of New Zealand was discovered by Abel Jansen Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642. The islands were visited in 1769 by Captain Cook, who returned to them in 1773, 1774, and 1777. In 1793 the Government of New South Wales despatched H.M.S. *Daedalus* to the islands on a diplomatic mission. The first settlement of Europeans was made in 1814, but no colonisation took place until 1825. In 1840 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. On Sept. 26, 1907, the designation was changed to *The Dominion of New Zealand*. The Constitution rests upon the Act of 1852, under which the executive authority is entrusted to a Governor (now Governor-General) appointed by the Crown and aided by a Council of Ministers, with a Legislature of two houses.

THE LEGISLATURE.

Parliament consists of a General Legislative Council appointed by the Governor (prior to 1891 the appointments were for life; since that date for 7 years only), at present consisting of 42 members; and a House of Representatives consisting of 80 members elected for 3 years. Four of the members are Maoris elected by the natives. Women are entitled to vote and to be elected Members of the House of Representatives (Women's Parliamentary Rights Act, 1919). Members of the Upper House receive £325 *per annum* and of the Lower House £450 *per annum*, in each case with travelling expenses and deductions for non-attendance.

Speaker of the Legislative Council, Hon. Sir W. C. F. Carncross £720
Speaker of the House of Representatives, Hon. Sir C. E. Statham 900

THE JUDICATURE.

The judicial system comprises a Supreme Court and Courts of Appeal; also Magistrates' Courts, having both civil and criminal jurisdiction.

Chief Justice, Hon. C. P. Skerrett, K.C. ... £2,250
Puisne Judges, Hons. Sir W. A. Sim, T. W. Stringer, A. L. Herdman, J. R. Reed, C.B.E., A. S. Adams, W. C. MacGregor, H. H. Ostler, O. T. J. Alpers ..... each 2,000
Judge, Court of Arbitration, F. V. Frazer 2,000

In 1925, 48,436 civil cases were tried in Magistrates' Courts, while summary convictions in criminal cases were 44,017. In 1925 convictions (or sentences) in Supreme Courts were 1,465. Civil cases to number of 467 were tried, judgment being entered for a total amount of £303,319.

POLICE.

On March 31, 1926, the strength of the Police Force was 1,085 of all ranks, equivalent to 1 for every 1,299 of the population. Average cost of police protection per inhabitant was, in 1925–26, 5*s.* 9½*d.*

LOCAL GOVERNMENT.

For purposes of local government the Dominion is divided into counties and ridings, with incorporated boroughs, under elected county and municipal councils, town, road, electric power, and harbour boards. Electors are adult ratepayers of both sexes.

Revenue of local bodies, 1924–25	£12,180,964
Receipts not revenue, 1924–25	7,613,399
Expenditure, 1924–25	19,422,833
Net indebtedness, March 31, 1925 ...	47,259,153

PASSPORTS.

With certain exceptions, no person over 15 years is permitted to land unless in possession of a passport issued by a competent British authority.

DEFENCE.

Army.

The New Zealand Defence Forces consist of the Permanent Force, the Territorial Force and the Senior Cadets.

Units of the N.Z. Permanent Forces are the New Zealand Staff Corps, the Royal New Zealand Artillery, the New Zealand Permanent Air Force, the New Zealand Permanent Staff, the New Zealand Army Ordnance Corps, the New Zealand Army Pay Corps, and the New Zealand Permanent Army Service Corps. The Territorial Force consists of 9 regiments of Mounted Rifles; 21 batteries of Artillery; 3 Depôts of Engineers (Field); 3 Depôts Corps of Signals; 3 Brigades of Infantry; 3 Depôts Army Service Corps; and 3 Depôts Medical Corps. The Dominion, for purposes of defence, is divided into 3 Commands, each of which produces one-third of the above Units. The Senior Cadets are reorganised in Battalions and receive physical and elementary military training. There are a large number of Rifle Clubs in the Dominion established for the encouragement of rifle shooting. Military training is compulsory on all male citizens between the ages of 14 and 25; in the Senior Cadets from the age of 14 to 18, and in the Territorial Force from the age of 18 to 25, and in the Reserve from the age of 25 to 30.

During the South African War, New Zealand despatched 10 Contingents, totalling 6,500 men, to the assistance of the Imperial Forces in South Africa. On the outbreak of the Great War, the Dominion contributed a Force which captured and garrisoned German Samoa, and an Expeditionary Force for service in Europe. The latter force was engaged in Egypt and Gallipoli, and being subsequently expanded to a Division and a Brigade of Mounted Rifles, continued to operate on the Western Front and in Palestine until the termination of hostilities. During this period of service the Expeditionary Force absorbed 100,000 men, and 10,000 more were ready for embarkation or under training when the Armistice was signed. Seventeen thousand of the Dominion's soldiers lost their lives on service. The New Zealand Troops established a very high reputation for their gallantry and general behaviour under all circumstances.

Navy.

In 1909 New Zealand presented the battle-cruiser *New Zealand* to the Imperial Government. The Naval Defence Act, 1913, provides for the establishment of a New Zealand Naval Force by voluntary enlistment for a prescribed period (fixed at 12 years or until age 30), members on discharge to be drafted into the New Zealand Royal Naval Reserve for such period as may be prescribed

for service only in time of war: the ships and personnel forming the Force to pass under the control and to be at the disposition of the Imperial Government in time of war. A commencement was made with the formation of a New Zealand Division immediately prior to the war, followed in May, 1921, with the recruiting of New Zealand boys and youths for training as seamen and stokers. H.M.S. *Chatham* (loaned in 1920 by the Imperial Government) was relieved in May, 1924, by H.M.S. *Dunedin*, an oil-burning light cruiser of the latest type. An additional light cruiser, H.M.S. *Diomede*, has been loaned by the Imperial Government from 1925. A Naval Board is charged with the control of all matters relating to the Naval Forces, and is vested with the executive command of the Naval Forces. By Order-in-Council of the 20th June, 1921, it was provided that the ships and personnel shall be described respectively as forming and belonging to "The New Zealand Division of the Royal Navy." H.M.S. *Veronica* (Sloop), which had been on the New Zealand station since 1920, was recommissioned in May, 1924, for further service on the station. H.M.S. *Laburnum* arrived in New Zealand waters from England in March, 1922, and was recommisioned in March, 1924.

*FINANCE.

1926	24,725,762	23,570,083	238,855,478

Banking.—At the end of 1925 there were six banks of issue doing business, two of which were New Zealand banks. Total assets (average of four quarters of year), £62,128,808; liabilities, £60,219,697; value of notes in circulation, £6,775,470.

Post-office and private savings banks had, at the close of the year 1925-26, 893,229 depositors, having £54,275,705 to their credit.

EDUCATION.

The State system of education is free, secular, and compulsory. There were (December, 1925) 2,580 public primary schools, with 6,362 teachers and 217,860 scholars; there are also 285 registered private primary schools, with 25,933 scholars, and, in addition, 128 village schools for the Maoris with 6,386 scholars. The higher education of boys and girls in the cities and large towns is carried on in 38 endowed colleges and grammar schools, and in 15 technical high schools. In addition there are 80 secondary dept. of district high schools, 29 private secondary schools, and 11 schools for Maoris. The University of New Zealand consists of Auckland University College, Victoria University College, Canterbury University College, and the University of Otago, the four colleges having 4,442 students in 1925, and has power to confer degrees.

PRODUCTION AND INDUSTRY.

Agriculture and Forestry.—The total area of the Dominion (excluding annexed islands) is 66,390,262 acres, and 43,606,829 acres of this were in occupation in 1925, this acreage representing 85,734 holdings. New Zealand is a pastoral rather than an agricultural country, but the quantity of wheat and oats grown is sufficient for the Dominion's requirements. The area under wheat in 1925-26 was 151,673 acres, giving a yield of 4,617,041 bushels. An area of 102,485 acres of oats was threshed, the yield totalling 4,115,606 bushels; while 245,026 acres were converted to chaff, hay, or ensilage. Other acreages were: barley, 25,969; rye-grass, 45,154; and potatoes, 23,484. An area of 481,571 acres was sown in turnips and mangolds. Amongst the forest productions are the Kauri pine (found only at the northern extremity of the islands), much valued for shipbuilding and for its resin (Kauri gum). New Zealand flax is used for the manufacture of ropes and twine.

Live Stock.—The cattle in 1926 numbered 3,452,486; sheep, 24,904,993; pigs, 472,534; and horses, 314,867. The pastures of the South Island produce the celebrated sheep of the Canterbury Plain.

Minerals.—Coal-mining is one of the largest industries, the output in 1925 being 2,114,995 tons, the approximate total output to the end of 1925 being 61,719,343 tons. Gold-mining both alluvial and quartz, is an important industry in many districts, and rich iron ore, in the form of ironsand, has been found in Taranaki, and in the form of brown hæmatite at Parapara, near Nelson.

COMMUNICATIONS.

Railways.—In March, 1926, there were 3,138 miles of Government railway lines in working order, and more under construction; and 119 miles of private lines, together with an excellent coaching system. The number of passengers carried in 1925–26, including season-ticket holders, was 27,653,414, while goods carried amounted to 7,268,016 tons. Revenue and expenditure were £8,460,762 and £6,468,428 respectively.

Shipping.—During 1925 the vessels entered inwards numbered 656 (tonnage, 2,122,741), and those entered outwards 663 (tonnage, 2,139,192), exclusive of coasting vessels.

Posts and Telegraphs.—The annual postal circulation was (1925) 303,737,841 letters and post cards, 44,717,406 newspapers, 115,946,882 books and packets, and 7,101,628 parcels, and the work is effected by 2,034 post-offices. There are 13,052 miles of telegraph line, with 59,791 miles of wire. The telephone service is highly efficient and universal in all centres. Telegrams transmitted during year, 16,201,874.

TOWNS.

CAPITAL, WELLINGTON, in the North Island.

The population of the Urban Areas, at the Census of April 20, 1926, was as follows:—Wellington, 121,324; Auckland, 192,176; Dunedin, 85,103; Christchurch, 118,408; Invercargill, 21,862; Napier, 17,933; Gisborne, 14,834; Palmerston North, 19,754; Nelson, 11,762; Timaru, 16,817; Wanganui, 26,130; New Plymouth, 15,938; Hamilton, 16,070; and Hastings, 14,638.

THE ISLANDS OF NEW ZEALAND.

The following islands form part of the Dominion proper:—*North Island* and adjacent islets; *South Island* and adjacent islets; *Stewart Island* and adjacent islets, and *Chatham Islands*, between 43° 30′ S. lat. and 175° 40′–177° 15′ W. long. Chatham Islands have a population of 268 Europeans and 294 Maoris and half-castes. They support large flocks of sheep and some cattle.

The following are included in the geographical boundaries of New Zealand as proclaimed in 1847:—*The Three Kings* (discovered by Tasman on the Feast of the Epiphany), in 34° 9′ S. lat. and 172° 8′ 8″ E. long. (uninhabited). *Auckland Islands*, about 290 miles south of Bluff Harbour, in 50° 32′ S. lat., and 166° 13′ E. long. The islands contain several good harbours, but are uninhabited. *Campbell Island* (uninhabited). *Antipodes Group* (49° 41′ 15″ S. lat., and 178° 43′ E. long.) uninhabited, and *Bounty Islands* (47° 43′ S. lat., 179° 0′ 30″ E. long.) uninhabited.

The following islands have been annexed to New Zealand:—

The Kermadec Group, between 29° 10′ to 31° 30′ S. lat., and 177° 45′ to 179° W. long., includes Sunday, Macaulay, Curtis Islands, and L'Espérance, and some islets. The group is uninhabited.

Cook Islands, included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga, Aitutaki, Mangaia, Atiu, Mauke, Mitiaro, The Herveys (Manuae and Aoutu), Takutea, Palmerston, Penrhyn (or Tongareva), Manahiki, Rakahanga, Pukapura (or Danger), Niue (or Savage), Suwarrow, and Nassau. The population at the Census of 1926 numbered 13,833, all except 313 being Natives. The chief products are bananas, oranges, and other tropical fruits, copra, coffee, pearl-shell, and hats (Niue). The trade is chiefly with New Zealand and the United States of America. The exports (1925) were valued at £169,368, and the imports at £149,356. Rarotonga is the chief island, with a native population of 3,701, and a population other than native of 205. The government is administered locally under the direction of New Zealand. The Island Council of the Cook Islands is under the direction of the Resident Commissioner at Rarotonga. The five Arikis of Rarotonga are of equal rank and are all members of the Council. Rarotonga is a place of call for the mail steamers between Sydney, N.S.W., and Wellington, N.Z., and San Francisco, U.S.A.

Resident Commissioner, Rarotonga, H. F. Ayson ..... *(and allowance £100)* £1,000
Resident Comm., Niue, A. A. Luckham.... 700

Ross Dependency—By Imperial Order in Council of July 30, 1923, the coasts of the Ross Sea, with adjacent island and territories, were proclaimed a British Settlement under the control of the Governor-General of New Zealand.

The Mandated Territories are:—

Western Samoa, consisting of the islands of Savaii, Manono, Apolima, Upolu, Fanuatapu, Namua, Nuutele and Nuulua (the remaining islands of the Samoan group belonging to the U.S.), have a total area of 1,135 square miles and a population at the Census of 1926 of 40,231. 36,308 were Samoans, 1,425 Chinese and Melanesians, and 2,498 half-castes and Europeans. The largest islands are *Savaii* (703 square miles) and *Upolu* (430 square miles). Upolu contains the harbours of Apia and Saluafata, of which the former is the capital. In 1889 a very heavy sea set up by a cyclone wrecked three U.S.A. warships and the *Eber* and *Adler* of the German Navy, H.M.S. *Calliope*, of the British Navy, effecting its escape. The disaster is recorded in "A Footnote to History," by R. L. Stevenson, whose home was at Vailima (near Apia). The natives of the islands are Christians of different denominations, including a few adherents of the Latter Day Saints (Mormons). Coco-nuts (copra), and cocoa are the chief products of the islands. The exports were valued in 1925 at £379,388 (copra £331,274), and the imports at £345,989.

Administrator, Maj.-Gen. Sir G. S. Richardson, K.B.E., C.B., C.M.G.

NAURU ISLAND.

Nauru Island, just south of the Equator, was proclaimed German territory on Oct. 1, 1888, and was administered as part of the (German) Marshall Islands group until it was captured by an Australian Expedition in 1914. The island was included in the cession of colonies made by Germany in 1919, and is now administered by the United Kingdom, the Commonwealth of Australia, and the Dominion of New Zealand under a mandate from the Allied and Associated Powers, 1919, the first Administrator having been appointed by agreement by the Australian Government. The island has a population (1925) of 2,174, of whom 118 are Europeans. There are valuable deposits of phosphates on the island, and in 1924–25 the exports of phosphates were 470,723 tons. The value of the imports in 1924 was £100,253.

Administrator, Brig.-Gen. T. Griffiths, C.M.G., C.B.E., D.S.O.

A law (No. 17 of 1923) amending and consolidating the pre-Union Acts in force in the four Provinces was passed and came into force as from the 1st January, 1924. Under this law registration of all European, Asiatic and Coloured (as distinct from Native) births and deaths was compulsory throughout the Union. Registration of Native births and deaths is compulsory only in urban areas. Only marriages solemnized under the prescribed civil laws are subject to registration.

PHYSIOGRAPHY.

Boundaries.—The provinces of the Union extend from the southernmost point of the African Continent to the course of the Limpopo River, *i.e.*, from 34° 50′ – 22° South latitude, and include all the British territories within those limits, with the exception of Basutoland and the Swaziland and Bechuanaland Protectorates, while provision is made for the future inclusion within the Union of those territories and of the territories of the British South Africa Company.

Relief.—The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous *Table Mountain* (3,582 feet), while the *Great Zwarte Bergen* and *Lange Bergen* run in parallel lines from west to east of the Cape province. Between these two ranges and the *Roggeveld* and *Nieuweveld* to the north is the Great Karoo Plateau, which is bounded on the east by the *Sneeuwbergen*, containing the highest summit in the province (Compassberg, 7,800 feet). In the east are ranges which join the *Drakensbergen* (11,000 feet), between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magalies* and *Waterberg* ranges of no great height. The veld or plains of this northernmost province is divisible into the Hooge Veld of the south, the Banker Veld of the centre, and the Bush Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a mimosa-covered waste. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the Drakensberg and the coast, the interior rising in terraces as in the southern provinces.

Rivers.—The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the Drakensbergen and flowing into the Atlantic between the Protectorate of South-West Africa and the Cape of Good Hope. The *Limpopo*, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

HISTORICAL SKETCH.

The *Cape of Good Hope* was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland, as a place of call in going to and from the East Indies. In 1652 the Netherlands' East India Company took possession of the shores of Table Bay, established a fort, and occupied the adjacent lands, in order to be always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

Natal derives its name from the fact of its discovery on Christmas Day, 1497, by the celebrated Portuguese navigator, Vasco da Gama. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu kingdom under T'Chaka. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony and settled in the northern districts, where to this day the Boers preponderate. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government.

The *Transvaal* was formed as the *South African Republic* by parties of Dutch Boers from the English colonies who "trekked" into the interior of the continent and wrested the land across the Vaal river from the native chiefs. The discovery of the goldfields within its borders led to the settlement of large numbers of foreigners, and eventually to hostilities with the British Government. A war of nearly three years' duration was fought with great tenacity, and its close was marked by the inclusion of the South African Republic within the British Empire, "responsible government" being granted almost immediately.

The *Orange Free State* was founded, in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854. Its subsequent history is identical with that of the Transvaal.

Delville Wood.—The title deeds of Delville Wood, containing the graves of South African troops who fell there during the battles on the Western Front in France during the Great War, are held by the Government of the Union of South Africa, and Delville Wood is part of South Africa.

GOVERNMENT.

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. VII., cap. 9), passed by the Parliament of the United Kingdom on September 20, 1909. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal, and the Orange River Colony became united on May 31, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal, and the Orange Free State respectively.

The Union Government is seised of all State property, and the Railways, Forts, Harbours, and Customs are administered by Union Commissioners for the benefit of a Consolidated Revenue Fund. The former debts of the Provinces are administered by and form a first charge upon the funds of the Union. Provision is made in the Act of 1909 for the admission to the Union of Rhodesia, and for the transfer to the Union Government of the administration of protected and other native territories. The Union was inaugurated by H.R.H. the Duke of Connaught, K.G., in 1910.

The Government publishes annually an "Official Year Book of the Union of South Africa," giving full statistics and descriptive information on all matters of public concern.

The seat of the Government is Pretoria; the seat of the Legislature is Cape Town.

The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council, with a Legislature of two Houses.

THE LEGISLATURE.

The *Senate* consists of 40 members. For ten years after the establishment of Union eight were nominated by the Governor-General-in-Council and 32 were elected, eight for each Province. The first election was made prior to the establishment of the Union by the two Houses of each of the Colonial Legislatures sitting as one body, and a vacancy was filled by the choice of the Provincial Council in respect of whose Province a vacancy occurred. Since 1921 the Provincial element has been elected, according to the system of proportional representation with the single transferable vote, by the Members of the House of Assembly and of the Provincial Council for each Province sitting together and presided over by the Administrator of such Province. Vacancies amongst elected Senators are filled in the same manner, but only for the period which the Senator in whose place the new Senator is elected would have held his seat; whereas nominated Senators always sit for the full ten year period, which is not even affected by the dissolution of the Senate or its expiration by effluxion of time. Of the eight nominated Senators, four are selected on the ground of their thorough acquaintance, by reason of their official experience or otherwise, with the reasonable wants and wishes of the coloured races.

The *House of Assembly* consists of 135 elected members, 51 of whom represent the Cape of Good Hope, 17 Natal, 50 Transvaal, and 17 the Orange Free State. Members of both Houses must be British subjects of European descent.

President of the Senate, Hon. H. C. van Heerden £1,200
Speaker of the House of Assembly, Hon. E. G. Jansen 2,000

LOCAL GOVERNMENT.

A Provincial Council in each Province has power to legislate by ordinance on certain subjects specified in the Act, and on such other subjects as may be delegated to it. All ordinances passed by a Provincial Council are subjected to the veto of the Governor-General in Council. Members of the Provincial Council are elected on the same system as Members of Parliament, but the restriction as to European descent does not apply. Provincial administration is in the case of each Province vested in an Administrator, with an Executive Committee of four members. The Provincial Council in each case consists of the same number of elected members as there are electoral divisions of such Province for the House of Assembly, unless that number is less than 25 (as in the cases of Natal and the Orange Free State), when the number is 25. Each Council exists for a period of three years. Direct taxation is permitted for Provincial purposes, and legislation is authorised on certain specified subjects.

DEFENCE.

The South Africa Defence Act, 1912, became law on June 14, 1912. This Act, as amended by the South Africa Defence Act Amendment Act of 1922, provides for the establishment of Defence Forces comprising:—

1. *The South Africa Permanent Force*, which consists of:—
(i) The South African Staff Corps.
(ii) The South African Instructional Corps.
(iii) The South African Naval Service.
(iv) The South African Field Artillery.
(v) The South African Permanent Garrison Artillery.
(vi) The South African Engineer Corps.
(vii) The South African Air Force.
(viii) The South African Service Corps.
(ix) The South African Medical Corps.
(x) The South African Ordnance Corps.
(xi) The South African Veterinary Corps.
(xii) The South African Administrative, Pay, and Clerical Corps.

The South African Naval Service includes the officers and men of the South African Division of the Royal Naval Volunteer Reserve engaged for whole-time service.

2. *The Coast Garrison Force*, which consists of:—
(i) The South African Garrison Artillery.
(ii) The South African Coast Defence Corps.

3. *The Citizen Force*, which consists of:—
(i) The Active Citizen Force.
(ii) The Citizen Force Reserve.
(iii) The National Reserve.

4. *The South African Division of the Royal Naval Volunteer Reserve.*

5. *Special Reserves.*

Every citizen between the ages of 17 and 60 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only 50 per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number.

The establishment of Rifle Associations, under the Citizen Force Reserve, is a marked feature of the Act; citizens between the ages of 21 and 25 who are not entered for peace training with the Active Citizen Force are to be compelled to undergo training during these four years in a Rifle Association, thus ensuring that, in course of time, all citizens will at least know how to handle and use a rifle.

Provision is made in the Act for the cadet training of boys between 13 and 17 in urban and other populous areas, where facilities can conveniently be arranged.

The Union is divided into 6 military districts. To each military district has been allotted various units of different arms, to which the citizens entered for peace training in their 20th and 21st years are posted.

The object of the amending Act is to provide for a small standing army with an efficient Air Force and the nucleus of a Naval Service for coastal defence. Under the Act the Permanent Force is relieved of all Police duties in peace time for which they were liable under the Act of 1912, and becomes a purely military force. The provision of a Police Reserve to take the place of the South African Mounted Riflemen, when on active service, is no longer necessary, and has been expunged from the Act of 1912 accordingly.

EDUCATION.

In the South Africa Act, Section 85 (iii.), it is provided that "Education, other than higher education, for a period of five years and thereafter, until Parliament otherwise provides, shall be and remain under the jurisdiction of the respective Provincial Councils."

Under Act No. 5 of 1922, a definition is given of the term "higher education." Section 11 of that Act, as amended by Section 14 of Act No. 46 of 1925, reads as follows:—The expression "higher education" as used in Section 85 of the South Africa Act, 1909, shall include *inter alia*: (*a*) Education provided by universities and university colleges incorporated by law; (*b*) education provided by the South African Native College; (*c*) education provided by such technical institutions (including schools of art, music, commerce, technology, agriculture, mining and domestic science) as the Minister of Education may declare to be places of higher education; (*d*) such part of the education provided by other technical institutions as the Minister of Education may, after consultation with the provincial administration concerned, declare to be higher education; (*e*) any other education which, with the consent of the provincial administration concerned, the Minister of Education may declare to be higher education.

In terms of clauses (*c*), (*d*) and (*e*) above, the Provinces have been relieved of all vocational education (technical, industrial, and agricultural), and the Department of Education under the Minister is therefore now concerned with—

I. Universities and university colleges comprising the following:—

1. *University of South Africa*, with the following constituent colleges—
Transvaal University College, Pretoria.
Potchefstroom University College, Potchefstroom.
Grey University College, Bloemfontein.
Rhodes University College, Grahamstown.
Huguenot University College, Wellington, C.P.
Natal University College, Pietermaritzburg.
2. *University of Capetown.*
3. *University of Stellenbosch.*
4. *University of the Witwatersrand.*

II. Technical colleges which have been established under Act No. 30 of 1923 at Capetown, Durban, Johannesburg, Port Elizabeth, East London, Pretoria, and Pietermaritzburg.

III. Industrial, trade, and agricultural schools (State and State-aided) at various centres throughout the Union.

The number of students at universities and university colleges for the year 1925 was 5,600. The State expenditure on higher education as above defined during the financial year 1925–26 was £541,000.

Primary Education and Education other than Higher Education.—The central direction of

public education (other than higher education) is exercised by the Provincial Education Department in each of the four Provinces of the Union. Each Department is controlled by a Director or Superintendent of Education. In the Cape Province practically all the schools are State-aided. In Natal they are partly State-schools, and partly State-aided. In the Transvaal and Orange Free State they are in the main State-schools. In all Provinces primary education is free.

Number of Schools in the Union in 1924.—For white scholars, 4,631; for coloured scholars, 3,259; total, 7,890.

Number of Scholars and Teachers in 1924.—White scholars, 330,371; coloured scholars, 262,763; total, 593,134. Teachers, 21,005.

Expenditure from State Funds in 1924–25.—Cape, £2,761,965; Natal, £637,667; Transvaal, £2,684,798; Orange Free State, £843,884; total, £6,928,304.

In all Provinces Normal Colleges and other institutions for the training of teachers are maintained by the Education Departments.

Superintendent-General of Education, Cape, W. J. Viljoen, M.A., Ph.D.

Supt. of Education, Natal, H. Bryan, M.A.

Director of Education, Transvaal, H. S. Scott, M.A.

Director of Education, Orange Free State, (vacant).

UNION FINANCE.

The ordinary Revenue and Expenditure of the Union (exclusive of subsidies to Provincial Administrations and interest on Railway capital) for the five years ended March 31, 1925, are stated as under:—

Year.	Revenue.	Expenditure.
	£	£
1920–1921	29,676,186	25,597,718
1921–1922	28,884,270	25,409,035
1922–1923	27,234,515	24,065,556
1923–1924	24,252,888	24,340,698
1924–1925	25,335,543	24,522,753

DEBT.

The Funded Debt of the Union at March 31, 1926, was £209,309,902, and the Floating Debt £12,646,529.

PROVINCIAL FINANCE.

Since their establishment in 1910 the powers and functions of the Provinces have undergone various alterations, and their powers of taxation have been limited from time to time. An Act (No. 46, 1925) to amend the laws regulating the financial relations between the Union and the several Provinces thereof was passed in the 1925 Session of Parliament, and as from April 1, 1925, the sources of revenue available to the Provinces are:—

(1) A subsidy from the Union Government based upon the average attendance of pupils receiving education within the Province, and the extent of other educational functions carried on by the Province.

(2) Certain scheduled and limited taxes.

(3) Certain taxes collected by the Union and assigned to the Provinces without power to legislate in regard thereto.

(4) Special grants of £75,000 each to the two smaller Provinces of Natal and the Orange Free State.

The requirements of the Provinces in regard to capital expenditure are supplied by the Union Government by way of loans. Special loans repayable in 10 years have been made by the Central Government to finance the deficits on the Provincial Revenue Funds at March 31, 1924.

The ordinary Revenue and Expenditure for the five years ended March 31, 1925, were as follows:—

Manufactures.—The development of local industries has been most marked during the last three years, the scarcity of oversea supplies, with the consequent increase in prices, having served as a very effective measure of protection, under which enterprise has flourished to a degree previously unknown. New industries have sprung up in the principal centres of trade, and existing industries have largely extended their operations. From the recently published returns of manufactures in the Union, the total output during the year 1917-18 was £60,806,910 sterling; 1918-19, £70,934,098; 1919-20, £92,913,844; 1920-21, £98,307,910; 1921-22, £79,446,299; 1922-23, £74,486,292; and 1923-24, £79,659,054. Amongst the new industries which have been established during the period of the War may be mentioned the following:—Wattle extract; industrial alcohol (motor fuel) from molasses; calcium carbide; sulphate of ammonia; bottle making; starch from maize; iron smelting (still in the initial stage); arsenic production; detinning of scrap tin; copper manufacture, &c. The production during 1924-25 of certain specified industries is indicated by the following preliminary figures:—

COMMUNICATIONS.

Railways.—The first railway in South Africa was commenced in April, 1859, the first sod being turned by the then Governor of the Cape of Good Hope, Sir George Grey. This was very shortly followed by Natal, who started the construction of a line running from Durban. Another two lines finally linked up at Heidelberg in 1895. The Cape line was opened for public traffic to Stellenbosch in 1862 and to Wellington in 1863, while a track to Wynberg was opened to traffic in 1864. Little progress was however made in succeeding years, and it became evident that the development of the country could not be left to private enterprise. The existing Cape lines were therefore purchased by the Government on Jan. 1, 1873, and in 1876 Natal followed by acquiring the railways in that colony. Increased working at once took place, and the construction of four lines was pushed inland from Cape Town, Durban, Port Elizabeth, and East London. Bloemfontein was reached in 1890, and two years later a line to Germiston linked up with the system already established in the Transvaal.

The total open mileage of Government-owned lines at the end of March, 1926, was 12,002 miles (comprising Cape 4,836, Orange Free State 1,489, Transvaal 2,946, Natal 1,379, and South-West Africa 1,352), of which 11,017 miles are 3 ft. 6 in. gauge and 985 miles 2 ft. gauge. The capital expenditure on Government railways up to March 31, 1926, amounted to £126,029,725. The gross earnings for the year ending March 31, 1926, were £24,151,407, and the net profit, after payment of Interest, £1,083,999. Working expenditure (excluding depreciation) amounted to £17,235,325, or 71·37 per cent. of the gross revenue, as compared with £15,358,571, or 70·62 per cent. of the gross revenue for the previous year. The *Cape to Cairo Railway*, projected by Cecil Rhodes, had advanced to Buluwayo by 1902, 1,362 miles from Cape Town, and 3,600 miles from Cairo. In 1922 there were certain small links to be completed along the Congo River, where steamers filled the gaps; and a big link between Stanleyville and El Obeid. The *Trans-Zambesi Railway*, from Dondo (on the Beira-Mashonaland line) to the Zambesi, was opened July 1, 1922, thus placing the Union in direct communication with Nyasaland.

Posts and Telegraphs.—On March 31, 1926, there were 3,016 post and telegraph offices open in the Union. 166,031,000 letters and cards, 119,751,000 newspapers, books, and circulars, 6,324,000 parcels, 3,025,000 registered articles, 17,272,000 official letters and other articles, and 5,676,733 telegrams were received and despatched during the year ended March 31, 1926. The number of money orders issued during the year ended March 31, 1926, was 487,526, while 445,802 were paid; 4,021,617 postal orders were issued, and 3,428,778 paid. The revenue of the Department of Posts, 1925–26, was £1,892,063; expenditure, £1,645,138. The revenue of the telegraph service was £458,034; that of the telephone service, £1,070,519, and the expenditure for both services, £1,143,231. 5,430 miles of telegraph line, carrying 36,907 miles of wire, and 18,396 miles of telephone route, carrying 267,485 miles of wire, were open in 1925–26. There are 4 wireless stations in the Union. During 1925–26, 13,834 messages, valued at £5,934, were sent. The number of depositors in the Government Savings Bank on March 31, 1926, was 332,168, the amount standing to their credit being £6,386,751.

Shipping.—In 1925, 4,960 vessels (13,543,848 tons) entered, and 4,942 vessels (13,560,382 tons) cleared at the ports of the Union of South Africa.

Railways and Harbours Board.

Chairman, Hon. C. W. Malan, M.L.A., Minister of Railways and Harbours.

Members, Hon. P. Whiteside, The Hon. A. Kuit, and C. T. M. Wilcocks.

Secretary, C. M. Hoffe.

The railways, ports, and harbours of the Union are administered and worked under the control and authority of the Governor-General in Council, exercised through a Minister of State, who is advised by a Board consisting of three Commissioners.

The management and working of the railways and harbours are subject to the control of the Minister of Railways and Harbours, carried on by the General Manager, who is governed by such regulations as the Minister may from time to time frame, after consultation with the Board.

South-West Africa.

Administered under Mandate as an integral part of the Union of South Africa.

Administrator, Albertus Johannes Werth.
Secretary, H. P. Smit.

South-West Africa lies between S. lat. 17° 23′ and the Orange River. There is in addition a narrow strip lying between 18°–18° 30′ S. lat. extending from 21° to 25° E. long. This is known as the Caprivi Zipfel, and gives access to the

Zambesi river. The estimated area of the country is 322,393 square miles, and the population amounts to approximately 227,739, of whom 19,432 are Europeans. These figures include the estimated population of certain areas, which it was found impracticable to enumerate in connection with the recent census; viz., Ovamboland, 90,030; Kuring Kuru, 20,010; Kaokoveld, 10,976; Franzfontein, 300. Running more or less parallel to the coast, and roughly at a distance of 60 to 100 miles from it, is a broken range of mountains, from which there is a gradual slope to the sea. The country between these mountains and the coast is barren desert except towards the North, and is known as the Namib. Towards the East from these mountains the land slopes eastward and forms the western edge of the great Kalahari Plateau. The Northern and Southern boundaries are the Okavango and Kunene, and the Orange Rivers, all perennial streams of considerable volume, and on the Orange are the *Great Falls*, twice the height of Niagara.

The native races are:—In the South, Hottentots. In the centre, Hereros and Bergdamaras, with the exception of the Rehoboth district, which is occupied by a mixed race known as the Bastards; and in the North, Ovambos. To the North and East there are many small bushmen tribes, some pure bushmen, but the remainder a mixture of aboriginal native tribes and bushmen. The Kaokoveld (the North-Western area) is very scantily inhabited by Hottentots and Ovatyimbas; the only Europeans are those allowed in under permit for the purpose of prospecting for minerals. It is very mountainous, and in many places well supplied with water.

The Administration of the country is vested in the Government of the Union of South Africa by mandate, and is actually exercised by the Governor-General, who has, however, delegated most of his powers to an Administrator appointed by the Union Government. The seat of Administration is Windhoek, which lies practically in the centre of the country, and is 5,590 ft. above sea-level. The territory is divided into 17 Districts ruled over by Magistrates as the representatives of the Government. The territory of Walvis Bay, which is actually part of the Cape Province of the Union, is administered so far as possible as a portion of South West Africa, and its magnificent harbour will undoubtedly in the future prove of great benefit. The only other harbour which can be made use of is at Luderitz. The power of legislation was formerly vested in the Administrator, but a measure of self-government is now being conferred on the local population. The constitution granted under Union Act No. 42 of 1925 provides for a Legislative Assembly consisting of 12 elected and 6 nominated members, an Executive Committee of 4 members elected by the Assembly with the Administrator as Chairman. The powers of legislation granted exclude the following matters which are permanently reserved to the Union Government:—

(*a*) Native affairs or any matters specially affecting natives, including the imposition of taxation upon the persons, land, habitations or earnings of natives. Whenever any ordinance of the Assembly imposes taxation upon persons, lands, habitations, or incomes or earnings generally, natives and their lands, habitations and earnings shall be exempt from its provisions;

(*b*) Mines, minerals, mineral oils and precious stones; or the moneys derivable therefrom or payable to the administration in respect of licences for prospecting or winning the same or as share of the produce thereof or any taxation in connection therewith;

(*c*) The acquisition, construction, management, regulation, control and working of railways and harbours in the territory; and the organization, discipline and conditions of employment of and the payment of pensions, retiring allowances and financial benefits to persons in the employment of the railways and harbours administration;

(*d*) The organization of and discipline and conditions of employment of persons in the public service who are serving in the territory and the payment of pensions, retiring allowances and financial benefits to such persons;

(*e*) The constitution and jurisdiction of courts of justice, whether superior or inferior, and the practice or procedure to be observed therein;

(*f*) The administration, management and working of the postal, telegraph and telephone services;

(*g*) The establishment or control of any military organization in the territory;

(*h*) The movements or operations of any unit of the South African Defence Forces within the territory;

(*i*) The entry of immigrants into the territory or of other persons;

(*j*) Tariffs of customs and excise duties and the control and management of customs and excise;

(*k*) Currency and banking and the control of banking institutions.

The following matters are reserved for a period of three years, after which period the Assembly may by resolution assume control thereof:—

(*a*) The establishment or control of any police force in the territory;

(*b*) Civil aviation;

(*c*) Primary or secondary education in schools supported or aided from the revenues of the territory;

(*d*) The establishment, management or control of any land or agricultural bank in the territory;

(*e*) The allotment, sale, lease or disposal of Government lands in the territory.

In regard to finance, the Assembly may not initiate any ordinance imposing taxation unless recommended to it by the Administrator.

The railway system in South-West Africa, now controlled and worked by the South African Railways and Harbours Administration, and connected with Union Lines (De Aar to Nakop Protectorate border 344 miles), comprises Union Lines 364 miles, S.W. Territory Lines 1,359 miles and privately owned Lines 74 miles, a total of 1,797 miles.

The Capital of the Protectorate is Windhoek (white population, 1926, 4,569), other inland towns being Keetmanshoop (white population, 1926, 2,644), Aroab, Bethanie, Gibeon, Gobabis, Grootfontein, Karibib, Okahandja, Omaruru, Otjiwarongo, Outjo, Rehoboth, Warmbad and Maltahohe. The ports are Walvis Bay (white population, 1926, 1,214) and Lüderitz Bay (white population, 1926, 2,588).

Provinces of the Union of South Africa.

CAPE OF GOOD HOPE.

The Province of the Cape of Good Hope reaches in S. lat. from 26° to 34° 50′, and in E. long from 16° 25′ to 30°. The extent of the country is, N.E. to S.W. 750 miles, and from N.W. to S.E. 800 miles, with a coast-line of nearly 1,300 miles.

CAPITAL, CAPE TOWN. Total population (1926), white (with suburbs), 129,759.
Capetown is 5,979 miles from Southampton; transit, 16 days.

NATAL.

The Province of Natal comprises an area of 35,284 square miles, (including Zululand, 10,427 square miles), with a seaboard of 360 miles. In 1926 the European population was 158,254 (males 80,810, females 77,444).

In 1925 the European births registered numbered 3,509, deaths 1,532, and marriages 1,209. The race question in Natal is complicated by the presence of large numbers of Indian subjects of the Crown, brought over during the latter half of the nineteenth century to supply the deficiency of local labour.

Education.—There is a University College at Pietermaritzburg, and there are 180 primary schools (exclusive of 279 farm schools), and 19 beyond primary schools for white children, 1 agricultural and trades school. There are also 2 Technical Institutes, 1 Physical Culture School, 3 Night Continuation Classes, 52 Asiatic schools, 492 native schools, and 22 other coloured schools, which receive Government aid, and a large number of private schools.

Administration.—The Provincial government is administered by an Administrator, aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. Sir G. T. Plowman, K.C.M.G.
Executive Committee, W. P. Bawden; J. Dyson; C. F. Clarkson; W. A. D. Russell.
Provincial Secretary, John M. Hershensohun.

PIETERMARITZBURG, the capital and seat of the Provincial Government, is situated about 54 miles inland from Port Natal. Total population (white and coloured), 36,023 in 1921. The preliminary unaudited Census figures for the European population of Pietermaritzburg are 19,714.

In Durban (population, 1921, 146,310; for 1926 European population of Durban was 69,899), or Port Natal, is the only harbour of any importance on the south-east coast. The entrance is now safe and navigable for any vessel at any time; the average low-water depth at the entrance, L.W.O.S.T., the bar being no longer existent, for 1924 being 37 feet.

Natal, 6,800 miles; transit, 20 days.

ZULULAND.

Zululand, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the new territory (formerly Utrecht and Vrijheid districts of the Transvaal) and Swaziland. The *Amapondaland Protectorate*, created by proclamation of Nov. 22, 1897, was annexed to Zululand on Dec. 27, 1897, and now forms part of the Province. The *Northern Districts* territory (consisting of the Magisterial Divisions of Vrijheid, Utrecht, Paulpietersburg, and Babanango) was annexed to Natal on January 27, 1903.

THE TRANSVAAL.

In 1926 the European population numbered 606,763 (males 312,705, females 294,058).

The Province of the Transvaal has a total area of 110,450 square miles, about 20,000 square miles lying within the tropics. The Census of 1921 showed a population of 2,087,636, of whom 1,159,430 were males and 928,206 females; the population (1926) comprised 606,763 Europeans or whites. In 1925* there were 21,379 European births, 13,660 European deaths, and 8,305 European marriages.

Religion.—The religious statistics for 1921 are:—

Churches.	Whites.	Others.
Dutch Churches	287,630	49,578
Anglican	98,849	94,543
Presbyterian	31,715	12,407

Jews	33,515	4
Hindus, &c.	1,804	15,499
No Religion	4,507	1,013,417

There were 1,155 Government schools for white children in 1925, with an average enrolment of 119,850 and an average attendance of 111,573. 5 normal colleges, one school of Domestic Science, and 3 Trades schools. There were also 363 native schools, 5 Asiatic and 24 coloured schools, with 44,629 pupils.

Administration.—The government is administered by an Administrator, aided by a Provincial Council of 50 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. J. H. Hofmeyr.

Executive Committee, B. D. G. Pienaar, J. F. Brown, C.M.G., E. de Sousa, T. C. Stoffberg.

Provincial Secretary, D. E. van Velden.

The Capital is PRETORIA, pop. 1926, white, 54,121. Pretoria, which is also the seat of the Union Government, is pleasantly situated on the River Aapies, and has wide, shady streets and magnificent buildings. The principal town is JOHANNESBURG, 5,500 feet above sea level, about 35 miles S.W. of the capital. Johannesburg is the centre of the Witwatersrand goldfields, and possesses magnificent buildings. Among its other industries are printing, brickmaking, brewing, tobacco manufactures and iron foundries. The population in 1926 was (white) 170,543.

Pretoria is distant from London 7,200 miles; transit, *viâ* Capetown, 19 days.

ORANGE FREE STATE.

The Province of the Orange Free State has a total area of 49,647 square miles, and is divided into 27 districts. The population at the last five censuses was:—

Year.	White.	Coloured.	Total.
1890	77,716	129,787	207,503
1904	142,679	244,636	387,315
1911	175,189	352,985	528,174
1918	181,678	...	...
1921	188,556	440,271	628,827
1626	202,191	...	202,191

In 1926, of the whites, 103,830 are males and 98,361 females. The estimated mean population (European) for the year 1926 was 202,191.

The number of European births registered in 1926 was 5,188, deaths 1,703, and marriages 1,661.

Religion.—The Census of 1921 showed the following results:—Dutch Churches, 207,536; Anglican Churches, 50,807; Presbyterians, 13,562; Congregationalists, 2,763; Methodists, 135,778; Lutherans, 7,931; Roman Catholics, 9,879; Jews, 4,761; Heathen, 174,697; Others, 607,714.

Education.—Higher education is under the control of the Union Ministry. In 1925 there were 843 public and aided private schools, with an enrolment of 44,604 pupils, and, except when the parents object, both official languages are taught.

Administration.—The government is administered by an Administrator, aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. E. R. Grobler.

Executive Committee, Dr. D. G. Conradie, E. A. van der Walt, D. J. de Villiers, H. J. J. van Reusburg.

Provincial Secretary, R. A. Gregorowski.

BLOEMFONTEIN, the Capital and seat of the Provincial Government, had a population of 22,577 whites in 1926. A new sewerage system and an additional water supply are in successful operation. Six new bridges of masonry, 85 ft. span, have been built over the Bloem Spruit, which has been straightened to avoid a repetition of the serious flood of Jan., 1904.

Bloemfontein is distant from London 6,700 miles; transit, *viâ* Capetown, 19 days.

BERMUDA.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in 32° 15′ N. lat. and 64° 51′ W. long, comprising an area of about 19 square miles, and containing a population (1924) of 23,870 (10,188 white, and 13,682 coloured). These islands derive their name from Bermudez, a Spaniard, who sighted them in 1527; but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant.

The Government is administered by a Governor, who is also Commander-in-Chief of the military forces. He is advised by an Executive Council of 7 members, appointed by the Crown. There is also a Legislative Council, composed of 9 members appointed by the Crown; and a representative House of Assembly consisting of 36 members.

The climate is mild and healthy. There are no streams or wells, and the inhabitants are dependent on the rainfall stored and preserved in tanks. Vegetation is prolific, the principal trees being the Bermuda cedar (juniper), formerly of great importance for shipbuilding. The islands produce large quantities of onions, potatoes, and green vegetables, which are largely exported, together with cut flowers and lily bulbs, to New York. Arrowroot and bananas are also grown, but meat, flour and other articles of consumption are imported from the U.S. and Canada. Fish are plentiful round the coasts. The islands are much frequented as a health resort by Americans and Canadians.

BORNEO.

Borneo is a large island in the Eastern Archipelago, extending from lat. 7° 4′ N. to 4° 10′ S., and from long. 108° 50′ to 119° 20′ E. It is about 850 miles in length and 600 in breadth, and contains an area of 284,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,846,000, consisting chiefly of Dyaks, Malays, Kyans, Papus or Negritos, Chinese, Bajaus, Dusuns, Muruts and Bugis (the aboriginal Celebes). The island was discovered by the Portuguese in 1521, and at the present time rather more than two-thirds of the island is included within "Netherlands' India." The remainder of the island is under British protection.

BRITISH NORTH BORNEO.

The territory of British North Borneo occupies the northern part of the island, with a total area of about 31,000 square miles, and a coast-line of about 900 miles. The population is 257,804, consisting mainly of Muhammadan settlers on the coast, aboriginal tribes inland, and a large number of Chinese traders, artisans, and agricultural labourers. The interior is mountainous (Mount Kinabalu, 13,455 feet) and is densely timbered.

The two chief towns are Sandakan, on the north-east coast, and Jesselton, on the west coast. All legislation is passed by the Legislative Council, which consists of 7 official and 5 unofficial members, who have the local title of Honourable. The appointment of the Governor is subject to the approval of the Secretary of State. For administrative purposes the whole State is divided into 5 Residencies. The laws are based on the Indian codes of criminal and civil procedure, amended and adapted by local ordinances. There is an Imam's Court for Muhammadan law.

The chief products are timber, tobacco, rubber, copra, cutch, birds'-nests, salt fish, damar, sago, coco-nuts, rattans, and all varieties of jungle and sea produce. The country is suitable for the cultivation of sugar, tapioca, coco-nuts, kapok, ground nuts, rubber, pepper, and gambier on a large scale. Gold has been found. Coal of good quality is now being produced at the rate of 7,000 tons per month at Sebattik, in the south-eastern corner of the territory.

A railway runs from Jesselton, the chief port on the west coast, and down the coast to Beaufort, the centre of the rubber industry, where it turns inland to Melalap, in the interior; there is a branch from Beaufort to Weston (20 miles). There are several wireless stations. There is a State bank at Sandakan with a branch at Jesselton.

There is a native military force of 770 men under European officers, with six machine and four mountain guns. There is a Church of England and a Roman Catholic mission, and churches at Sandakan, Kudat, and Jesselton.

BRUNEI.

Sultan, H.H. Ahmed Tajudin Akhazul Khairi Waddin, *succ.* Sept., 1924.
Joint Regents, Pengiran Bendahara and Pengiran Pemancha.

A native State on the north-west coast of the island of Borneo. The total area is about 2,500 square miles, the population being 25,454 (April, 1921), of whom 23,938 are Malays and Bornean races. The territory was placed under British protection in 1888, and on Jan. 1, 1906, the Sultan accepted by treaty a British Resident to assist and advise him in the administration.

The chief town, Brunei, has a population of nearly 10,000. Native industries include fishing, cloth-weaving, brass foundries, and silversmiths' work. The chief imports are rice, cloth, tobacco, sugar, petroleum, and sundries; the exports are chiefly cutch (mangrove extract), rubber, jelutong, and sago. The revenue for 1925 was £36,782, and the expenditure £28,616; the debt (Dec. 31, 1925) is £50,617. Total imports, 1925, £117,902; exports, £217,005.

High Commissioner, The Governor of the Straits Settlements.
British Resident, Brunei, O. E. Venables.

Brunei is 5 hours by steamer from Labuan. There are wireless stations at Brunei, Labuan, Temburong, and Belait.

BRITISH GUIANA,

which includes the Counties of Demerara, Essequibo, and Berbice, is situated on the north-east coast of South America and has a total area of 89,480 square miles, with a seaboard of more than 300 miles. The population, Dec. 31, 1925, was estimated at 304,412, of whom 125,686 were East Indian immigrants. The colony is bounded on the south by Brazil, on the east by Dutch Guiana, on the west by Venezuela, and on the north and N.E. by the Atlantic Ocean. The climate, although hot, is pleasant and healthy. The cultivated portion of the country, amounting to about 140,000 acres (of which 57,500 acres are in sugar-cane and 29,330 in rice), is confined to the sea-coast and to a short distance from the rivers. The coastland is very like the Netherlands, being below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the boundaries of British Guiana and Venezuela is Mt. Roraima, a flat-topped mountain 8,740 feet above sea level, and on the Potaro River (a tributary of the Essequibo) are the *Kaieteur Falls*, with a clear drop of 741 feet and a total fall of 822 feet. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The meteorological records taken on the coast-lands during a period of 79 years show, as regards temperature, that the climate is a very equable one. The mean temperature is 80·2°, its recorded extremes during this long period ranging between 68° and 92°, but these extreme temperatures are very rarely recorded, the usual extremes during a year being 72° and 89°. In the interior the mean temperature is higher—82·8°, its extremes ranging from 66° to 103°. The yearly rainfall is, on the contrary, subject to marked variation, its mean on the coast lands being 93·8 inches distributed over 195 days of the year, and its range from 44·9 to 132·2 inches per year. In the interior the average recorded rainfall is 50·8 inches per year, ranging from 45·3 to 57·9 inches per year. The birth-rate in 1925 was 33·5, and the death-rate 24·2 per 1,000. The chief product is sugar, which forms 47 per cent. of the export trade. The leading exports are sugar (£1,413,696 in 1925), rum, diamonds, timber, balata, bauxite, and rice. There are about 9,700 aboriginal Indians; they are occupied largely in fishing, hunting, and raising crops of cassava.

The Government consists of a Governor and a Court of Policy of 15 other members, 7 official and 8 elected, and a Combined Court including the members of the Court of Policy together with

six elected Financial Representatives; with an Executive Council, consisting of the Governor, 5 official and 3 unofficial members nominated by the Crown. There are 2,550 miles of post-office telephone wire, with 11½ miles of aerial cable, and 576 of telegraph lines, with 75 post-offices. There are 95 miles of railway.

BRITISH HONDURAS.

British Honduras, in Central America, lies within 18° 29′ 5″ to 15° 53′ 55″ N. latitude and 89° 9′ 22″ to 88° 10′ W. longitude. Its extreme length and breadth are approximately 174 m. and 68 m. respectively; it is bounded on the north and north-west by Yucatan (Mexico), on the west and south by Guatemala, and on the east by the Caribbean Sea. The total area is about 8,598 sq. miles, with a population (Census 1921) of 45,317—22,564 males and 22,753 females; the estimated population (Dec. 31, 1925) being 47,893 — 23,683 males, 24,210 females. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 50° to 98°. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. The country consists chiefly of primeval forest, with savannahs and so-called "pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pine-trees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten or twenty miles inland; after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary.

The staple products are the natural woods of the colony, principally mahogany and logwood. Sugar, rubber and cacao grow readily. Fruit, including bananas, plantains, coconuts, pineapples, oranges, and mangoes also grow well, while inland there are extensive regions of good pasturage. About 60,000 acres are under cultivation. The best description of cacao trees grow wild in the bush. There are 69 primary schools in the colony, and 5 schools with secondary departments in Belize. The shipping entered and cleared at the port of Belize in 1925 was 643,163 tons. There is a radio-telegraph station at Belize.

British Honduras is governed as a Crown colony. There is an Executive Council of 3 official and 3 appointed members and a Legislative Council of 5 official and 7 appointed members. The Governor is President of both Councils.

BRITISH WEST INDIES.

The West Indies, so named in 1492 by Columbus, who believed the islands to form the western limits of India, are a number of islands and islets, some of them mere rocks, situated between 10° to 27° North and 59° 30′ to 85° West. The whole archipelago extends in a curve from the Florida Channel (North America) to within 7 miles of the coast of Venezuela (South America), and is divided into three main groups: I. GREATER ANTILLES, which contain the largest islands, *Cuba* (44,000 sq. miles) and *Hispaniola* (28,000 sq. miles), being Independent; Jamaica and its dependencies, British; and Puerto Rico, a dependency of the United States.

II. BAHAMAS, which are entirely British. III. LESSER ANTILLES, which are divided among the United Kingdom, France, Netherlands, the United States and Venezuela. The total area of the archipelago is nearly 100,000 square miles, of which 72,000 square miles are *Independent*, 12,300 *British*, 3,890 *United States*, 1,350 *French*, 430 *Netherlands*, and 90 *Venezuelan*.

THE BAHAMAS.

The Bahamas (or Lucayos) are an archipelago of the British West Indies, lying between 21° 42′ —27° 34′ N. lat. and 72° 40′—79° 5′ W. long., and extending from the coast of Florida on the north-west to Haiti on the south-east. The group consists of about twenty inhabited islands, and an immense number of islets and rocks, comprising an area of about 4,404 square miles, and a population in 1926 of 56,854, the most part being descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), San Salvador, Abaco, Grand Bahama, Long Island, Eleuthera, Exuma, Harbour Island, Inagua, Andros Islands, Watlings Island, Rum Cay, Long Cay, Ragged Island, and Biminis. Originally settled by Englishmen, the Bahamas were, in 1781, surprised by the Spanish, but at the peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge-gathering; the exports of sponge in 1925 being valued at £149,820. The fruit trade is principally with the United States, bananas, coco-nuts, fruit and vegetables being exported. Tomatoes are being cultivated in large quantities for shipment to the United States. Mahogany, lignum-vitæ, mastic, ironwood, ebony, logwood, and satinwood are found throughout the islands. A fibre industry is largely established, the land under the fibre plant being 16,445 acres, and the value of Bahamas hemp fibre exported in 1925, £52,419. The imports are chiefly food-stuffs, wines, spirits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided by an Executive Council of 9 members, a nominated Legislative Council of 9 members, and an elective Representative Assembly of 29 members.

BARBADOS,

the most windward of the West India Islands, is situated in 13° 4′ N., and longitude 59° 37′ W. It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 106,470 acres (about 166 square miles), about 100,000 acres being cultivated. The population (Census of 1921), was 156,312. The principal exports are sugar, molasses, rum, and cotton, and the imports rice, salted meat, corn, salted fish, butter, flour, and Indian corn meal. Liberal provision is made for elementary education, and the Lodge School and Harrison's College provide for higher education for boys, and Queen's College and Codrington High School for girls. Barbados alone of the W.I. Islands makes local provision for University training, Codrington College having been founded under the will of Christopher Codrington, who died in 1710. Unlike most of the neighbouring islands, Barbados has always remained in the possession of Great Britain, by which it was settled in 1625. In 1885 it was constituted a distinct government, with a Governor, aided by an Executive Council and an Executive Committee, a Legislative Council of 9 members appointed by the Sovereign, and a House of Assembly of 24 members elected yearly on the basis of a moderate franchise.

The CAPITAL and port is Bridgetown (pop., 1921, 13,486), on the shores of an open roadstead (Carlisle Bay).

JAMAICA,*

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 42′—18° 32′ North lat. and 76° 11′- 78° 23′ W. long. It is the largest and most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,450 square miles, and a population, in April, 1921, of 858,118 (males, 401,973 ; females, 456,145) ; whites, 14,476 ; coloured, 157,223 ; blacks, 660,420 ; East Indians, 18,610 ; Chinese, 3,696 ; not specified, 3,693.

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509 ; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the *Treaty of Madrid*.

From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,388 feet. From these mountains at least 70 streams descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 210 miles of railway open. Telegraph stations and post offices are established in every town and in very many villages ; the number of accounts open in the Govt. savings banks was 66,748 (1925). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported ; the latter is still counted the best in the world ; and the coffee raised in certain districts of the Blue Mountains fetches a high price. There is an extensive trade in fruits, chiefly bananas and oranges, with the U.S.A. and U.K. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dyestuffs, drugs, and spices, and there are some rare cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members ; the Legislative Council consists of the Governor, the Senior Military Officer, the Colonial Secretary, the Attorney-General, the Director of Public Works, and the Collector-General (all *ex officio*), of 10 Nominated Members, and of 14 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, pop. (Census, 1921) 62,707 ; the next in importance are Spanish Town, pop. 8,694 ; Montego Bay, 6,580 ; and Port Antonio, 6,272. Chief exports (1925): bananas, £1,510,625 ; sugar, £544,671 ; coffee, £485,087.

THE CAYMAN ISLANDS.

The Cayman Islands, forming a dependency of Jamaica, between 79°44′ and 81°26′ W. and 19° 15′ and 19° 46′ N., consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 225 square miles. They are said to have been discovered by Christopher Columbus on his return voyage from Porto Bello to Haiti, and called "Las Tortugas." Population (1921) 5,253.

The principal town is Georgetown, in Grand Cayman, population (1921) 1,070.

TURKS AND CAICOS ISLANDS.

These West India islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from the north-east of which they are distant about 450 miles. They have an area of about 170 square

miles, and a population (1921) of 5,612, of which the principal island, Grand Turk, contains 1,568.

A Commissioner administers the government of the Dependency, assisted by a Legislative Board. This Board has control of local finance, and passes local ordinances, subject to the assent of the Governor of Jamaica, who is also the medium of communication between the Commissioner and the Colonial Office. The Legislature of Jamaica has the power to pass laws applying to the Turks and Caicos Islands, and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes, and is also a Court of Appeal.

These 5 presidencies are administered by a Governor, to whom the Administrators and Commissioners are subordinate, and there is also a General Legislative Council, possessing concurrent legislative powers with the local Legislature on certain subjects. The population of the federal colony at the Census of 1921 was 122,242. The General Legislative Council consists of 10 *ex-officio* and 10 elective members, with the Governor as President.

(1) ANTIGUA AND BARBUDA.

Antigua is the seat of government and residence of the Governor-in-Chief. It lies in 17° 6′ N. lat. and 61° 45′ W. long., and is about 70 miles in circumference. Its area is nearly 108 square miles, equal to 68,980 acres, of which nearly 17,000 are under cultivation. The population (with Barbuda) in 1921 was 29,767, including 12,542 males and 17,225 females. Settled by the English in 1632, and granted to Lord Willoughby by Charles II., the island has always been more distinctively English. It is much less hilly and wooded than the other Leeward Islands, and is largely given up to the cultivation of sugar, for which two central sugar factories have been erected. Cotton is being planted, and the island also exports molasses, tamarinds, pine-apples, and arrowroot. In March, 1898, the Crown Colony system of government was instituted.

Barbuda is situated 30 miles N. of Antigua, of which it is a dependency, in lat. 17° 35′ N., long. 61° 42′ W. Area, 62 square miles. Population, 900. The island is flat and fertile in parts, producing cotton, corn, pepper, tobacco, and vegetables, and was formerly a possession of the Codrington family. Wild deer are plentiful and afford excellent sport, and there is good tarpon and other fishing. *Magistrate*, Capt. G. Downing, (*and quarters*) £250.

Redonda, is a small island with a phosphate industry.

(2) ST. KITTS-NEVIS WITH ANGUILLA.

The islands of St. Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and taken together they had a population (Dec. 31, 1925) of 36,158 and a total area of about 150 square miles. The climate is decidedly healthy for the tropics, the temperature being from 78° to 85°.

St. Kitts (population 19,458), the principal island of the Presidency, and the oldest colony in the West Indies, is situated in lat. 17° 18′ N. and long. 62° 48′ W., and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central cone, which rises to a height of 3,711 feet (Mount Misery). The capital, Basseterre, is a port of registry, and had 55 vessels of 807 tons in 1925.

Nevis (population 12,135) is separated from St. Kitts by a strait some 3 miles wide and has an area of 50 square miles. Sugar-cane and cotton

are grown. Its greatest elevation is 3,596 feet. The chief town, Charlestown, is a port of entry.

Anguilla (population 4,565) is about 60 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 2 to 3 miles, containing an area of 35 square miles. Salt is the principal product, and small stock are raised.

(3) DOMINICA,

the largest island of the colony, and the loftiest of the Lesser Antilles, is situate between 15° 20′—15° 45′ N. lat. and 61° 13′—61° 30′ W. long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad, comprising an area of 291 sq. miles, or 186,240 acres, of which about 70,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85°. The cultivation of sugar has been practically replaced by cocoa, limes, coco-nuts, vanilla, and fruit. The population was estimated at 40,075 on Dec. 31, 1925; included in this total are 400 Caribs, of whom 100 are of pure blood. The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. There is an Executive Council composed of official and unofficial members, and a Legislative Council consisting of the Administrator, who sits as President, and 6 official and 6 non-official members, 4 of whom are elected, and 2 nominated by the Governor. The principal towns are Roseau, on the south-west coast, population 7,374, and Portsmouth, population 1,190.

(4) MONTSERRAT

is situated in 16° 41′ N. lat. and 62° W. long., 26 miles S.W. of Antigua. It is about 11 miles in length and 7 in breadth, comprising an area of 32½ square miles, with a population (1925) of 11,673. Discovered by Columbus in 1493, it was settled by Irishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1784. It is justly considered one of the most healthy and beautiful of the Antilles; it contains three active soufrières and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island are mountainous, the rest well cultivated. A great part of the island was devastated by a hurricane in 1924. The chief exports during the year 1925 were cotton-seed meal, cotton, cotton-seed oil, onions, limes and its products, sugar, papaine and animals of all kinds. The chief town is Plymouth, with a population (1921) of 1,709. A wireless station was opened in 1925.

(5) THE VIRGIN ISLANDS,

a group of islands belonging chiefly to Great Britain and the U.S.A., form a connecting link between the Greater and Lesser Antilles. Such of the islands as are British became so in 1666; the principal are—Tortola (the largest), situate in 18° 27′ N. lat. and 64° 40′ W. long., Virgin Gorda, and Anegada. The area of the British possessions is 58 square miles, and the population in 1921 was 5,082. There is good pasturage for cows, sheep, and goats. Sugar, cotton and coconuts are grown in increasing quantity, and a tobacco and cigar industry has been established; fishing and poultry-rearing are also carried on. A copper mine has been worked at Virgin Gorda. The capital of the group is Road Town, on the south-east of Tortola; population (1921), 463.

TRINIDAD AND TOBAGO.

Trinidad is the most southerly of the West India Islands. It is close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. It lies between 10° 3′—10° 50′ N. lat. and 60° 55′—61° 56′ W. long., and is about 69 miles in length by 54 in breadth, with an area of 1,862 square miles (541,682 acres cultivated), and a population at the Census of 1921 of 365,913 (including Tobago). The island was discovered by Columbus in 1498, was

colonised in 1588 by the Spaniards, and capitulated to the British under Abercromby in 1797. The chief town and port of entry, Port of Spain (pop. 64,535), is one of the finest towns in the West Indies, with sewerage, electric lighting, tram and telephone services. Other towns of importance are San Fernando (pop. 11,118), about 30 miles south of the capital; Princestown (pop. 5,228), and Arima (pop. 4,429). A remarkable phenomenon is the asphalt lake near the village of La Brea, 110 acres in extent, containing an apparently inexhaustible supply; in 1925, 157,986 tons (£360,062) were exported. The soil is rich and productive, the most important products being sugar, cocoa, mineral oil, molasses, rum, copra, limes, and coco-nuts, and various kinds of timber and fruits. The chief exports (1925) were cocoa £1,462,723; sugar £1,092,594; and petroleum £1,562,868. On Dec. 31, 1925 there were 19 companies actively engaged in the production of oil, the royalties payable on oil won from Crown Lands being £40,099. Coal, iron, graphite and gypsum are known to exist in small quantities and traces of gold have been found in the Northern Range. There were 290 Elementary and Intermediate Schools at Dec. 31, 1925, in addition to 6 colleges for higher education. There are 123 miles of railway open, and the island is in communication with Tobago and the mainland by telegraph and wireless. The Government is vested in a Governor, an Executive Council, and a Legislative Council of 12 official and 13 unofficial members, 6 of the latter being nominated by the Crown and 7 elected.

Tobago was annexed in 1889 to the Government of Trinidad, and on Jan. 1, 1899, it was constituted a ward of that island. It is between 11° 9′ N. lat. and 60° 43′ W. long., about 75 miles south-east of Grenada, 18 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados; is 26 miles long, and from 6 to 7½ broad, and has an area of 114 square miles, with a population (Census 1921) of 23,390. It is one of the most healthy of the West Indies; the temperature varies from 81° to 88°. There are two towns in the island, viz., Scarborough (pop. 1,476) and Plymouth (pop. 434).

THE WINDWARD ISLANDS.

The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent. The total area is 508 square miles, with a population (1921) of 162,254. There is one Governor for the three islands; but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. Each island retains its own institutions, and in the Governor's absence is governed by an Administrator subordinate to him.

Governor and Commander-in-Chief, Sir Frederick Seton James, K.B.E., C.M.G. (1924) £2,500

Transit to Grenada from London about 14 days.

GRENADA AND THE GRENADINES.

Grenada is situated between the parallels of 12° 30′-12° 58′ N. lat. and 61° 20′-61° 35′ W. long., and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 85,120 acres; population (including some of the Grenadines), 66,302 (Census of 1921). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonised by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1783.

The soil is very fertile, and cocoa, spices, rubber, cotton, coffee, and fruit are grown. The forests are rich in timbers. The imports chiefly comprise dry goods, bread-stuffs, hardware, &c. The Legislative Council consists of 16 members, 8 of whom are officials (3 nominated and 5 elected).

St. George's, on the south-west coast, is the chief town, and possesses a good harbour.

The Grenadines are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1921) 7,204.

St. Lucia,

the largest and most picturesque of the Windward group, situated in 13° 50′ N. lat. and 60° 58′ W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 21 miles S.E. of Martinique, is 24 miles in length, with an extreme breadth of 12 miles. It comprises an area of 233 square miles, with a population (Dec. 31, 1925) of 55,099. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports (1925) are sugar, cocoa, coco-nuts, copra, limes, lime-juice, lime-oil, logwood, molasses, syrup, bananas and other fruits. The chief places are Castries, the capital (pop. 1921, 5,899), and Soufrière (pop. 2,480).

Port Castries, one of the finest in the W.I., is a coaling depot. In 1925, 245 steamers (tonnage 545,473) entered Port Castries.

St. Vincent,

an island about 95 miles west of Barbados, situate in 13° 10′ N. lat. and 60° 57′ W. long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (Census of 1921) of 44,447. In 1846 a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are arrowroot, cotton, sugar, molasses, rum, cassava, cocoa, coffee, and spices. Its chief imports are linen, cotton and woollen manufactures, Canadian flour, fish, lumber, &c. Steps have been taken to settle the labouring classes on lands acquired for the purpose.

CAMEROON.

(Joint Franco-British Administration.)

The German Protectorate of *Kamerun* on the west coast of Africa between (British) Nigeria and French Congo (the Spanish Muni River Settlements occupying a small intervening area), was obtained by conquest by Franco-British forces during the War of 1914–18, and at the conclusion of Peace its administration was confided by the Supreme Council of the Allied Powers to Great Britain and France jointly.

The approximate geographical limits are between 2°–12° N. lat. and 8° 48′–19° E. long., and the area is about 187,596 square miles, containing a population estimated at 2,144,000.; of which total the French sphere is 153,846 square miles, with 1,550,000 inhabitants. The coast-line extends from the Rio del Rey to the Muni River. The territory occupies the north-west corner of the Central African Plateau, with Cameroon Peak (13,370 feet) near the capital, on the coast, and the Chebchi and Mandara Mountains on the north-west frontier. The Sanaga is a considerable river flowing into the Atlantic opposite Fernando Po; the Sanga and Dscha (or Ngoko) are tributaries of the Congo, and the Logone-Shari flows into Lake Chad. The inhabitants are Bantus and Sudanese, with some Haussas and Fula tribes, of whom the latter are Muhammadans and the remainder pagans. Cocoa cultivation is a highly successful industry of recent origin, and the Protectorate is rich in forest produce. The exports are rubber, palm oil, palm kernels, cocoa and ivory; the imports are chiefly clothing and textile goods, meat, fish and provisions.

In 1920 the whole area was divided into a British Sphere and a French Sphere.

British Cameroon.

The *British Sphere* is a wedge-shaped strip, running with the Nigerian border, and containing an area of about 33,750 sq. miles, with a population of about 644,000. It is administered by the Nigerian Government, the capital being Buea, on the slopes of the Cameroon Mountain. The principal port is Victoria (in Ambas Bay), which is connected by railway with the capital.

CAYMAN ISLANDS.

(*See* British West Indies.)

CEYLON,

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between 5° 55′ 9° 50′ N. lat. and 79° 42′–81° 53′ E. long. Its area is (with outlying islands) 25,332 square miles, or more than three-fourths of that of Ireland. Its greatest length is from north to

outh, 270 miles; and its greatest width 140 miles. The climate varies with the altitude of the district; but on the whole, though tropical, it is healthy, except in the low-lying jungle. The coolest months are December and January; the hottest are April and May.

The population (Census of 1921) was 4,504,549 (including military and shipping), the most important element being the Sinhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543. In 1505 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but six years after, in 1802, Ceylon was formed into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the islands are agricultural. The most important for home consumption is rice in its two forms of paddy and husked grain. The principal exports are tea, products of the coconut palm, rubber, plumbago, cacao, cinnamon, cardamoms, ebony, and a little vanilla.

About one-fifth of the island is under cultivation, and the approximate areas in 1925, in acres, were:—Rice, 830,000; other grain, 107,000; tea, 440,000; coconuts, 882,000; rubber, 439,000; cinnamon, 25,000; cacao, 34,000; and tobacco, 12,000. The live stock in 1925 included 1,457,000 horned cattle, 65,000 sheep, 161,000 goats, 47,000 pigs, and 1,400 horses. Among the more important native industries are gold, silver, brass, ivory and tortoiseshell work, pottery, mats, fans, and wood-carving. Ceylon is famous for precious stones, especially catseyes, rubies, &c.; and for the pearl fishery in the Gulf of Mannar, off the N.W. of the island. The manufacture of salt is a Government monopoly.

There are 791 miles of railway open, 674 being 5 ft. 6 in. gauge and 117 miles 2 ft. 6 in.; and 649 post offices, 249 money order offices, and 189 telegraph offices, with 7,776 miles of telegraph wire.

The government of Ceylon is administered by a Governor, aided by an Executive Council of 9 members, and a Legislative Council of 49 members. The Legislative Council contains representatives of the various territorial divisions of the island, and special safeguards provide for the representation of minorities and unrepresented interests. Of the 37 unofficial members 34 are elected and 3 nominated by the Governor.

For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government agent. The larger towns have municipalities, Urban District Councils, or local boards; and in the country districts the natives retain their village councils and tribunals for matters of minor importance.

The MALDIVE ARCHIPELAGO lies to the S.W. of Ceylon, a few degrees north of the equator.

Malé, the seat of government, is about 400 miles distant from Ceylon, to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Muhammadans. The islands are unhealthy, and the main exports are dried fish, cowrie shells, coconut coir, and tortoiseshell.

Colombo, distant from London 5,868 miles; transit, 19 days.

THE CHANNEL ISLANDS,

situated off the north-west coast of France (at distances of from ten to thirty miles), are the only portions of the *Dukedom of Normandy* now belonging to England, to which they have been attached ever since the Conquest. They consist of Jersey (28,717 acres), Guernsey (15,654 acres), and the following dependencies of Guernsey—Alderney (1,962 acres), Brechou (74), Great Sark (1,035), Little Sark (239), Herm (320), Jethou (44), and Lithou (38), a total of 47,083 acres, or 73·4 square miles. The 1921 Census population of Jersey was 49,494, and of Guernsey, &c., 40,120, total, 89,614.

The climate is mild, and the soil exceptionally productive. The land under cultivation in 1916 was 49,678 vergées (2¼ vergées = 1 acre), the principal product of the soil of Jersey being potatoes, tomatoes, and wheat, and of Guernsey green crops and oats, fruits and tomatoes. The famous Jersey and Guernsey breeds of cows have earned a well-deserved celebrity. The principal officer in each island is the Lieut.-Governor, who represents the King-Emperor (the Duke of Normandy). French is the official language of the local legislatures, called the *States*, and of the Royal Court, and is still spoken by the people, but English is now permissible in the Legislative Assembly. The Bailiff, appointed by the Crown, presides over the *States* and over the Royal Court or judicial body. The islands being all but exempt from imperial taxation they possess a very large trade. The chief town of Jersey is St. Helier, on the south side; the principal town of Guernsey is St. Peter Port, on the east coast.

The trade is principally with the United Kingdom, the exports from the Island to the U.K. being valued at £3,320,000 in 1925; the imports from the U.K. in 1925 were valued at £4,040,000.

CYPRUS

is an island in the Mediterranean Sea, between N. lat. 34° 33′ and 35° 41′, and E. long. 32° 20′ and 34° 35′. It is about 40 miles distant from the nearest point of Asia Minor; and 60 miles from Latakia, on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad; from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is 3,584 square miles. The population at the census of 1921 was 310,715, of whom about 20 per cent. were Muhammadans, and the remainder mostly members of the autocephalous Church of Cyprus, which is a branch of the Orthodox Eastern Church. The principal productions are grain of various kinds, sesame, linseed, flax, wine and spirits, silk, olives, locust-beans (carobs), cotton, wool, hides, grapes, oranges, pomegranates, asbestos, aniseed, sponges, sumac leaves, terra umbra, gypsum, salt, pyrites, and chrome. In 1925 the wine export was 1,158,701 gals., and that of spirits 19,891 gals., the bulk of the wine and spirits going to Egypt. The climate varies in different localities. In the plains the summer heat is very great, and the British troops suffered when first stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various sanitary measures, the death-rate of the whole island is nearly as low as that of any European country.

Cyprus was formally annexed to the British Empire in 1914. The inhabitants have been granted a political franchise, every man paying direct taxes having a vote. The government is administered by a Governor, assisted by a Legislative Council composed of 24 members, 9 being official and 15 elected. The island is divided into three electoral districts each returning one Muhammadan member, and 12 electoral districts each returning one non-Muhammadan member.

For administrative and legal purposes it is divided into six districts. In each district the executive government is represented by a commissioner; and each has a Court of Law presided over by an English judge, who is assisted by two native judges, one being a Christian and the other a Muhammadan. There is also a Supreme Court for the whole island, consisting of two English judges.

The capital is Nicosia (Lefkosia), near the centre of the island, with a population of 18,579 in 1921; the other principal towns are Larnaca (population 9,768), Limassol (13,291), Famagusta (6,890), Kyrenia (1,913), Paphos (4,119), and Morphou (4,250).

Important works at Famagusta have rendered the inner harbour accessible to steamers, and a narrow-gauge railway connecting the harbour with the capital (36 miles) was opened in 1905, and was extended to Morphou, 25 miles, in 1907, and to Evrykhou, 15 miles, in 1915. There is a regular service of steamers from Egypt, from France, and from Italy (*viâ* Trieste).

FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 15′—53° S. lat. and 57° 40′ -62° W. long. They consist of East Falkland (area 2,580 sq. miles), West Falkland (2,038 sq. miles), and upwards of 100 small islands (islets, rocks, and sandbanks), comprising in the aggregate 4,618 sq. miles, and a population in 1921 of 2,094. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. A settlement was made by France in 1764; this was subsequently handed over to Spain, but the latter country recognised Great Britain's title to a part at least of the group in 1771. In 1820 the Argentine Republic esta lished asettlement, which was destroyed by the Americans in 1831. In 1833 the islands were again taken possession of by the English for the protection of the whale-fishery, and colonised, being the most southerly organised colony of the British Empire. On Dec. 8, 1914, a British squadron under Adm. Sir Doveton Sturdee defeated a German squadron (von Spee) off the Falkland Islands. The climate, though somewhat bleak, is usually considered healthy, and the temperature is on the whole equable, the thermometer ranging in winter from 20° to 50°, and in summer from 40° to 65°. The islands are chiefly bog-land, and have proved suitable for sheep, 670,000 being carried; the output of wool is about five million lb. annually. The population is mainly British, and is principally engaged in sheep-farming and seafaring industries. The chief exports are whale-oil and guano, wool, tallow, hides and sheepskins. The only important settlement is Port Stanley, at the head of Port William, on the coast of East Falkland.

The government of the Falkland Islands is vested in a Governor, aided by an Executive Council of 4 members, and a Legislative Council, the members of both being appointed by the Crown.

Dependencies of the Falkland Islands.

The total area of land and sea included in the dependencies of the Falklands is over 3,000,000 square miles. *South Georgia*, an island 800 miles east-south-east of the Falkland Group, with an area of 1,000 square miles, is the only part of the dependencies which is permanently habitable, there being a Resident Magistrate and other officials, and a permanent population (engaged in the whaling industry) at Grytviken Harbour. In the *South Shetlands*, Deception Island contains a harbour at Port Foster, ice-free for about five months in the year, with a land station which arrives and departs with the whaling fleet. The *South Orkneys* also have a seasonal land station, and the Argentine Government have, with the permission of H.M. Government, established a meteorological station, in connexion with a discovery that a cold winter in the Weddell Sea is a precursor of drought in the maize and cereal area of Argentina 3½ years later. The other dependencies, of which the principal units are the *South Sandwich Islands*, and a part of the *Antarctic*, or South Polar, continent known as *Graham's Land*, are even more inhospitable than those already named, being nearly covered with snow and ice and almost completely destitute of plant life. In spite, however, of the climatic and other disadvantages, the revenue derived from all the dependencies in 1922 amounted to £142.102, and the local expenditure was no more than £12,939,

the surplus (after meeting administrative expenses at Port Stanley) being devoted to local research and development. The trade is considerable, the exports being valued at £2,504,944, and the imports at £389,263 in 1921. The whaling industry carried out from these dependencies is greater than that of the rest of the world combined. Thirteen companies (2 British, 11 Norwegian) caught 6,955 whales in the 1921–2 season, the landed value of the oil being £2,244,390.

Port Stanley is distant about 8,130 miles; transit, 25 days from Liverpool. Telegrams by cable and wireless telegraphy *vid* Monte Video.

FEDERATED MALAY STATES

(*See* MALAYA).

FIJI.

This is a group of 200 to 250 islands (of which some are, however, mere uninhabited islets and rocks) in the South Pacific Ocean, about 1,100 miles north of New Zealand, which extend 300 miles from east to west, and 300 north to south, between 15° 45′—21° 10′ S. lat. and 176° E.—178° W. long. The gross area of the group is about 7,083 square miles. The islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji) and Vanua Levu (Great Land). The climate is equable and remarkably healthy for Europeans; the average temperature in the shade in the cool season is 72°, rising to 84° in the hot season, extremes lying between 60° and 94°. Vegetation is remarkably luxuriant, the chief productions being the bread-fruit tree, banana, plantain, pea-nuts, yams, and dalo (taro), coco-nut, sugar-cane, rice, maize, and cotton. The principal exports are sugar, copra, bananas, trocas shell, molasses, rubber, maize, hides and pelts, and bêche-de-mer. The Governor is appointed by the Crown, and is assisted by an Executive Council consisting of 6 members. Laws are passed by a Legislative Council (of which the Governor is president) containing 12 nominated members (one specially representing Indian interests), 7 elected members, and 2 native members, appointed by the Governor. Native administration is carried on through the chiefs under the Governor's supervision. The population (1921 Census) was 157,266 (84,475 native Fijians, 60,634 Indians, 3,878 Europeans, and some Polynesians and others).

GAMBIA.

The West African river Gambia, which is navigable for some 300 miles from its mouth, was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognised, by the *Treaty of Versailles*, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It now consists of the Island of St. Mary, British Kombo, Albreda, the Ceded Mile, MacCarthy Island, and various other islands and territories on the banks of the river. The total area is estimated at 4,132 sq. miles. The population of the Island of St. Mary, at the Census of April 24, 1921, was 9,227, and that of the Protectorate 201,303. The climate is unhealthy during the rainy season, viz., from June to October; but during the rest of the year it is less unhealthy. The chief export is ground nuts, which form ninety-five per cent. of the total exports. They were sent chiefly to Marseilles, where the oil is extracted and used for the same purpose as olive oil, but, since the outbreak of war, the export trade has been mainly with the U.K. Beeswax, palm kernels, hides, and calabashes are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities to meet local requirements. The chief imports are cotton goods, kola nuts, rice, soap, spirits, hardware, sugar, wine, and tobacco. A Company of the W.A.F.F. (4 officers and 120 non-commissioned officers and men) is stationed in the Colony, and there is an armed police force in the settlement (numbering 142 men), which performs both civil and military duties. There are 4 Government wireless stations. The Government, which is that of a Crown Colony, is vested in a Governor, assisted by an Executive Council consisting of 3 official members (besides the Governor), and by a Legislative Council of 5 official

members and 3 unofficial members, nominated by the Crown.

GIBRALTAR,

a rocky promontory, 2¾ miles in length and ¾ of a mile in breadth, and 1,396 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. Gibraltar was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713. Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated was the great siege in 1779–83, when General Elliott, afterwards *Lord Heathfield*, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. During the year 1925 4,732 vessels entered, with a total tonnage of 6,532,168. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, beer and motor spirit. There is an enclosed Admiralty harbour with an area of about 440 acres, containing three graving docks. The estimated civilian population (1925) was 16,127

The Governor is in command of the garrison, and is aided in the administration by an Executive Council of 7 members; there is no Legislative Council.

GOLD COAST.

The Gold Coast comprises a portion of the coast of the Gulf of Guinea from about 3° 7′ W. to 1° 14 E. of Greenwich. It is divided into three parts:—Gold Coast Colony, 23,490 sq. miles; Ashanti, 24,560 sq. miles; and the Northern Territories, 30,600 sq. miles—a total area of 78,650 sq. miles. It extends along the coast line about 334 miles and inland to an average distance of 440 miles, or to the 11° of N. latitude. It is bounded on the west and north by the French colonies of the Ivory Coast and French Sudan, and on the east by Togoland. The population (Census of 1921) was: *Gold Coast Colony*, 1,171,913; *Ashanti*, 406,193; *Northern Territories*, 530,355; total, 2,108,461, excluding 2,033 Europeans. The natives are almost all Pagans, but there are 60,000 Muhammadans, and the number of Christians is steadily increasing.

The trade is principally with the United Kingdom (48 per cent.), U.S. (17), Germany (13), Netherlands (10) and France (10 per cent.). Gold is found in considerable quantities, and diamonds were discovered in 1919; there are also large deposits of high-grade manganese. The principal product is cocoa, more than half the world's supply being produced in the Colony; rice and sisal hemp plantations have been started and steps have been taken to improve the coco-

nut industry. The principal exports in 1925 were: cocoa, £8,222,263; gold and gold dust, £840,525; and manganese, £680,944. The chief imports are textiles, building materials, cotton goods, provisions, kerosine, and hardware. The climate, generally, is hot and moist, but is becoming annually less unhealthy by the aid of medical science and sanitation. The Government assists the missionaries in educational matters, and has established schools of its own, and a University College at Achimota, 6 miles from Accra, is being built. Great efforts are being made to improve the sanitary condition of the coast towns. The principal towns are lighted and policed. The total tonnage of shipping entered and cleared in 1925 was 4,181,150 (British, 2,490,652). 2,600 miles of telegraphs have been established in the Colony, of which 290 miles are in Ashanti and 203 miles in the Northern Territories. There is a wireless telegraph station at Accra. A Government railway runs from Sekondi through Tarkwa, the centre of the gold-mining industry, to Kumasi (168 miles). Another line runs from Accra to Kumasi (192 miles).

The seat of government is Accra (population (38,049). The other principal towns are: Cape Coast (14,921), Ada (1,620), Elmina (5,262), Sekondi (9,500), Tarkwa (2,672), Keta (9,839), Axim (3,781), Kumasi (20,268), Saltpond (6,342), and Winnebah (6,980). The government of the Colony is administered by a Governor, aided by a nominated Executive Council. There is a Legislative Council of 12 official and 9 unofficial members, for the Colony, excluding Ashanti and the Northern Territories.

Ashanti.

Ashanti was placed under British protection on Aug. 7, 1896, and a British Resident was appointed to Kumasi. Under Orders in Council of Sept. 26, 1901, the country was definitely annexed by Great Britain, the Governor of the Gold Coast being appointed Governor of Ashanti, though the laws and ordinances of the Gold Coast do not apply to the annexed territory. It is divided into two provinces under Provincial Commissioners—the Eastern Province, headquarters Kumasi, and the Western Province, headquarters Sunyani. The population (census 1921) was 406,293. Kumasi, the chief town, has about 20,000 inhabitants. There are Government schools at Kumasi, Sunyani and Juaso, and a number of mission schools. Agriculture is extending, cocoa and rubber plantations are being formed. In the western parts of the Gold Coast Colony, and especially of Ashanti, are rich forests with excellent timber trees (mahogany, cedar, &c.), trees yielding fruits, rich in oil, rubber-bearing plants, and species yielding gum copal. The country is well watered, and with proper restraints on wasteful native farming and on over-exploitation, would contain inexhaustible supplies of valuable forest products. On the eastern side the forests are sparser, though timber and oil trees are common and game plentiful; the products there are chiefly maize, kokoyams, bananas, ground-nuts, and cocoa, the plantations of which are rapidly extending.

Northern Territories.

In 1901 the Northern Territories lying to the north of the parallel of 8° N. lat., bounded on the west and north by the French possessions and on the east by Togoland, were placed under British protection. They are administered, under the Governor, by a Chief Commissioner with his headquarters at Tamale. The country is divided into two provinces under Commissioners; the Southern Province, with headquarters at Tamale, and the Northern Province, with headquarters at Navaro. By the census taken in 1921 the population was about 530,360. The Mohammedans have substantial mosques; there is a Roman Catholic mission. Government schools have been established at Tamale.

Gambaga, Lorha, and Wa. Good permanent roads are being made. The Northern Territories are capable of producing various agricultural crops (cereals, shea-butter, ground-nuts, indigo, tobacco), and are said to contain wide auriferous areas.

HONG KONG.

The Crown Colony of Hong Kong consists of a number of islands situated off the south-eastern coast of China, at the mouth of the Canton River, in 22° 10′–22° 34′ N. lat. and 113° 52′–114° 30′ E. long., and of a portion of the mainland.

Hong Kong is an island about 10 miles long and from 2 to 6½ miles broad, with a total area of 32 square miles; it lies close to the mainland, being separated at one point by a narrow strait (Lyee-moon) not more than a quarter-mile wide, and was first occupied by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842; *British Kowloon* was subsequently acquired by the Peking Convention of 1860; and the *New Territories*, being a peninsula in the southern part of the Kwangtung province, by a lease signed June 9, 1898. The whole colony comprises an area of about 391 square miles, with a population (1921) of 662,200 (1925, est. 874,400). The non-Chinese residents, excluding naval and military, numbered about 15,200 (1925, est. 16,500).

The capital of the colony is Victoria, which lies along the northern shore of the island, facing the mainland; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some 10 square miles. With the exception of liquor and tobacco the port is free, and is fortified. It possesses excellent docks, capable of holding the largest vessels for the purposes of repair. There is a considerable ship repairing and construction industry. Shipping entered, (1924) 28,365,538 tons; (1925) 21,734,742 tons. A railway, of which 23 miles belong to the Government, runs from Kowloon to Canton; the length north of the Sham Chun River (which is the boundary of the British territory) is controlled by the Chinese Government. A light railway runs through the fertile valleys of the north-east portion of the New Territories from Fanling to Sha-Tau-kok, a distance of 7 miles. Good roads connect the principal districts with the railway.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is about 1,820 feet high. The Peak District is a favourite place of residence, and is reserved for Europeans. The New Territories contain peaks from 1,800 to 3,000 feet. The hot season lasts from May to October. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The average daily maximum temperature ranges from 87° in July to 63° in February, and the average daily minimum temperature from 78° in July to 55° in February. The average annual rainfall is 84 in., of which no less than 75 per cent. falls between May and September, when the S.W. monsoon prevails.

Hong Kong is the centre of a vast trade in many kinds of produce, chiefly camphor, coal, cottons, flour, gunnies, hides, iron and steel goods, leather, matches, oils, rice, silks, sugar, tea and tin.

Much encouragement is given by the Government to education in the colony. In 1925 there were 885 schools subject to Government supervision, attended by 39,735 pupils. The University (opened in 1912) includes faculties of medicine, engineering, and arts.

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of 9 members, together with a Legislative Council of 14 members, including himself, a representative from the Chamber of Commerce, and a representative of the Justices of the Peace. There is also a Sanitary Board, partly elected, which controls certain sanitary measures.

THE ISLE OF MAN (MONA),

an island in the Irish Sea, in lat. 54° 3′ – 54° 25′ N. and long. 4° 18′ – 4° 47′ W., nearly equidistant from England, Scotland, and Ireland. The total land area is 145,325 acres (227 sq. miles), with a population (1921) of 49,270. In 1925 the births numbered 761 and the deaths 787. The cultivated area (1926) was 81,041 acres, and the live stock included 3,819 horses, 18,734 cattle, 89,717 sheep, and 2,642 pigs. In the 9th century a body of malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition and conquered the Orkneys and the Shetlands, the Western isles, and Man. For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III. defeated the famous Haco, at the battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV. seized on the Isle of Man, and in 1406 bestowed it on the Stanley family. In 1827 the Crown purchased it for the sum of £417,144.

The land is rich in minerals, lead, iron, blende and slate, and exports large quantities of agricultural produce. Forty-seven miles of railway have been constructed, and about 25 miles of electric tram road.

Man is governed by a separate Legislature, called the Tynwald, consisting of two branches —the Governor and Council and the House of Keys. The Council consists of the Governor, the Bishop of Sodor and Man, the two Deemsters, the Attorney-General, 2 members appointed by the Governor, and 4 members appointed by the House of Keys. The House of Keys (possibly from the Scandinavian *keise* = chosen) is one of the most ancient legislative assemblies in the world. It consists of 24 members, elected by the male and female owners and occupiers of property, 16 from the six *sheadings*, 5 from Douglas, and 1 each from Castletown, Peel and Ramsey. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. After receiving the Royal Assent, a Bill does not become law unless promulgated within the ensuing twelve months, and on the first "Tynwald Day" (July 5) following it is announced in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys. An annual contribution of £10,000 is made to the Imperial Government. In 1923 the Tynwald offered the Imperial Government the sum of £200,000 as the Island's contribution to the cost of the Great War.

KENYA.

Kenya Colony and the *Kenya Protectorate* are situated in Eastern Equatorial Africa. The eastern boundary has been settled by agreement with Italy, to whom the Province of Jubaland (35,812 sq. miles) was ceded by treaty in 1925; and on the north by an agreement with Abyssinia in 1908. On the west the Colony adjoins Uganda, and on the south the mandated Tanganyika Territory. The population of the Colony at the census of 1926 was 2,602,969 (exclusive of Jubaland). The area is 208,320 square miles (exclusive of Jubaland).

A great portion of this vast region consists of pasture lands or barren wastes, but there are not lacking extensive districts of great natural fertility in the interior, as well as on the coast. The Colony is divided for administrative purposes into 7 provinces, which are subdivided into districts, and 5 extra-provincial districts.

The districts most suitable for settlement by Europeans are those of Kyambu, North Nyeri, Nakuru, Naivasha, Kericho, Uasin Gishu, and Trans-Nzoia. There is also a considerable region still undeveloped.

Kenya Protectorate also includes the *Witu Protectorate*, a small tract of country at the mouth of the river Tana.

Mombasa, which is connected with Europe by telegraph, possesses perhaps the finest harbour on the east coast of Africa (population about 40,564, of whom 869 are Europeans). There is also telegraphic communication along the coast between Mombasa and Lamu, and between Mombasa and Entebbe, the capital of the Uganda Protectorate. There are also extensions to Taveta, Fort Hall, West Kenia, Archers Post, Masai Province, Eldama Ravine, Kericho, Eldoret, Machakos, Kisii, and Mumias; also telegraph connexion between Mombasa and Tanga. Radio-telegraph station at Mombasa. The Kenya and Uganda Railway has its terminus at Mombasa, which is connected with the mainland by a railway bridge 1,732 feet in length. There are also about 57 miles (under Kenya and Uganda Railway management) from Nairobi to the Fort Hall District, and 73 miles under construction. There are about 90 miles from the main line at Magadi junction to the Magadi Soda Lake. A line (142 miles) has been built from Nakura to Turbo, and is being continued to Mbulamuti on the Nile, a further 185 miles. The Voi-Kahe railway (92 miles) is also under Kenya and Uganda Railway management, and branch lines are under construction to Sulai (27 miles) and Kitale (45 miles). Nairobi, the capital of the Colony, and central station of the Kenya and Uganda Railway, has a population of 25,901, of whom 3,612 are Europeans. There are also some 600 European farmers in the immediate neighbourhood of Nairobi.

There being no customs barrier between Kenya and Uganda, import and export statistics of the two territories are combined. The principal imports are piece goods, provisions, agricultural machinery and appliances, motor and other vehicles, building and fencing material, rice, flour, and petroleum. The importation of arms and ammunition is prohibited, except under the most stringent regulations, and the introduction and local manufacture of spirits

is also heavily checked. The principal exports are cotton, coffee, maize, fibres, oil-seeds, carbonate of soda, wool, hides and skins. The trade imports for Kenya and Uganda were valued at £6,277,907 in 1924, and at £8,061,448 in 1925; the domestic exports of the two territories were £7,730,122 (1924) and £9,576,153 (1925). Imports from Gt. Britain (1925), £3,068,152; exports to Gt. Britain, £4,728,572.

MALAYA.

The whole of the Malay Peninsula, from the southern boundary of Siam to the Strait of Singapore, is within the British sphere, the administrative groups being the *Straits Settlements*, the *Federated Malay States*, the *Non-Federated Malay States*, and the Protected *State of Johore*. The total estimated population of BRITISH MALAYA (1922) was 3,437,841 (as compared with 2,672,754 in 1911). Of the 1922 total, 2,110,606 were males and 1,327,235 females, the disparity being principally due to the large number of Chinese male immigrants. The total European population at the Census of 1921 was 14,954. The total trade of British Malaya was valued in 1925 at £117,608,466 for Imports (£15,768,898 from U.K.), and at £150,486,572 for Exports (£20,785,373 to U.K.).

(1) THE STRAITS SETTLEMENTS.

The Settlements forming what is known as the Colony of the Straits Settlements consist of the island of Singapore (with its dependencies), Penang (including Province Wellesley and the Dindings), Malacca, the Cocos or Keeling Islands, Christmas Island, and Labuan. These Settlements have an entire area of about 1,600 square miles, with an estimated population (1926) of 1,025,835.

The Government consists of a Governor, assisted by an Executive Council of 10 members, and a Legislative Council of 13 official and 13 unofficial members, appointed by the Crown. Of the unofficial members 11 are nominated by the Crown and 2 are selected by the Chambers of Commerce at Singapore and Penang. The law of the colony is the common and statute law of England as it was in 1826, qualified by local ordinances. The Supreme Court consists of the Chief Justice and four puisne judges, and constitutes also a court of appeal, from which there is yet another appeal in certain cases, viz., to the Privy Council. The jurisdiction of the Supreme Court includes that of a Colonial Court of Admiralty. There are also in each Settlement district courts with limited civil and criminal jurisdiction, and the usual police magistrates' and coroners' courts.

The climate of the colony is almost uniform throughout the year, and foliage is perennial.

There is railway communication from Singapore, across the Straits of Johore, to Bangkok.

The principal exports are Para rubber, tin, preserved pineapples, tapioca, gambier, copra, pepper, sago, coco-nut oil, tanned hides, raw hides, rattans, coffee, spices, gums and dye-stuffs (cutch, mangrove, bark, &c.). The rubber exports amounted to 210,135 tons in 1924, and 248,138 tons in 1925. The chief imports are dried fish, rice, milk, sugar, cigarettes and tobacco, coal, cotton piece-goods, machinery, ironware, opium, petroleum, sarongs, slendangs and kains.

SINGAPORE is an island situated off the southern extremity of the Malay Peninsula, from which it is separated by a narrow strait about three-quarters of a mile in width; its length is about 27 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 217 square miles, and an estimated population (1926) of 511,441. It was first occupied in 1819, and formally ceded to the British Government by the Sultan of Johore in 1824. The seat of government for all the settlements is the town of Singapore, situated on the south side of the island in lat. 1° 16′ N. and long. 103° 53′ E., with 350,355 inhabitants in 1921. The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year. The railway from Singapore to Bangkok was open for passenger traffic on July 1, 1918.

The number of merchant vessels entered and cleared in 1925, exclusive of native craft, was 14,286, with a tonnage of 24,004,726. The total for the whole colony was 21,287, with a tonnage of 35,032,127. The total native craft entered and cleared at all four ports, Singapore, Penang, Malacca, Labuan, during the same year was 64,913 (tonnage, 2,250,486). The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a port of call for vessels trading between Europe or India and the Far East, the North of Australia, and Netherlands Indies, and is strongly defended. The Tanjong Pagar docks and wharves were taken over by Government in 1905 at a cost (fixed by arbitration) of $29,000,000. The King's Dock (opened in 1913) is the largest east of Suez, being 879 feet long, 100 feet wide, and 34 feet deep; its cost was $3,500,000.

Singapore is a free port; no duties are levied upon anything except opium, tobacco, spirits, wines, beer, and petroleum consumed in the colony. The trade returns aggregate for 1925 (including inter-settlement trade) amounted to $1,948,724,223 (including the value of bullion and specie), the value of exported tin being $72,856,975, and of Para rubber $405,844,282.

Labuan is an island of the Malayan Archipelago, situated about 6 miles off the north-west coast of Borneo, in 5° 16′ N. lat. and 155° 15′ E. long., and forms part of the Settlement of Singapore. Its area is about 28 square miles, and its estimated population is 5,694. It was ceded to Great Britain by the Sultan of Brunei in 1846, being at that time uninhabited. The island has a fine harbour. The exports consist of coal, cloth, rice, sago, earthenware, brassware, &c. Victoria Harbour, in the south-east, is the principal inlet, and affords good anchorage. There is a cable station of the Eastern Extension Telegraph Company on the island. Imports (1924), $3,983,331; exports, $4,417,512.

Resident, R.W. Grant (*acting*).

The Cocos-Keeling Islands are a group of about 20 small islands about 700 miles south-west of Sumatra, and form part of the Settlement of Singapore. The estimated population is 887, and the islands export about 800 tons of copra. There is a station of the Eastern Extension Telegraph Company on Direction Island.

Christmas Island, in the Indian Ocean, 222 miles S. of Java, and 549 miles E. of the Cocos-Keeling Islands, has an area of about 56 square miles and an estimated population of 769. A District Officer is stationed on the island, which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company. The amount exported in 1924 was 125,157 tons.

Penang is the northernmost of the Settlements. It includes Penang or Prince of Wales's Island (est. pop., 1926, 176,126), on the eastern side of which is Georgetown, the port and capital, and the strip of mainland opposite, known as Province Wellesley (est. pop., 1926, 131,930), and the Dindings. Penang Island, about 15 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat. 5° 18′ N., long. 100° 21′ E., and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kédah. Area, 108 square miles. At the time it was founded, Penang was the only British settlement in further India; now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula, its aggregate trade for 1925 (including inter-settlement trade) amounted to $633,147,759; the export of tin from the port being $102,855,979 in 1925. *Province Wellesley* is a strip of coast about 45 miles in length with an area of 288 square miles, ceded by the Raja of Kédah in 1798, with some land S. of the Krian River acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, spices, tapioca, and rubber plantations.

The Dindings Territory (area 183 square miles, est. pop., 1926, 16,360) is at present little developed; but it contains what is considered the best natural port on the western side of the peninsula. The headquarters are at Lumut, where a District Officer is stationed, and steamers call regularly at Pangkor and Lumut. The territory comprises a group of islands (of which Pangkor is the largest); and

a strip of the mainland on the west coast of the peninsula, cut out of the State of Perak, and measuring about 22 miles long by about 10 miles in width.

Malacca, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 110 miles to the N.W. of Singapore, comprises an area of about 720 square miles. It is one of the oldest European settlements in the East, having been taken possession of by the Portuguese in 1511, and held by them till 1640, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1818, when it was restored to the Dutch; it finally became a British possession, in pursuance of the treaty with Holland, March 17, 1824, being exchanged for the British settlements in Sumatra. The estimated population in 1926 was 184,437. Aggregate trade, 1925, $120,669,853 (including Para rubber, $70,769,978, exported).

SINGAPORE, the capital of the Straits Settlements, is distant from London 8,700 miles; transit, 22 days. Penang, 20 days; and Malacca, 23 days.

(2) THE FEDERATED MALAY STATES.

These States are situated on the mainland of the Malay Peninsula, and are closely connected with the Straits Settlements; they consist of the States of Perak, Selângor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government, and are administered under the advice of a Chief Secretary to Government, with Residents in each State, subject to the instructions of the High Commissioner, who is also Governor of the Straits Settlements. The total area of the Federation is 27,648 square miles, with a population in 1921 of 1,324,890. The principal towns are Kuala Lumpur (Sel.), pop. 80,424; Ipoh (Pk.), 36,860; Taiping (Pk.), 21,111; Kampar (Pk.), 12,325; Seremban (N.S.), 17,272; Klang (Sel.), 11,655; and Teluk Anson (Pk.), 10,859.

The first three States are on the west coast, and extend from the border of Province Wellesley to that of the independent State of Johore. Pahang is on the east coast. All are governed by their native rulers under the above-mentioned control.

There are 1,073 miles of railway, practically all of which have been constructed from revenue. This mileage includes the Johore State Railway (120½ miles), which is leased from the Johore Government. The line is of metre gauge throughout, and extends from Singapore (in the South) to Padang Besar (on the Siamese frontier), where it is connected with the Siamese State Railways, affording direct communication with Bangkok. The journey between Singapore and Penang occupies 23 hours, and that between Prai (Penang) and Bangkok 34 hours (compared with a sea journey of 6 days). The railway runs direct between Singapore Island and the mainland, crossing the Straits of Johore by a causeway. At Gemas there is a branch from the main Singapore-Penang line running northwards through Negri Sembilan and Pahang as far as Chigar-Perah. This line will eventually connect with another running South through Kelantan, now under construction. Through communication between F.M.S. and Kelantan *viâ* the Siamese State Railways is in operation. There are 2,537 miles of metalled road, 150 miles of unmetalled roads, and 1,877 miles of bridle-paths, while the principal rivers are navigable for small boats.

One of the regions contributing largely to the raw products of the British Empire is the Malay Peninsula, and the most productive portion of the peninsula is that embraced by the four Federated Malay States. The territory is greatly endowed by having tin and plantation rubber as its two richest products, but the figures given below show that it has other exports of great value.

With the growth of the rubber industry, there has been a tendency to neglect some of the older products of the country, such as indigo, coffee, sugar, and pepper; gold has always been found in small quantities, chiefly in Pahang, and the export in 1925 amounted to 12,496 oz.

Exports from the Federated Malay States:—

	1924. tons.	1925. tons.
Rubber	93,507	107,178
Tin and tin ore	45,043	45,926

Tapioca	4,599	3,434
Areca nuts	1,413	1,473
Gambier	280	226
Wolfram and scheelite	97	158

The climate is very uniform, and may be described as hot and moist. There is no well-marked dry season, and the rainfall in the low country is about 100 inches. The average maximum shade temperature is 89°, and the minimum 72°.

The States are policed by a mixed force of Indians and Malays, officered by Europeans.

(3) THE NON-FEDERATED MALAY STATES.

The Malay States not included in the Federation consist of Johore, Kedah, Perlis, Kelantan, and Trengganu. The relations of Johore with Great Britain are defined in the Treaty of Dec. 11, 1885, as amended by an agreement dated May 12, 1914, whereby the Sultan accepts, and acts upon, the advice of a British officer called the General Adviser. In respect of the other four States, the rights of Suzerainty, protection, administration and control were transferred by Siam to Great Britain by the Anglo-Siamese Treaty of March 10, 1909.

In all these States the trade is almost entirely carried on with the Straits Settlements. Currency, weights and measures are the same. The religion is Muhammadism.

JOHORE, with an area of 7,678 square miles and a population (Census 1921) of 282,234, occupies the southern extremity of the Malay Peninsula. Capital: Johore Bahru, population, 15,312. The rubber estates and tin mines are important.

KEDAH, between 5° 5′ – 6° 35′ N., lies on the west coast of the peninsula, and includes the Langkawi group of islands. The population in 1921 was 338,544, and the approximate area 3,800 sq. miles. Rice is the principal crop in North Kedah, while coco- and betel-nut and rubber are cultivated in South Kedah. The capital is Alor Star, 8 miles inland on the Kedah River, with a population of about 12,000. The powers of the Sultan have, owing to illness, been vested in a Regent, who is assisted by a Council. There are 44 British officials, employed in the Public Works, Survey, Police, and Medical departments.

PERLIS, the most northerly State, is on the west coast of the Malay Peninsula. The area is about 316 sq. miles, and the population is 44,000, of whom 39,000 are Malays. The capital is Kangar, a few miles up the Perlis River, but H.H. the Raja lives at Arau, which is on the main trunk line from Singapore to Bangkok. Rice is the principal crop, and tin ore and rice are the principal exports. The State came under British protection in 1909, and the revenue has since increased from $100,000 to $600,000

KELANTAN lies between 4° 45′ – 6° 25′ N. and 101° 30′ – 102° 40′ E. on the east coast of the peninsula, with a total length of about 120 miles and a breadth of 50 miles. The northern portion is flat and fertile, producing rice, coco-nut and betel-nut and affording pasturage for large quantities of live-stock. Agriculture, fishing, and the production and weaving of silk are the principal industries. The southern and larger portion is mountainous and unproductive. The capital, Kota Bharu, 8 miles from the mouth of the Kelantan River, has a population of 10,833.

MALTA,

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 91¼ square miles. The colony includes also the adjoining island of Gozo, with an area of 24¾ square miles; COMINO—the site of the *Sultan's* disaster in 1889 and now a sanitary station—and several islets. The civil population of the whole group, on Dec. 31, 1921, was 218,510. In religion the Maltese are Roman Catholics. The lower orders are mainly Punic in race. The Maltese dialect, which is generally spoken, is of Semitic origin, and is held by some

to be derived from the Carthaginian and Arabic tongues. The upper classe are mostly descendants of those who sought the protection of the Order of St. John during the Middle Ages, from all parts of Southern Europe. They speak English and Italian. There is a Maltese order of nobility, recognised by the Crown, consisting of 29 families.
